Preface

Published four times each year, the S&P Stock Market Encyclopedia includes a broad array of large, actively traded stocks representing a cross-section of U.S. industry. Material has been grouped within specialized segments of investor interest:

Market Benchmarks & Comments on the S&P 500 Index iii
Chart: S&P 500-Stock Index and Price/Earnings Ratios & Table: P/E Ratio & Yield of the S&P 500 iv
Glossary ..... xiii, xiv, xv

GROWTH SELECTIONS:
Selection of stocks with five straight years of rising profits v
Rapid growth stocks vii
Stocks with high rankings viii

CONTRARIAN SECTIONS:
Stocks with low price/earnings ratios & high yields ix
Selection of stocks with low price/earnings ratios x

INCOME SELECTIONS:
Top Encyclopedia companies ranked by dividend yield xii
Fast-rising dividends xi
Stocks with higher dividends for ten straight years xviii

STATISTICAL:
Low-priced stocks with low P/Es and high rankings vi
Stock group performances—fourth quarter 1989 xvi
NYSE winners & losers—fourth quarter 1989 xvii

Note: All computer-generated selections were run against the 750-company Encyclopedia database.

For every company in the Encyclopedia, we include relevant data on its earnings, dividends, and price history, and key income account and balance sheet statistics. We consider this essential background for making a decision whether to buy, sell, or hold any stock. A chart tracing the market action for each stock over the past seven years provides an additional dimension.

While all material in this book was current when we went to press, new developments will inevitably occur over time. Before you make your buy or sell decisions, therefore, we suggest several supplementary sources of updated information: Standard & Poor's weekly investment advisory publication, THE OUTLOOK, and the monthly STOCK GUIDE—either of which would make an ideal companion for this book, as does the monthly Stock Summary. Orders for any S&P publication may be directed to Sales Support: Telephone (212) 208-8786 or 8787.

Information has been obtained by Standard & Poor's Corporation from sources believed to be reliable. However, because of the possibility of human or mechanical error by our sources, Stock Market Encyclopedia or others, Stock Market Encyclopedia does not guarantee the accuracy, adequacy or completeness of any information and is not responsible for any errors or omissions or for the results obtained from use of such information. Stock Market Encyclopedia is a publication of Standard & Poor's Equity Research Department. This Department operates independently of, and has no access to information obtained by, S&P's Corporate Bond Rating Department, which may in its regular operations obtain information of a confidential nature. Officers of Standard & Poor's Corporation: Harold W. McGraw, III, President, Chief Executive Officer and Chairman; Kurt D. Steele, Senior Vice President, General Counsel and Secretary; Frank Penglase, [illegible]

The S&P 500: What It Is, How To Use It

Standard & Poor's 500 composite stock-price index and the stock market have become one and the same in the minds of sophisticated investors. Portraying the pattern of common stock price movement, the S&P 500 is used by money managers who run mutual funds, pension funds and the like as a benchmark against which to measure their performance. The pros all strive to outpace the S&P 500 in a given period.

The index is also one of the U.S. Commerce Department's 12 leading economic business indicators. It is, moreover, used as the basis for an estimated $150 billion in index funds, which seek to replicate the S&P 500. Because of the vast sums tied to the "500" via indexing, many "derivative" financial instruments have been created that use the index as their basis, such as futures contracts and options.

Index's Composition

The broad-based "500" index, which traces its history back to 1923, tracks 500 stocks traded on the New York Stock Exchange, the American Stock Exchange and the over-the-counter market. The index is comprised of industrial companies, utilities, financial institutions and transportation firms. The 500 issues represent roughly two-thirds of the total U.S. equity market capitalization with slightly less than 10% of the stock population represented (approximately 5,500 stocks are actively traded).

Until 1988, the S&P 500 contained a fixed number of stocks in four broad categories—industrial, utilities, financial and transportations. Although the index is still comprised of 500 stocks, the number of issues in each of the four sectors varies from time to time. Previously, when a company was removed from the index, it was replaced by another company from the same category. Now, if a company is dropped in one sector, it may be replaced by one in an entirely different category. This results in greater flexibility.

It is important to note that the S&P 500 does not contain the 500 largest stocks. While many of the issues are the largest or among the largest listed on their respective exchanges, the "500" includes many relatively small companies. This is so since the index is constructed by industry groups. Using this "bottom up" approach, S&P identifies important industry categories and then allocates a representative sample of stocks to the group. There are more than 100 industry groups; thus, investors can focus on the often disparate performances of the diverse segments of the markets.

Another key feature of the index is that it is market-value weighted rather than price-weighted. This means that each stock influences the index in proportion to its

*Based on daily closing indexes. †Based on estimated 1990 earnings.

importance in the market. The Dow Jones Industrial Average, on the other hand, is not an index but rather an arithmetic average of the price of 30 stocks. Higher-priced issues, as a result, tend to carry more weight in the DJIA than do lower-priced ones.

Using The "500" As An Investment Tool

Investors can compare the current price-earnings ratio (P/E) of the S&P 500 with P/Es of the past to help determine if the market in general is overpriced and due for a correction or is undervalued. As shown in the table on page iv, the P/E of the "500" at the end of 1989 stood at 12.5, which was 40% lower than the P/E of 21 just prior to the market crash in October 1987.

P/Es for the S&P group indexes may also be used this way to determine if stocks in a particular industry are fairly valued, undervalued or overvalued. One can compare the P/E of an issue to other stocks in the industry, as well as to the S&P 500. Historical data for both the "500" and the individual group indexes may be obtained in S&P's *Analyst's Handbook.*

The yield on the "500" can be used as a gauge by income investors, as well as by other investors, as a valuation measure. In recent decades, a yield of 5% or more on the S&P 500 represented good value, while a return of 3% or less has usually signaled an overextended market. The yield on the S&P 500 at the end of 1989 stood at 3.3%, compared with 2.6% prior to the October 1987 market break.

The total return on the S&P 500 index is another useful investment tool. Taking into account both price changes and dividends, the total return is the best way of measuring stock market performance. The figure for different periods may be found in Standard & Poor's weekly investment advisory publication, *The Outlook.*

For the Record

The S&P 500 set a record high of 359.80 on October 9, 1989, then plunged 7% on October 13, which was reminiscent of the action on October 19, 1987 when the "500" plummeted 20%. For all of 1989, however, the index turned in one of its best performances, with a gain of 27%. The total return of the S&P 500 was even better; dividends plus appreciation totaled more than 31%.

†P/E Ratio and Yield of S&P 500

Companies With Five Straight Years of Rising Profit Margins

The following table, compiled from a computer screen of the 750 stocks in this handbook, shows 26 industrial companies that have recorded both rising per-share profits and improved profit margins for five consecutive years. Rising margins indicate that a business is operating more efficiently and is squeezing more earnings out of each additional dollar of revenue.

Company	5-Year Earn. Per-Share Growth Rate	After-Tax Profit Margins (%)					Price 1/03/90	E1989 Earn.	†P/E

†Based on estimated 1989 earnings. E—Estimated.

Low Prices, Low P/Es, High Rankings

The screen below shows companies in the Encyclopedia with market prices of 30 or below, P/Es no higher than 12.4 based on trailing 12-month earnings, and Standard & Poor's earnings and dividend rankings of A– or better. Low-priced issues have special attraction for smaller investors, but are usually more volatile than higher-priced stocks. Selecting issues with relatively low P/Es and high rankings may reduce some of the risk associated with low-priced stocks. At the end of 1989, the P/E of the S&P 500 was 14.9 (based on trailing 12-months actual earnings).

Rapid Growth Stocks

Of the 750 issues of companies in this Encyclopedia, the 46 stocks listed below have shown strong and consistent earnings growth. Those companies with erratic profit patterns or with recent adverse trends were eliminated, despite good overall performance. Issues of rapidly growing companies tend to carry high price earnings ratios. They offer potential for substantial appreciation, but also are subject to strong selling pressures should growth in earnings slow.

Company	5-Year Earn. Per-Share Growth Rate	Latest 12-Month Per-Share Earn.	Price 1/03/90	†P/E Ratio

Stocks with Relatively Low P/Es, High Yields

The issues listed below have been screened for P/Es that are below 10 and yields that are 4% or higher. By contrast, the yield and P/E of the S&P 500 at the end of 1989 (based on 1990 earnings) stood at 3.3% and 12.4, respectively.

Company	Price 1/3/90	†P/E	Indicated Dividend Rate	Yield

Low Price/Earnings Ratios

Using the 750 companies in the Encyclopedia as a base, the issues listed here carry price-earnings ratios that are below 8 vs. the 14.9 P/E of the S&P 500 at the end of 1989 (based on trailing 12-months actual earnings). Studies have shown that low P/E stocks generally do better over the long run than those issues with more generous multiples. Stocks should not, however, be purchased on the sole basis of a low P/E. Often, a low P/E indicates poor earnings prospects or an irregular historical profit pattern. Also, stocks of cyclical companies and utilities are two groups that consistently sell at low P/Es. The list below can nevertheless be a starting point in the investment selection process.

Company	†P/E	Company	†P/E	Company	†P/E	Company	†P/E

Top Encyclopedia Companies Ranked By Yield†

The stocks below are ranked solely on the basis of yield. We have eliminated from the computer screen stocks of companies whose yields were far above average, since this indicates the prices may be depressed as a result of poor fundamentals and that a dividend cut or omission could be forthcoming. The highest yield in the table is 10.8% and the lowest is 6%.

Company	Yield 1/3/90
Lone Star Inds.	10.8%

Per Share Data ($) Table

Tangible Book Value; Book Value (See also: "Common Equity" under Industrials)—Indicates the theoretical dollar amount per common share one might expect to receive from a company's tangible "book" assets should liquidation take place. Generally, book value is determined by adding the stated value of the common stock, paid-in capital and retained earnings and then subtracting intangible assets (excess cost over equity of acquired companies, goodwill and patents), preferred stock at liquidating value and unamortized debt discount. Divide that amount by the outstanding shares to get book value per common share.

Earnings—The amount a company reports as having been earned for the year on its common stock based on generally accepted accounting standards. Earnings may be indicated in terms of *primary* (common stock and common stock equivalents such as stock options and warrants) and *fully diluted* (reflecting dilution in earnings resulting if all contingent issuances of common stock materialized at the outset of the year), and are generally reported from continuing operations, before extraordinary items. INSURANCE companies report *operating earnings* before gains/losses on security transactions and *earnings* after such transactions.

Dividends—Generally total cash payments per share based on the ex-dividend dates over a twelve months period. May also be reported on a declared basis where this has been established to be a company's payout policy.

Payout Ratio—Indicates the percentage of earnings paid out in dividends. It is calculated by dividing the annual dividend by the earnings. For INSURANCE companies *earnings* after gains/losses on security transactions are used.

Prices High/Low—Shows the calendar year high and low of a stock's market price.

P/E Ratio High/Low—The ratio of market price to earnings—essentially indicates the valuation investors place on a company's earnings. Obtained by dividing the annual earnings into the high and low market price for the year. For INSURANCE companies *operating earnings* before gains/losses on security transactions are used.

Net Asset Value—Appears on investment company reports and reflects the market value of stocks, bonds and net cash divided by outstanding shares. The % DIFFERENCE indicates the percentage premium or discount of the market price over the net asset value. Take price minus net asset value and divide the difference by the net asset value expressed as a percentage.

Portfolio Turnover—Appears on investment company reports and indicates percentage of total security purchases and sales for the year to overall investment assets. Primarily mirrors trading aggressiveness.

Income/Balance Sheet Data Tables

BANKS

Net Interest Income—Interest and dividend income, minus interest expense.

Loan Loss Provision—Amount charged to operating expenses to provide an adequate reserve to cover anticipated losses in the loan portfolio.

Taxable Equivalent Adjustment—Increase to render income from tax-exempt loans and securities comparable to fully taxed income.

Non-interest Income—Service fees, trading and other income, excluding gains/losses on securities transactions.

% Expenses/Op. Revenues—Noninterest expense as a percentage of taxable equivalent net interest income plus noninterest income (before securities gains/losses). A measure of cost control.

Commercial Loans—Commercial, industrial, financial, agricultural loans and leases, gross.

Other Loans—Gross consumer, real estate and foreign loans.

% Loan Loss Reserve—Contra-account to loan assets, built through provisions for loan losses, which serves as a cushion for possible future loan charge-offs.

% Loans/Deposits—Proportion of loans funded by deposits. A measure of liquidity and an indication of bank's ability to write more loans.

Earning Assets—Assets on which interest is earned.

Money Market Assets—Interest-bearing interbank deposits, federal funds sold, trading account securities.

Investment Securities—Federal, state and local government bonds and other securities.

Gains/Losses on Securities Transactions—Realized losses on sales of securities, usually bonds.

Net Before Taxes—Amount remaining after operating expenses are deducted from income, including gains or losses on security transactions.

Effective Tax Rate—Actual income tax expense divided by net before taxes.

Glossary

Net Income—The final profit before dividends (common/preferred) from all sources after deduction of expenses, taxes, and fixed charges, but before any discontinued operations or extraordinary items.

Net Interest Margin—A percentage computed by dividing net interest income, on a taxable equivalent basis, by average earning assets. Used as an analytical tool to measure profit margins from providing credit services.

% Return on Revenues—Net income divided by gross revenues.

% Return on Assets—Net income divided by average total assets. An analytical measure of asset-use efficiency and industry comparison.

% Return on Equity—Net income (minus preferred dividend requirements) divided by average common equity. Generally used to measure performance.

Total Assets—Includes interest earning financial instruments—principally commercial, real estate, consumer loans and leases; investment securities/trading accounts; cash/money market investments; other owned assets.

Cash—Mainly vault cash, interest bearing deposits placed with banks, reserves required by the Federal Reserve and items in the process of collection—generally referred to as float.

Government Securities—Includes United States Treasury securities and securities of other U.S. government agencies at book or carrying value. A bank's major "liquid asset."

State & Municipal Securities—State & municipal securities owned at book value.

Loans—All domestic and foreign loans (excluding leases), less unearned discount and reserve for possible losses. Generally considered a bank's principal asset.

Deposits—Primarily classified as either *demand* (payable at any time upon demand of depositor) or *time* (not payable within thirty days).

Deposits/Capital Funds—Average deposits divided by average capital funds. Capital funds include capital notes/debentures, other long-term debt, capital stock, surplus and undivided profits. May be used as a "leverage" measure.

Long Term Debt—Total borrowings for terms beyond one year including notes payable, mortgages, debentures, term loans and capitalized lease obligations.

Common Equity—Includes common/capital surplus, undivided profits, reserve for contingencies and other capital reserves.

% Equity to Assets—Average common equity divided by average total assets. Used as a measure of capital adequacy.

% Equity to Loans—Average common equity divided by average loans. Reflects the degree of equity coverage to loans outstanding.

INDUSTRIAL COMPANIES

Following data is based on Form 10K Annual Report data as filed with SEC.

Revenues—Net sales and other operating revenues. Includes franchise/leased department income for retailers, and royalties for publishers and oil and mining companies. Excludes excise taxes for tobacco, liquor and oil companies.

Operating Income—Net sales and operating revenues less cost of goods sold and operating expenses (including research & development, profit sharing, exploration and bad debt, but excluding depreciation and amortization).

% Operating Income of Revenues—Net sales and operating revenues divided into operating income. Used as a measure of operating profitability.

Capital Expenditures—The sum of additions at cost to property, plant & equipment and leaseholds, generally excluding amounts arising from acquisitions.

Depreciation—Includes non-cash charges for obsolescence, wear on property, current portion of capitalized expenses (intangibles) and depletion charges.

Interest Expense—Includes all interest expense on short/long-term debt, amortization of debt discount/premium and deferred expenses (e.g. financing costs).

Net Before Taxes—Includes operating and non-operating revenues (including extraordinary items not net of taxes), less all operating and non-operating expenses, except income taxes and minority interest, but including equity in non-consolidated subsidiaries.

Effective Tax Rate—Actual income tax charges divided by net before taxes.

Net Income—Profits derived from all sources after deduction of expenses, taxes, and fixed charges, but before any discontinued operations, extraordinary items and dividends (preferred/common).

% Net Income of Revenues—Net income divided by sales/operating revenues.

Cash—Includes all cash and government and other marketable securities.

Glossary

Current Assets—Those assets expected to be realized in cash or used up in the production of revenue within one year.

Current Liabilities—Generally includes all debts/obligations falling due within one year.

Current Ratio—Current assets divided by current liabilities. A measure of liquidity.

Total Assets—Current assets plus net plant and other non-current assets (intangibles & deferred items).

% Return on Assets—Net income divided by average total assets on a per common share basis. Used in industry analysis and as a measure of asset-use efficiency

Long Term Debt—Debts/obligations due after one year. Includes bonds, notes payable, mortgages, lease obligations and industrial revenue bonds. Other Long Term Debt, when reported as a separate account, is excluded. This account generally includes pension and retirement benefits.

Common Equity (See also: "Book Value" under Per Share Data Table)—Common stock plus capital surplus and retained earnings, less any difference between the carrying value and liquidating value of preferred stock.

Total Invested Capital—The sum of stockholders' equity plus long-term debt, capital lease obligations, deferred income taxes, investment credits and minority interest.

% Long Term Debt of Invested Capital—Long-term debt divided by total invested capital. Indicates how highly "leveraged" a business might be.

% Return on Equity—Net income less preferred dividend requirements divided by average common shareholders' equity on a per common share basis. Generally used to measure performance and industry comparisons.

UTILITIES

Operating Revenues—Represents the amount billed to customers by the utility.

Depreciation—Amounts charged to income to compensate for the decline in useful value of plant and equipment.

Maintenance—Amounts spent to keep plants in good operating condition.

Operating Ratio—Ratio of operating costs to operating revenues or the proportion of revenues absorbed by expenses. Obtained by dividing operating expenses including depreciation, maintenance and taxes by revenues.

Fixed Charges Coverage—The number of times income before interest charges (operating income plus other income) after taxes covers total interest charges and preferred dividend requirements.

Construction Credits—Credits for interest charged to the cost of constructing new plant. A combination of allowance for equity funds used during construction and allowance for borrowed funds used during construction—credit.

Effective Tax Rate—Actual income tax expense divided by the total of net income and actual income tax expense.

Net Income—Amount of earnings for the year which is available for preferred and common dividend payments.

% Return on Revenues—Obtained by dividing net income for the year by revenues.

% Return on Invested Capital—Percentage obtained by dividing income available for fixed charges by average total invested capital.

% Return on Common Equity—Percentage obtained by dividing income available for common stock (net income less preferred dividend requirements) by average common equity.

Gross Property—Includes utility plant at cost, plant work in progress and nuclear fuel.

Capital Expenditures—Represents the amounts spent on capital improvements to plant and funds for construction programs.

Net Property—Includes items in gross property less provision for depreciation.

% Earned on Net Property—Percentage obtained by dividing operating income by average net property for the year. A measure of plant efficiency.

Total Invested Capital—Sum of total capitalization (common-preferred-debt), accumulated deferred income taxes, accumulated investment tax credits, minority interest, contingency reserves and contributions in aid of construction.

Total Capitalization—Combined sum of total common equity, preferred stock and long-term debt.

Long Term Debt—Debt obligations due beyond one year from balance sheet date.

Capitalization Ratios—Reflect the percentage of each type of debt/equity issues outstanding to total capitalization. % DEBT is obtained by dividing total debt by the sum of debt, preferred, common, paid-in capital and retained earnings. % PREFERRED is obtained by dividing the preferred stocks outstanding by total capitalization. % COMMON, divide the sum of common stocks, paid-in capital and retained earnings by total capitalization.

NYSE Winners & Losers—Fourth Quarter 1989

Stocks of companies in oil and gas drilling, gold mining and household products were among the strongest performers during the fourth quarter of 1989 (see listing of 90 groups on preceding page).

Among the weakest groups were homebuilding and airlines.

The ten largest winners and losers among NYSE-listed stocks were:

Largest Gains % Change		Largest Losses % Change	
+217	Service Resources	−92	Integrated Resources
+ 81	Global Marine	−86	Bay Financial
+ 62	Western North American	−73	Imperial American
+ 61	Tyler Corp.	−71	Emerald Homes
+ 60	Keystone Consolidated	−71	Mercury Savings & Loan
+ 50	Cycare Systems	−68	American Medical Int'l.

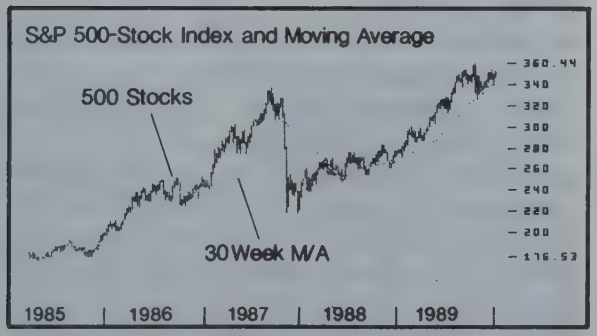
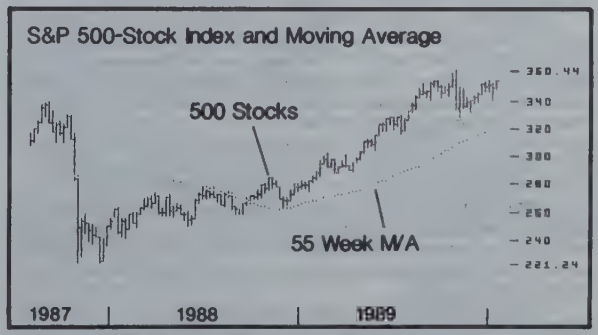
+ 48	Germany Fund	−67	Columbia Savings & Loan
+ 48	Dallas Corp.	−63	Home Owners Savings
+ 47	Great Northern Nekoosa	−63	Crossland Savings





Higher Dividends for Ten Years

Screened from the 750 companies in the Encyclopedia, the companies listed below paid higher dividends in each of the past ten calendar years. To be able to hike dividends under the difficult economic conditions that were experienced at times over the past ten years indicates finances and capable management. Each of the stocks also yields at least 3.4%, which compares with the S&P 500's 3.3% yield at the start of December 1989.

Allegheny Power	7.7%	Contel Corp.	3.4%	K mart	4.4%	Security Pacific	5.7%

S&P's Common Stock Ranking System

In the process of evaluating and comparing the earnings and dividend histories of companies, Standard & Poor's proprietary Common Stock Ranking System can be a valuable investment tool (Standard & Poor's earnings and dividend ranking appears on the top line of every stock report in this Handbook.)

The S&P Ranking System is a computerized scoring system that measures the historical growth and stability of earnings and dividends of the most recent ten years. This period is considered long enough to measure significant time segments of secular growth, to capture indications of basic changes in trends as they develop, and to encompass the full peak-to-peak range of the business cycle. The ranking system also makes allowances for company size, since large companies have certain inherent advantages over smaller ones.

After a final score is computed, it is reviewed and in some instances modified, because no computerized system can evaluate the numerous special considerations and developments that could have an impact on the company's earnings and dividend record.

Companies with high growth and stability in earnings and dividends rank higher than companies whose earnings and dividends grow slowly, erratically, or not at all. The system has seven grades: A+, A and A− are above average; B+ is average; B, B− and C are below average. An NR designation (no ranking) is given to common stocks with insufficient historical data or because the company is not amenable to the ranking process because of one or more reasons. As a matter of policy, S&P does not rank foreign companies, investment companies and real estate investment trusts. The grade of D signifies a company in reorganization, while Liq. denotes a company in liquidation.

Because S&P believes that no single scoring system can cover all facets of the investment merit of a particular stock, the Ranking System does not consider a company's balance sheet, the financial resources at its disposal, profit margins or changes in management. So as not to be biased by future expectations, the rankings are based on past events only and do not use earnings and dividend estimates.

Some companies may have below-average rankings or no ranking because of reasons not related to the investment merits of the stock: absence of cash dividends can hold a score down; a company in a developmental stage with no established record may be unranked. A company may be a desirable investment and still have a low ranking, or no ranking. The rankings do not take into consideration the price of a stock; the stock of an above-average ranked company can at times be overpriced, while a low-ranked stock's price can be undervalued.

An S&P ranking is not a recommendation to buy or sell the stock of any company. S&P common stock rankings also should not be confused with debt quality ratings.

AMP Inc.

NYSE Symbol AMP Options on CBOE (Feb-May-Aug-Nov) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Sep. 5'89	1989					
46¼	49⅜-40¼	17	1.20	2.6%	A	1.39

Summary

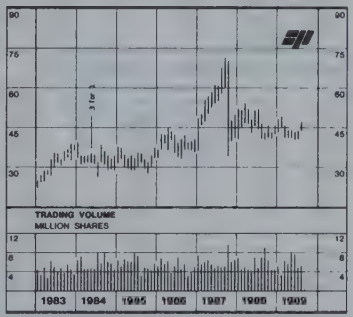
The world's largest producer of electronic and electrical connection devices, AMP in 1988 derived over half of its revenues and operating income from foreign operations. Following strong earnings progress in 1988, a decline is likely in 1989 due to pressure on margins and a nonrecurring charge. An increase in earnings is projected in 1990 due largely to reduced pricing pressures, lower costs and the absence of nonrecurring charges.

Current Outlook

Earnings for 1990 should approximate $3.10 a share, up from the $2.80 projected for 1989.

A modest increase in the $0.30 quarterly dividend is likely in 1990.

Revenues for 1990 are anticipated to increase about 5%, assuming some economic growth and reduced pressure on prices. The gain will likely be restrained by a stronger dollar and sluggish growth in the electronics industry, especially in the computer industry. Operating margins are likely to widen due to firmer prices, recent cost reductions and lower costs. The absence of a nonrecurring charge should further extend the improvement in profitability. Long-term prospects should be aided by the relatively rapid growth projected for the electronics industry, as well as AMP's strong management and finances.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	713	654	526	453
Jun.	723	687	585	492
Sep.	---	633	573	481
Dec.	---	695	633	506
	---	2,670	2,318	1,933

Sales for the six months ended June 30, 1989, year to year, despite the stronger dollar. Due to pressure on domestic profit margins due to modest growth, pricing pressures and rising wage costs, as well as a $20 million ($0.11 a share) charge for early retirement and restructuring, margins narrowed. Pretax income declined 14%. After taxes at 38.9%, versus 40.4%, net income was 11% lower. Share earnings were $1.34, compared with $1.50.

Common Share Earnings ($)

Sep.	E0.65	0.67	0.58	0.39
Dec.	E0.81	0.79	0.65	0.43
	E2.80	2.96	2.31	1.52

Important Developments

Sep. '89— AMP said that even after adjusting for the usual seasonal slowdown, domestic orders were somewhat lower than in the first half due to sluggish orders from the computer and durable goods industries and a stretchout of military orders. However, it added that international orders were strong in local currencies.

Next earnings report expected in late October.

Business Summary

AMP Inc. is the world's leading producer of electrical and electronic connection devices.

Over 100,000 types and sizes of terminals, splices, connectors, cable assemblies, switches, touch screen data entry systems and related application tooling (including 55,000 machines and a multitude of tools) are supplied to more than 50,000 electrical and electronic manufacturers, as well as to customers who install and maintain that equipment.

Over two-thirds of sales are of products provided in strip form on reels and applied by customers with special machines provided by the company. Another 10%-15% of sales are of products provided in single-piece form and applied by customers with special AMP tools. The balance of sales is of pre-assembled devices which do not require application tools or machines.

Foreign operations accounted for 52% of sales and 58% of operating income in 1988.

Research, development and engineering expenditures totaled $238 million (8.9% of sales) in 1988, versus $204 million (8.8%) in 1987.

Dividend Data

Dividends have been paid since 1951. A dividend reinvestment plan is available.

Amt. of Divd. $	Date Decl.	Ex-divd. Date	Stock of Record	Payment Date
0.25	Oct. 26	Nov. 1	Nov. 7	Dec. 1'88
0.30	Jan. 25	Jan. 31	Feb. 6	Mar. 1'89
0.30	Apr. 26	May 2	May 8	Jun. 1'89
0.30	Jul. 26	Aug. 1	Aug. 7	Sep. 1'89

Next dividend meeting: late Oct. '89.

Finances

Upon releasing second quarter 1989 earnings, the company said that capital spending was expected to exceed $250 million in 1989, up from the $220 million of 1988. The increase, which is larger than originally budgeted, reflects higher spending in Europe and the Far East for new facilities and equipment.

Jan. 10'90	1989-90					
56⅛	107½-52⅛	7	None	None	B-	1.32

Summary

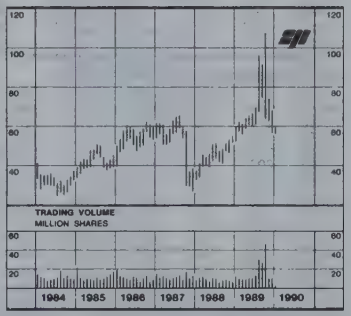
This holding company's principal subsidiary, American Airlines, is undertaking a major expansion of its fleet to support substantial route growth in the next few years. New hubs have been established in the Southeast, the Caribbean and the West and international routes are being expanded, including the proposed purchase of Eastern Air Lines' Latin American routes. Weakening fare levels and higher costs could result in a decline in earnings in 1990.

Current Outlook

Earnings for 1990 are estimated at $5.50 a share, down from the $6.80 expected for 1989.

Early resumption of dividends is not likely.

Revenues for 1990 could be up close to 10%. Traffic in the first half should reflect some softening in the economy, and fare yield is likely to decline in the early months as the result of aggressive fare discounting in some markets. Also, unit costs should rise, reflecting the current sharp increase in fuel costs. Improvement in yield and cost conditions should lead to a turnaround in earnings during the second half. Completion of acquisition of Eastern's Latin American routes could produce some initial earnings dilution.



Revenues (Million $)

Quarter:	1990	1989	1988	1987
Mar.	---	2,451	1,965	1,509
Jun.	---	2,716	2,163	1,831
Sep.	---	2,727	2,328	1,975
Dec.	---	---	2,368	1,882
	---	---	8,824	7,198

Revenues for the first nine months of 1989 increased 22.3%, year to year. Operating costs rose 23.8%. With nonoperating income larger, pretax income advanced 15.8%. After taxes, net income was up 15.5%, to $6.59 a share from $5.99.

Dec.	E1.20	E0.21	1.93	d0.05
	E5.50	E6.80	7.92	3.28

Important Developments

Dec. '89— AMR reached an agreement to purchase the South and Central American routes of Eastern Airlines, together with Eastern's Miami-Toronto and Miami-Madrid routes and Continental Airlines' Miami-London route for $471 million. It also agreed to acquire TWA's Chicago-London route for $195 million. Both transactions require approval by the Departments of Justice and Transportation.

Oct. '89— Donald Trump withdrew an offer to purchase all of AMR common shares for $120 a share in cash, a total of $7.5 billion.

Jun. '89— The agreement to merge AMR's Sabre and Delta's Datas II computer reservations systems was abandoned because of anti-trust reservations by the Department of Justice.

Next earnings report expected in late January.

Business Summary

AMR Corp. is the parent company (formed in 1982) of American Airlines, one of the largest U.S. airlines. In early 1989 American served 151 airports in 42 states, Washington, D.C., Bermuda, Canada, the Caribbean, Great Britain, France, Spain, Switzerland, West Germany, Mexico, Puerto Rico, Japan and Venezuela. The breakdown of 1988 passenger revenues was: U.S./Canadian 88.3%, Caribbean/Mexican 4.5%, European 6.3% and Pacific 0.9%. The airline's principal domestic hubs are at Dallas/Ft. Worth, Chicago, Nashville, San Juan, Raleigh/Durham and San Jose. AirCal was acquired in early 1987.

AMR operates Sabre, the largest computer reservations and travel data processing system. Other subsidiaries include AMR Services Corp., AA Direct Marketing, AMR Information Services, AMR Leasing, AMR Investment Services and AMR Eagle (commuter airlines).

On December 31, 1988 the active fleet consisted of 13 A300-600Rs, 125 B-727-200s, 39 B-727-100s, 30 B-767-200s, 15 767-300s, 153 MD-80s, 61 DC-10s, 2 747SPs, 24 737s, 6 BAe-146s and 128 commuter aircraft. On order as of March 1989 were 10 B-767 ERs, 75 757s, 77 MD-80s, 8 MD-11s, 75 F-100s and 12 A300-600s for delivery through 1994.

Dividend Data

The most recent payment on the common was $0.10 on February 15, 1980. A "poison pill" stock purchase right was adopted in 1986.

Finances

In February, 1987 the company sold $100 million of 9% debentures and $100 million of 8⅝% debentures. In May, 1987 it sold $150 million of perpetual preferred auction rate stock in three series of $50 million each. The dividend rate is determined every seven weeks through a Dutch auction process.

Capitalization

Long Term Debt: $2,459,700,000, incl. $1.49 billion of capital lease obligations.

Perpetual Preferred Stock: $150,000,000.

Common Stock: 62,237,137 shs. ($1 par). Institutions hold approximately 75%. Shareholders of record: 20,800.

Warrants: To purchase 109,375 shs. at $40.

Summary

This publicly traded (closed-end) investment company invests over 50% of its assets in common shares (or securities convertible into common) of South African gold mining companies, and most of the remainder in other South African companies. Social unrest in South Africa has had an adverse effect on the market for all South African shares, and fluctuating exchange rates are reflected in changes in the net asset value (in U.S. dollars) of ASA shares.

Business Summary

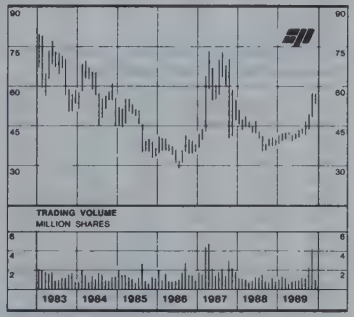
ASA Limited is a publicly traded investment company with a policy of investing over 50% of assets in common shares of gold mining and related companies in South Africa, and the balance in other South African companies. Subject to government approval, up to 20% of assets may be invested in mining or real estate outside South Africa. The company may hold up to 25% of its assets in gold or gold certificates.

Net assets were distributed as follows at August 31, 1989 and November 30, 1988:

	8/89	11/88
Gold mining cos.	76.6%	82.3%
Other cos.	19.5%	15.0%
Net cash & other assets	3.9%	2.7%

The 12 largest gold mining company holdings at August 31, 1989 were Driefontein Consolidated Ltd. (18.0% of net assets), Vaal Reefs Exploration and Mining Co. Ltd. (15.3%), Kloof Gold Mining Co. Ltd. (12.1%), Southvaal Holdings Ltd. (11.1%), Winkelhaak Mines Ltd. (6.7%), Hartebeestfontein Gold Mining Co. Ltd. (4.6%), Zandpan Gold Mining Co. Ltd. (3.0%), Western Deep Levels Ltd. (2.5%), Kinross Mines Ltd. (1.4%), American Barrick Resources Corp. (0.5%), Hemlo Gold Mines Inc. (0.4%) and Beatrix Mines Ltd. (0.4%). ASA's gold mining investments in South Africa are confined to relatively low cost producers with extensive remaining lives.

ASA also held stock of coal, diamond and platinum mining companies, including De Beers Consolidated Mines Ltd. (4.5%), Anglo American Coal Corp. Ltd. (2.7%), Gold Fields of South Africa Ltd. (2.7%), Rustenburg Platinum Holdings Ltd. (2.4%), Anglo American Corp. of South Africa Ltd. (2.0%), Rand Mines Ltd. (1.6%) and Sasol Ltd. (1.6%).



In September, 1985 South Africa reinstituted the dual-rand system of commercial rand (the "official" exchange rate) and financial rand, which it had abolished in February, 1983. In its financial statements ASA translates rands into U.S. dollars at the commercial rand exchange rate at which it is entitled to obtain U.S. dollars. The financial rand can be used for investment in securities listed on the Johannesburg Stock Exchange. If computed at the financial rand exchange rate, net asset value at August 31, 1989 would have been $36.54 per share, a discount of 34.7% from the commercial rand computation of $55.93.

Important Developments

Sep. '89— The company said that it had substantially completed its program to eliminate shares of less promising companies and increasingly concentrate its investments in stronger holdings.

Next report expected in February.

AVX Corp.

15X

NYSE Symbol AVX

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Oct. 19'89	1989					
29¼	30¼-16¼	13	[3]---	[3]---	B	1.61

Summary

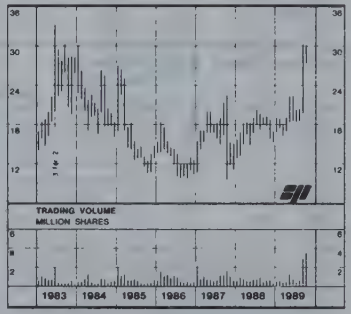
AVX, a leading manufacturer of capacitors, and Kyocera Corp., a Japanese company, announced on September 28, 1989 that they had signed a definitive merger agreement. Terms call for each outstanding share of AVX to be exchanged for 0.39 Kyocera American Depositary Share (ADS), subject to upward adjustment. The transaction is subject to approval of a majority of AVX shareholders at the special meeting expected to be held in late December, and various U.S. and Japanese regulatory approvals, and other conditions.

Current Outlook

Earnings for 1990 (for the company as a separate entity) should approximate $2.35 a share, up from the $2.20 projected for 1989.

The current $0.06 quarterly dividend is likely to be maintained.

Sales for 1990 are expected to rise 10%. The gain will likely be restrained by minimal growth in the semiconductor industry, in which capacitors are used. Margins should be well maintained.



Net Sales (Million $)

13 Weeks:	1989	1988	1987	1986
Mar.	102.5	105.3	60.1	46.6
Jun.	111.1	110.5	61.6	51.0
Sep.	---	101.6	70.4	47.2
Dec	---	91.6	79.8	50.5
	---	408.9	271.9	195.4

Sales for the 26 weeks ended July 1, 1989 were off 1.0%, year to year, reflecting an industry slowdown. Despite a slight improvement in the gross profit margin, higher selling, general and administrative expenses caused margins to narrow, and operating income declined 1.9%. Following a 46% decrease in other expenses, pretax income advanced 13%. After taxes at 40.0%, versus 40.1%, net income rose 14%, to $1.08 a share from $0.96.

Merger Agreement

Sep. '89— AVX and Kyocera Corp., a Japanese company, signed a definitive merger agreement under which each share of AVX will be exchanged for 0.39 Kyocera American Depository Share (ADS), subject to an upward adjustment. The ADSs, each of which represents two shares of Kyocera common stock, closed at $82 on the New York Stock Exchange on September 26, 1989. The transaction is subject to approval by a majority of AVX shareholders at a meeting planned for December and various governmental approvals and other conditions. Kyocera (see Standard NYSE Stock Report No. 1315M) is a global manufacturer of technical ceramics for electronics industries whose sales exceeded $2.5 billion for its fiscal year ended March 31, 1989.

Next earnings report expected in late October.

Business Summary

AVX Corp. is a leading manufacturer of multilayer ceramic, tantalum and glass capacitors, as well as other passive electronic components.

Contributions to revenues by market in 1988 were: data processing 30%, military and aerospace 25%, telecommunications 20%, automotive/consumer electronics 13% and instrumentation and process control 12%.

Capacitors are basic electrical components used to store electrical energy in order to release predetermined amounts of power in a short period of time. They are also used to filter or smooth out small voltage variations and to retard signals of low frequencies while permitting signals of higher frequencies to pass.

Multilayer ceramic capacitors and tantalum capacitors are used with integrated circuits. Unit prices generally range from $0.02 to $1.00.

Foreign sales accounted for 43% of revenues and 25% of operating income in 1988.

Finances

Auditors noted in their opinion on the company's 1988 financial statements that uncertainty existed concerning the ultimate outcome of legal actions claiming substantial damages as a result of alleged violations by AVX of certain environmental protection statutes in prior years.

Dividend Data

Dividends, initiated in 1976, were omitted in October, 1985 and resumed in 1988 as follows:

Summary

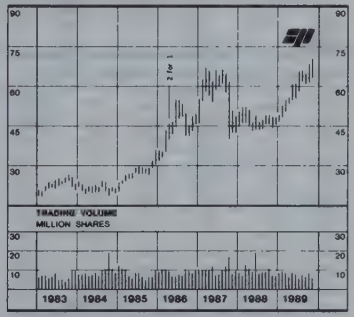
Abbott Laboratories is a major diversified health care firm, with strong positions in the areas of nutritional products such as Similac and Isomil infant formulas, pharmaceuticals, hospital and laboratory supplies, and diagnostic products, including a leading position in AIDS testing. The company's enviable long-term record of sales and earnings growth should continue in the years ahead.

Current Outlook

Earnings for 1990 are expected to reach $4.35 a share, up from the $3.80 estimated for 1989.

An increase in the $0.35 quarterly dividend is likely during the first half of 1990.

Sales for 1990 should show further progress. Although increased competition and restrictive reimbursement in the WIC program are expected to continue to impact the infant formula business, good growth is seen for established pharmaceutical, medical nutritional, and hospital & laboratory products lines. Contributions from new products will also aid comparisons. Profitability should benefit from the better volume, cost economies and productivity improvements.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	1,296	1,188	1,004	865

Important Developments

Oct. '89— ABT noted that during the third quarter seven countries approved its new second generation macrolide antibiotic, clarithromycin. A New Drug Application for the drug is expected to be filed with the FDA before the end of 1989. Abbott also announced plans to acquire Damon Biotech, a producer of biomedical products, for about $9.4 million cash. In September directors approved the buyback of up to 10 million ABT shares.

Aug. '89— ABT received FDA approval for a new AIDS test, representing the first diagnostic test to detect AIDS virus antigens. ABT also formed alliances with Johnson & Johnson and Chiron to develop hepatitis C diagnostic products. Separately, ABT and Johnson & Johnson plan to collaborate in consumer diagnostics and in automated immunohematology testing.

Next earnings report expected in mid-January.

Business Summary

Abbott Laboratories is an important manufacturer of health care-oriented products. Industry segment contributions:

1988	Sales	Profits
Pharmaceutical & nutritional products	53%	68%
Hospital & laboratory	47%	32%

International operations accounted for about 31% of sales and 23% of profits in 1988.

Pharmaceuticals (17% of 1988 sales) include erythromycin antibiotics sold under the Erythrocin, PCE (polymer-coated erythromycin), and E.E.S. names; Tranxene tranquilizer; Depakote anticonvulsant; cardiovasculars, including Loftyl, a vasoactive agent, Hytrin, an anti-hypertensive, and Abbokinase, a thrombolytic drug; Ogen, an oral estrogen; and cough cold products. Infant formulas (20% of sales) include Similac and Isomil, and Advance, with other nutritionals encompassing Ensure nitrogen formulations and Osmolite; hematinics and vitamin products. The company also sells various personal care products such as Selsun Blue dandruff shampoo, Murine eye and ear care items and other products.

Hospital and laboratory products include intravenous and irrigating fluids and related equipment (13% of total sales), venipuncture products, anesthetics, critical care and suctioning equipment, diagnostic instruments and tests (including tests for AIDS and drug abuse), and other specialty products for hospitals and clinical laboratories.

Dividend Data

Dividends have been paid since 1926. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1988.

Summary

This integrated Canadian forest products company is the world's largest producer of newsprint and one of the world's largest producers of uncoated groundwood papers, with manufacturing facilities in both Canada and the U.S. ABY also produces coated papers, building products and lumber, and has paper converting operations. Earnings rose to a new peak in 1988, but 1989's first half earnings declined sharply, primarily reflecting softened newspaper markets and the effects of the lower value of the U.S. dollar. In May, 1989 Olympia & York Developments Ltd. upped its stake in ABY to 81.8% from 80.3%.

Business Summary

Abitibi-Price, an integrated Canadian forest products company, is among the world's largest producers of newsprint and uncoated groundwood papers. It also produces coated papers, building products and lumber, and has Canada's largest distribution network for printing papers, industrial paper products, and information processing products. The company owns or has cutting rights on 29,380 square miles (about 19 million acres) of land in Canada and the U.S., and has manufacturing operations in both countries.

Contributions by business segment in 1988:

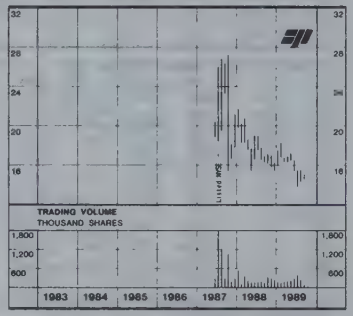
	Sales	Profits
Newsprint	38%	67%
Distribution, office products, converted products	39%	14%
Groundwood papers	10%	12%
Building products	6%	3%
Coated papers	5%	4%
Other	2%	---

In 1988 products made in Canada accounted for 77% of total sales and 94% of operating profits and in the U.S. for 23% and 6%, respectively. Products are shipped to some 30 foreign countries.

ABY operates nine newsprint mills with an annual capacity of approximately 1.9 million tons. Newsprint customers are mainly newspaper publishers.

The company distributes printing and industrial papers and allied products in Canada through a group of company-owned merchant outlets. ABY also distributes office products and converted products such as envelopes, cartons and paper bags.

Groundwood papers are sold principally to commercial printers in North America. Hardwood products and siding are produced and sold in the U.S. Coated papers are sold to publishers and various graphic arts printers and paper merchants.



Important Developments

Aug. '89— ABY said it planned to sell its building products division, subject to certain conditions. The division is located in the U.S. and makes hardboard panel and siding products, plastic moldings, and bi-fold doors, shutters and shelving.

Jul. '89— Management attributed the company's 44% year-to-year decline in 1989 first half earnings to continued soft newsprint markets, which resulted in increased discounts and reduced margins on newsprint sales. Production problems during the second quarter at one of its groundwood papers mills and the lower value of the U.S. dollar also adversely impacted earnings.

Next earnings report expected in late October.

Net Sales (Million Can. $)

Quarter:	1989	1988	1987	1986
Mar.	810	800	696	647
Jun.	830	836	756	702
Sep.		813	750	717
Dec.		856	786	698
		3,305	2,988	2,764

Sales for the six months ended June 30, 1989 advanced 0.3%, year to year, as a gain in distribution, office supplies and converted products barely outweighed a decline in newsprint sales. Margins narrowed, and pretax profits fell 44%. After taxes at 40.6% against 40.5%, and minority interest of $2.0 million, against $4.7 million, net income also was down 44%, to C$0.74 a share from C$1.37.

Acme-Cleveland

NYSE Symbol AMT In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Oct. 5'89	1989					
10⅞	13-9¼	NM	0.40	3.7%	B-	1.16

Summary

Acme-Cleveland manufactures products and provides services designed to improve productivity and quality in the metalworking and telecommunications industries. The company reported a substantial loss from continuing operations for fiscal 1988, mainly reflecting $24.7 million of nonrecurring charges, which were recognized in the fourth quarter. AMT returned to profitability in the first nine months of fiscal 1989, benefiting from sales gains in both segments and improved margins.

Business Summary

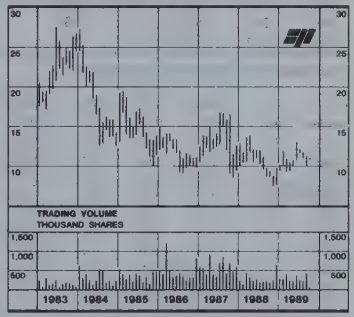
Acme-Cleveland manufactures products for the metalworking and telecommunications industries. AMT sold the LaSalle Machine Tool unit (transfer lines) in 1985 and the Hillyer machining center business in 1986. Contributions (profits in million $) in fiscal 1988:

	Sales	Profits
Metalworking	68%	$181
Telecommunications & electronics products	32%	-23,960

Operations outside the U.S. accounted for 16% of sales in fiscal 1988.

The metalworking segment manufactures metal cutting, metal removing and threading tools such as high speed steel drills, reamers, end mills, taps and thread rolling heads. It also produces multiple-spindle automatic bar and chucking machines and replacement parts for the multiple spindle machines. Other products include computerized quality control and measurement systems, master gears, spline gauges and thread gauges used in the production of precision gears and rotary tables and slides for numerically controlled machines and other products.

The telecommunications equipment segment produces cable splice closures, wire connectors and accessories, electronic equipment test sets, voltage detection equipment, cable restoration equipment, and related hardware and accessories. Other products include limit switches, solenoids, electronic proximity switches and sensors, encoders for industrial machinery and process control applications, cable analysis test equipment and software for verification of installed telephone lines. Telecommunications and electronics products are sold to the telephone, automotive and certain other industries.



Important Developments

Aug '89— Order backlog at June 30 totaled $41.4 million, up from $28.6 million at September 30, 1988.

Jul. '89— The company acquired a 44% equity interest in International Twist Drill (Holdings) Ltd. (ITD), Peterhead, Scotland, for $4.6 million. The investment was made in conjunction with the renewal of a license agreement between ITD and Cleveland Twist Drill Co. (CTD), a subsidiary of AMT. Included was an option to acquire the remaining equity interests of the other ITD shareholders. The investment was intended to secure the presence of CTD in the European cutting tool market and to provide a vehicle for increasing AMT's position in that market.

Next earnings report expected in late October.

Net Sales (Million $)

Quarter:	1988-9	1987-8	1986-7	1985-6
Dec.	43.9	43.5	44.7	45.1
Mar.	48.3	43.6	44.0	42.8
Jun.	50.0	44.3	42.4	50.2
Sep.		44.7	45.4	47.9
		176.1	176.5	186.1

Sales for the nine months ended June 30, 1989 advanced 8.2%, year to year, reflecting gains in the metalworking and telecommunications products segments of 7.8% and 8.9%, respectively. Margins widened on the higher volume, and following a 33% decline in depreciation and amortization charges, pretax income amounted to $6.7 million, in contrast to a pretax loss of $2.8 million. After taxes at 49.0%, versus taxes of $1.6 million, net income was $3.4 million ($0.51 a share), against a net loss of $4.3 million ($0.73). Results for the 1988-9 period exclude a $0.24 per share tax loss carryforward credit.

Advanced Micro Devices

NYSE Symbol AMD Options on Pacific (Jan-Apr-Jul-Oct) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Sep. 21'89	1989					
8⅝	10½-8	NM	None	None	C	1.80

Summary

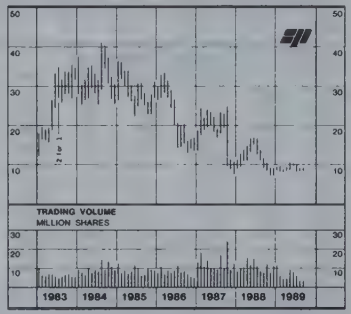
This company develops, designs, manufactures and markets semiconductors, including microprocessors, principally for use by the telecommunications and computer industries. A lower gross profit margin and unusual charges allowed only modest profitability to be restored in 1988. Assuming no further unusual charges and despite a projection of limited sales growth and pressure on prices, significant profitability is estimated for 1989. Further growth is expected in 1990 even though limited growth is likely in the semiconductor industry.

Current Outlook

Earnings for 1990 should approximate $0.50 a share, up from the $0.35 projected for 1989.

Cash dividends have never been paid.

Sales are expected to be only modestly higher in 1990, reflecting the impact of new products. The gain will be restrained by a projection of minimal industry growth and the company's emphasis on commodity products. In addition, the lackluster industry growth is likely to result in continued pressure on prices. Aggressive cost reductions, including research and development spending, should allow margins to widen. Long-term prospects are enhanced by aggressive research and development spending and increased emphasis on proprietary products.



Net Sales[1] (Million $)

Quarter:	1989	1988	1987	1986-7
Mar.	269.6	284.2	222.8	153.9
Jun.	274.9	308.1	250.8	157.7
Sep.	---	285.5	260.9	150.2
Dec.	---	248.1	262.5	170.1
	---	1,126.9	997.1	632.0

Sales for six months ended June 25, 1989 declined 8.1%, year to year, reflecting a significant slowing of industry growth and a loss of marketshare by the company. Despite lower expenses, a 4.3 percentage point decline in the gross profit margin, operating margins narrowed, and operating income declined 61%. A 256% increase in net interest and other income reduced the decline in pretax income to 52%. After taxes at 10.0% in each period, net income also declined 52%. Following preferred stock dividends, share earnings were $0.21, down from $0.51.

Business Summary

Advanced Micro Devices designs, develops, manufactures and markets complex monlithic integrated circuits for use by manufacturers of a board range of electronic equipment and systems. Its largest customers are manufacturers of computation and communications equipment.

The company is a leading supplier of high-speed, field programmable integrated circuits. Its programmable array logic devices (PALs) dominate the market for field-programmable logic devices.

A major portion of revenues are derived from the sale of erasable programmable read-only memories (EPROMs) and programmable read-only memories (PROMs). Other memory devices are also sold.

Under a technology exchange agreement with Intel Corp., which is the subject of arbitration, various microprocessors are produced. In addition, the company in 1988 introduced an internally developed microprocessor.

The company also provides a wide variety of solutions for a broad spectrum of connectivity problems, such as applications involving central office switches, PBX equipment and local area networks.

Foreign sales accounted for 31% of revenues and a $4,743,000 operating loss in 1988.

Research and development spending totaled $208,339,000 (18.5% of sales) in 1988, versus $247,792,000 (24.9%) in 1987.

Dividend Data

No cash dividends have ever been paid.

Finances

In August, 1987 the company acquired Monolithic Memories, a maker of semicustom semiconductors that had revenues of $205 million in fiscal 1986, for about 19 million common shares.

Nov. 17'89	1989					
60½	62½–46⅝	10	2.76	4.6%	B	0.80

Summary

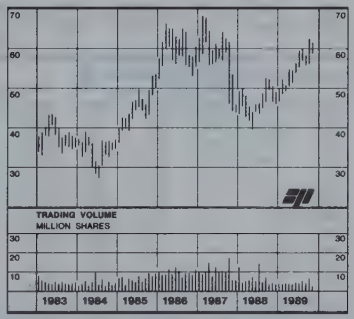
The nation's largest investor-owned insurance enterprise, Aetna has major representation in life, health and property-casualty fields. Third quarter 1989 earnings declined as continued improvement in group health lines was more than offset by deteriorating property-casualty results due to competitive pricing and increased catastrophe losses. In August, 1989 AET sold its Federated Investors unit for $350 million and an equity interest in the acquiring company.

Current Outlook

Excluding realized capital gains or losses and "fresh start" tax benefits in both years, share earnings for 1990 are estimated at $5.50, versus the $4.95 anticipated for 1989.

The $0.69 quarterly dividend is expected to be maintained over the near term.

Earnings growth in coming periods will remain under pressure from continued competitive p-c pricing. Although rates are expected to firm, AET's high loss costs, particularly in personal auto lines, will diminish the effects of improved pricing. Steps have been taken to reduce costs in these lines and, longer term, this is a plus. Offsetting these adverse factors is the group health area, where profits have benefited from sizable rate hikes and increased utilization of AET's HMO and PPO systems. Further growth is expected in this segment, particularly as employers, seeking to minimize employee health care costs, turn to alternative health care delivery programs, like HMOs. Share repurchases will benefit share earnings comparisons.



Review of Operations

Total revenues for the nine months ended September 30, 1989 rose 7.3%, year to year (1988 restated). Benefits and expenses were 6.9% higher, and after taxes of $158.0 million versus $55.9 million, and minority interests, net income advanced 1.3%. Share earnings were $4.54 (including realized capital gains of $0.72) on fewer shares, compared with $4.41 ($0.29), before an extraordinary credit of $15 million ($0.13) in the 1989 interim.

Common Share Earnings[1] ($)

Mar.	1.52	1.11	1.56	1.21
Jun.	1.52	1.34	1.93	1.37
Sep.	1.50	1.67	2.01	1.72
Dec.		1.74	1.98	1.87
		5.85	7.48	6.18

Important Developments

Oct. '89— AET said the improvement in its group health lines during 1989's third quarter was offset by declines in personal and commercial p-c lines. While competitive pricing was part of the problem, sharply higher catastrophe claims (including those from Hurricane Hugo) and higher loss costs, especially in personal auto lines, were major contributors to this unfavorable situation.

Aug. '89— AET sold its Federated Investors (FI) investment management unit to members of FI management for $320 million in cash, about $30 million in AET common stock held by FI, and preferred stock convertible into 27.5% of the new company's common stock. AET also retained about $110 million in cash, receivables and securities from FI.

Next earnings report expected in early February.

Business Summary

This company is the nation's largest investor-owned insurance organization, providing virtually all forms of business and personal insurance and pension products. Operating earnings (in million $) in recent years were derived as follows:

	1988	1987
Employee benefits	$238	$268
Personal financial	214	261
Commercial insurance	233	322
Reinsurance	151	133
Int'l & fin. services	-28	21
Corp. expenses	-140	-138

The employee benefits division provides group life, health and pension products and services to employers, associations and trusts. AET also offers clients alternative health care delivery programs such as HMOs and PPOs. Pension assets under management in 1988 amounted to $43.2 billion. The personal financial security division markets a complete line of insurance to individuals. In addition, through Federated Investors (FI), the division manages, distributes and administers mutual funds. At year-end 1988, the division had $37.8 billion of assets under management. In August, 1989 AET sold FI. The commercial insurance division writes virtually all types of p-c coverage. Commercial lines accounted for 60% of the $6.79 billion of written premiums in 1988, while personal lines accounted for 40%.

Other operations include reinsurance (American Re-Insurance), international insurance and financial services. The company has a 39% interest in MBIA Inc., the largest municipal bond insurer in the U.S.

Dividend Data

Dividends have been paid since 1934. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1989.

Summary

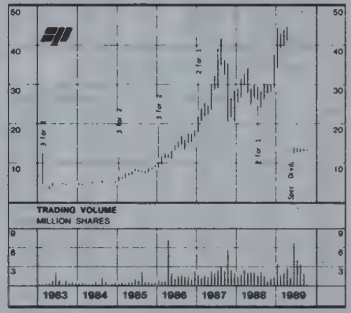
This media company owns The Boston Globe, the largest newspaper in New England, and Billboard Publications, a publisher of specialty magazines, books and directories. In May, 1989 AFP and McCaw Cellular Communications (MCAWA), which was formerly 47.2% owned by AFP, completed major restructurings of both companies, following which AFP shareholders retained share-for-share ownership in the publishing company, and received 0.84 of a share in MCAWA.

Current Outlook

Earnings for 1990 are projected at about $0.80 a share, versus the $0.75 estimated for 1989.

The $0.05½ quarterly dividend will probably be raised to $0.06 in 1990.

Revenues for 1990 from continuing operations are expected to be flat-to-up slightly, reflecting improvements at BPI Communications. The Boston Globe's revenues will continue to be penalized by advertising softness which will offset gains in newspaper circulation revenues. Margins should be penalized by the softness in newspaper revenues in spite of considerable relief in the cost of newsprint and higher operating income at BPI.



Oper. Revenues (Million $)

13 Weeks:	1989	1988	1987	1986
Mar.	130.4	126.7	102.8	91.5
Jun.	137.7	140.4	125.9	100.6

Dec.	---	137.0	135.6	110.3
	---	534.2	490.1	401.1

Revenues for the 1989 first half were virtually flat, year to year, reflecting reduced advertising revenues at The Boston Globe. Operating income fell 20%. After other items and taxes at 40.4%, versus 39.9%, earnings from continuing operations were down 22%. Share earnings were $0.31, down 21% from $0.39.

Dec.	E0.25	d0.43	d0.05	0.19
	E0.75	d1.17	2.04	0.56

Important Developments

Aug. '89— AFP raised circulation prices of the Sunday Globe and instituted a number of cost-cutting measures to help offset soft advertising volume.

May '89— AFP and McCaw Cellular Communications (MCAWA) completed major restructurings of both companies which, through a series of transactions and spinoffs, have resulted in AFP shareholders owning shares in two different companies. AFP shareholders were distributed the same number of class A and class B common shares in the new AFP, which is the parent of the Globe Publishing Co. and Billboard Publications. In addition, 0.84 of a share of MCAWA (which had been 47.2% owned by AFP) was distributed for each share of AFP held on the effective date.

Next earnings report expected in late October.

Business Summary

Affiliated Publications publishes The Boston Globe newspaper, and publishes specialty magazines and books. Through a complex restructuring with 47.2%-owned McCaw Cellular Communications (MCAWA), involving a series of transactions and spinoffs completed in May, 1989, AFP shareholders now hold stock in both AFP and MCAWA. MCAWA is the largest nonwireline cellular telephone operator in the U.S., with majority interests in 25 of the top 90 markets. It is also the sixth largest paging operator in the country.

The Boston Globe has the largest combined daily and Sunday circulation of all newspapers in the Boston primary market, and it garners more than 80% of all advertising dollars placed in Boston newspapers. Average daily circulation in the six months ended March 31, 1989 was 509,573 daily and 787,385 Sunday.

BPI Communications, whose stated goals is to become the nation's leading information provider for the entertainment, arts and design fields, owns 14 publications, including Hollywood Reporter, Billboard Magazine, Amusement Business, Back Stage, Architecture, Music and Media, Musician, American Film, American Artist, Photo Design and Interiors. In addition it publishes and distributes books through its subsidiary, Watson-Guptil Publications, and distributes information electronically around the world.

Dividend Data

The company and its predecessor have paid dividends every year since 1882. Dividends are the same on both Class A and Class B common.

Ahmanson (H.F.) & Co.

NYSE Symbol AHM Options on ASE (Jan-Apr-Jul-Oct) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 10'89	1989					
20	25-15¾	10	0.88	4.4%	B	1.23

Summary

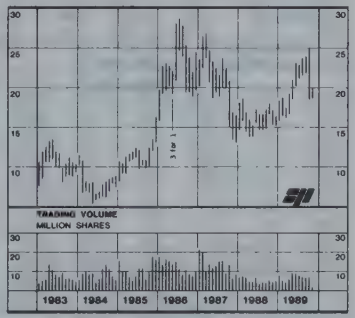
This holding company owns Home Savings of America, the nation's largest savings and loan association, with 356 savings branches in nine states and 106 mortgage lending offices in 19 states. AHM is also involved in securities brokerage and real estate development. The company's mortgage loan portfolio is comprised of substantially all (about 90%) monthly adjustable rate mortgages. It is thus well insulated from the harmful effects of higher interest rates on earnings, but it would also benefit less from lower rates.

Current Outlook

Earnings for 1990 are projected at $2.70 a share, up from the $2.00 expected for 1989.

A modest increase in the $0.22 quarterly dividend is possible in 1990.

Mortgage lending activity in 1990 is expected to moderate from the robust levels of 1989 and 1988, mainly due to a cooling of the housing market in Southern California, AHM's main lending area. The spread will probably widen sharply through late summer, based on the effect of projected lower interest rates on the company's funding costs. The provision for loan losses should be higher, given the continued decline in real estate values in the Southwest where AHM has some exposure. A major uncertainty is the extent of the damage from the October, 1989 earthquake. Gains on sales of loans are likely to be smaller, principally due to the company's goal of retaining originations for portfolio. If interest rates fall significantly, opportunistic selling could occur. General and administrative expenses may decline slightly. Ahmanson's competitive advantage is having an average cost of funds well below the index used to compute spreads on its home mortgage loans.



Review of Operations

Net interest income for the nine months ended September 30, 1989 rose 6.2%, year to year, reflecting growth in the level of earning assets. The provision for loan losses increased 7.0%, to $43.8 million. Noninterest income declined 1.2%, primarily due to lower gains on asset sales ($6.6 million, against $33.8 million). Noninterest expenses were up 8.2%. Pretax income fell 3.3%. After taxes at 44.5%, versus 43.4%, net income fell 5.2%. Earnings per share were $1.29, against $1.37, before a special charge of $0.01 in 1988.

Important Developments

Oct. '89— AHM said that third-quarter loan originations of $2.25 billion brought loan volume for the year to date to $7.7 billion, compared with the record $10.2 billion of loans funded in the 1988 period. The portfolio of loans serviced for investors totaled $12.3 billion at September 30, 1989, up from $11.9 billion a year earlier.

Next earnings report expected in early February.

Business Summary

H. F. Ahmanson is the parent of Home Savings of America, the nation's largest savings and loan association based on 1988 year-end assets of $40.3 billion. At December 31, 1988 Home Savings had 352 savings branches located in nine states and 106 loan offices located in 18 states. AHM is also involved in securities brokerage and real estate development activities.

Of AHM's $34.26 billion of loans and mortgage-backed securities outstanding at 1988 year-end, 78% were loans on single family loans, 13% on apartments, 8% on commerical properties, and 1% were non-real estate loans. New loan volume totaled $14.91 billion in 1988, up from $11.26 billion in 1987. Nonperforming assets (problem loans) were 0.92% of assets at year end, down from 1.48%.

Of total deposits of $29.51 billion at 1988 year-end, 31% were checking, passbook or money market savings accounts, 29% were term accounts six months or less, 21% were term accounts of one year, 11% two years, and 8% were jumbo CD's and other. The one-year gap (excess of liabilities maturing in one year over assets maturing in one year) was -2.47% at the end of 1988. The average yield on earning assets in 1988 was 9.42% (9.46% in 1987), the cost of funds was 6.86% (6.59%), for an earnings spread of 2.56% (2.87%).

Profits from real estate operations in 1988 amounted to $31.7 million, up from $10.7 million in 1987.

Summary

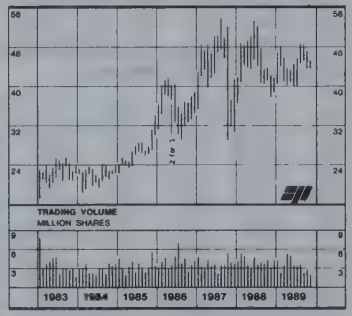
This company is a major producer of industrial and specialty gases; makes consumer, industrial and agricultural-related chemicals; provides cryogenic and process equipment; and is developing environmental and energy systems. Record earnings are expected for fiscal 1990, with volume gains for most core products. Longer-term growth is expected to come from the core industrial gases and chemicals units, global expansion, and development of new businesses.

Current Outlook

Share earnings for the fiscal year ending September 30, 1990 are estimated at about $4.20, versus the $4.04 of fiscal 1989.

Dividends at $0.33 quarterly are the minimum expected.

Earnings for fiscal 1990 should benefit from continued volume gains in the core industrial gases and chemicals units, aided by contribution from new products and acquisitions. Industrial gas prices should improve somewhat with recent industrywide price increases and high operating rates, but commodity chemicals prices are expected to remain weak. Moderating business development costs should also benefit profits. The equipment/technology segment is expected to be profitable with higher levels of orders.



Net Sales (Million $)

Quarter:	1988-9	1987-8	1986-7	1985-6
Dec.	641	586	534	476
Mar.	669	619	527	509

Sep.	669	622	544	503
	2,642	2,432	2,132	1,982

Sales for the fiscal year ended September 30, 1989 (preliminary) rose 8.6%, year to year. Higher industrial gas profits and a nonrecurring gain of $0.18 a share outweighed increased selling, R&D, and interest expenses; after taxes at 30.9%, versus 29.6%, net income was up 3.5%.

Sep.	0.92	0.92	0.70	0.17
	4.04	3.90	2.83	0.08

Important Developments

Oct. '89— APD said that fiscal 1989 earnings reflected strong worldwide volumes in most major product lines. APD also invested over $500 million in new plants and acquisitions in 1989. Fourth quarter profits reflected slightly lower prices in merchant gases, falling commodity chemicals prices and higher interest expense. However, strong volumes and higher prices in strategic chemicals more than offset the decline in commodity chemicals. The equipment business remained profitable. The full-year loss for the equipment and technolgy segment reflected lower equipment orders and restructuring charges related to the consolidation of the landfill gas business. APD expected continued volume growth in fiscal 1990 and some improvement in merchant gas prices.

Next earnings report expected in mid-January.

Business Summary

This major industrial gas producer derived fiscal 1989 sales and operating profits from the following business segments:

	Sales	Profits
Industrial gases	57%	77%
Equip. & technology	6%	-2%
Chemicals	37%	25%

Foreign operations accounted for 24% of sales and 26% of operating income in fiscal 1989.

The industrial gases segment produces a variety of industrial, medical and specialty gases, including nitrogen, oxygen, argon, hydrogen, helium, carbon dioxide, synthesis gas, fluorine compounds, and welding gases for both merchant and tonnage customers.

Equipment consists of cryogenic and process equipment, including air separation systems, gas processing, natural gas liquefaction, wastewater treatment, hydrogen purification, and nitrogen rejection; plant design, engineering and construction management services are also provided. Technology consists of technology licensing, landfull gas recovery and new venture R&D activities.

Chemicals include polymers for adhesives, coatings, and textiles; polyurethane intermediates and additives used in furniture, automotive and construction markets; and amines and specialty additives for pesticides, water treatment chemicals, and coatings. Commodity chemicals (methanol, ammonia, acetic acid and PVC resins) are also produced.

Dividend Data

Dividends have been paid since 1954. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1988.

Alaska Air Group

NYSE Symbol ALK Options on ASE (Jan-Apr-Jul-Oct)

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Jan. 9'90	1989-90					
21¼	30½-19⅞	7	0.20	0.9%	B+	1.07

Summary

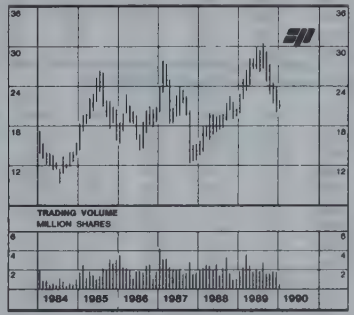
Alaska Air Group is the holding company for Alaska Airlines, the leading passenger carrier between Alaska and the lower 48 states, and Horizon Air, which serves smaller cities in the Northwest. ALK has maintained relatively high earnings in the past few years as the result of well-managed route expansion, largely in West Coast markets. Rising costs and fare discounting could produce lower earnings in 1990.

Current Outlook

Earnings for 1990 are projected at $2.15 a share, versus the $2.70 estimated for 1989.

Dividends should continue at the current $0.05 quarterly rate.

Revenues for 1990 are likely to grow moderately. Traffic growth should reflect additions to schedules to Mexican winter vacation destinations and some expansion of the fleet, which will increase capacity on routes in western states. Yields could be weak early in the year as the result of competitive fare cuts and promotional discounts. Margins should be under pressure in the early part of the year because of higher labor costs and sharply rising fuel costs.



Total Oper. Revenues (Million $)

Quarter:	1990	1989	1988	1987
Mar.	---	197.7	173.3	141.4
Jun.	---	226.6	203.1	178.4
Sep.	---	268.9	241.5	214.9
Dec.	---	---	196.5	175.1
	---	---	814.4	709.8

Revenues for the first nine months of 1989 advanced 12.2%, year to year. Operating costs increased 11.9%. Net income rose 28.8%, to $2.55 a share from $1.99.

Common Share Earnings ($)

Dec.	E0.30	E0.15	0.38	0.04
	E2.15	E2.70	2.37	0.85

Important Developments

Nov. '89— ALK applied to the DOT for authority for service between San Jose and Guadalajara and Acapulco, which have been served from San Francisco and Los Angeles since early 1989. Service between Los Angeles and Los Cabos began in September. Service to Puerto Vallarta and Mazatlan was initiated in November 1988. The new service to Mexico accounted for 60% of traffic growth in the first nine months of 1989.

Sep. '89— ALK announced orders for six MD-80 aircraft for delivery between 1993 and 1995. This brings the number of MD-80s on order to 19. In addition, the company will lease an MD-80 in early 1990.

Next earnings report expected in late January.

Business Summary

Alaska Air Group, Inc. is the holding company for Alaska Airlines and Horizon Air Industries (acquired December, 1986). Alaska Airlines is the leading airline between Alaska and the lower 48 states. As of April, 1989 it served 14 cities in Alaska, 16 cities in Washington, Oregon, Idaho, California and Arizona, using hub cities at Seattle, Portland and Anchorage, and four cities in Mexico. It also served Dallas/Ft. Worth, Houston, Chicago and Washington through an interchange agreement with American Airlines, using Seattle as the interchange point connecting with Anchorage and Fairbanks.

As of April, 1989 Horizon Air served 30 airports in five western states, primarily connecting smaller cities to hubs in Seattle, Portland, Spokane and Boise.

As of June, 1989 the Alaska Airlines fleet included 24 727-200s, 19 MD-80s, seven 737-200Cs and one 727-100. Horizon's fleet included 29 Fairchild Metroliner IIIs, 12 deHavilland Dash 8s, and two Fokker F28s. On order were 15 MD-80s for Alaska Airlines and three Dash 8s for Horizon.

Dividend Data

Cash dividends were resumed in late 1982 after a three-year hiatus. A "poison pill" stock purchase right was adopted in 1986.

Summary

This company is an important producer of hair care products and health and beauty aids. Its Sally Beauty division operates the world's largest chain of professional beauty supply stores in the world. The company's strong positions in its major markets and benefits from an aggressive new product development program brighten long-term prospects.

Current Outlook

Earnings for the fiscal year ending September 30, 1990 are projected at about $2.65 a share, up from fiscal 1989's $2.25.

An increase in the $0.09 quarterly dividend is likely in early calendar 1990.

Another good sales gain is anticipated for fiscal 1990, bolstered by growth in established hair care, personal care and other consumer lines (especially overseas), new products, and further expansion in the chain of Sally Beauty outlets. Profits are expected to benefit from the better volume, possible reductions in certain raw material costs and productivity improvements.

Important Developments

Nov. '89— A company spokesman noted that by the end of fiscal 1990 the Sally Beauty division was expected to be operating some 880 to 900 outlets, up from 807 at September 30, 1989. Sally Beauty's earnings for fiscal 1990 were projected to rise between 25% and 30%. ACV plans to introduce a Consort men's shampoo and a new product in the household products group is expected to be launched in tbe spring of 1990.

Mar. '89— ACV signed a licensing agreement with Sunstar Inc. of Japan which will allow Sunstar to manufacture and market Alberto products in Japan. Sunstar presently markets the Alberto VO5 hair spray line in Japan. Also, in March ACV began shipping a new line of Bold Hold shampoos and conditioners.

Next earnings report expected in mid-January.

Business Summary

Alberto-Culver primarily manufactures mass marketed products, mostly hair care products, and industrial institutional food and cleaning products. Business segment contributions:

Fiscal 1988	Sales	Profits
Personal use products	52%	59%
Institutional/industrial	12%	18%
Other	36%	23%

Foreign operations accounted for about 25% of sales and 4% of profits in fiscal 1988.

Hair care products include Alberto VO5 line, Consort hair sprays, and related items sold under the Alberto, Get Set, TCB, and Bold Hold names. Other personal use products include the FDS Feminine Deodorant Spray and other health and beauty aids; household aids such as Static Guard antistatic spray, and Kleen Guard furniture polish; and several retail food items such as Sugartwin sugar replacement, Mrs. Dash seasonings and Molly McButter butter substitute.

Institutional and industrial products include specialty foods for institutions and restaurants and professional hair care products. Other products principally are professional beauty and barber products sold by the Sally Beauty division. Sally Beauty, the largest beauty supply company in the world, operated 807 outlets at September 30, 1989.

Summary

This Idaho-based operator of supermarkets and combination food-drug stores has increased sales and earnings substantially over the past decade, largely through internal expansion. The company's $1.75 billion five-year growth plan, calling for the opening of 200 new stores, remodeling of 175 existing stores, installing in-store computers, and a major expansion of the distribution system, bodes well for the future, as does its representation in growing geographic markets.

Current Outlook

Earnings for the fiscal year ending January 31, 1990 should advance to about $2.85 share from the $2.44 of fiscal 1988-9. Earnings for fiscal 1990-1 could approximate $3.20 a share.

The $0.20 quarterly dividend is the minimum expected.

Revenues for fiscal 1989-90 should reflect increased selling space, store remodelings, and new store expansion. Margins should benefit from increased overall volume, more high margin service departments, and tight control of operating and administrative expenses. Share earnings will reflect fewer shares outstanding.

Net Sales (Million $)

13 Weeks:	1989-90	1988-9	1987-8	1986-7
Apr.	1,813	1,555	1,399	1,279
Jul.	1,826	1,660	1,481	1,338

Jan.	---	1,889	1,521	1,405
	---	6,773	5,869	5,380

Sales for the 26 weeks ended August 3, 1989 rose 13%, year to year. Gross margins widened, reflecting efficiencies gained from the new Portland, Ore. distribution center and an improved product mix. Operating and administrative expenses increased as a percentage of sales due to higher labor costs and reduced volume due to a strike in Seattle. Pretax income advanced 24%. After taxes at 37.0% in both periods, net income also rose 24%, to $1.34 a share from $1.09.

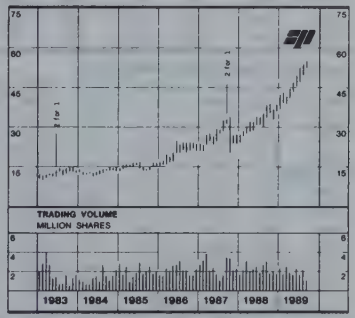
	E2.85	2.44	1.88	1.50



Important Developments

Aug. '89— ABS said that same store sales for the second quarter of fiscal 1989-90 increased 3.3%; an 11½ week strike in 34 Seattle, Wash. area stores substantially affected store sales. During the first half of fiscal 1989-90, a total of eight stores were opened. ABS expected to open an additional 24 stores during the second half, including three combination units in Austin, Texas which will be purchased from American stores in October. Remodels were completed on 17 stores during the first half of fiscal 1989-90; 27 more are expected to be completed in the second half. The Brea, Calif. distribution center finished a 344,000 sq. ft. addition during the second quarter. In March, directors authorized the repurchase of up to 3.3 million shares. Under a previous buyback program, ABS repurchased 1.2 million shares.

Next earnings report expected in late November.

Business Summary

As of February 2, 1989 Albertson's was operating 497 stores in 17 Western and Southern states, consisting of 167 conventional supermarkets, 127 combination food and drug units, and 175 superstores and 28 warehouse stores. During the past 10 years about 86% of the square footage has been newly built or completely remodeled.

Conventional supermarkets average 26,000 sq. ft. in size and offer a full line of grocery items and, in many locations, feature in-store bakeries and delicatessens.

The typical combination food and drug store covers 57,000 sq. ft. Selling space is divided between prescription and proprietary drugs and general merchandise, and the regular supermarket products. Superstores, which are smaller versions of combination stores, approximate 42,000 sq. ft. on average.

The company also operates 28 stores in a warehouse format varying in size up to 73,000 square feet.

Albertson's has been expanding distribution facilities, and in fiscal 1988-9 handled 61% of the merchandise purchased for resale, through its own distribution centers.

Dividend Data

Dividends have been paid since 1960. A "poison pill" stock purchase right was adopted in 1987.

Amt. of Divd. $	Date Decl.	Ex-divd. Date	Stock of Record	Payment Date

Oct. 20'89	1989					
22⅛	25⅛-20⅛	5	[2]1.12	[2]5.1%	B	1.00

Summary

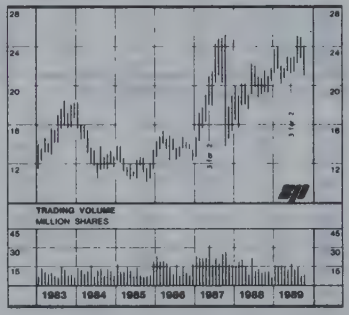
Alcan Aluminium is the largest aluminum producer in the world from facilities located mainly in Canada, with a wide geographical range of markets. Profits are likely to decline in 1989 and 1990, reflecting sluggish economic growth. Earnings had risen steadily in recent years to a record level, as a result of a prolonged business expansion along with previous cost cutting measures.

Current Outlook

Earnings for 1990 are projected at $2.65 a share, down sharply from 1989's estimated $3.70.

Dividends are expected to continue at $0.28 quarterly.

Operating revenues for 1990 may decline slightly on expected modest decreases in aluminum shipments and annual average aluminum prices. Significantly reduced earnings are likely from North America and European income may be about the same. However, Pacific profits will probably increase further, albeit at a more modest pace. With negative operating leverage (the spreading of high fixed costs over fewer units of production), earnings should decline substantially.



Oper. Revenues (Million U.S. $)

Quarter:	1989	1988	1987	1986
Mar	2,239	1,950	1,523	1,432
Jun	2,320	2,198	1,699	1,560

Dec	---	2,223	1,868	1,482
	---	8,529	6,797	5,956

Operating revenues for the first nine months of 1989 rose 7.0%, year to year, reflecting higher average prices mainly in the first half. With an after-tax nonrecurring gain of $60 million ($0.26 a share), net income was up 2.5%. Share earnings were $2.98 (on reduced preference dividends), versus $2.76 (adjusted).

Important Developments

Oct. '89— AL said that Logan Aluminum (40% owned by AL and 60% by Atlantic Richfield) began a $280 million expansion of its Russellville, Ky. sheet rolling facilities including a 3-stand, high-speed cold mill, a coating line, a precision slitting line, two ingot preheat furnaces, and an ingot scalper. The expansion would be financed and owned by AL with the exception of the furnaces, which would be jointly funded. In September AL said that it intended to file notice, effective October 27, of a new 1989-90 program to buy back up to 15 million (6.5%) of its common shares.

Nov. '88— AL proceeded immediately with construction of the fourth and final phase of its 200,000 metric-ton-a-year Laterrière smelter in Quebec. The phase would cost $75 million between November, 1988 and March, 1991 when Laterrière would be completed. Overall project cost was estimated at more than $600 million.

Next earnings report expected in late January.

Business Summary

Alcan is the largest producer of aluminum in the world. Shipments in 1988 were 2,278,000 metric tons, of which 63% was fabricated products and 37% ingot and ingot products. Of 1988 total sales, 35% were in the U.S., 32% in Europe, 14% in Canada, 13% in the Pacific, 5% in Latin America, and 1% elsewhere. Sales by market in 1988 were divided among containers and packaging (23% of the total), building and construction (22%), electrical (9%), transportation (8%), and other (38%), which includes ingot sales, sales to distributors, and sales of chemicals, alumina and bauxite.

Bauxite reserves are estimated to be sufficient to support existing smelter capacity for more than 50 years. Mines are located in Brazil, Guinea, India, Jamaica and Malaysia.

Alumina plants are located in Canada, Jamaica, India, Brazil, Ireland, and Japan. Alcan also has a 21% interest in an alumina plant in Queensland, Australia.

Consolidated primary capacity at year-end 1988 was 1,680,000 metric tons a year. Smelting capacity in Canada is rated at 1,075,000 tons, with the rest in Australia, Brazil, the U.K., and the U.S. In 1988 consolidated primary output was 1,619,000 tons.

Alcan has its own hydroelectric facilities in Canada, and electric power outside that country is supplied from a variety of sources.

Dividend Data

Dividends have been paid since 1939. Payments are made in U.S. funds, subject to 15% Canadian tax. A dividend reinvestment plan is available.

33⅝	36⅝-25⅜	13	0.84	2.5%	A	1.20

Summary

ASN is the largest U.S. distributor and converter of paper and related products, a major and rapidly growing distributor of office products, and a manufacturer of foodservice equipment. It also provides specialty manufacturing and services to the aerospace and steel converting industries. ASN is building a nationwide office products distribution system through the acquisition of numerous regional distributors.

Current Outlook

Earnings for the fiscal year ending September 30, 1990 may rise to $2.80 a share from fiscal 1989's $2.68 from continuing operations.

The dividend was raised 11%, to $0.21 quarterly from $0.19, with the December, 1989 payment.

Fiscal 1990 sales at Paper Corp. of America should rise on increased volume and higher prices. Office Products should report sharp increases, fueled by internal growth and an aggressive acquisition program. Higher contributions by the Triumph Group are expected, and results at Foodservice should stabilize from the decline of recent years. Earnings will be penalized by higher interest expense and a sharply higher tax rate. There will be fewer shares outstanding.

Revenues (Million $)

Quarter:	1988-9	1987-8	1986-7	1985-6
Dec.	985	920	864	1,021
Mar.	1,044	941	881	1,045

Sep.	1,085	1,001	971	1,116
	4,146	3,817	3,633	4,323

Revenues for the fiscal year ended September 30, 1989 (preliminary) rose 8.6% from those of the prior year. Boosted by contributions by acquisitions in the office products segment, pretax income rose 12%. After taxes at 21.9%, against 23.6%, net income was up 16%. Share earnings were $2.68 on 8.2% fewer shares, versus $2.10, before income from discontinued operations of $1.31, versus $0.21.

Important Developments

Nov. '89— ASN said that all of its groups surpassed operating and financial goals in fiscal 1989. Paper Corp. of America's revenues rose 11% and operating income advanced 11% to $117.5 million. Alco Office Products reported a 48% increase in revenues and 59% rise in operating income to $41.7 million. A turnaround began in the Foodservice group in the second half of the year with fourth quarter income up 35% from the year-earlier level. The Triumph Group reported a 21% increase in revenues and a 16% rise in operating income to $18.9 million. In fiscal 1989 ASN realized a gain of $57.3 million ($1.19 a share) from the sale of most of its 49% interest in Alco Health Services. Cash proceeds of $181 million were used by the company to buy back 7.5 million (15.8%) of its common shares at $28 a share through a "Dutch Auction" tender offer.

Next earnings report expected in late January.

Business Summary

Alco Standard is a diversified company with operations in distribution and manufacturing. ASN identified paper, office products, foodservice and specialty manufacturing as its key business units. Segment contributions in fiscal 1988:

	Sales	Profits
Paper	74%	60%
Office products	10%	15%
Foodservice	9%	16%
Triumph Group	3%	9%
Other businesses	4%	Nil

Paper Corp. of America is the largest U.S. distributor and converter of paper and related products, including printing papers, packaging supplies and equipment, janitorial and industrial supplies and specialty paper.

Office products includes the sale, renting and servicing of copiers, typewriters and other automated office equipment, and the sale and distribution of office furniture, equipment and supplies. During fiscal 1988 ASN acquired 13 office products dealers with some $145 million in annual sales. The company's goal is to continue to expand through acquisitions and internal growth, the geographical coverage of its dealer network.

ASN is a leading maker of commercial and institutional food service equipment, including equipment for preparation, storage, dispensing and packaging of food and beverages.

Dividend Data

Dividends have been paid since 1965. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1988.

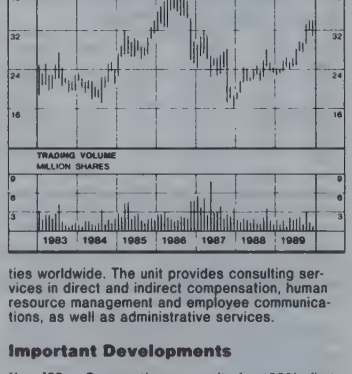
Summary

Alexander & Alexander is an international insurance brokerage and risk management firm operating in over 70 countries and territories. In an effort to emphasize core businesses as it expands internationally, AAL sold its premium financing unit for $73.8 million in late 1988. Earnings for 1989's first nine months were impaired by downward pricing pressures in the competitive U.S. insurance marketplace and by increased reserves.

Business Summary

Alexander & Alexander Services is the second largest international insurance brokerage company and the world's leading retail insurance broking firm. AAL provides a broad range of insurance services, risk management and financial services to companies, organizations and individuals. Other subsidiaries provide a variety of human resource management services and management consulting services. AAL serves clients through offices in more than 160 cities in the U.S., Canada and the United Kingdom, and operates in over 70 countries and territories worldwide.



1988	Revs.	Op. Inc.
Insurance services	87%	107%
Human resources mgmt. consulting	11%	12%
Other & corp.	2%	-19%

The insurance services business consists primarily of negotiating and placing property, casualty and marine insurance for clients (mostly corporations) with underwriters worldwide. Compensation is generally by commissions, usually as a percentage of the premium paid by the client. Other services include risk surveys and analyses, loss control and cost studies, claims and loss processing assistance, marine average adjusting, formulation of safety programs, research in connection with new insurance coverages, and consultation on self insurance programs.

In 1988 AAL sold TIFCO Inc., its premium finance unit for $73.8 million. In December, 1987 AAL sold its two major underwriting units, Sphere Drake Insurance Group plc and Shand, Morahan & Co.

The Alexander Consulting Group oversees employee benefit and management consulting activities worldwide. The unit provides consulting services in direct and indirect compensation, human resource management and employee communications, as well as administrative services.

Important Developments

Nov. '89— Commenting on results for 1989's first nine months, AAL said that revenue growth continued to be restrained by marketwide reductions in U.S. property-casualty premium rates. Margins were impaired by an increase in reserves in anticipation of a large policy settlement, and to cover previously incurred system development costs. These two factors offset a substantial rise in investment income and a lower tax rate, and net income declined 10%.

Next earnings report expected in early February.

Jun.	320	313	295	269
Sep.	298	297	273	267
Dec.		318	281	282
		1,228	1,119	1,068

Revenues for the nine months ended September 30, 1989 rose 1.1%, year to year. With operating expenses up 2.7%, operating income declined 13%. The absence of equity earnings after the sale of TIFCO in 1988's fourth quarter offset higher investment income, and pretax earnings were down 13%. After taxes at 38.2%, versus 41.0%, and losses from minority interests of $2.6 million, versus $2.0 million, net income decreased 10%. Share earnings were $1.12 (on 2.6% fewer shares), compared with $1.21, before special credits of $0.03, versus $0.06.

NYSE Symbol ALS

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Dec. 13'89	1989					
40⅜	41⅝-29¼	7	1.20	3.0%	NR	NA

Summary

This company is a leading manufacturer of specialty steel and specialty metals and one of the largest domestic producers of stainless steel. Sales and earnings for the first nine months of 1989 benefited substantially from higher selling prices and increased nonoperating income. A projected decline in sales along with margin contraction and lower nonoperating income will probably lead to an earnings decline in 1990. In November, 1989 directors increased the dividend 20%.

Current Outlook

Earnings for 1990 are projected at $4.50 a share, versus the $5.60 estimated for 1989.

The dividend was increased 20%, to $0.30 from $0.25 quarterly, with the November, 1989 declaration.

Sales for 1990 are expected to decline from 1989's levels as slower economic growth results in lower shipments and less buoyant pricing. Margins will likely contract as decreased operating rates outweigh the benefits of lower raw material costs. Given a probable increase in interest costs and a decline in nonoperating income connected to higher capital spending levels, earnings will probably decrease in 1990.

Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	364	275	206	---
Jun.	334	318	217	---
Sep.	267	320	209	---
Dec.	---	294	235	---
	---	1,208	867	733

Sales for the nine months October 1, 1989 rose 5.6%, year to year, as higher selling prices offset a 6.0% decline in tonnage shipped. Margins widened, and following sharply higher nonoperating income, pretax income advanced 23%. After taxes at 38.0%, versus 38.1%, net income was up 24%. Share earnings were $4.66, versus $3.76.

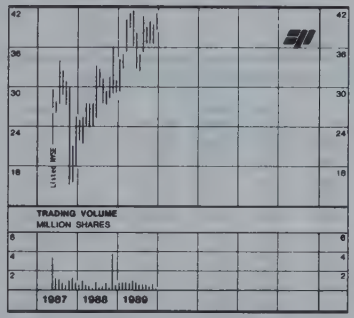
	E5.60	4.81	2.27	0.78



Important Developments

Jun. '89— Allegheny Ludlum announced that it was planning to increase its production capacity for stainless sheet and strip by 30% during the next four years.

Jun. '89— The company said that directors had authorized the repurchase of up to 1.0 million ALS common shares from time to time in the open market or through privately negotiated transactions. The shares acquired would be held in the treasury.

Jun. '89— ALS reported that it had filed suit against Nippon Steel Corp. of Japan and others charging patent infringement of a process for manufacturing grain oriented silicon steel. ALS said that it was seeking a preliminary injunction to prevent further infringement and also stated that it believed it was entitled to triple damages and attorney's fees.

Next earnings report expected in late January.

Business Summary

Allegheny Ludlum is a leading manufacturer of specialty steel and specialty metals and one of the largest domestic producers of stainless steel. The company has three principal product lines: stainless steel, silicon electrical steel, and other specialty steel alloys (including specialty metals). Contributions to sales in recent years:

	1988	1987	1986	1985
Stainless	80%	80%	78%	79%
Silicon electrical	15%	15%	17%	17%
Other specialty steel alloys	5%	5%	5%	4%

Stainless steel products are sold in the form of sheet, strip and plate, as well as stampings and welded tubing. Stainless steel sheet is used in commercial kitchens, fast food restaurants, food processing equipment, chemical processing equipment, chemical process and storage tanks. Stainless steel strip is used in flatware, cookware, dishwashers, ranges, vacuum bottles, and a range of automotive components. Stainless steel plate is used primarily in industrial equipment that requires cleanliness or corrosion-resistant capabilities, including food processing equipment, pulp and paper equipment, chemical equipment, and power generation equipment.

Silicon electrical steel products are used primarily in applications in which electrical conductivity and magnetic properties are important. Users of ALS's silicon electrical steel products include manufacturers of transformers, motors, generators and communications equipment.

ALS produces tool steel, high temperature alloys, electronic and thermostatic alloys, and other special alloys in flat-rolled form. These specialty steel alloys are used primarily in applications that require high strength, hardness, heat resistance and special magnetic, electronic or expansion characteristics.

Principal markets in 1988 included steel service centers (42%), energy (16%), transportation (10%), converters (10%), commercial and domestic products (7%), exports (6%), industrial machinery and equipment (4%), construction and contractor products (3%), communications and electronic equipment (1%), and other (1%).

Finances

In 1980 ALS's senior management and Tippins Machinery Co. purchased ALS from Allegheny International, Inc. and took the company private. At the end of 1986 the company purchased all of its common stock held by Tippins (about 86% of the shares then outstanding) and all of its preference stock for $128 million in cash and $50 million in subordinated notes due 1995. To finance these purchases and refinance $40 million of bank debt the company borrowed $168 million from a group of banks.

ALS went public on May 8, 1987 when underwriters offered 6,265,000 ALS common shares at $25 each, including 5,500,000 for the company and 765,000 for selling shareholders (net of underwriters over-allotment of 939,750 shares, subsequently exercised). Proceeds from the sale together with internally generated funds were used to repay $40 million of a bridge loan, $50 million of senior subordinated notes, and $60 million of term notes.

Capitalization

Long Term Debt: $75,673,000.

Common Stock: 22,399,500 shs. ($0.10 par).
Officers and directors own some 43.7%.
Institutions hold about 45%.

Dec. 18'89	1989					
40⅞	42½-35⅝	11	3.16	7.7%	A	0.35

Summary

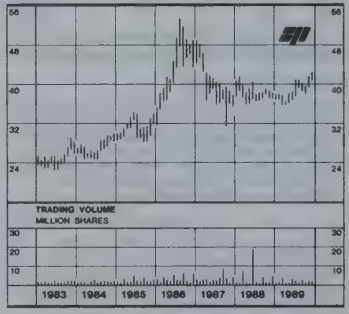
This integrated coal-based electric utility system serves contiguous areas primarily in Pennsylvania, West Virginia and Maryland. With completion of the 40%-owned Bath County pumped-storage hydroelectric project in 1985, no additional generating capacity is expected to be needed until the year 1999. Earnings in recent years have been lackluster because of weak economic conditions in the company's service territories. Flat earnings are expected for 1990.

Current Outlook

Earnings for 1990 are expected to approximate the $3.80 estimated for 1989.

Directors raised the quarterly dividend 2.6%, to $0.79 from $0.77, with the December 1989 payment.

Flat earnings are expected for 1990. AYP should operate more efficiently thanks to a decline in financing costs and efforts to trim overhead expenses. However, these factors are expected to be offset by rate cuts as well as soft economic conditions in many of the local service territories. An aggressive program to attract new businesses could help long term. Separately, construction expenditures (excluding AFUDC) for 1989-91 were expected to total approximately $776 million.



Operating Revenues (Million $)

Quarter:	1990	1989	1988	1987
Mar.	---	590	616	474
Jun.	---	559	504	454
Sep.	---	538	526	522
Dec.	---	---	525	531
	---	---	2,170	1,981

Operating revenues for the nine months ended September 30, 1989 rose 2.5%, year to year, primarily reflecting higher sales to other utilities, partially offset by rate decreases. Net income fell 3.2%. Share earnings were $2.84 on 1.3% more shares, against $2.98.

	E3.80	E3.80	3.96	4.05

Important Developments

Nov. '89— Allegheny estimated its growth rate in electric kwh sales and peak load for the 1988-98 period at 1.9% and 2.0%, respectively. For 1991 AYP projected total system generating capacity of 7,981 mw and a winter peak of 6,567 mw, or reserves equal to 22% of peak. For 1989 the company estimated reserves of 25%, down from the actual level of 31% in 1988.

Sep. '89— The company said that effective September 1 the Virginia PSC approved a $544,000 base-rate decrease. The reduction reflected increased operational efficiencies and growth in sales of electricity in the Potomac Edison units' Virginia service territory. Proceeds from a $70 million offering of first mortgage bonds in August were used to refund two other first mortgage bond issues.

Next earnings report expected in early February.

Business Summary

Allegheny Power System is an integrated electric utility holding company operating in Pennsylvania (44.3% of 1988 revenues), West Virginia (29.0%), Maryland (21.5%), and small adjacent sections of Virginia (3.9%) and Ohio (1.3%). Its subsidiaries, West Penn Power, Potomac Edison and Monongahela Power, serve a highly industrialized area with a population of nearly 2.9 million. Electric revenues in recent years were derived:

Revenues	1988	1987	1986	1985
Residential	29%	32%	34%	28%
Commercial	15%	17%	17%	15%
Industrial	26%	30%	31%	27%
Other	30%	21%	18%	30%

The fuel mix in 1988 was 89% coal, 10% pumped storage, and 1% hydroelectric. Peak load in 1988 was 6,045 mw and system capability at year-end was 7,906 mw, for a capacity margin of 23.5%.

AYP has a 40% interest in the 2,100 mw pumped-storage hydroelectric generating facility in Bath County, Va., completed in December, 1985. The entire project's cost was about $1.9 billion ($772 million for AYP). No additional generating capacity should be needed until the year 1999.

Dividend Data

Dividends have been paid since 1935. A dividend reinvestment plan is available.

Oct. 26'89	1989					
35⅛	40⅜-31¾	10	1.80	5.1%	B	0.88

Summary

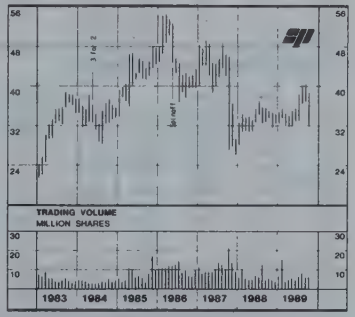
This diversified company provides a broad range of products and services to the aerospace and automotive industries and makes synthetic fibers and plastics. During the past three years ALD has undergone extensive restructuring, including the sale of several operations. Proceeds have been used primarily to repurchase stock, including 27.4 million shares in 1987 and 5.5 million shares in 1988. An extensive cost-cutting program will benefit earnings in 1990.

Current Outlook

Earnings for 1990 are projected at $3.70 a share, up from 1989's estimated $3.56, which includes a $0.16 nonrecurring gain.

Dividends should continue at $0.45 quarterly.

Sales for 1990 should rise slightly. The bulk of the improvement will continue to come from aerospace, reflecting booming commercial markets. A slight gain could develop for automotive as marketing efforts are increased. Engineered materials should be modestly better, assuming a slight gain for housing starts. Overall corporate margins should improve, reflecting the extensive cost-cutting and restructuring moves currently under way and the lessening of problems affecting certain markets in 1989.



Net Sales (Billion $)

Quarter:	1989	1988	1987	1986
Mar.	2.94	2.94	2.64	2.91
Jun.	3.12	3.10	2.85	2.94

Dec.	E0.79	0.70	0.50	0.38
	E3.56	3.10	3.07	3.26

Important Developments

Oct. '89— The company reported that profits from automotive operations declined 67% in the third quarter because of lower vehicle production, foreign exchange losses and investment in antilock brake systems.

Sep. '89— ALD agreed to sell its KDI Composite Technology subsidiary to Wyman-Gordon Co.

Jul. '89— During the second quarter of 1989 ALD recorded a gain equal to $0.16 a share from an insurance settlement received by Union Texas Petroleum.

Jan. '89— The company announced that it planned to expand industrial polyester fiber capacity 10% by the third quarter of 1990.

Next earnings report expected in late January.

Business Summary

Allied-Signal Inc. is the successor to Allied Corp., which acquired The Signal Companies in September, 1985. ALD acquired Bendix Corp. in 1983. Segment contributions in 1988 (operating profits in million $):

	Sales	Profits
Aerospace	40%	$346
Automotive	34%	268
Engineered materials	26%	377
Corporate & unallocated	---	-288

Foreign operations contributed 23% of sales and $123 million in profits in 1988.

Aerospace businesses make primary propulsion and gas turbine engines, avionics, wheels, brakes, controls and other products used in aircraft, spacecraft, missiles, military vehicles and other applications.

Automotive supplies brakes and steering components, friction materials, turbochargers and other items to U.S. and foreign car and truck makers.

Engineered materials includes a wide variety of synthetic fibers, fluorine products, plastics and other specialty materials.

ALD spun off some 35 subsidiaries as The Henley Group in May, 1986. In 1985 ALD sold 50% of Union Texas Petroleum; ALD's interest in UTP was cut to 39% following a public offering of UTP's shares in September, 1987.

Dividend Data

Dividends have been paid since 1920. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

Summary

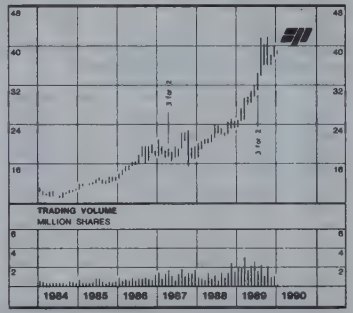
ALLTEL Corp. operates one of the largest telephone systems in the U.S., serving some 1.1 million subscriber lines in 25 states. The company derives a significant portion of its total revenues from nontelephone businesses. Growth has been enhanced in recent years through an ongoing acquisition program, which has included the December, 1988 acquisition of CP National Corp. for approximately 12.9 million (adjusted) common shares.

Current Outlook

Earnings for 1990 are projected at $2.60 a share, compared with the $2.33 estimated for 1989.

The quarterly dividend was raised 10%, to $0.32 from $0.29, with the January, 1990 payment.

Telephone revenues should advance moderately in 1990, reflecting largely increases in customer lines and calling volumes. Telephone earnings should rise, aided by continued improvement in operating efficiencies. Contributions from nonregulated operations should advance, aided by rapid revenue growth from cellular operations and the inclusion of recently acquired businesses.



Tel. Oper. Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	276	264	139	132

Sep.	314	265	147	139
Dec.	---	274	148	141
	---	1,068	576	545

Revenues for the nine months ended September 30, 1989 rose 14%, year to year. Margins widened, and operating income advanced 16%. After a $12.9 million gain on investments and merger expenses in the 1988 period, pretax income increased 6.6%. Following taxes at 32.3%, versus 32.7%, net income increased 7.3%, to $1.72 a share on 4.9% more shares from $1.65 (adjusted).

Important Developments

Oct. '89— The company announced that it exercised its right of first refusal and would acquire the 55% interest that it does not already own in the Aiken, S.C./Augusta, Ga. cellular franchise from Pond Branch Telephone Co., Inc. Terms of the transaction, which was subject to regulatory approval, were not disclosed. AT noted that the Aiken/Augusta Metropolitan Statistical Area (MSA) has a population of about 406,000; combined with its other cellular interests, AT would have 3.8 million "pops" (population adjusted by percent ownership) in MSAs and would be the majority partner in nine markets. The MSA pops, combined with 2.6 million Rural Statistical Area (RSA) pops AT expects to own following the FCC's lottery process, would increase the company's total cellular pops to 6.4 million.

Next earnings report expected in late January.

Business Summary

ALLTEL Corp., with its expanded scope of operations through the December, 1988 acquisition of CP National Corp., is a diversified telecommunications, energy and manufacturing company (electric properties were disposed of in 1988). Revenues and operating income in 1988 were derived as follows:

	Revenue	Income
Telephone operations	69%	90%
Gas & electric	6%	4%
Manufacturing	6%	2%
Supply	14%	2%
Other	5%	2%

At December 31, 1988 Altel's 33 telephone operating subsidiaries provided local service and toll network access to 1,085,000 customer access lines in 25 states. Natural gas service is provided to about 62,000 customers in three states; AT's natural gas requirements are met by regulated gas suppliers.

Unregulated operations include the manufacture of voice and data communications equipment for air traffic control facilities and advance electronic command and control systems for the U.S. Navy. Alltel Supply distributes nationwide telephone equipment and materials. AT operates six cellular mobile telephone systems and has minority interests in nine others. Other operations include the provision of paging services and cable television, and the publication of telephone directories.

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Oct. 19'89	1989					
73⅛	79⅝–55¼	6	---	---	B-	1.04

Summary

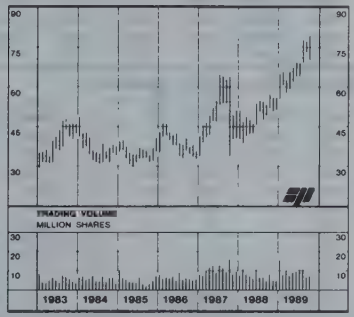
Alcoa, the leading U.S. aluminum producer, is focusing on improving returns in its aluminum operations. In recent years the company has pursued modernization and efficiency programs at various facilities to provide high-quality products for a competitive marketplace. Nevertheless, earnings for 1990 may decrease moderately, reflecting anticipated sluggish economic growth.

Current Outlook

Earnings for 1990 are projected at $9.50 a share, down from 1989's estimated $11.25.

AA's dividend policy calls for payment of a base dividend of $0.40 quarterly, plus 30% of annual earnings over $6.00 a share in the next year's first quarter. The dividend for the first quarter of 1989 totaled $1.52, based on 1988 profits.

Sales for 1990 may decline slightly on expected modest decreases in aluminum shipments and average annual aluminum prices. Primary aluminum plants are likely to operate at reduced annual rates of capacity. With negative operating leverage (the spreading of high fixed costs over fewer units of production) and lower aluminum prices, per-share earnings should decrease moderately, despite anticipated fewer shares outstanding.



Sales & Oper. Revenues (Million $)

Quarter:	1989	1988	1987	1986

Important Developments

Jul. '89— AA said that it would idle a 42,000 metric-ton-a-year aluminum production line at its Wenatchee, Wash. facility. Separately, directors approved the repurchase of up to 10 million shares (11%) of AA's common stock.

Dec. '88— AA reported that new 43-month labor agreements were ratified by its major unions covering some 15,000 employees. The key feature of the agreements was profit sharing, which would be retroactive to January 1, 1988 and would apply through the life of the pact.

Dec. '88— AA's 51%-owned Alcoa of Australia began production from its new gold mine, which was expected to produce about 100,000 ounces in 1989.

Next earnings report expected in late January.

Business Summary

Alcoa is the largest aluminum producer in the U.S. and the second largest in the world. In recent years through modernization and efficiency programs, it has been able to provide high-quality products for a competitive marketplace.

The Metals & Chemicals group manages AA's bauxite, alumina, and aluminum smelting interests in the U.S., Suriname and Jamaica to supply aluminum ingot at the lowest possible cost to AA's fabricating operations.

Packaging Systems is the world's leading supplier of aluminum sheet for beverage cans. Other products include foil packaging and closures, using not only aluminum but also polymers and other packaging materials.

Aerospace and Industrial Products group serves the aerospace, automotive, building and construction, defense, and distribution markets.

In Materials Science, AA operates businesses in separations technology, fiber optics products and systems, high-performance ceramics, and defense related businesses.

The International Group manages AA's sales offices and interests in aluminum companies outside the U.S., including Alcoa of Australia and Alcoa Aluminio, Brazil.

Dividend Data

Dividends have been paid since 1939. A dividend reinvestment plan is available. In January, 1989 AA announced a new dividend policy, under which it would pay a base dividend of $0.40 each quarter. When AA's annual earnings are more than $6 a share, it would pay out 30% of the additional earnings along with the next year's first quarter base dividend.

AMAX Inc.

NYSE Symbol AMX Options on ASE (Mar-Jun-Sep-Dec) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 28'89	1989					
23⅜	29¾-20¾	3	0.80	3.4%	B-	1.42

Summary

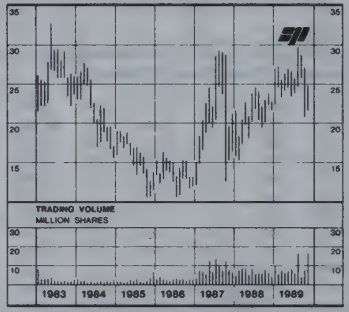
This natural resources firm is engaged in the aluminum, energy, gold and molybdenum businesses. In September, 1989 AMAX allowed its offer to buy all of the outstanding shares of Falconbridge Limited to expire. Falconbridge had accepted a competing offer from Noranda Inc. and Trelleborg AB to purchase all of its shares that they did not already own at a higher price.

Current Outlook

Earnings for 1990 are projected at $3.25 a share, down sharply from 1989's estimated $4.50.

Dividends are expected to continue at $0.20 quarterly.

Sales for 1990 may decrease moderately, reflecting sluggish industrial activity. Profits from Alumax should decline, on expected slight decreases in aluminum prices and shipments. Molybdenum income will probably fall as a result of reduced quotes. However, gold earnings are likely to rise on anticipated higher prices. Energy profits will probably be little changed. With a higher tax rate, net earnings should decline substantially.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	980	917	765	303
Jun.	1,081	1,031	834	311
Sep.	928	998	872	270
Dec.	---	998	912	423
	---	3,944	3,383	1,308

Sales for the first nine months of 1989 rose 1.5%, year to year, largely reflecting strong performances by molybdenum and natural gas. Results were hurt by stock repurchase expense of $41.7 million. and after tax items, net income was down 33%, to $3.52 a share on 4.5% fewer shares from $5.03.

Important Developments

Sep. '89— AMX did not extend its offer to buy all of the outstanding shares of Falconbridge Ltd., a nickel, copper and zinc producer, for C$36⅛ each, or US$2.4 billion. Falconbridge had accepted an offer from Noranda Inc. and Trelleborg AB to purchase all of its shares that they did not already own for C$37 each.

Jun. '89— Alumax Inc. announced plans to begin building a C$1 billion hydroelectric-powered aluminum reduction plant near Quebec City in August, 1989. The facility, which was forecast to be complete in the spring of 1992, was expected to produce 215,000 metric tons of aluminum a year. In December, 1988 owners of the Becancour (Quebec) hydroelectric-powered smelter (24.95%-owned by Alumax) said that they would build a third potline for C$550 million.

Next earnings report expected in mid-February.

Business Summary

AMAX is a natural resources producer. Contributions by business segments:

1988	Sales	Op. Prof.
Aluminum	65%	79%
Coal	16%	11%
Gold	3%	7%
Molybdenum	7%	2%
Oil & gas	1%	1%
Other metals	8%	Nil

Alumax operates numerous fabricating plants, and has joint venture interests in primary aluminum reduction plants in South Carolina, Washington state, Maryland and Canada.

AMAX Coal Ind. produced 37.5 million tons of coal in 1988, nearly 90% of which was sold by long-term contract to electric utilities.

AMX's 87%-owned Amax Gold (AU) has gold interests in the Sleeper mine and Wind Mountain property in Nevada, 28% of a New Zealand mine and 49.7% of Canamax Resources (Can.). Gold output attributable to AU was estimated at 330,000 ounces for 1989, versus 254,180 in 1988.

The Henderson and Climax mines (Colo.) have the capacity to produce 65 million pounds of molybdenum a year. In 1988, the Henderson mine produced 30 million pounds of molybdenum while Climax operations remained suspended.

Amax Oil & Gas (AOG) is a U.S. natural gas producer with reserves equivalent to 410 bcf at year-end 1988. In 1988 AOG acquired SPG Exploration, conventional oil and gas properties of Kaneb Energy Partners and Kaneb Operating Co., and the interests of B & N Petroleum.

Dividend Data

After omission in July, 1985 common dividends were resumed in June, 1988. A "poison pill" stock purchase right was amended in 1989.

4⅜	23⅜-10⅜	9	0.10	0.7%	B+	1.51

Summary

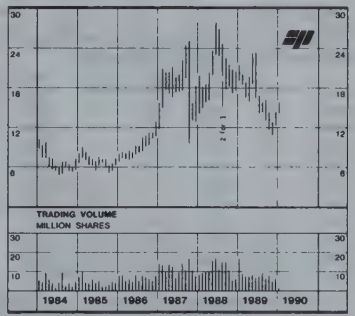
This company is a leading manufacturer of large-scale computers that are compatible with IBM software and hardware and related products and services. Sales are expected to benefit in 1990 from the wider availability of new ESA-compatible mainframes and recently introduced UNIX systems, but earnings should continue to be restricted by price competition and higher manufacturing costs. Fujitsu Ltd. holds a 44% stake.

Current Outlook

Earnings for 1990 are projected at $1.50 a share, versus the $1.40 estimated for 1989.

Dividends should continue at $0.02½ quarterly.

Revenue growth is estimated to be about 10% in 1990. Amdahl should continue to increase its penetration of the IBM 370 market as cost-conscious customers are increasingly willing to consider alternative sources to IBM that offer lower prices and increased functionality. Sales growth should benefit from support of IBM's new operating systems, MVS/ESA, and the introduction of UNIX systems (see Important Developments), but margins are likely to remain under pressure, as competitive pricing continues and new mainframe production is ramped up. AMH has said it may need additional financing in 1990 and beyond in order to meet future cash demands.



Revenues (Million $)

13 Weeks:	1989	1988	1987	1986
Mar.	470	368	319	200
Jun.	471	424	341	209
Sep.	534	465	363	220
Dec.	---	546	483	337
	---	1,802	1,505	966

Revenues for the 39 weeks ended September 29, 1989, advanced 17%, year to year; equipment sales increased 18% and service revenue was up 14%. Gross margins narrowed sharply, restricted by competitive price decreases, trade-in allowances, a stronger U.S. dollar, a provision for future engineering change costs to support IBM's new architecture, and higher manufacturing costs. In addition, a sales force expansion and increased research expenditures led to a 25% decline in net income, to $1.02 a share ($1.01 fully diluted), from $1.36 (no dilution), as restated.

Dec.	E0.38	0.59	0.46	0.28
	E1.40	1.99	1.37	0.42

Important Developments

Nov. '89— AMH eliminated about 400 jobs (about 5% of its total workforce). The reduction was not expected to affect fourth quarter results, because the cost savings were offset by the expense of severance packages. Separately, AMH announced its first series of mainframe computers dedicated exclusively to the UNIX system market. The processors are to be available in January 1990.

Next earnings report expected in late January.

Business Summary

Amdahl Corp. produces large-scale computers (mainframes) that are software and hardware compatible with those of International Business Machines (IBM), the dominant factor in the market. Foreign operations contributed 43% of revenues and 51% of profits in 1988.

AMH sells the 5890 series and the 5990 (first shipped in the second quarter of 1988), which compete with IBM's high-end 3090 series of System/370 mainframes, the most current models of which began shipping in the second half of 1988. AMH also produces high performance direct access storage devices (DASD) for use with large scale computers. The 6100 series began shipping in late 1988.

AMH competes on price/performance, functionality, reliability and service. Its proprietary multiple domain feature (MDF) allows several different operating systems to run simultaneously on a system. AMH also sells UTS, a UNIX-based proprietary operating system that runs independently on 370 systems. In addition, it supplies vector processors, communication systems, communication control processors, software, and educational services.

Fujitsu Ltd. supplies both components and subassemblies for Amdahl's computer systems. The communication control processors, direct access storage devices, and vector processors are each made by Fujitsu to Amdahl's specifications. The supply agreement provides for fixed U.S. dollar prices within a range. Outside that range, any benefits or disadvantages are split equally.

In February 1989, Amdahl acquired privately owned Key Computer Laboratories, a concern with expertise in UNIX systems and scalar technologies, in exchange for 1.5 million shares of AMH common stock. The transaction was accounted for as a pooling of interests.

Dividend Data

Cash dividends were initiated in 1977.

Amerada Hess

NYSE Symbol AHC Options on Phila (Feb-May-Aug-Nov) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 1'89	1989					
42½	44½-31	7	0.60	1.4%	C	0.79

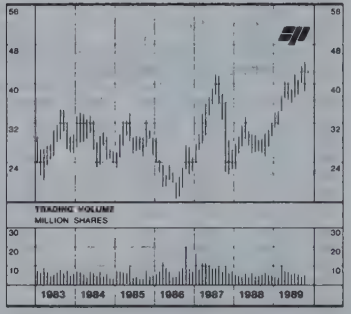
Summary

Amerada Hess is an integrated oil and gas company. AHC has substantially increased its U.S. based natural gas production capacity with the 1989 purchase of Gulf of Mexico properties from Transco Exploration Partners Ltd. The purchase positions the company to exploit expected growth in the U.S. natural gas markets. AHC's earnings historically have been volatile due to the company's use of FIFO inventory accounting, which exaggerates the swings in feedstock costs. Earnings for 1989 will be limited by damage caused by Hurricane Hugo at AHC's principal refinery in the Virgin Islands.

Current Outlook

Share earnings for 1990 are projected at $5.70, up slightly from the $5.65 estimated for 1989. The $0.15 quarterly dividend is the minimum expectation.

Revenues for 1990 are expected to benefit from increased refining volumes and greater natural gas production. However, profits may be limited by potentially soft crude prices. The Virgin Islands refinery, damaged by Hurricane Hugo in September, is expected to be back in full operation by year-end 1989. No additional charges associated with the damaged refinery are expected in 1989 or 1990. Over the longer term, AHC is positioned to be a leading supplier of natural gas in the U.S.



Total Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	1,485	1,262	1,233	1,432
Jun.	1,474	883	1,155	927
Sep.	1,183	925	1,122	780
Dec	---	1,194	1,275	923
	---	4,264	4,785	4,062

Revenues for the nine months ended September 30, 1989 rose 35%, year to year, due to increased crude oil prices, higher refined product prices, and increased refining volumes. As a result of stronger refined product margins (particularly for gasoline), and despite higher interest expense, net income was $405.5 million ($4.99 a share), versus $57.9 million ($0.71).

Dec.	E0.66	0.80	d0.93	0.69
	E5.65	1.51	2.73	d2.60

Important Developments

Oct. '89— AHC reported net income of $51.8 million for 1989's third quarter, versus $15.8 million in the 1988 period. In the third quarter the company recorded a $30.0 million net charge for estimated expenses due to hurricane damage at AHC's Virgin Islands refinery. The refinery, which represents about 95% of AHC's refining capacity, should be back on line by late 1989. In the third quarter refining and marketing operations contributed $33.3 million to net income, including the charge related to the refinery, versus $12.9 million in the 1988 interim. Downstream margins benefited from higher prices and increased volumes. Exploration and production earnings were $37.1 million, versus $17.9 million a year earlier. Upstream profits included a $19.9 million foreign currency gain, compared with a loss of $3.3 million in the 1988 period.

Next earnings report expected in late January.

Business Summary

Amerada Hess is an integrated oil and gas company. In August, 1989 AHC acquired oil and gas properties in the Gulf of Mexico from Transco Exploration Partners Ltd., for $865.6 million. AHC said current natural gas production from the acquisition was averaging about 150 million cubic feet a day with the potential of possibly 250 million cubic feet a day within two years. In September, 1989 AHC purchased North Sea oil and gas properties from Panhandle Eastern Corp. for $267.2 million.

Sales	1988	1987	1986
Petroleum products	68%	71%	66%
Crude oil	21%	19%	20%
Natural gas	7%	6%	7%
Other	4%	4%	7%

Refinery runs averaged 296,000 barrels a day in 1988 (371,000 b/d in 1987) and refined products sold 379,000 b/d (411,000 b/d). Operating refineries are located at St. Croix, U.S. Virgin Islands (capacity of 545,000 b/d) and Purvis, Miss. (30,000 b/d).

In 1988 net crude and natural gas liquids production averaged 144,303 b/d (136,244), of which 47% was in the U.S., and natural gas production 506.3 million cubic feet a day (531.5); 56% U.S. Net proved reserves at the 1988 year-end stood at 572 million barrels of crude oil and liquids (471); 36% U.S., and 2,136 billion cubic feet of natural gas (2,018); 36% U.S.

Dividend Data

Common dividends, paid since 1922, were suspended in March, 1986 and resumed at a lower rate with the June, 1987 declaration. A dividend reinvestment plan is available.

Summary

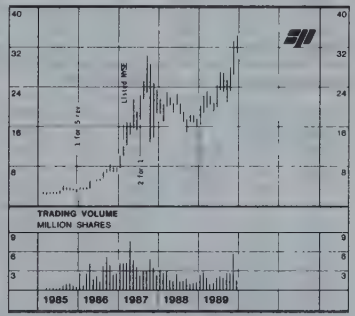
This company is a significant North American gold producer with interests in seven mines in Canada, the southwestern U.S. and Alaska. Further earnings growth is likely in 1990 on anticipated increased gold output, reflecting the continuation of a multi-year $395 million expansion at the Goldstrike property in Nevada. A 2-for-1 stock split is pending.

Current Outlook

Assuming gold market prices rise moderately, earnings for 1990 are projected at $0.80-$0.90 a share, up from 1989's estimated $0.65, before giving effect to the pending 2-for-1 split.

Dividends on the pre-split shares are expected to continue at C$0.07½ semiannually.

Revenues for 1990 may advance significantly, mainly on an expected increase in gold production (550,000 ounces, versus 1989's estimated over 440,000); 1990's gold realizations under ABX's hedging program will probably be modestly below the relatively high average annual gold price realized in 1989. Gold realizations in the first nine months of 1989 averaged $429 an ounce, down from $450 in the year-earlier period. While diminished inflation expectations could have a temporary negative effect on the gold market, increased financial fears and possible stabilization of forward gold sales by producers would keep gold quotes in their recent uptrend. With expected slightly lower unit costs and the greater ABX gold output, earnings should advance substantially.



[2]Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	46.6	27.4	24.4	20.2
Jun.	45.6	31.9	26.3	23.8

Dec.	---	49.8	36.8	24.5
	---	147.5	119.7	89.8

Revenues for the first nine months of 1989 advanced 46%, year to year, reflecting increased gold sales (322,067 ounces, versus 217,049). With lower gold prices and heavier unit operating costs ($236 an ounce, versus $229), and after a $3.2 million pretax writedown of Valdez Creek, a $3.3 million loss on sale of part of an investment in LAC Minerals and a $3.6 million gain from an investment in Consolidated Gold Fields all in 1989, net income was up 26%, to $23.7 million ($0.39 a share) from $18.8 million ($0.32; both unadjusted).

	E0.65	0.52	0.51	0.37

Important Developments

Dec. '89— ABX completed its public offering of three million common shares (unadjusted), for net proceeds of C$106 million. In November ABX said that exploration had identified gold mineralization in an area known as the Purple Vein, which is approximately one mile north of the Betze deposit. Stepout drilling on 200 foot centers would be carried out during the rest of 1989 and into 1990 to determine the overall size and significance of this resource.

Next earnings report expected in early March.

Business Summary

American Barrick (ABX) has interests in seven North American gold mines. Its share of 1988 output was 341,000 ounces, versus 225,109 ounces in 1987, and was expected to rise to over 1,000,000 ounces by 1992.

In 1987 ABX completed acquisition of the Goldstrike (Nev.) property. Gold output was 119,418 ounces in 1988, versus 1987's 40,144. In January, 1989 ABX began a $395-million plan to raise output to over 180,000 ozs. in 1989, 300,000 in 1990, 375,000 in 1991, and 900,000 in 1992. At January 1, reserves were 16.1 million ounces, comprised of 12.3 million of Post surface and Betze reserves and 3.8 million of Deep Post reserves.

ABX' Mercur mine (Utah) is an open-pit operation. The project comprises 13,400 acres of mining claims, a significant portion of which has not been explored. The addition of an autoclave circuit for treatment of refractory ore allowed for production of 115,390 ounces in 1988 at a cash cost of $235 an ounce, versus 1987's 108,278 ounces at $216. Under an agreement with an ABX unit, Gold Standard Inc. is entitled to a 15% net profits interest in Mercur. In August, 1989 GS filed an amended suit seeking return of title to the mine; establishment of a constructive trust (a legal device to gather assets and return them to their rightful owner) that would include ABX' profits from Mercur, as well as any assets acquired or developed with the profits from the mine; and punitive damages. A trial was set to begin in February, 1990.

ABX' Holt-McDermott gold mine (Ontario) commenced production in June, 1988. Output was 23,848 ounces of gold for 1988 at a cash cost of $268 an ounce, and was estimated at 70,000 ounces for 1989.

ABX owns 100% of the Camflo mine (Quebec) and earns 40% of operating profits from the adjoining Malartic Hygrade property. ABX' share of gold output in 1988 was 30,888 ounces at a cash cost of $272 an ounce. In January, 1989 ABX and Malartic agreed to explore targets on the Orion property, an extension of ground to the north, at a cost of C$2.5 million. Results of this exploration could extend both companies' operations.

The 26.25%-owned Pinson mine (Nev.) consists of open pit operations. ABX' 1988 share of gold production was 21,612 ounces at an average cash cost of $157 an ounce.

ABX owned 50% (45% since December, 1988) of the Renabie underground mine (Ontario), which produced 19,408 ounces of gold in 1988 for ABX' account at a cash cost of $353 an ounce.

In October, 1989 mining operations at ABX' 23.125%-owned Valdez Creek (Alaska) placer mine were suspended temporarily pending a recovery in the gold price. The mine provided 10,436 ozs. of gold as ABX' share in 1988 at an average cash cost of $451/ounce.

As of December 31, 1988 ABX' interest in total gold reserves at its seven properties was 18.5 million ounces, including proven and probable reserves of 17.1 million.

American Brands

NYSE Symbol AMB Options on ASE (Mar-Jun-Sep-Dec) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 6'89	1989					
68½	81⅞-61¼	11	2.72	4.0%	A	1.11

Summary

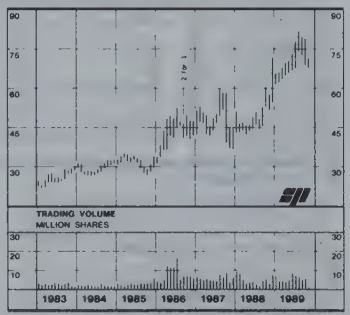
This diversified company is a significant producer of cigarettes and liquor and other consumer products in the U.S. and abroad. Core businesses also include office products, hardware, and life insurance. In July, 1988 AMB sold E-II Holdings to the Riklis family for $950 million cash and $250 million in preferred stock, and purchased five E-II companies for $645 million. Higher cigarette prices, cost cutting in acquired businesses and continued debt reduction should allow a good earnings gain in 1990.

Current Outlook

Earnings for 1990 may rise to $7.15 a share from the $6.35 estimated for 1989.

The quarterly dividend was raised 11%, to $0.68 from $0.61, with the October, 1989 declaration.

Profits should remain in an uptrend in 1990, although momentum is likely to slow somewhat. Margins should widen on higher cigarette prices in the U.S. and abroad, and on continued cost cutting programs in distilling. Expansion of office, hardware and home products businesses abroad and continued debt reduction should also be positive factors aiding growth prospects.



Revenues[1] (Billion $)

Quarter:	1990	1989	1988	1987
Mar.	---	3.25	3.13	2.22
Jun.	---	2.77	2.72	1.96
Sep.	---	3.06	3.13	2.49
Dec.	---	---	3.00	2.48
	---	---	11.98	9.15

Revenues for the nine months ended September 30, 1989 rose only 0.3%, year to year, due largely to the Southland Life divestiture. Operations benefitted from higher cigarette prices and consolidation of office products facilities. With interest expense and tax provision lower, income from continuing operations rose 11%, to $4.76 a share from $4.09, which excludes income from discontinued operations of $0.41.

Dec.	E1.80	E1.59	1.35	1.16
	E7.15	E6.35	5.44	4.42

Important Developments

Oct. '89— Lower exchange rates for foreign currencies, primarily the British pound, decreased revenues by $120 million and share earnings by $0.06 in the 1989 third quarter and by $360 million and $0.15 a share for the nine months.

May '89— Southland Life Insurance Co. was sold for approximately $434 million in cash. Proceeds were used in part to reduce AMB debt.

Jul. '88— AMB sold E-II Holdings Inc. (acquired February, 1988 for $1.1 billion for $950 million cash and $250 million of preferred stock. The sale excluded hardware and office products assets which AMB purchased. AMB bought back 17 million common shares acquired earlier by E-II Holdings.

Next earnings report expected in late January.

Business Summary

American Brands derived its 1988 sales and operating profits as follows:

	Sales	Profits
Tobacco products	59%	63%
Life insurance	8%	14%
Distilled spirits	6%	8%
Other consumer products	27%	15%

Tobacco brands include Pall Mall, Lucky Strike, Tareyton, Carleton and Malibu cigarettes in the U.S. (7.0% market share in 1988) and Benson & Hedges, Silk Cut and Berkeley cigarettes in the U.K. (41.6%) made by Gallaher Ltd. At 1988 year-end the company was a defendant in some 60 product liability lawsuits related to cigarettes.

Distilled spirits include Jim Beam, Old Grandad, Old Taylor, Old Crow, Gilbeys and DeKuyper.

Hardware includes Master Lock, Dexter Lock, and Swingline staplers and fasteners. Office products comprise supplies and stationery by ACCO World, Swingline, Wilson Jones and a Gallaher subsidiary. Other includes Acushnet golf balls, Foot-Joy golf shoes, and optical goods in the U.K. Financial services comprise Franklin Life Insurance Co. The company sold the Southland Life insurance unit in early 1989.

Dividend Data

Dividends have been paid since 1905. A dividend reinvestment plan is available. A new "poison pill" stock purchase right was adopted in 1987.

53⅛	60⅜-45⅝	15	1.35	2.5%	A-	1.17

Summary

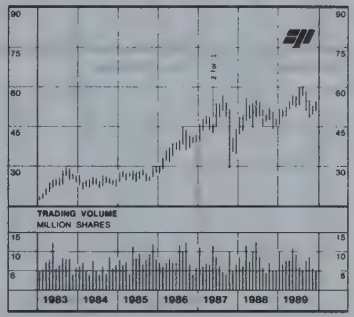
This company's broadly based operations include the production of pharmaceuticals and medical products, pesticides, animal health care products, specialty chemicals and consumer products. Earnings for 1990 are expected to rebound significantly from the depressed $3.10 a share indicated for 1989, which was reduced by dilution from recently acquired Praxis Biologics, Inc. and a nonrecurring writeoff associated with the Shulton subsidiary in Brazil.

Current Outlook

Earnings for 1990 are expected to rebound to the $4.20 a share area, up from the depressed $3.10 estimated for 1989.

An increase in the dividend, presently at $0.33¾ quarterly, is likely during the first half of 1990.

Sales for 1990 should show further progress, aided by continued strength key pharmaceutical, medical, agricultural and consumer lines. New products such as Suprax antibiotic and Pursuit herbicide will also make important contributions. Profitability should be helped by alleviation of 1989's herbicide carryover problems, reduced dilution from the Praxis Biologics acquisition and the absence of 1989's nonrecurring Shulton writeoff.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986

	E3.10	3.41	2.89	2.18

Important Developments

Dec. '89— The company announced that earnings for the fourth quarter of 1989 would be reduced $0.25 a share as a result of unauthorized borrowings and unreported losses at the Shulton subsidiary in Brazil. ACY added that reflecting this provision and dilution of about $0.33 a share from the recent acquisition of Praxis Biologics, earnings for 1989 were expected to be between $3.10 and $3.15 a share.

Nov. '89— American Cyanamid completed the acquisition of Praxis Biologics, Inc. for about 4.6 million common shares. A maker of highly purified vaccines, Praxis had revenues of about $6.1 million and sustained a net loss of some $10 million in 1988. Also in November, ACY sold through underwriters 1,250,000 of its treasury shares.

Next earnings report expected in early February.

Business Summary

American Cyanamid is a diversified company with interests in four major areas. Contributions by business segment in 1988:

	Sales	Profits
Medical	40%	52%
Agricultural	23%	30%
Chemicals	24%	9%
Shulton consumer	13%	9%

Foreign operations accounted for about 38% of sales and 59% of profits in 1988.

Lederle Laboratories produces prescription and non-prescription pharmaceutical products (including antibiotics, antiarthritics, ophthalmic drugs, anticancer agents, generics, vitamins, and vaccines), and Davis & Geck surgical sutures, wound closure devices and other hospital products.

The Agricultural division makes insecticides, herbicides and fungicides, and plant regulators; animal feed and health products; and nitrogen fertilizers. Pesticides are sold under the Scepter, Prowl, Counter, Pursuit and other names.

Chemicals include industrial water treating, mining and paper chemicals, molding compounds and resins, and enhanced oil recovery products; adhesives and composites materials, process chemicals, and catalysts; fine and rubber chemicals, elastomers, plastic additives, textile chemicals and resins, dyes, acrylic fibers, and industrial safety equipment.

Consumer products include personal care and grooming products, household maintenance and cleaning aids, and insect control products.

Dividend Data

Dividends have been paid since 1934. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

American Electric Power

NYSE Symbol AEP Options on CBOE (Feb-May-Aug-Nov) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 27'89	1989					
30⅜	31-25¾	10	2.40	7.9%	A-	0.50

Summary

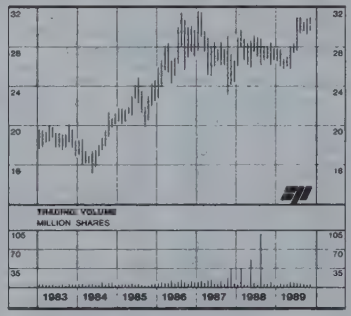
Subsidiaries of this Ohio-based electric utility holding company serve an extensive service territory from Indiana and Michigan to Kentucky, Tennessee, West Virginia and Virginia. Recent earnings have been restricted by a return to more normal summer weather in 1989, and an increase in operating expenses. The longer-term outlook is strengthening due to the planned completion of the construction program in the early 1990s and the company's ability to market its power throughout the Midwest and South and to the East Coast.

Current Outlook

Share earnings for 1990 are projected at $3.30, up from the $3.20 estimated for 1989.

The dividend was raised 3.4%, to $0.60 quarterly from $0.58, with the July, 1989 declaration. AEP's improved prospects bode well for dividend growth for the foreseeable future.

Share earnings for 1990 will benefit from continued, although slower, economic growth. The longer-term outlook is enhanced by the company's proximity to power deficient East Coast utilities.



Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	1,263	1,219	1,233	1,280
Jun.	1,197	1,103	1,144	1,155
Sep.	1,297	1,287	1,261	1,211
Dec	---	1,232	1,150	1,198
	---	4,841	4,788	4,843

Based on a brief report, revenues for the 12 months ended September 30, 1989 rose 4.9%, year to year, owing to higher system and off-system sales. Higher operating expenses narrowed profit margins. However, in the absence of the earlier period's write-off of unrecoverable costs of the Zimmer plant, net income advanced 10%. Share earnings were $3.16, versus $2.87.

Common Share Earnings ($)

Dec.	E0.86	0.83	0.46	0.78
	E3.20	3.24	2.60	2.62

Important Developments

Oct. '89— AEP said that the major factors in the year-to-year earnings decline in 1989's third quarter were the return to more normal summer weather across the seven states served by the company compared with the unseasonably hot summer of 1988, as well as an increase in operating expenses. The company reported total kwh sales for the nine months ended September 30, 1989 advanced 9.0%, year to year. System sales were up fractionally (0.5%), as small gains in both the commercial and industrial sectors were mostly offset by lower residential sales. Residential sales fell 2.0%, while commercial sales rose 1.8%, and industrial sales increased 1.5% on continued economic growth. Off-system sales to the less profitable wholesale market were up 46% in the 1989 period.

Next earnings report expected in late January.

Business Summary

American Electric Power is an integrated electric utility holding company serving portions of Ohio, Indiana, Michigan, Virginia, West Virginia, Kentucky and Tennessee with a population of about 7 million. Electric revenues by customer class:

Revenues	1988	1987	1986	1985
Residential	32%	33%	32%	30%
Commercial	20%	21%	20%	19%
Industrial	30%	30%	29%	30%
Wholesale	15%	15%	18%	18%
Other	3%	1%	1%	3%

System and off-system peak load in 1988 was 22,349 mw and capability totaled 22,704 mw for a capacity margin of 1.6%. Coal accounted for some 86% of capacity in 1988, nuclear 9% and other 5%. The company is vulnerable to onerous acid rain legislation.

AEP is adding to its coal capacity through its 1,300 mw Rockport 2 plant, scheduled for completion in late 1989, and the 25.4% owned Zimmer plant. Zimmer, originally designed as a nuclear station, was abandoned in 1984. In 1985 AEP wrote off $0.35 a share for a portion of unrecoverable costs. Following the settlement with General Electric Co., AEP wrote off $0.36 a share in 1987 for the balance of unrecoverable costs. Conversion of the plant to a 1,300 mw coal unit is proceeding and remains on schedule for service in mid-1991. Total costs have been capped at $3.6 billion. AEP does not anticipate building additional base load capacity for some 15 years.

AEP's most recent acquisition was Columbus Southern Power Co. in 1980. AEP can consider possible mergers that would offer customer and load diversity. Specifically, prospective companies would be summer peaking utilities that serve a residential economy.

Dividend Data

Dividends have been paid since 1909. A dividend reinvestment plan is available.

Nov. 24'89	1989					
34⅞	39⅜-26⅜	13	0.92	2.6%	A-	1.36

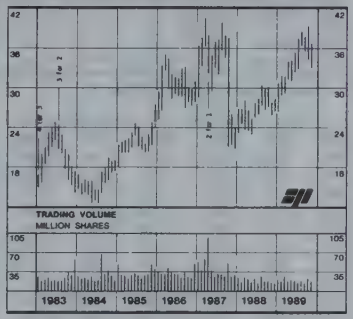
Summary

A leader in travel-related services (TRS), American Express is also active in international banking, investment services and insurance. The company has expanded its financial services network through acquisitions, including Investors Diversified Services (IDS), Lehman Brothers, and E.F. Hutton. In July, 1989 AXP swapped its remaining Fireman's Fund common shares for FFC preferred stock valued at $342 million.

Current Outlook

Earnings for 1990 could reach $3.25 a share, compared with the $2.80 estimated for 1989. In November, 1989 directors raised the dividend 9.5%, to $0.23 quarterly from $0.21.

Despite a slowing economy, profits should advance in 1990. While a cooling economy would likely result in reduced consumer spending, interest rates would probably fall as well, leading to lower funding costs. In addition, a higher savings rate would help IDS and Shearson. TRS should perform well as card and cheque usage increase. IDS should benefit from an increased asset base and growing sales of insurance and investments products. Emphasis on private banking should help banking operations. Shearson could continue under pressure. AXP's swap of Fireman's Fund common for preferred stock should add about $0.05 a share to earnings.



Total Revenues (Billion $)

Quarter:	1989	1988	1987	1986
Mar.	5.87	5.33	4.15	3.40
Jun.	6.36	5.56	4.60	3.62
Sep.	6.50	5.70	4.20	3.55
Dec.	---	6.35	4.82	4.08
	---	22.94	17.77	14.65

Total revenues for the nine months ended September 30, 1989 rose 24%, year to year, (1988 restated). Gains at TRS, IDS, and ISC offset lower profits at Shearson and the banking units, and net income from continuing operations advanced 17%. Share earnings were $2.09, versus $1.79, before income from discontinued operations of $0.10 in the 1988 period.

Dec.	E0.71	0.52	d0.24	0.63
	E2.80	2.31	1.20	2.46

Important Developments

Oct. '89— AXP reported that TRS's 17% earnings advance in the third quarter was aided by 12% growth in cards in force and a 12% gain in charge volume. IDS posted a 19% increase in third quarter profits, reflecting strong mutual fund sales and higher asset levels. Banking operations profits fell 50%, due to a $110 million addition to loan loss reserves; at September 30 the bank's long-term LDC loans were about 91% covered by reserves. Information services gained 38%. Shearson reported $66 million in profits (AXP's portion was $41 million), versus a year-earlier loss of $43 million, aided by a $37 million gain from the sale of the LEMCO institutional money management business. In July America Express exchanged its remaining 9.5 million Fireman's Fund Corp. (FFC) common shares for 8.55 million shares of new FFC preferred stock valued at about $342 million, and yielding $26.5 million.

Next earnings report expected in late January.

Business Summary

American Express is a major financial service company principally engaged in providing travel-related, investment, international banking, and insurance services worldwide. Industry segment contributions in 1988:

	Revs.	Profits
Travel related services	32%	70%
Shearson Lehman	45%	5%
American Express Bank	8%	11%
IDS	15%	14%

The Travel Related Services segment is comprised of the Payment Systems division, which includes travelers cheques and the American Express card, a major credit card with about 31 million cards in force; the Travel Services division, which provides vacation and leisure travel services and corporate card and business travel support; and other activities, including publishing, data processing services, direct mail merchandise services, and life insurance.

American Express Bank Ltd. and its affiliated Trade Development Banks, acquired in 1983, provide a range of private banking services to high net worth individuals and their businesses through a network of 103 offices in 42 countries.

Shearson Lehman Hutton (62% owned) is one of the largest full-line investment service firms serving U.S. and foreign securities and commodities markets.

IDS Financial Services provides financial products and planning services to individuals, businesses and institutions.

NYSE Symbol AGC Options on CBOE (Jan-Apr-Jul-Oct) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Jan. 3'90	1989-90					
32¾	38½-29½	10	1.50	4.6%	A	0.96

Summary

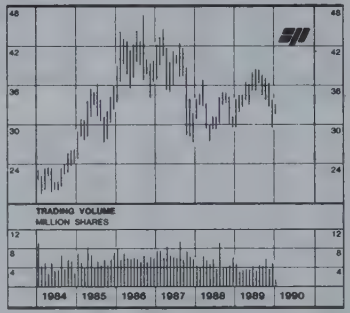
American General is a financial services holding company whose major sources of revenues and earnings are life and health insurance. As part of a plan to reduce cyclicality and concentrate its distribution efforts, AGC sold its property-liability unit in May, 1989 for $740 million and its group life and health division in January, 1990 for up to $195 million.

Current Outlook

Excluding realized investment gains or losses in both years, earnings of $3.75 a share are expected for 1990, up from $3.25 a share estimated for 1989.

A modest increase in the $0.37½ quarterly dividend is possible.

Following the sale of its group life and health insurance segment (in January, 1990) and property-liability operations (in May, 1989), AGC is now able to concentrate on less cyclical areas of the insurance market, as planned. As such, solid growth is expected for the home service life area, with the attendant rise in invested assets to benefit earnings. Increased demand for investment oriented insurance products, especially tax-qualified annuities, will lead to higher special markets growth. Increased contributions are expected from the enlarged consumer credit business. A higher tax rate could reduce these gains, but share repurchases will aid share earnings comparisons.



Review of Operations

Revenues for the nine months ended September 30, 1989 rose 15%, year to year, reflecting a 7.6% increase in premiums, a 12% gain in net investment income, and a 30% advance in finance charges. Benefits and expenses were also up 15%, and pretax income advanced 14%. After taxes at 32.1%, versus 21.5%, net income fell 1.0%. Share earnings were $2.42 on fewer shares, against $2.38, including realized capital gains of $0.15 versus $0.18, but excluding a $0.59 gain on disposal of discontinued operations in 1989 and $0.21 income from such operations in 1988.

Common Share Earnings[1] ($)

Sep.	0.83	0.78	0.95	0.93
Dec.		0.84	1.03	0.97
		3.22	3.82	3.60

Important Developments

Jan. '90— AGC said it completed the sale of its group life and health insurance operations to Associated Insurance Companies for up to $195 million. The purchase price consists of $175 million in cash, a $10 million contingent note, and participation in certain earnings of up to $10 million. This follows the May, 1989 sale of its p-c operations, and marks AGC's departure from the agency-broker marketing system and is part of a plan to consolidate distribution efforts to streamline operations, increase cross selling opportunities, and reduce overhead. The company has also been actively repurchasing its common stock. From December 31, 1988 through November 2, 1989, AGC reacquired approximately 6.3 million of its common shares. Another one million shares were reacquired from American Financial Corp. under a plan covering the buyback of some 10.6 million shares held by American.

Next earnings report expected in late January.

Business Summary

American General is one of the largest insurance-based financial services holding companies in the U.S. In 1988 AGC announced plans to divest its property-liability (sold in May, 1989) and group insurance (sold in January, 1990) operations. These operations were classified as discontinued operations. Pretax income from continuing operations in recent years ($ million):

	1988	1987	1986
Home service	$402	$415	$408
Special markets	161	104	128
Fin./Real estate	190	162	140
Real. inv. gains	38	12	197
Int. & expenses	-250	-172	-171
Eliminations	-7	-1	-1

AGC's home service segment emphasizes the direct sale and service of both permanent and term life insurance to customers, in their home, by employee agents. The home service companies also provide health insurance products. Life insurance in force in this segment at year-end 1988 was $42.2 billion.

The special markets segment consists of The Variable Annuity Life Insurance Co. (VALIC) and AGC's ordinary life insurance companies. VALIC provides fixed and variable tax-qualified annuity products on a group and individual basis. The ordinary life companies provide whole-life, interest-sensitive, term and annuity products. At year-end 1988 life insurance in force totaled $40.6 billion.

The Finance/Real Estate segment primarily emphasizes consumer finance and real estate investment and development. Other activities include the sale of credit-related insurance products and mortgage lending. In 1988 AGC acquired the consumer finance unit of Manufacturers Hanover Corp. for about $685 million in cash and other consideration.

Dividend Data

Dividends have been paid since 1929. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1989.

Summary

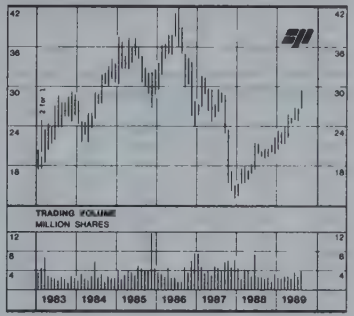
Earnings of this major manufacturer of greeting cards and related social expression merchandise are recovering following several years of fiercely competitive industry conditions. Future prospects are enhanced by a number of corrective measures taken to improve profitability.

Current Outlook

Earnings for the fiscal year ending February 28, 1990, are expected to advance to about $2.00 a share, from the $1.38 reported for 1988-9.

The $0.16½-a-share quarterly dividend is expected to be raised within the next several quarters.

Revenues for the fiscal year ending February 28, 1990, should rise about 10%, boosted by firmer pricing, new product introductions and growing popularity of the company's products. Margins are expected to widen considerably, reflecting abatement of a lengthy price war among the major industry players and a number of cost-saving measures instituted in 1988-9. The company's longer-term prospects are also quite favorable.



Total Revenues (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
May	290	303	263	244
Aug.		265	250	227
Nov.		388	371	364
Feb.		319	315	291
		1,275	1,199	1,126

Total revenues for the quarter ended May 31, 1989 declined 4.4%, year to year, reflecting the absence of certain businesses and timing differences of shipments. Costs and expenses were well controlled, and net income rose 13%.

Important Developments

Aug. '89— AGREA launched a new 90-card line, called Couples, devoted to the full spectrum of romantic relationships and aimed particularly at the aging baby-boom generation. Separately, the company said it would close its Brigham City, Utah distribution center (one of four U.S. distribution centers) by the end of the year because new technology at several other centers enable the company to provide improved service to retail customers now served by the Utah facility.

Apr. '89— The company said that restructuring charges during the year ended February 28, 1989, reduced net income by $12.0 million, or $0.37 a share. During the year, the company refocused its worldwide business operating strategies in order to improve competitiveness and enhance future earnings prospects.

Next earnings report expected in late September.

Business Summary

American Greetings Corporation is believed to be the second largest manufacturer of greeting cards and among the four largest producers of gift wrappings in the U.S. and Canada. It also produces a line of giftware items and candles and licenses a family of character properties. Sales in recent fiscal years were derived from:

	1988-9	1987-8
Everyday cards	40%	39%
Holiday cards	25%	24%
Gift wrap & party goods	17%	17%
Consumer products	8%	10%
Stationery and miscellaneous	10%	10%

About 19% of total revenues and 21% of operating profits for the 1988-9 fiscal year were from foreign sources, primarily Mexico, Canada and Europe. Sales to the company's five largest customers in 1988-9 accounted for about 17% of total sales.

The company also operates several smaller business units. An independent licensing division, established in 1981, has created a number of characters licensed to more than 200 companies for product marketing and more recently featured in a television series. Plus Mark produces Christmas promotional products such as gift wrap, ribbon, bows and boxed Christmas cards. AG Industries produces cabinet fixtures. SMD Industries manufactures picture frames and stationery products. Carlton Cards produces greeting cards, invitations, correspondence products, gift wrap and party goods.

104¾	109-79¾	15	3.90	3.7%	A+	0.89

Summary

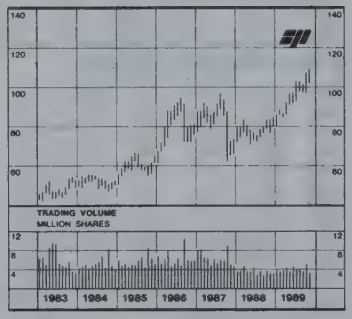
This leading manufacturer of ethical and proprietary drugs, food products and household products has established a long record of growth in earnings and dividends which should continue over the foreseeable future. The long-awaited acquisition of A.H. Robins, a leading drug producer now operating under Chapter 11, is expected to be completed by year-end 1989 for a total of some 8,480,000 AHP shares for all RAH shares and the payment of $2.3 billion to satisfy Dalkon Shield claimants.

Current Outlook

Earnings for 1990 should rise to the $7.70 a share area from 1989's estimated $7.00.

An increase in the $0.97½ quarterly dividend is likely in early 1990.

Bolstered by the planned inclusion of A.H. Robins, sales for 1990 are projected to reach $6.6 billion, up from the $5.3 billion indicated for 1989. Volume gains are anticipated in principal health care and food & household products lines, aided by new products and line extensions. Robins is expected to make an immediate positive contribution to AHP because of cost synergies and tax savings.



Net Sales (Million $)

Dec.	E1.79	1.63	1.47	1.34
	E7.00	6.38	5.73	5.18

Important Developments

Nov. '89— AHP announced that it expected to complete the acquisition of A.H. Robins (RAH) by year-end 1989, following the refusal of the Supreme Court to grant further hearings in the Robins bankruptcy case. In connection with the acquisition, $2.3 billion will be paid out to two trusts to satisfy Dalkon Shield claims against RAH, and AHP will issue a total of about 8,480,000 AHP common shares for all RAH common shares outstanding. The Dalkon Shield trusts are an integral part of RAH's reorganization plan and, after the trusts are funded, neither AHP or RAH will have any further connection with them. A maker of pharmaceutical and consumer products such as Robitussin, Dimetapp and Chapstick, Robins had sales $934 million in 1988.

Next earnings report expected in mid-January.

Business Summary

American Home Products' business segment contributions in 1988 were:

	Sales	Profits
Health care products	75%	85%
Food & household products	25%	15%

Foreign operations accounted for about 31% of sales and 23% of profits in 1988.

Health care items include prescription drugs, consumer health care products, and medical supplies and diagnostic products. Prescription drugs (47% of 1988 sales) include Triphasal oral contraceptives, Premarin estrogen replacements, Inderal and Isordil cardiovasculars, Ativan and Serax benzodiazepine tranquilizers, and infant nutritionals sold under the S-26 and Nursoy names. Other drugs include antiarthritics, analgesics, anti-inflammatories, antibiotics and antihistamines. Consumer health care items (17%) include Advil and Anacin analgesics, Primatene asthma medication, Dristan, Preparation H for hemorrhoids, and the Today contraceptive sponge.

Medical supplies and diagnostic products (11%) include needles and syringes, catheters, enteral pumps and feeding sets, thermometers, synthetic dressings, diagnostic kits and other items.

Food products (12%) encompass Chef Boyardee items, Gulden's mustard, Jiffy-Pop popcorn and other items. Household products (13%) include Woolite, Black Flag insecticides, Wizard deodorizers, Easy-Off oven cleaner and Pam cooking spray.

Summary

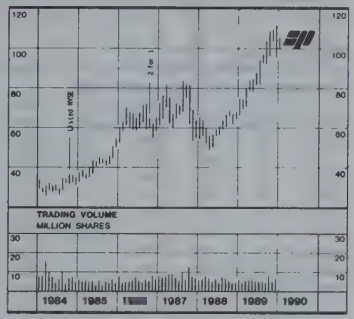
Operating in more than 130 countries, American International Group is one of the world's leading insurance organizations, providing property, casualty, marine, life and financial guarantee insurance. AIG also provides diversified financial services. The company's underwriting record continues to be superior to that of the overall industry, reflecting its adherence to strict underwriting standards. Higher earnings are expected for 1990.

Current Outlook

Excluding "fresh start" tax benefits and realized investment gains or losses in both years, net earnings for 1990 are estimated at $8.25 a share, compared with $7.60 anticipated for 1989.

The $0.12 quarterly dividend is the minimum expectation.

Solid p-c underwriting performance and strong results from the life unit should lead to higher earnings in 1990. While most commercial lines have come under pricing pressures, AIG's leadership position in specialty insurance lines and services, where competition is less severe, yields a degree of protection from the current p-c down-cycle and premiums should experience moderate growth. Underwriting performance may suffer slightly, but should approximate breakeven. AIG's diversified foreign life operations should continue to perform well. Further gains are expected from the financial services unit.



Review of Operations

Revenues for the nine months ended September 30, 1989 rose 10%, year to year, reflecting premium growth in most lines, a strong increase in net investment income, and higher realized capital gains. Following well controlled expenses, pretax income was up 19%. After taxes at 19.6%, versus 16.9%, net income rose 16%, to $6.18 a share from $5.36, restated.

		7.14	5.74	4.04

Important Developments

Nov. '89— AIG noted that earnings for the first nine months of 1989 benefited from growth in most segments. This was accomplished despite insured losses totaling $45 million arising from Hurricane Hugo. Losses from the California earthquake will be reflected in fourth quarter earnings; their impact is not expected to be as great. By segment: general insurance operating profits were 127% higher in the first nine months as a 15% rise in net investment income helped offset an 18% drop in underwriting profits. The combined ratio deteriorated slightly to 99.6% from 99.4%. (A combined ratio of below 100% indicates an underwriting profit.) Life operations posted a 17% gain, due mainly to continued growth in the Far East. Financial services income more than doubled to $124 million, while agency and service fee income fell 11%.

Next earnings report expected in early February.

Business Summary

American International Group is a holding company whose subsidiaries engage in property, casualty, marine and life insurance underwriting throughout the U.S. and in some 130 foreign countries. AIG also provides a variety of financial services.

Pretax oper. inc.	1988	1987	1986
General insurance	66%	64%	58%
Life insurance	25%	28%	34%
Agency oper.	3%	4%	6%
Fin. services	6%	4%	2%

Operations outside North America accounted for 37% of revenues and 44% of operating income in 1988.

General insurance written premiums totaled $8.5 billion in 1988 and were derived: commercial casualty 53%, commercial property 8%, foreign 21%, reinsurance, pools and associations 13%, personal lines 4% and mortgage guaranty 1%.

AIG's general insurance operations are multiline property-casualty companies. The Domestic General-Brokerage division deals principally with insurance brokers representing major industrial and commercial clients. The Agency division provides coverage to small and medium-size businesses and writes selected personal lines. Financial service operations include interest rate and currency swaps, cash management, premium financing, and private banking.

Life insurance subsidiaries offer a wide range of individual and group life, annuity and accident and health policies. Operations outside the U.S. accounted for about 78% of life premiums and 93% of the segment's operating income.

Summary

On October 26, 1989 IMA Holdings purchased 63 million AMI common shares (about 86% of the total outstanding on a fully diluted basis) through a revised tender offer at $26.50 in cash. IMA Holdings is a company formed by Harry Gray, Mel Klein & Partners L.P. and First Boston Investments, Inc. Under terms of the merger agreement, the remaining AMI common shares will be converted into common shares of IMA Holdings, representing about 20% of all IMA shares to be outstanding after the merger.

Current Outlook

Share earnings (for AMI as a separate entity) for the fiscal year ending August 31, 1990 could recover from the depressed $0.85 a share estimated for fiscal 1989.

AMI is precluded from paying common stock dividends under its acquisition agreement with IMA Holdings.

Net operating revenues for fiscal 1990 are projected at about $2.8 billion, up from the $2.6 billion estimated for fiscal 1989, aided by improvement in hospital utilization trends and rate increases. Profit comparisons should benefit from the better volume and the absence of the heavy nonrecurring costs sustained during fiscal 1989.

Net Oper. Revenues² (Million $)

Quarter:	1988-9	1987-8	1986-7	1985-6
Nov.	647	742	708	805
Feb.	678	766	708	862
May	720	812	734	908
Aug.	---	791	732	893
	---	3,111	2,882	3,468

Revenues for the nine months ended May 31, 1989 declined 12%, year to year, reflecting the September, 1988 sale of 36 hospitals. Profits were hurt by rising costs, asset writedowns and the absence of a large nonrecurring gain taken in fiscal 1988. Net income fell 51%, to $0.56 a share from $0.98 (before a net special gain of $0.19).

Cash Tender Offer

Oct. 26 '89— IMA Holdings purchased 63 million common shares of AMI (about 86% of AMI's shares outstanding on a fully diluted basis) through a cash tender at $26.50 a share. IMA Holdings is a company formed by Harry Gray, Mel Klein & Partners, L.P. (an LBO fund in which the Pritzker family of Chicago are major investors) and First Boston Investments, Inc. IMA had first proposed to purchase 68.8 million AMI shares at $28 a share, but subsequently lowered its bid in early October. Under the revised terms, IMA plans to effect a merger with AMI in which the remaining common shares of AMI will be converted into common stock of IMA Holdings, representing 20% of IMA's common stock to be outstanding immediately after the merger. The financing for the revised transaction includes $285 million in equity. Debt financing for the transaction has been arranged with Chemical Bank, six other banks and First Boston Securities Corp.

Business Summary

American Medical International presently owns and operates a chain of 78 acute care and psychiatric hospitals in some 15 states and several foreign countries. The company also provides contract management services for others on a fee basis. In September, 1988 the company sold 36 acute care hospitals to Epic Healthcare Group, Inc., a newly formed employee stock ownership plan (ESOP).

As of May 31, 1989 AMI owned and operated 49 acute care hospitals with 11,393 beds in the U.S., located in California (11), Texas (9), Florida (9), and 11 other states (mostly in the Sunbelt). Admissions and patient days at these hospitals in fiscal 1988 were estimated at about 300,000 and 1.8 million, respectively. Domestic hospitals have an average bed size of 232. Medicare payers accounted for an indicated 35% of admissions in fiscal 1988, Medicaid 6%, HMOs and PPOs 19%, and private payers 40%. In the U.S., AMI also owns and operates six psychiatric hospitals in four states with a total of 767 beds.

Overseas, AMI owns and operates 20 acute care facilities with a total of 2,255 beds. These include 13 acute care hospitals in the U.K. operated by AMI Healthcare (65% owned), and other acute care hospitals in Switzerland, Greece, Spain, and Singapore. AMI Healthcare also operates three psychiatric units. The company also provides contract management services for hospitals in the U.S., Canada and Spain.

Dividend Data

Dividends have been paid since 1965. The acquisition agreement with IMA Holdings precludes the payment of common dividends. The most recent payment was $0.18 on May 3, 1989.

Summary

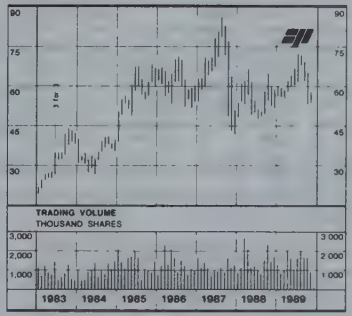
American Stores is one of the nation's leading retailers, operating combination drug/food stores, super drug centers, drug stores and food stores. The company operates some 1,900 food and drug stores in 40 states. The high interest expense associated with the $2.5 billion acquisition of Lucky Stores in June, 1988 and the inability to complete the integration of Lucky and Alpha Beta supermarkets due to ongoing litigation have restrained earnings in fiscal 1989-90, but improvement is expected in 1990-91.

Current Outlook

Earnings for the fiscal year ending January 31, 1991 are projected at $3.50 a share, versus an estimated $2.50 in fiscal 1989-90.

The $0.25 quarterly dividend is the minimum expected.

Sales for fiscal 1990-91 will increase moderately, reflecting greater volume slightly offset by the divestiture of stores in Northern California. Margins should widen substantially if the company is allowed to complete the integration of Lucky and Alpha Beta stores. Growth in operating profits should continue in the Osco Drug division. Interest expense should begin to decline. Share earnings will reflect the conversion of preferred shares into common.



Net Sales (Billion $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Apr.	5.21	3.60	3.45	3.40
Jul.	5.38	4.55	3.54	3.50
Oct.	5.27	4.94	3.47	3.43
Jan.	---	5.39	3.81	3.69
	---	18.48	14.27	14.02

Sales for the nine months ended October 29, 1989 rose 24%, year to year, reflecting the Lucky acquisition; comparable store sales advanced 6.1%. Higher interest expense was partially offset by gains from the sale of certain assets and leasehold interests. Pretax income declined 9.8%. After taxes at 54.0%, versus 50.2%, net income was down 17%, to $1.84 a share from $2.02.

	E2.50	2.54	4.19	3.79

Important Developments

Nov. '89— The California Attorney General modified a preliminary injunction blocking the merger of the company's Alpha Beta and Lucky supermarket chains in California. The modification allows the combination of 23 Alpha Beta units in Northern California with Lucky Stores operations under the condition that about 13 Alpha Beta supermarkets in the same trade area be sold. The preliminary injunction blocked plans to integrate Alpha Beta operations in California with Lucky Stores, pending decisions related to antitrust litigation brought against the company by the State of California. The U.S. Supreme Court has agreed to decide whether or not the State of California could require that the $2.5 billion June, 1988 acquisition of Lucky Stores be dismantled.

Next earnings report expected in late February.

Business Summary

American Stores is one of the nation's largest retailers. As of January 28, 1989 the company was operating 1,917 retail units in 39 states (versus 1,460 units a year earlier), consisting of combination drug/food stores, super drug centers, drug stores and food stores. Most of the additional stores in fiscal 1988-9 came with the acquisition of Lucky Stores Inc. in June, 1988.

The company conducts all of its activities through its wholly owned subsidiaries: American Superstores, Inc., comprised of Acme Markets, Inc., Jewel Food Stores, Star Market and Jewel Osco; American Food and Drug, Inc., comprised of Skaggs Alpha Beta and Buttrey Food-Drug; American Drug Stores, Inc., a nationwide chain under the Osco Drug and Sav-on names; Lucky Stores, Inc. and Alpha Beta Co.

Capital expenditures for fiscal 1988-9 amounted to $500.5 million (including Lucky Stores since June 2, 1988). The company plans to spend about $2.5 billion on capital improvements over the next five years. By the end of 1988, Acme completed 119 major remodels, and ended the year with a total of 292 stores. In addition, beginning in 1988 Skaggs Alpha Beta embarked on a program to remodel 45 of its stores over three years and remerchandise its remaining 40 stores. Future plans for Osco and Sav-on include continued active expansion of the company into existing and new markets along with the remodeling of existing stores.

Summary

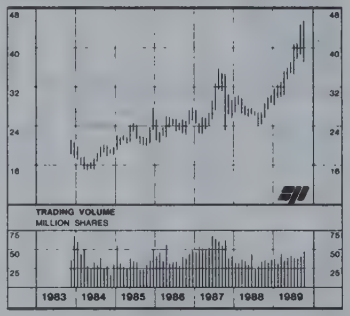
AT&T's operations consist primarily of the provision of long distance communications services and the manufacture, sale and service of telecommunications equipment. The company took a $6.7 billion charge in the 1988 fourth quarter as part of a plan to accelerate the modernization of its network, resulting in a net loss for the year. Earnings have rebounded sharply during the first nine months of 1989.

Current Outlook

Earnings for 1990 are projected at $2.95 a share, compared with the $2.50 a share estimated for 1989.

The $0.30 quarterly dividend could be raised by mid-1990.

Revenues for 1990 are expected to moderately increase, primarily reflecting growth in calling volume, offset partly by lower rates; sales of products should be higher; rental revenues should continue to decrease. Margins should widen, aided by improved efficiencies in the company's long-distance communications operations, and as a result of improved contributions from product sales.



Net Revenues (Billion $)

Quarter:	1989	1988	1987	1986
Mar.	8.66	8.39	8.12	8.71
Jun.	9.26	8.80	8.40	8.42

	E2.50	d1.55	1.88	0.21

Important Developments

Oct. '89— AT&T said that it amended its management pension plan to make more managers eligible for pension payments and make those payments more generous. Managers with at least five years of service would have five years added to their age and length of service for pension purposes. The number of employees eligible to retire with immediate pension benefits would nearly double to 34,000. The retirement option was expected to increase 1989 fourth quarter expenses, but those costs would be offset by other items, including an expected gain on the sale of holdings in Olivetti & C., S.p.A. for shares in Compagnie Industriali Riunite S.p.A. Earlier, AT&T offered to acquire the stock of ISTEL, a British information technology services company, for 180 million pounds sterling, or about $280 million. ISTEL had pretax income of $14 million in 1988 on $145 million in revenues.

Next earnings report expected in late January.

Business Summary

AT&T provides interexchange and international telecommunications services and makes, sells, rents, and services telecommunications equipment and general purpose computers. Revenues in recent years were derived:

	1988	1987	1986
Sales of services	59%	59%	56%
Sales of products	32%	30%	30%
Rental revenues	9%	11%	14%

Through its End-User Organization, AT&T provides long-distance communications services throughout the U.S. International communications services are provided to more than 200 nations and territories via undersea cable and satellite transmission facilities. AT&T also makes information movement and management products and systems for business and consumers, including a range of customer premises equipment, data communications and computer products and the networking arrangements to link them.

The End-User Organization is divided into functional groups including: the Business Markets Group, which addresses the network needs of large businesses; the Data Systems Group, which develops data communications and computer products for sale through its own sales force and authorized dealers; and the General Markets Group, which handles two end-user markets-consumers and small businesses.

AT&T Network Systems manufactures switching equipment, transmission systems, cable and wire products, and operations systems for AT&T, local exchange carriers and others. AT&T Microelectronics manufactures integrated circuits and other electronic components.

AT&T Federal Systems manufactures special design products and systems for sale to the Federal Government. AT&T International markets the company's products in foreign markets. The company participates in a number of international marketing and manufacturing joint ventures. Bell Laboratories designs and develops new products and carries out fundamental research.

Dividend Data

Dividends have been paid since 1881. A dividend reinvestment plan is available.

Amt. of Divd. $	Date Decl.	Ex-divd. Date	Stock of Record	Payment Date

Summary

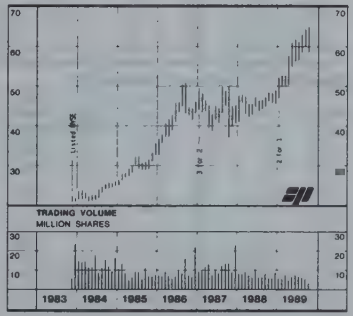
Ameritech (American Information Technologies), which was spun off from AT&T in 1984, is the fifth largest telephone holding company in the U.S., based on 1988 revenues. AIT provides service in parts of five upper-Midwestern states. Over the longer term, earnings are expected to benefit from new service offerings and investments in nonregulated businesses.

Current Outlook

Earnings for 1990 are projected to approximate $4.80 a share, compared with the $4.55 estimated for 1989.

The $0.73 quarterly dividend is likely to be raised with the December, 1989 declaration.

In 1990, revenues from telephone operations are likely to increase modestly, as continued moderate growth in customer lines and increased demand for network services is partly offset by rate cuts. Revenues from cellular and other unregulated units are likely to continue to advance at a strong pace. Margins may widen slightly as the positive effects of increased efficiences and improved profitability from unregulated operations are partly offset by the effects of rate cuts.



Revenues (Billion $)

Quarter:	1989	1988	1987	1986
Mar.	2.50	2.42	2.30	2.29
Jun.	2.55	2.48	2.37	2.35
Sep.	2.55	2.51	2.42	2.35
Dec.	---	2.50	2.45	2.38
	---	9.90	9.54	9.36

Revenues for the nine months ended September 30, 1989 increased 2.8%, year to year. Margins narrowed and operating income was up 0.4%. Other income was sharply lower, and after a 4.7% rise in interest expense, pretax income decreased 4.0%. Following taxes, net income fell 2.3%, to $3.37 a share from $3.40 (adjusted for a 2-for-1 stock split in January, 1989).

	E4.55	4.55	4.24	3.94

Important Developments

Oct. '89— AIT said the 1.9% rise in 1989 third quarter revenues reflected increased calling volumes and growth from unregulated businesses, partly offset by rate refunds and reductions. The decrease in earnings for the first nine months of 1989 reflected a 1988 second quarter gain of $42.1 million from the sale of AIT's interest in Cantel, a Canadian cellular company, and the 1988 third quarter sale of Applied Data Research. Excluding those results, net income for the nine months rose 1.4%, while share earnings were up 2.7%.

Jul. '89— AIT announced a corporate realignment effective July 15, pursuant to which the Bell Group was integrated with Mobile Communications and Ameritech publishing as a strategic business unit. The changes were intended to speed up the decision making process and increase efficiencies.

Next earnings report expected in mid-January.

Business Summary

American Information Technologies Corp. (known as Ameritech) is the fifth largest telephone holding company in the U.S., based on 1988 revenues. The company's telephone subsidiaries, Illinois Bell, Indiana Bell, Ohio Bell, Michigan Bell, and Wisconsin Bell, furnish telephone service within designated areas in their respective states, and provide customers access to long distance carriers. At September 30, 1989 the company served 15,775,000 customer access lines, up 2.6% from 15,373,000 a year earlier.

The company also provides advanced mobile communications services using cellular technology. Ameritech Mobile does business through wholly-owned subsidiaries which are either general or limited partners of partnerships holding FCC licenses.

As of September 30, 1989 the unit had more than 209,000 cellular lines in service, up 62% from a year earlier, in 22 different markets. Ameritech Mobile's markets include Chicago, which became the first U.S. market for cellular service in October, 1983, Milwaukee, Detroit, Cincinnati, Dayton, and Columbus.

The company provides directory advertising and publishing through Ameritech Publishing, and provides customer premises telecommunications equipment and related products through Ameritech Communications and through subsidiaries of its five telephone operating companies. Ameritech Credit Corp. arranges financing for customers who lease telecommunications products and services from Ameritech companies.

Ameritech Development develops and invests in new products, services, technology and other opportunities on behalf of other Ameritech companies. Ameritech Services provides operational support to the telephone subsidiaries.

In October, 1988 AIT sold Applied Data Research, Inc., a subsidiary that made a comprehensive line of systems software products for IBM computers. AIT had acquired ADR in January, 1986.

The company jointly owns, with the six other Bell regional holding companies, Bell Communications Research, which provides technical assistance and consulting services to the companies.

Dividend Data

Dividends were initiated in 1984. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1988.

Next dividend meeting: late Dec. '89.

Finances

Over the three year period to December 31, 1991, AIT plans to invest approximately $6.2 billion for new plant construction, with about 40% of this amount directed to investment in digital and fiber-optic technology.

To comply with the 1982 consent decree with the DOJ, AT&T on January 1, 1984 spun off its 22 Bell operating companies in the form of seven regional holding companies, one of them being Ameritech.

Ames Department Stores

NYSE Symbol ADD Options on Pacific (Jan-Apr-Jul-Oct)

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Dec. 8'89	1989					
10⅜	20-10⅛	NM	0.10	0.9%	A+	1.17

Summary

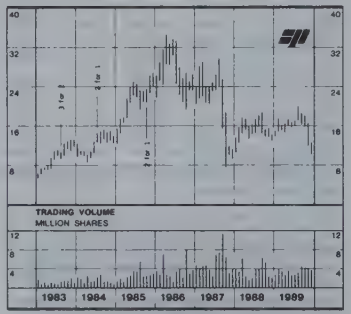
Ames is the fourth largest discount retailer in the U.S. with annual sales of more than $5 billion, following the October, 1988 acquisition of Zayre Corp.'s troubled discount department store division. ADD now operates nearly 700 discount department stores in 20 states and the District of Columbia. Poor sales, problems in the conversion of newly acquired Zayre stores and much higher interest expense resulted in a large loss for the first nine months of fiscal 1989-90; profitability should resume in the fourth quarter.

Current Outlook

Earnings for the fiscal year ending January 31, 1991 are projected at $1.60 a share, versus an estimated $0.35 in fiscal 1989-90.

The quarterly dividend should remain at $0.02½.

Revenue growth in fiscal 1990-91 should reflect the acquisition of Zayre discount department stores and modest gains from comparable store sales. Margins should recover in the absence of the costs of integrating Zayre stores and an improved in-stock position. Interest expense will begin to decline.



Total Sales[1] (Million $)

13 Weeks:	1989-90	1988-9	1987-8	1986-7
Apr.	1,108	494	448	376
Jul.	1,219	551	494	445
Oct.	1,197	547	513	472
Jan.	---	1,771	657	595
	---	3,363	2,112	1,888

Sales for the nine months ended October 28, 1989 rose more than 2.2-fold, reflecting the acquisition of Zayre discount department stores. Margins narrowed, and following much higher interest expense, the pretax loss was $37.9 million, in contrast to income of $40.0 million. After tax credits of $15.3 million, versus taxes of $15.6 million, the net loss was $22.6 million, ($0.86 a share, before an extraordinary loss of $0.13), versus net income of $24.4 million ($0.65).

Jan.	E1.21	0.50	0.45	0.11
	E0.35	[2]1.20	0.88	0.73

Important Developments

Nov. '89— ADD said that results in the third quarter of fiscal 1989-90 were below expectations, partially due to unseasonably warm weather and a softening economy. In addition, in-store conversion and related restocking of inventory disrupted operations in the Zayre stores. Although November sales in the Zayre stores were below last year by about 15%, ADD expected an increase in earnings in the fourth quarter and a profit for the full year. In October the company sold $155 million of 7½% convertible subordinated debentures; proceeds of about $151 million were used to repay a portion of outstanding debt.In September Ames sold its G.C. Murphy Co. variety store operations for $77.6 million; proceeds of about $55 million were used to reduce debt.

Next earnings report expected in mid-February.

Business Summary

Ames, through the October, 1988 acquisition of Zayre Corp.'s 392 discount store division, became the fourth largest discount retailer in the U.S. The company acquired Zayre Corp.'s discount department stores for about $778 million, consisting of cash, $200 million subordinated notes, and 6% preferred stock (convertible into 8 million shares of ADD common at $25 a share). As of January 28, 1989 the company operated 678 discount department stores and 172 variety and other stores in 20 states and the District of Columbia.

The Ames discount stores are generally located in rural communities which are not served by large retail stores. Some of the Ames stores, however, are located in high traffic suburban sites and in smaller cities. The Zayre discount department stores, which span the eastern half of the U.S., are clustered primarily in key metropolitan areas and suburban strip shopping centers. Zayre stores serve middle and lower income customers and have a strong franchise in certain inner city locations.

Of the 392 Zayre store acquired, 257 stores will be converted to Ames, 58 urban locations will retain the Zayre name and 77 stores were closed. Other divisions include: Crafts & More, stores specializing in home craft and hobby supplies; and Mathews & Boucher, a wholesale sporting goods business. The company sold its G.C.Murphy variety store operations in September, 1989.

Dividend Data

Dividends have been paid since 1970. A "poison pill" stock purchase right was adopted in 1986. A dividend reinvestment plan is available.

Summary

This diversified industrial company manufactures both capital goods and components used in consumer products. In December, 1988 AME completed the spin-off of several divisions as a newly-formed corporation, Ketema, Inc., the stock of which was distributed to AME shareholders. In August, 1989 AME acquired General Electric's Instrument Products Operation for $110 million in cash. Earnings improved slightly in the first half of 1989.

Business Summary

AMETEK, Inc. is a diversified manufacturer of capital goods and components used in consumer products. The process equipment segment was spun off to shareholders in late 1988. Business segment contributions from continuing operations in 1988:

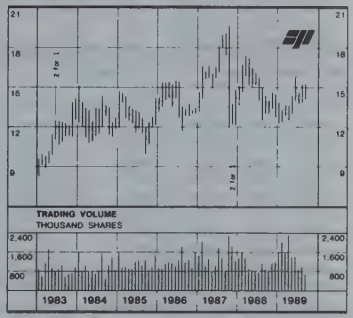
	Sales	Profits
Electro-mechanical	41%	42%
Precision instruments	29%	26%
Industrial materials	30%	32%

International sales accounted for 15% of total sales in 1988.

The Electro-mechanical segment includes the production of fractional horsepower electric and brushless D.C. motors (for floor care, computer and business machines), permanent magnetic motors for high-speed computer peripheral equipment, electronic power supplies, electric motors used primarily in home and commercial vacuum cleaners, and computer-driven graphics plotters and digitizers.

Precision instruments include temperature and pressure gauges, process control instruments and recording devices, automotive, aircraft and industrial instruments, testing equipment, calibration instruments, electronic tachometers, springs, semiconductor components, and combustion analyzing instruments, and instruments used in analyzing fiber optic communications.

Industrial materials include thermoplastic compounds; color concentrates for plastics; cartridge filters and molded thermoplastics; foam packaging material; heat resistant silica-based insulation material; corrosion-resistant heat exchangers; tanks and piping for process systems; composite materials components; and high-purity metals and alloys in powdered and strip form.



Important Developments

Aug. '89— AME announced that it had acquired General Electric Co.'s Instrument Products Operation (since renamed Ametek Areospace Products, Inc.) for $110 million in cash. The acquired unit, with annual sales of over $100 million, is a leading producer of aircraft and jet engine sensors, aircraft cockpit instruments and flight reference systems, and airborne electronics such as signal conditioning and monitoring equipment. It employs more than 1,000 people.

Dec. '88— AME announced that the spin-off of several of its divisions to newly-formed Ketema, Inc. was completed. The divisions spun off included most of the process equipment segment (discontinued in mid-1988) along with several other divisions across the company. These units had sales of $181 million through November 30, 1988 and incurred an operating loss of $4.6 million. AME stockholders received one share of Ketema and one right for every 10 shares of AME common stock held.

Next earnings report expected in late October.

Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	144.1	128.9	143.9	141.3
Jun.	145.2	133.4	155.3	146.2
Sep.		131.7	156.6	138.9
Dec.		126.4	164.4	142.0
		520.5	620.1	568.5

Sales for the six months ended June 30, 1989 advanced 10% from the year-earlier level, as restated to exclude operations spun off in 1988's fourth quarter. Margins widened slightly on cost-containment programs and additional productivity from new, more efficient automated manufacturing facilities. However, other income fell substantially, and income from continuing operations was up 5.8%, to $0.50 a share from $0.48. Results for the 1988 period were before a $0.14 loss from spun off operations and an $0.08 gain from the cumulative effect of an accounting change.

47	50½-36⅞	15	1.90	4.0%	A	0.65

Summary

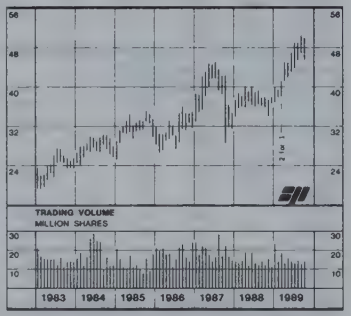
This worldwide petroleum and chemical company acquired Canada-based Dome Petroleum Ltd. in September, 1988 and in December, 1988 purchased oil and gas properties from Tenneco Inc. The assets add significantly to AN's natural gas reserves and position the company as a leading supplier of natural gas in North America. Profit comparisons in 1989 will be impaired by higher costs from the Dome acquisition, restructuring costs, and the absence of 1988's nonrecurring income. The longer-term earnings outlook is enhanced by expected asset divestitures and greater natural gas and downstream volumes.

Current Outlook

Share earnings for 1990 are projected at $3.80, up from 1989's estimated $3.20, which includes about $0.45 of nonrecurring charges related to restructuring and environmental programs.

The $0.47½ quarterly dividend is the minimum expectation.

Revenues for 1990 are expected to benefit from increased natural gas production and greater downstream volumes. Year-to-year profit comparisons will be enhanced by lower debt service expense and the absence of 1989's nonrecurring charges. AN can be expected to divest marginal and peripheral operations in order to concentrate on projected growth in the U.S. natural gas markets.



Gross Oper. Revenues[1] (Billion $)

Quarter:	1989	1988	1987	1986
Mar	6.47	5.63	5.07	5.85
Jun	6.69	5.99	5.53	4.84
Sep.	6.47	5.76	5.64	4.44
Dec	---	6.17	5.85	4.91
	---	23.55	22.09	20.03

Revenues for the nine months ended September 30, 1989 rose 13%, year to year, reflecting mostly increased natural gas production. Restructuring costs and higher production and financing expenses associated with the Dome Petroleum acquisition, plus the absence of 1988's net nonrecurring gain, led to a 24% drop in net income. Share earnings were $2.50, against $3.28.

Dec.	E0.70	0.72	0.74	0.33
	E3.20	4.00	2.66	1.46

Next earnings report expected in late January.

Important Developments

Oct. '89— Earnings comparisons through September 30, 1989 were restricted by costs for downstream environmental programs. Additionally, earnings in 1989 were limited by restructuring costs at Canadian operations and the U.S. upstream segment and computer operations. The company recorded sharply higher debt service stemming from the Dome Petroleum acquisition. In order to improve near-term profitability, AN intends to pare down the debt related to the Dome acquisition and possibly sell a minority interest in the unit. The company is also exploring the possible sale of its downstream operations in the United Kingdom. Third quarter operating earnings were limited by soft margins in the downstream segment and weak pricing for commodity chemicals. Higher crude oil prices sustained U.S. upstream earnings.

Business Summary

Amoco (formerly Standard Oil Co. of Indiana) is a large integrated petroleum company historically having a domestic operating base, but now well represented in the search and production of petroleum outside the U.S. The merger with Dome Petroleum Ltd., effective September 1, 1988, and the December 8, 1988 purchase of certain Tenneco Inc. properties (primarily natural gas) substantially boosted AN's reserve base.

Profits	1988	1987	1986
U.S. petr. expl. & prod.	19%	28%	-3%
Foreign petr. expl. & prod.	12%	31%	29%
Ref., mkt., & trans.	43%	16%	48%
Chemicals	33%	31%	35%
Other	-7%	-6%	-9%

Net production of crude oil and natural gas liquids averaged 809,000 barrels a day in 1988 (802,000 in 1987), net production of natural gas 3.2 billion cubic feet a day (3.0), refinery runs 944,000 b/d (895,000), and refined product sales 1,120,000 b/d (1,021,000 b/d).

Net proved reserves at the end of 1988 stood at 2,798 million barrels of crude oil and natural gas liquids (2,580) and 19,500 billion cubic feet of natural gas (15,400).

Dividend Data

Dividends have been paid since 1894. A dividend reinvestment plan is available.

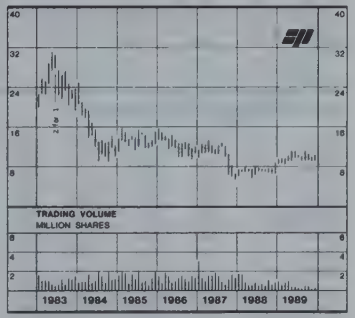
Summary

Analogic manufactures high-speed, high-precision measurement, signal translation and data manipulation equipment. The company's products are primarily incorporated by OEMs into systems used in medical, industrial and scientific applications.

Business Summary

Analogic Corporation designs, manufactures and sells standard and customized high-precision data conversion and signal processing equipment, which is primarily incorporated by OEMs into systems used in medical, industrial and scientific applications. Contributions to sales in recent fiscal years were:

	1989	1988
Medical technology products	56%	57%
Advanced technology products	17%	19%
Test & measurement products	10%	11%
Industrial technology products	17%	13%



Analogic's medical imaging data acquisition systems are incorporated into advanced X-ray equipment known as computer-assisted tomography (CAT) scanners. It also manufactures electronic subsystems for ultrasound imaging equipment and magnetic resonance imaging equipment.

Advanced technology products consist of analog-to-digital (A/D) and digital-to-analog (D/A) converters and supporting modules. A/D devices convert continuously varying analog signals into the numerical digital form required by computers, while D/A converters transform computer output in digital form into the analog signals required by process control equipment. It also makes high-speed digital signal processors such as array processors.

Test and measurement products use much of the same technology as the medical and industrial equipment. These instruments include digital multimeters (which measure the basic parameters of voltage, current and resistance) and digital counters.

Industrial technology products include digital panel instruments, which are incorporated in precision thermometers, blood analyzers and automatic test equipment; and industrial data acquisition and conversion systems, which are used in static and dynamic weighing, measurement of pressure, force or temperature, and engine power measurement.

Research and development expenditures totaled $17,362,000 (12.0% of revenues) in fiscal 1989, compared with $17,627,000 (13.1%) the year before.

In fiscal 1989, Analogic's three largest customers were Siemens A.G. (accounting for 21% of sales), 3M Corp. (11%) and General Electric (10%). Foreign sales, primarily to Europe and Asia, made up 41% of the fiscal 1989 total.

Through a joint venture with Massapea, Inc., the company holds a 50% interest in a hotel built on 7.5 acres of land owned by Analogic at its Peabody, Mass., corporate headquarters site (the hotel opened in September 1989). It also is partners with China-based Kejian Corp. in Analogic Scientific, which manufactures medical imaging systems in China.

Next earnings report expected in early March.

No cash dividends have been paid.

1. Incl. gain from sale of joint-venture interest. d-Deficit.

Finances

In August 1989, the company boosted its stake in Camtronics Ltd. (a medical imaging equipment manufacturer), to 65%, from 18%, through the conversion of $1.2 million of debentures and the purchase of the 33% interest held in that concern by Analogic's chairman (for $600,000).

During fiscal 1989, the company repurchased 919,700 of its common shares at an aggregate cost of $7.0 million. Analogic repurchased 1,732,000 shares during fiscal 1988 for a total of $12.2 million and 1,772,000 shares in fiscal 1987 for $19.6 million.

During the first quarter of fiscal 1989, the company sold its remaining 25% stake in the Medical Electronics Laboratories (MEL) venture to Siemens Medical Systems, recognizing a net gain of $4.6 million, and giving Siemens a 100% interest in the unit. In fiscal 1988 and 1987, Analogic had recorded net gains of $6.1 million and $8.3 million, respectively, from the sale of 25% interests in MEL.

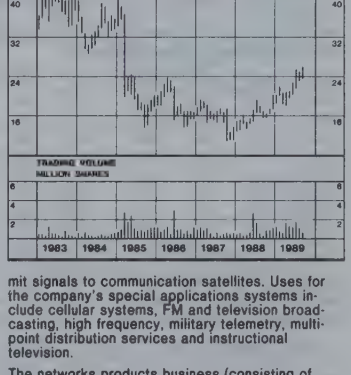
Summary

Andrew manufactures specialized antennas and transmission lines used in telecommunications systems throughout the world. In fiscal 1987, following two acquisitions, the company also became a major defense equipment supplier. Sales have increased sharply in recent periods.

Business Summary

Successor to a partnership formed in 1937, Andrew Corporation designs, manufactures and sells specialized antennas and transmission lines used in telecommunications systems throughout the world. In fiscal 1987, the company formed the Government Group (which accounted for some 27% of fiscal 1988 net sales) to supply specialized antenna, radar and communications reconnaissance systems for the military and defense markets. Contributions to sales in recent fiscal years were:

	1988	1987
Microwave antenna systems	35%	41%
Coaxial cable systems and bulk cables	29%	28%
Earth station antennas	7%	8%
Special antennas	12%	14%
Network products	5%	---
Defense electronics	12%	9%



Contributions by geographic area in fiscal 1988:

	Sales	Profits
United States	70%	39%
Europe	13%	31%
Canada	11%	22%
Australasia	6%	8%

Microwave antenna systems are manufactured for use in land-based microwave radio networks, used by the telecommunications industry for telephone, telex, video and data transmission. Other users of microwave systems include pipeline companies, electric utilities, railroads, governmental agencies and the military.

Coaxial cables are used to carry radio frequency signals while waveguides (tubular conductors) have their greatest application at higher frequencies, although they are also employed in UHF broadcasting. Semiflexible cables and waveguides are sold under the trademark HELIAX.

Earth station antenna systems are used at land-based terminals to receive signals from, and transmit signals to communication satellites. Uses for the company's special applications systems include cellular systems, FM and television broadcasting, high frequency, military telemetry, multipoint distribution services and instructional television.

The networks products business (consisting of companies acquired in fiscal 1988) provides connection devices to data communications customers for use in corporate communications systems.

In fiscal 1987, the company acquired Scientific Communications Inc. and Kintec Corp., defense electronics firms.

Important Developments

Sep. '89— Agreement in principle has been reached whereby the company would acquire Texas-based KMW Systems Corp for $5.25 a share in cash, or about $12 million. Separately, in July, Andrew purchased a minority interest in Alliance Acquisition Corp. for $12.5 million, using short-term borrowings under an existing $30 million credit line.

Sep.		75.7	66.9	61.0
		253.5	223.2	197.7

Net sales for the nine months ended June 30, 1989, advanced 20%, year to year, reflecting strength in the company's core businesses, particularly coaxial cable. Overall, costs and expenses increased at about the same pace as sales and pretax income expanded 19%. After taxes at 37.7%, versus 36.0%, net income was up 16%, to $9,077,000 ($0.91 a share) from $7,831,000 ($0.79).

Dividend Data

No cash has been paid.

Finances

Research and development expenditures in fiscal 1988 amounted to $14,129,000 (5.6% of sales), versus $10,415,000 (4.7%) the year before.

In fiscal 1987, the company recorded a one-time restructuring charge of about $19.9 million ($11.4 million after taxes or $1.13 a share) mainly related to costs associated with the elimination of excess terrestrial microwave manufacturing capacity. Also, as a further part of its restructuring, in fiscal 1987 Andrew realized a gain of some $5.9 million ($3.7 after taxes or $0.36 a share) from the sale of excess land.

Anheuser-Busch

NYSE Symbol BUD Options on Phila (Mar-Jun-Sep-Dec) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Dec. 22'89	1989					
47⅞	46-30⅝	15	0.88	2.3%	A+	0.96

Summary

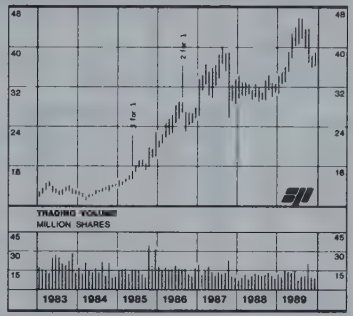
Anheuser-Busch is the nation's largest brewer, accounting for 42% of the domestic market. It also owns Campbell Taggart, a leading U.S. baker. Acquisition of Harcourt's theme parks in November, 1989 for $1.1 billion tripled BUD's theme park business. Earnings growth is likely to slow, as BUD responds to widespread discounting by competitors.

Current Outlook

Earnings for 1990 are expected to rise to $3.00 a share from the $2.70 estimated for 1989.

An increase in the $0.22 quarterly dividend is likely in mid-1990.

Sales for 1990 should continue to trend higher, although recent price promotions by competitors have led to a slowing volume trend. BUD's plan to meet competitive pricing pressures will cause some near-term erosion of margins. Packaging costs are likely to increase modestly, while commodity costs should remain stable. While growth is likely to slow, productivity gains on new breweries and distribution cost savings should fuel an improved earnings contribution from beer. Acquisition of Harcourt's theme parks may be somewhat dilutive near term, but should enhance the future.



Net Sales (Million $)

Quarter:	1990	1989	1988	1987
Mar.	---	2,205	2,074	1,922
Jun.	---	2,480	2,322	2,146
Sep.	---	2,487	2,340	2,148
Dec.	---	---	2,188	2,042
	---	---	8,924	8,258

Sales for the first nine months of 1989 increased 5.5%, year to year, due largely to higher beer volume shipped to retailers. Higher commodity costs hurt margins, but after proportionately lower marketing, administrative, and research expense and tax provision, net income rose 8.2%. Share earnings were $2.23 on 2.6% fewer shares, versus $2.01.

	E3.00	E2.70	2.45	2.04

Important Developments

Dec. '89— Heirs to the August A. Busch Jr. estate sold 7.76 million common shares in a secondary public offering.

Nov. '89— BUD introduced O'Doul's, a non-alcoholic brewed product in select states and major metropolitian areas across the U.S.

Nov. '89— BUD completed the acquisition of Harcourt Brace Jovanovich's (HBJ) Sea World and other theme parks and land holdings for $1.1 billion, including $975 million for the theme parks. Under the agreement, HBJ would also receive 50% of profits above $100 million over the next 10 years from sale of undeveloped land included in the purchase. Earlier, the company announced plans to build a theme park in Spain.

Next earnings report expected in early February.

Business Summary

Anheuser-Busch is the largest U.S. brewer and, through Campbell Taggart, the second largest producer of bakery goods. Sales and profit contributions by major product segment in 1988:

	Sales	Profits
Beer	77%	92%
Food products	19%	4%
Diversified	4%	3%

Beer brands include Budweiser, Michelob, Busch, Michelob Light, Natural Light, Bud Light, LA, Michelob Dry, and Michelob Classic Dark. The company operates 12 breweries, with combined capacity to produce about 84 million barrels of beer. Sales in 1988 totaled 78.5 million barrels (up 3.1% from 76.1 million barrels in 1987), or 41.1% of industry sales, including imports (compared with 39.9%). Vertically integrated operations include can manufacturing, metalized paper printing, and barley malting. Some 94% of barrelage is sold through 950 independent wholesalers.

The food products segment consists mainly of Campbell Taggart, the nation's second largest producer of bakery goods, and Eagle Snacks.

Diversified operations are in the areas of entertainment (St. Louis Cardinals baseball franchise and Busch Gardens and Sea World theme parks), real estate development, communications and transportation.

Dividend Data

Dividends have been paid since 1932. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1985.

Summary

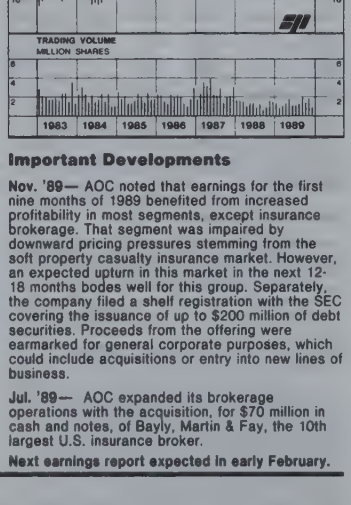
Aon Corp. through its subsidiaries writes life, accident and health, and specialty property-casualty insurance, and has an insurance brokerage unit. Earnings for 1989's first nine months benefited from growth in most segments together with well controlled costs. Higher earnings are expected in 1990.

Current Outlook

Earnings for 1990 (before realized capital gains and losses) are estimated at $3.87 a share, up from the $3.50 anticipated for 1989.

The $0.35 quarterly dividend is the minimum expectation.

Advances are anticipated in revenues for most segments in coming periods, and earnings should experience a moderate increase. Strong demand for single premium deferred annuities will benefit life results. The resulting strong cash flow will lead to solid increases in investment income. Accident and health results are expected to be mixed, reflecting lower premiums due to uncertainty surrounding the need for supplemental health insurance. Auto and appliance warranty insurance should post advances. Insurance brokerage operations should benefit from expansion efforts and an expected upturn in the property-casualty insurance pricing cycle. Share repurchases will aid per share comparisons.



Review of Operations

Revenues for the nine months ended September 30, 1989 rose 5.3%, year to year, as a 3.3% drop in premiums and policy fees was offset by a 20% rise in investment income, higher commission and fee income, and realized investment gains of $4.6 million, versus losses of $19.3 million. With total benefits and expenses up 2.9%, pretax earnings advanced 24%. After taxes at 26.0%, versus 25.9%, net income was also up 24%, to $2.64 a share (including investment gains of $0.05) from $2.17 (restated, including losses of $0.19).

Dec.		0.82	0.69	0.74
		3.18	2.80	2.76

Important Developments

Nov. '89— AOC noted that earnings for the first nine months of 1989 benefited from increased profitability in most segments, except insurance brokerage. That segment was impaired by downward pricing pressures stemming from the soft property casualty insurance market. However, an expected upturn in this market in the next 12-18 months bodes well for this group. Separately, the company filed a shelf registration with the SEC covering the issuance of up to $200 million of debt securities. Proceeds from the offering were earmarked for general corporate purposes, which could include acquisitions or entry into new lines of business.

Jul. '89— AOC expanded its brokerage operations with the acquisition, for $70 million in cash and notes, of Bayly, Martin & Fay, the 10th largest U.S. insurance broker.

Next earnings report expected in early February.

Business Summary

Aon Corp. (formerly Combined International) is a holding company which, through its subsidiaries, writes accident and health, life and specialty property-casualty insurance. Other operations include insurance brokerage and related services. Pretax income (in million $) by line of business in recent years was:

	1988	1987	1986
Accident & health	$132.7	$118.6	$133.9
Life insurance	54.9	52.1	48.1
Spec. property-cas.	25.6	20.1	4.5
Brokerage & rel. ops.	32.2	29.5	25.1
Corp. & other	33.0	39.5	51.1

The life insurance line of business is composed primarily of capital accumulation products, ordinary life products and credit insurance. The major distribution channels are direct sales by agency field forces, direct response, insurance brokers and stockbrokers. Accident and health products consist primarily of Medicare supplemental insurance, disability, credit and accident and health supplemental insurance. Ryan Insurance is a leading marketer of credit life, automobile mechanical repair insurance, and appliance and electronic equipment warranty products. Other lines include casualty coverage for financial institutions, and professional liability insurance.

Union Fidelity is a major factor in the mass marketing of Medicare supplement, hospital indemnity and various forms of life insurance.

Insurance brokerage and related services provides commercial clients and specialty groups with risk management, reinsurance services and employee benefit consulting. Rollins Burdick Hunter Co. is one of the largest insurance broker in the U.S.

The Life Insurance Co. of Virginia offers life, and accident and health insurance, annuities, and guaranteed investment contracts.

Dividend Data

Cash dividends have been paid since 1950. A dividend reinvestment plan is available.

Nov. 8'89	1989					
45	50⅜-33½	13	0.44	1.0%	B	1.49

Summary

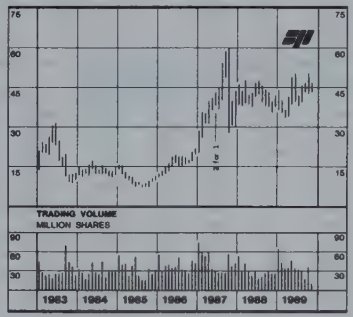
This company is a leading manufacturer of personal computers. The Apple II line is sold primarily to the home and education markets, while the Macintosh is directed at the office market. Earnings in fiscal 1989 were under pressure due to a product line transition and the purchase early in the year of a significant amount of DRAM memory chips at peak prices. However, a gradual resumption of earnings momentum is likely throughout fiscal 1990, reflecting the ramp-up of new products and lower component costs.

Current Outlook

Earnings for the fiscal year ending September 30, 1990, are projected at $4.15 a share, versus fiscal 1989's $3.53 ($3.16 from operations).

The quarterly dividend was increased to the current $0.11 a share in November 1989.

Sales growth in fiscal 1990 is expected to slow to about 20% as comparisons become more difficult, although growth levels should remain above those for the industry as a whole as Macintosh computers continue to increase their penetration of the business market and as price performance of laser printers continues to improve. Wider availability of several new products should help sales. Gross margins, under severe pressure in fiscal 1989 due to component shortages, should begin to recover. In addition, Apple has implemented expense reduction programs which include limiting headcount growth, postponing major new administrative projects and minimizing discretionary spending.



Sales (Million $)

13 Weeks:	1988-9	1987-8	1986-7	1985-6
Dec.	1,405	[1]1,042	662	534
Mar.	1,247	867	575	409
Jun.	1,248	993	637	448
Sep.	1,384	1,169	787	511
	5,284	4,071	2,661	1,902

Sales for the fiscal year ended September 29, 1989 (preliminary) advanced 30% from those of the preceding year, reflecting strong demand for the Macintosh and LaserWriter families of products. Gross margins narrowed sharply, reflecting the purchase of significant amounts of DRAM memory chips at peak prices; research and development spending advanced 54% and general and administrative expense was up 39%, but marketing and distribution expenses were up only 27%. After the inclusion of a $48 million ($0.37 a share) after-tax gain from the sale of Adobe common stock in the fourth quarter, and taxes at 39.0% in both periods, net income was up 13%.

Sep.	1.24	0.84	0.54	0.25
	3.53	3.08	1.65	1.20

Important Developments

Sep. '89— Apple introduced two new Macintosh computers: the Macintosh Portable and Macintosh IIci. The Portable's components include a Motorola 68000 processor, lead acid batteries providing 6 to 12 hours of power, Active Matrix Liquid Crystal Display technology, and an optional 40MB hard disk. The Portable runs at 16 MHz and weighs 15.7 pounds. The Macintosh IIci, with its 25 MHz 68030 processor and 68882 coprocessor, is the most powerful computer that Apple has ever developed.

Next earnings report due in mid-January.

Business Summary

Apple Computer makes personal computers and related software and peripherals. Its operating systems are proprietary. Foreign operations contributed 32% of revenues in fiscal 1988.

The Macintosh, sold largely to businesses, is a user-friendly computer that makes use of graphic icons (pictorial representations of functions) and a mouse input device. The Macintosh Plus, based on a 32-bit Motorola 68000, has a 3½-inch floppy drive and a nine-inch monochrome monitor in a single unit. The Macintosh SE is an enhanced version with a larger keyboard and an expansion slot which is also available with an internal hard disk drive. The SE/30, introduced in January, 1989, is based on the 68030 processor, which offers four times the performance.

The Macintosh II, based on the 68020 processor, is a workstation-class machine with up to 16 MB of memory, six expansion slots and high-resolution 12-inch or 13-inch monitors. The II can run A/UX, a UNIX-based operating system. The Macintosh IIx, introduced in September, 1988, incorporates the 68030 and a 3½-inch floppy drive that can read MS-DOS disks.

The Apple II line is sold to the education and home markets. The IIGS features high-resolution graphics and advanced sound capabilities. The IIc Plus is a compact 7.5-pound computer with a 3½ floppy drive.

The LaserWriter II family of desktop laser printers includes the entry-level single-user IISC, the NT with networking capabilities and the 68020-based NTX with high throughput capabilities and memory, font expansion card and hard disk expansion options.

Apple also sells system software, networking and communications products, and external disk drives, scanners other peripherals. Claris Corp, a wholly owned subsidiary formed in 1987, develops and markets applications software under the Claris label.

Dividend Data

Quarterly cash dividends were as follows:

Summary

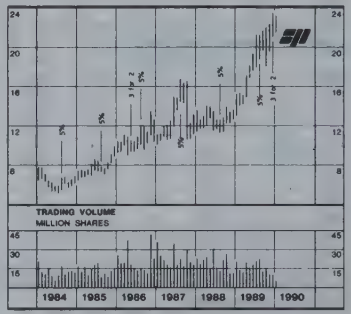
This company is a major factor in soybean processing, corn refining and flour milling. It has grown significantly in the past five years through acquisitions and internal expansion, and diversification has helped generate good earnings growth over the past decade. Earnings for fiscal 1989 advanced on better pricing for most products and a lower tax rate. For fiscal 1990, solid profit improvement is likely, given improved comparisons for soybean processing and ethanol production and more efficient operations. New products and possible acquisitions would enhance the future. The shares were split 3-for-2 in December, 1989.

Current Outlook

Earnings for the fiscal year ending June 30, 1990 are projected at $1.70 a share, up from fiscal 1989's $1.51 (adjusted), which included a $0.17 LIFO inventory profit.

The $0.02½ quarterly dividend (which was maintained following a 3-for-2 split in December, 1989) has been supplemented with an annual 5% stock extra since 1978.

Earnings in fiscal 1990 should remain in a solid uptrend, due to better comparisons for dominant soybean processing and corn refining operations on lower average commodity costs. Favorable factors would include an increase in LIFO inventory profits, better pricing for corn syrups, and a significant turnaround for profits from ethanol refining. Cost-control programs should also be beneficial. New products and continued acquisitions augur well for the future. Share repurchases in fiscal 1989 should aid per-share earnings comparisons as well.



Sales & Oper. Revenues (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Sep.	1,854	1,972	1,588	1,371
Dec.	---	1,851	1,654	1,465
Mar.	---	2,083	1,681	1,432
Jun.	---	2,023	1,875	1,507
	---	7,929	6,798	5,775

Sales for the three months ended September 30, 1990 were down 6.0%, reflecting lower oilseed volumes and prices. LIFO profits more than doubled and with improved corn processing margins, operating earnings increased 12%. With a three-fold increase in other income, pretax earnings rose 24%. After taxes at 35.7% versus 37.6%, net income advanced 28%.

Important Developments

Jan. '90— ADM sold 100 million gallons of fuel grade ethanol to Petrobas, the state-owned company responsible for production and sale of gasoline in Brazil. Combined with the resulting feed by-products to be exported as well, the transaction would improve the U.S. balance of trade by $200 million.

Next earnings report expected in mid-January.

Business Summary

Archer-Daniels-Midland is primarily engaged in the processing and merchandising of raw agricultural commodities, largely used in the production of consumer foods and beverages. Revenue contributions in recent fiscal years:

Revenues	1989	1988
Oilseed opers.	53%	57%
Corn opers.	27%	26%
Wheat flour	8%	8%
Other	12%	9%

Export businesses generated 15% of revenues in fiscal 1989, versus 16% the year before.

Soybeans are processed into soybean oil and soybean meal. Some of the soybean meal is further processed into soy flour, soy protein and texturized vegetable protein (TVP). Cottonseed, sunflower seeds, peanuts, corn germ, and other commodities are also processed into oils and meals.

Corn wet milling products include high fructose corn syrup (HFCS), glucose, starches, and ethanol. Dry milled products include meal, flour, grits, ethanol and grains.

Wheat flour is sold primarily to large bakeries, and durum flour is sold largely to pasta manufacturers. Bulgur, a gelatinized wheat food, is sold in both domestic and export markets.

Other operations include grain merchandising; production of barley malt, cane sugar, animal feeds and various consumer foods; and other products for industrial markets.

30⅜	27⅝-17¼	7	1.00	4.9%	NR	NA

Summary

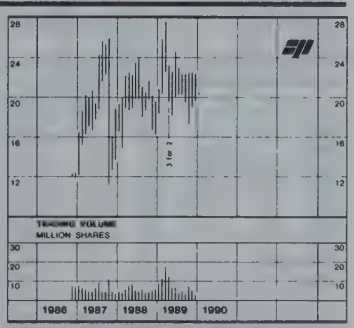
This company is a producer of polymer and related products and basic and industrial chemicals. Earnings in 1989 have been penalized by lower margins for polypropylene as well as a higher tax rate and the scheduled maintenance shutdowns of several plants. Unfavorable conditions are expected to continue in 1990. In November, 1989 ARS rejected a $25-a-share cash acquisition offer made by Jon M. Huntsman, who owns 8.7% of ARS common stock.

Current Outlook

Share earnings for 1990 are estimated at $2.25, versus the $2.50 expected for 1989.

Dividends at $0.25 quarterly are the minimum expected.

Profits for 1990 are expected to be penalized by the reduction in polypropylene margins experienced in 1989, due to reduced selling prices resulting from increased industry capacity and reduced export demand; however, raw material costs have declined from peak levels. Demand for phenol and deriviative products remains relatively good. Possible anti-takeover actions, including a recapitalization or sale of the polypropylene business, would impact earnings.



Net Sales (Million $)

Quarter:	1989	1988	1987	[1]1986
Mar.	275	260	209	196
Jun.	268	268	229	192
Sep.	230	278	240	187
Dec.	---	259	242	176
	---	1,065	919	751

Sales for the first nine months of 1989 declined 1.1%, year to year, reflecting lower polypropylene prices. Penalized by lower polypropylene profits, second-quarter plant outages and the absence of a nonrecurring gain equal to $0.61 a share, and after taxes at 36.7%, against 26.7%, net income fell 48%, to $1.93 a share from $3.44.

Dec.	E0.58	0.97	0.56	0.29
	E2.50	4.41	1.81	1.13

Important Developments

Nov. '89— Directors rejected as inadequate the $25 a share acquisition proposal made by Jon M. Huntsman, chairman of Huntsman Holdings, Inc. Mr. Huntsman said that he was willing to negotiate all aspects of the proposal and would consider increasing the price if additional information about ARS were made available. Mr. Huntsman owns 8.7% of ARS common stock.

Oct. '89— ARS said that the decline in third quarter earnings reflected reduced revenues and earnings from polypropylene. However, earnings improved from those of the second quarter, due to the completion of maintenance and capacity expansion projects. ARS projected that second half earnings would likely fall below the first half level, primarily due to smaller than expected polypropylene margins and weakness in several other products. ARS terminated discussions regarding the sale of several businesses.

Next earnings report expected in mid-January.

Business Summary

This company, formerly the USS Chemicals division of USX Corp., produces polymers and related products and basic and industrial chemicals used in automotive, home and office construction, appliances, boat, apparel, medical, packaging and consumer products markets. Sales contribution in recent years:

	1988	1987
Polymers & related products	52%	52%
Basic & industrial chemicals	48%	48%

The company is a leading producer of polypropylene resins (used for synthetic fibers, films and molded parts). Plants at LaPorte, Texas, and Neal, West Virginia have combined annual capacity of 700 million pounds. A modernization and 100 million pound expansion program at Neal was completed in 1988 and a further 50 million pound expansion was completed in 1989. ARS is one of the world's largest producer of unsaturated polyester resin (primarily used for fiber glass reinforcement) with four plants (including the world's largest) with capacity of 230 million pounds. Acrylic sheet (used for outdoor signs and molded tub and shower units) is produced at a plant with capacity of 38 million pounds. Plasticizers (used in flexible polyvinyl chloride plastic compounds) are made at a plant with capacity of 210 million pounds.

Basic and industrial chemicals include phenol and related products, consisting of phenol (used in plywood adhesives), acetone (paint solvents), bisphenol-A (epoxy resins and engineering plastics), and aniline (polyurethane foam insulating and coating resins); phthalic anhydride (unsaturated polyester resins and plasticizers) and maleic anhydride (unsaturated polyester resins and pesticides); pitch (carbon electrodes and products); creosote (wood treatment chemicals); and benzene (plastics, polyester resins, and phenol).

Dividend Data

Dividends were initiated in 1987. A "poison pill" stock purchase right was amended in 1989.

Next dividend meeting: mid-Jan. '90.

Finances

In May, 1989 ARS anticipated that capital spending for 1989 would be about $60 million, versus 1988's $56 million (excluding acquisitions). Projects include expansions of its phenol and bisphenol-A unit and of the Neal, W. V. polypropylene plant, as well as initial spending for a cumene/phenol complex. In October, 1989 ARS suspended plans to build the complex.

In November, 1986 underwriters sold 22,500,000 ARS common shares held by USX Corp. at $17.75 each. An overallotment option of 3,375,000 shares granted by ARS was sold at the same initial price. ARS repurchased from USX, at the initial offering price per share, $150 million of common stock, eliminating USX's interest in ARS. Funds for the purchase were provided by a $200 million bank revolving credit agreement.

Capitalization

Long Term Debt: $175,800,000.

Common Stock: 32,480,498 shs. ($1 par).
Institutions hold about 47%.
Jon M. Huntsman controls 8.7%

Summary

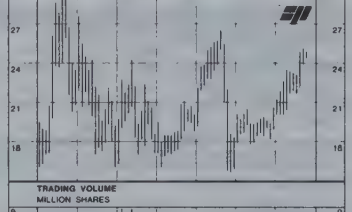
This integrated natural gas company is engaged in the transmission, distribution, exploration and production of natural gas in the south central U.S. Earnings for the 1989 first half declined, reflecting warmer weather, lower pipeline margins, and higher interest charges. In July, 1989 ALG acquired Louisiana Intrastate Gas Corp. for 2.25 million common shares plus the assumption of existing debt.

Current Outlook

Share earnings for 1990 are projected at $1.45, up from the $1.30 estimated for 1988.

Dividends should continue at $0.27 quarterly.

Gas transmission profits in 1990 should increase on higher rates and an increase in throughput, partly reflecting expansion of areas served. Distribution profits are expected to be slightly higher, assuming normal weather conditions and some customer additions. Exploration and production profits should benefit from increased activity and higher average gas prices. Share earnings growth will be restricted by a slight rise in shares outstanding and interest charges.



Sales & Oper. Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	705	745	414	252

Important Developments

Aug. '89— ALG and Texas Gas Transmission Corp. entered into an agreement whereby Texas Gas would purchase from ALG up to 350 million cubic feet of natural gas per day over a 10-year period, and the two companies would jointly own new transmission facilties to be constructed.

Jul. '89— ALG acquired Louisiana Intrastate Gas Corp. and certain properties from a group of private investors for 2.25 million common shares and the assumption of existing debt, or an acquisition cost of about $170 million.

Mar. '89— ALG's Mississippi River Transmission Corp. unit filed for regulatory approval to provide open access transportation services. Separately, ALG and Coastal Corp. reached agreements to expand the gas pipeline capacity out of the Midcontinent supply region.

Next earnings report expected in late October.

Business Summary

Arkla, Inc. is primarily an integrated natural gas utility serving Arkansas, Mississippi, Missouri, Tennessee, Louisiana, Texas, Kansas and Oklahoma. Other activities include the manufacture and sale of chemical and petroleum products. Revenue contributions in recent years:

	1988	1987
Natural gas sales	93%	94%
Gas transportation	3%	3%
Chemical and petroleum	1%	1%
Other	3%	2%

Arkla Pipeline Group operates a 12,000-mile interstate natural gas pipeline system serving the south central U.S.; Arkla Energy is located primarily in Arkansas and Oklahoma; Mississippi River Transmission (acquired 1986) operates a interstate pipeline system with access to the St. Louis, Mo. and southeastern Illinois markets. Gas sales throughput in 1988 totaled 485.2 Bcf, versus 455.2 Bcf in 1987.

Arkla Louisiana Gas Co. provides gas distribution services to about 720,000 customers in five states. Entex, Inc. was merged into ALG in 1988; it distributes gas to about 1.2 million customers in Texas, Louisiana, and Mississippi. Combined total throughput in 1988 amounted to 302.3 Bcf, up from 286.9 Bcf in 1987.

Oil and gas exploration and production is conducted by Arkla Exploration Co. whose properties are located onshore in Arkansas, Louisiana, Mississippi, Oklahoma and Texas. Proved reserves at year-end 1988 were estimated at 675 Bcf of gas and 5.6 million barrels of oil.

Dividend Data

Dividends have been paid since 1953. A dividend reinvestment plan is available.

provement in industry conditions and in company operations along with a large onetime gain allowed e nation's fifth largest steelmaker to return to profitability in 1987. In the absence of that gain, earn- gs declined in 1988 but an increase is projected for 1989, aided substantially by the completion of S's joint venture agreement with Kawasaki Steel. Auditors noted in their opinion on AS's 1988 financial atements uncertainty with regard to the recovery of its investment in the discontinued Financial Ser- ces Group. Dividends were resumed in 1989.

urrent Outlook

rnings for 1990 are estimated at $1.30 a share, rsus the $2.40 estimated for 1989.

April, 1989 the common dividend, (omitted in d-1984) was reinstated at $0.10 quarterly.

ales for 1990 are expected to decline, reflecting e impact of slower economic growth on the spe- alty flat-rolled steel and bar, rod, and wire prod- ts units. Forecasted softness in consumer urables is expected to result in lower equity in- me from AS's new joint venture, ASC, L.P. Pe- lized further by the absence of a gain on the for- ation of the ASC joint-venture, earnings will likely cline in 1990.

Important Developments

Oct. '89— AS reported that at September 30, 1989 it had cash and other liquid investments of $575.8 million, which was available for general corporate purposes, including debt reduction, capital expentitures and acquisitions. AS noted that its total debt to capitalization ratio at September 30, 1989 was 30%, versus 39% at December 31, 1988 and 48% at December 31, 1987.

Jul. '89— AS said that it realized a gain of $112.3 million in 1989's second quarter from the completion of its joint venture with Kawasaki Steel Corp. AS added that following the formation of its joint venture with Kawasaki Steel on May 13, 1989, it would account for its 60% share of the new, jointly operated company called Armco Steel Co., L.P., under the equity method.

Next earnings report expected in late January.

Business Summary

Armco is a diversified maker of carbon and specialty steels and related products. Contributions by segment:

1988	Sales	Profits
Carbon steel	62%	67%
Specialty steels	30%	32%
Other	8%	1%

Annual steelmaking capacity at 1988 year-end was about 6.0 million net tons. In 1988 AS produced 5.8 million tons and shipped 4.9 million tons. Capacity utilization was 97% in 1988, versus 88% in 1987.

Carbon steel mill products include sheet and strip (79% of 1988 shipments); bar, rod, and wire (18%); pipe and tube (1%); plates and structurals (1%); and other (1%). Major markets for carbon steel include service centers (31%), automotive (27%), construction (7%), appliances (8%), industrial machinery (14%), and other (13%).

Specialty steels consist of electrical steels (46% of 1988 shipments) for transformers and generators and stainless flat and tubular products (54%). Major markets include industrial machinery and equipment (42%), service centers (11%), automotive (17%), construction products (2%), appliances and commercial equipment (2%) and other (26%).

Other operations include the manufacture of drainage, highway, agriculture, grinding and construction products.

Dividend Data

Common dividends, omitted in mid-1984, were resumed in April 1989. A "poison pill" stock purchase right was adopted in 1986.

Amt. of Divd. $	Date Decl.	Ex-divd. Date	Stock of Record	Payment Date

Dec. 13'89	1989					
38½	50⅞-33⅜	11	1.06	2.8%	A	1.60

Summary

This company is a leading producer of interior furnishings, including resilient flooring, carpeting, ceilings and furniture, for renovation/remodeling and new construction markets. About 60% of ACK's business is consumer-related, and the remaining 40% is in commercial and industrial markets. In July, 1989 the Belzberg family of Canada acquired 9.85% of ACK's common shares outstanding.

Current Outlook

Share earnings for 1990 are projected at $3.50, down from 1989's estimated $3.54.

The dividend should continue at $0.26½ quarterly.

Sales for 1990 should decline, reflecting the absence of the carpet operations (1988 sales $368.3 million) and the Applied Color systems division, as well as weak demand for flooring and building products due to the soft housing and construction markets. However remodeling markets should remain strong. Benefits from stable raw material prices and fewer salaried personnel will be offset by more competitive pricing and selling expenses. Interest charges will be lower.

Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	710	630	541	431
Jun.	744	671	597	487
Sep.	724	673	622	506
Dec.	---	707	605	496
	---	2,680	2,365	1,920

Sales for the first nine months of 1989 rose 10%, year to year. Margins narrowed, and with higher interest charges, pretax income fell 1.6%. After taxes at 35.7%, versus 38.7%, net income rose 3.2%. After preferred dividends, share earnings were $2.75 ($2.65 fully diluted) compared with $2.77 ($2.65). Results for 1989 include a onetime gain of $0.17 for termination of the contributory portion of the employees' retirement plan and settlement of an asbestos-related claim.

Important Developments

Oct. '89— ACK said that while the Belzberg family had not increased their stock position in ACK, they had submitted a petition calling for the board to submit to shareholder vote five amendments of ACK's articles of incorporation. On July 3 the Belzberg family of Vancouver, Canada, acquired 9.85% of ACK's common stock, and indicated through a 13D filing that they were considering further purchases of ACK, as well as acquiring control of the entire company. Separately, ACK agreed to sell its carpet operations to Shaw Industries for $140 million and sell its Applied Color Systems division. Additionally, ACK said that most of the sales gain in the third quarter resulted from the American Olean subsidiary, which was acquired in October, 1988. ACK said demand for most of its products was weak, and would most likely continue being weak during the next six months.

Next earnings report expected in late January.

Business Summary

Armstrong World is primarily a manufacturer and marketer of interior furnishings, including floor coverings, building products, and furniture. The home improvement and refurbishing market accounted for over 40% of sales in 1988; commercial and institutional building for about 35%; new residential building for about 11%; and the remainder to industrial markets. Contributions by industry segment in 1988:

	Sales	Profit
Floor coverings	48%	43%
Building products	26%	34%
Furniture	16%	10%
Industry products & other	10%	13%

Foreign sales accounted for 23% of total sales and 25% of profits in 1988.

A broad range of floor coverings is manufactured. Resilient flooring is made in both sheet and tile form; ceramic tile is produced through American Olean, acquired in 1988. Sales in 1988 were $915.8 million. In the fall of 1989 ACK sold its carpet operations for $140 million to Shaw Industries.

Building materials consist mainly of ceiling materials of varied design and uses. Most contain features such as noise reduction, integrated lighting, fire protection and ease of installation.

Thomasville Furniture makes traditional and contemporary household furniture, primarily case goods. Industrial products consist of a variety of products (flexible pipe, gasket materials, etc.) for the building, automotive, and textile industries.

ACK is involved in asbestos-related litigation.

Dividend Data

Dividends have been paid since 1934. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

ummary

is manufacturer of a broad line of auto parts, coated metals and consumer products is focusing on pansion of its European automotive operations via acquisitions, in order to participate in the post-92 unified European market. Increased sales to Japanese transplant auto manufacturers and wage ductions under new labor contracts should contribute to profit gains in future years.

urrent Outlook

rnings for 1990 are expected to rise to $1.00 a are from the $0.75 estimated for 1989.

e quarterly dividend should continue at $0.17.

les for 1990 are likely to rise as production der new contracts from Japanese transplant car nufacturers increases. Start-up costs related to new contracts should decline, but earnings im-vement may be limited by operating inefficien-s while training new employees to replace strik- workers at two plants. These increased ining costs will offset somewhat lower wages d to the new employees and to workers at five er plants under new labor contracts.

Important Developments

Nov. '89— ARV said that it was jointly developing with Active Noise Vibration Technologies, Inc. an electronic automotive muffler system using electronic noise cancellation technology.

Oct. '89— Earnings for the first nine months of 1989 were restricted by a $12 million onetime charge for the realignment of labor economics, reorganization of manufacturing operations and start-up of major new contracts. In addition, lower than anticipated car build in North America and high interest expense due to delay of the sale of ArvinAir hurt third- quarter earnings.

May '89— Arvin sold its consumer electronics unit to ElectroCon International for book value of the unit plus $1.5 million. ARV plans to sell ArvinAir, a manufacturer of portable electric heaters and evaporative coolers.

Next earnings report expected in mid-February.

Business Summary

Sales and profit contributions of this manufacturer of automotive products in 1988:

	Sales	Profits
Automotive	35.5%	28.9%
Consumer	39.5%	16.7%
Government	14.6%	22.0%
Industrial	10.4%	32.4%

ARV supplies parts to the original equipment automotive market, including mufflers, exhaust pipes, catalytic converters, tubular manifolds, fuel filler tubes, tubeless tire valves, shock absorbers, MacPherson struts, gas springs, decorative trim parts, and coated coil steel for fabricating into body parts. Shipments to the automotive replacement market include mufflers, exhaust pipes, catalytic converters, shock absorbers, MacPherson struts, gas springs, brake and front end parts, tire valves and accessories.

The industrial segment provides tank valves, valve cores, bicycle valves, shock absorbers, pneumatic cylinders, vinyl metal laminate stampings, precoated coils of steel and aluminum.

The company also supplies research, development and testing services to the government and industrial customers in such areas as aerodynamics, automobile crash testing and accident research, aircraft systems, electronic systems analysis, surface and laser chemistry.

In 1988 13.0% of sales were to Ford Motor Co., 12.8% to the Government, and 11.2% to General Motors. Foreign operations accounted for 14% of sales and 28% of profits in 1988.

In May, 1989 ARV sold its consumer electronics business and it has an agreement to sell its portable electric heater and evaporative cooling products business.

ASARCO Inc.

NYSE Symbol AR Options on ASE (Mar-Jun-Sep-Dec) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 9'89	1989					
31¼	35⅞-26⅛	5	1.60	5.1%	B-	1.22

Summary

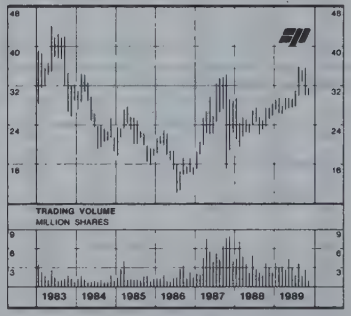
ASARCO is a leading producer of copper, silver, lead and zinc; has crushed stone and chemicals operations; and provides environmental services. The company implemented major restructuring and cost-cutting programs in the mid-1980s. Following a strong revival of the copper market in 1987-89, earnings for 1990 are likely to decline substantially, reflecting anticipated sluggish economic growth.

Current Outlook

Earnings for 1990 are projected at $3.75 a share, down sharply from 1989's estimated $5.50.

Dividends should continue at $0.40 quarterly.

Sales for 1990 may decline moderately. Copper and zinc income will probably decrease dramatically on expected much lower average copper and zinc prices, reflecting sluggish growth of industrial activity. However, silver profits may benefit from anticipated modestly higher quotes, while lead earnings are likely to be little changed. With an expected higher tax rate, earnings should fall substantially, despite absence of nonrecurring charges related to disposal of assets.



Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	618	447	274	292
Jun.	539	443	330	257

Important Developments

Nov. '89— At September 30, AR had bought back 759,000 common shares and 2.8 million warrants under programs authorizing $95 million in repurchases. In June, AR acquired a 49.9% interest in Montana Resources' (MR) copper mining business in Butte, Montana for $100 million cash plus an income participation by MR of up to $25 million contingent on metal prices.

Feb. '89— Directors approved a $260-million program to expand and modernize the company's copper production facilities in the next three years. When the program is completed, AR mines would provide all of the feed required by AR's two copper smelters, and both smelters would be modern, state-of-the-art facilities. AR's total copper mine output would increase to 290,000 tons from 1988's 200,600.

Next earnings report expected in late January.

Business Summary

AR is a major producer of nonferrous metals, has crushed stone and chemicals operations, provides environmental services, and holds interests in foreign mining firms. Contributions:

1988	Sales	Profits
Metals	86%	92%
Minerals	3%	1%
Chem., mfg. & env. serv.	11%	4%
Equity in assoc. cos.	---	3%

Excluding associated companies, AR's share of mine output in 1988 was 9,333,000 ounces of silver, 200,600 tons of copper, 76,700 tons of lead, and 107,000 tons of zinc. Including purchased materials, refined output was 35,695,000 ounces of silver, 484,700 tons of copper, and 197,200 tons of lead.

The minerals segment consists of crushed stone operations; in October, 1989 AR said that it was exiting from the coal mining business, and in August, 1989 sold its remaining interest in asbestos mining. The chemical and manufacturing segment contains units that produce specialty chemicals, alloys, and PVC pipe. In August, 1988 AR acquired OMI International, a producer of specialty chemicals for the electroplating and metal finishing industries, for $100 million. AR is also involved in hazardous waste treatment.

The 34%-owned Mexico Desarrollo Industrial Minero, S.A. holds Mexican mining and processing companies. Including purchased materials, output in 1988 was 27,112,600 ounces of silver, 33,900 tons of copper, 69,600 tons of lead, and 147,000 tons of zinc. The 52.3%-owned Southern Peru Copper Corp. produced 209,000 tons of copper and 2,091,000 ounces of silver in 1988.

Dividend Data

A 10-year preferred stock purchase right was adopted in August, 1989. Since omission in October, 1984, dividends were resumed in late 1987. Recent payments:

Summary

Ashland Oil is a leading independent petroleum refiner, and through its SuperAmerica Group a distributor of gasoline and merchandise. The company also has extensive chemical and engineering and construction operations. Earnings in fiscal 1989 were restricted by nonrecurring charges. The near-term earnings outlook is expected to be limited by a projected slowdown in the economy. ASH's longer-term strategy emphasizes strengthening the competitive position of its refining operations and widening the distribution of its branded products.

Current Outlook

Share earnings for the fiscal year ending September 30, 1990 are projected at $3.25, compared with 1989's $1.55, which included a $1.31 net nonrecurring charge.

Dividends are expected to continue at $0.25 quarterly.

Revenues for fiscal 1990 are expected to show some growth as volume gains in the SuperAmerica Group (the company's marketing unit) are partially offset by projected soft economic conditions. Margins in the petroleum area may show some improvement, reflecting potentially lower feedstock costs. Profits will benefit from the absence of the nonrecurring charges of fiscal 1989.

Sales & Oper. Revenues[1] ($ Million)

Quarter:	1988-9	1987-8	1986-7	1985-6
Dec.	2,110	1,965	1,576	2,043
Mar.	1,888	1,858	1,596	1,782
Jun.	2,210	2,146	1,882	1,761
Sep.	2,256	2,227	2,135	1,697
	8,464	8,196	7,189	7,283

Revenues for the fiscal year ended September 30, 1989 (preliminary) rose 3.2%, year to year. As a result of nonrecurring charges, soft operating margins in the petroleum segment, and weakness in the road construction business, pretax income fell 48%. After taxes at 46.4%, versus 32.2%, net income was down 53%. Share earnings were $1.55, against $3.29, which excluded a $0.72 extraordinary gain.

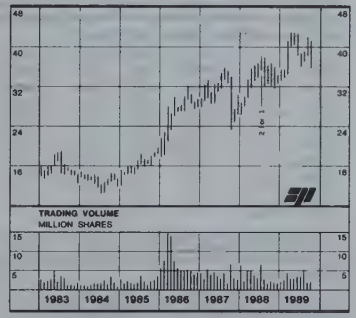
Sep.	d0.71	1.19	1.11	0.52
	1.55	3.29	2.14	3.08



Important Developments

Oct. '89— ASH reported fiscal 1989 net income of $86.2 million ($1.55 a share) after a net nonrecurring charge of $72.4 million ($1.31). The principal factor in the charge related to a settlement with the National Iranian Oil Co. The company also included in the charge a reserve for anticipated costs to correct problems with boilers built by its Riley Consolidated subsidiary, a charge resulting from the planned sale of its technology unit, and a charge for an arbitration award related to the Riley subsidiary. The company recognized a gain on the sale of its carbon black operations in November, 1988. The decline in earnings from operations in fiscal 1989 primarily reflected lower income from Ashland Petroleum and APAC construction operations and lower equity income from coal investments.

Next earnings report expected in late January.

Business Summary

Ashland is a leading independent petroleum refiner in the U.S. In addition to its traditional petroleum refining, transportation, and marketing businesses, Ashland is also engaged in oil and gas exploration/production, chemicals, coal, highway construction, and engineering/technology.

Oper. Profits	Fiscal 1988	Fiscal 1987
Petroleum	63%	31%
Chemical	25%	38%
Engr./construction	12%	30%
Exploration	Nil	1%

In fiscal 1988 Ashland processed 320,669 barrels a day of crude and sold 355,683 b/d of petroleum products. Net production of crude oil was 33,288 b/d and of natural gas 41.0 million cubic feet a day. At fiscal 1988 year-end proved reserves stood at 47.7 million barrels of crude (5% U.S. and 95% Nigeria) and 212.1 billion cubic feet of natural gas (all U.S.). Refineries operated at 93% of their 346,500 barrels a day capacity in fiscal 1988. In August, 1988, ASH reduced its ownership in Ashland Coal from 65% to 46% through an initial public offering.

Finances

ASH was indicted on two misdemeanor counts of violating environmental laws in connection with the collapse in January, 1988 of a company fuel tank. Each count carries a maximum fine of $200,000 upon conviction. As of December 30, ASH had paid out $18 million in claims and clean-up costs (settling nearly all of the outstanding claims), most of which were covered by insurance. The issue of possible penalties and fines, however, remains unresolved.

Dividend Data

Dividends have been paid since 1936. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

Ashton-Tate

NASDAQ Symbol TATE (Incl. in Nat'l Market; marginable) Options on Pacific

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 21'89	1989					
9⅝	24-8¾	NM	None	None	NR	1.57

Summary

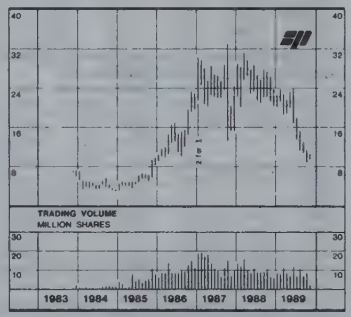
This company is one of the three largest independent publishers of microcomputer software products. TATE is the recognized leader in the microcomputer database management systems market and is also a major presence in the word processing, business graphics and multifunction software markets. Results turned unprofitable in the second quarter of 1989, owing to lower revenues and higher expenses. Earnings are expected to rebound through 1990 as results benefit from sequential revenue increases and cost containment programs.

Current Outlook

Earnings for 1990 are projected at $1.00 a share, up from the $0.90 loss estimated for calendar 1989 and compared with the $1.83 reported for the fiscal year ended January 31, 1989.

Cash dividends are not currently anticipated.

Revenues over the next several quarters should rebound from the depressed levels of the past two interims as the company increases product shipments to U.S. distributors following its inventory reduction program. While sales of dBASE to end-users have flattened, owing in part to technical problems with dBASE IV Version 1.0, shipments should get a boost by the end of 1990's second quarter from the anticipated availability of the updated dBASE IV Version 1.1 (currently undergoing its final Beta testing cycle) and other new dBASE products. A recent workforce reduction and other cost containment measures should benefit profitability.



Net Revenues (Million $)

Quarter:	1989	1988-9	1987-8	1986-7
Mar.	89.8	72.36	60.21	41.17
Jun.	59.5	71.91	63.58	48.99
Sep.	53.9	75.71	68.03	57.74
Dec.	---	87.30	75.51	62.90
	---	307.28	267.33	210.80

Revenues for the nine months ended September 30, 1989, fell 7.6% from those of the nine-month period ended October 31, 1988; however, revenues for the September quarter alone fell 29%, as dBASE sales slowed. Margins narrowed, owing to the lower volume and costs related to the development of other versions of dBASE, and following an $11,136,000 writeoff of a product line, a nine-month pretax loss of $30,147,000 contrasted with a $54,511,000 profit. After tax credits of $2,500,000, versus taxes at 37.1%, the net loss was $27,647,000 ($1.05 a share), against income of $34,311,000 ($1.32).

Dec.	E0.15	0.51	0.50	0.43
	Ed0.90	1.83	1.70	1.26

Important Developments

Oct. '89— The company said that it's domestic inventory-reduction program had been largely completed. Separately, TATE said that third quarter results included a $4.9 million provision to upgrade dBASE IV inventories into Version 1.1 and $1.8 million in severance costs as part of its workforce reduction program.

Next earnings report expected in early February.

Business Summary

Ashton-Tate develops and markets microcomputer software in three major product segments: databases; presentation products, including word processing, business graphics and desktop publishing; and multifunction products.

Since the introduction in 1981 of its initial product, dBASE II, TATE has been the leading publisher of database management systems for microcomputers. dBASE III PLUS, first shipped in 1985, permits single or multiple users to store, edit, retrieve and manipulate large volumes of data and to generate standard or customized reports. In October 1988, TATE began shipping dBASE IV, which is expected to succeed dBASE III PLUS as the company's flagship relational database management product. Other database products include RapidFile, a file management product for users not requiring the features of a relational database management system, and dBASE Mac, for the Apple Macintosh.

Presentation products include MultiMate word processing products; Byline, a desktop publishing product; and DRAW APPLAUSE, a presentation graphics product. The company also offers products that operate on the Apple Macintosh, including FullWrite Professional, a full-featured word processor, and FullPaint, a graphics product.

Framework III is a multifunction product that combines spreadsheet and word processing capabilities with database, graphics, outlining and communication features. Full Impact, a spreadsheet product for the Macintosh that also features word processing and graphics capabilities, began shipping in July 1988.

The company also publishes books, periodicals and certain utility programs that support its products.

Sales of dBASE products accounted for 70% of revenues in the 1988-9 fiscal year, compared with 64% in 1987-8. About 39% of TATE's revenues (39% of its operating income) were derived from export and foreign sales, versus 30% (26%) the year before.

Dividend Data

No cash has been paid.

Finances

During 1988-9, research and development expenses totaled $52,863,000 (17% of revenues), versus $35,463,000 (13%) the year before.

In February 1988, TATE acquired Ann Arbor Softworks, Inc., a vendor of software for the Apple Macintosh, for an undisclosed amount.

Capitalization

Long Term Debt: $3,455,000 of lease obligs. (9/89).

Common Stock: 26,165,000 shs. (no par).
Institutions hold about 73%.
Shareholders of record: About 2,700.

Summary

RCO is a major integrated oil and gas company with substantial interests in chemicals. The company is xpanding both its North American and overseas reserve base through acquisitions and low cost explo- ation projects. Its chemical and distribution businesses are dominant factors in their specialty markets. arnings comparisons in 1990 will be limited by the absence of a nonrecurring gain from the public sale f 54% of the company's Lyondell Petrochemical unit in January, 1989. The longer-term earnings out- ook is enhanced by the well contained exploration and production cost structure.

Current Outlook

hare earnings for 1990 are estimated at $9.50, ersus 1989's projected $10.95, which includes a 1.64 net nonrecurring gain.

he $1.12½ quarterly dividend is the minimum ex- ectation.

evenues in 1990 should benefit from increased rude oil and natural gas production and higher as prices. Downstream margins should show im- rovement, reflecting potentially softer feedstock osts. Earnings comparisons will be limited by the bsence of 1989's nonrecurring gain.

Oper. Revenues[1] (Billion $)

Important Developments

Oct. '89— Earnings through September 30, 1989 included a $634 million net nonrecurring gain on the sale of ARC's 54% interest in its Lyondell Petrochemical Co. in January, 1989. Partially offsetting the gain was a $345 million net charge for future environmental costs and other matters. Earnings for the 1988 period included a $110 million net gain on the sale of ARC's interest in Britoil plc and a $25 million net gain from property sales. Operating profits in 1989 benefited from higher crude oil and refined products prices, and higher volumes for natural gas, coal and refined products. Income from investments was up sharply, reflecting equity accounting for Lyondell, while operating profits excluded Lyondell (which was accounted for on a full consolidation in 1988).

Next earnings report expected in late January.

Business Summary

Atlantic Richfield (ARCO) is one of the largest domestic based integrated oil companies, with significant holdings in chemicals and coal.

Oper. Profits (cont. opers.)	1988	1987
Petro. expl. & prod.	24%	43%
Petro. ref. & mkt.	17%	8%
Petro. transportation	14%	18%
Spec. & interm. chem.	18%	21%
Lyondell Petrochemical	24%	7%
Coal	3%	3%

In 1988 net production of crude oil, condensate, and natural gas liquids averaged 674,000 barrels a day in the U.S. (including 487,300 b/d from Alaska-mainly North Slope) and 63,600 b/d foreign; natural gas sales 1.5 billion cubic feet a day; refinery runs 397,800 b/d; petroleum products sales 418,800 b/d (western areas only); and integrated petroleum processing sales (Lyondell, refinery/chemical plant complex) 246,600 b/d.

Net proved reserves at 1988 year-end stood at 3,093 million barrels of crude and natural gas liquids (67% Alaska, 25% lower 48, and 8% foreign) and 7,622 billion cubic feet of natural gas (33%, 51%, & 16%, respectively).

In January, 1989 ARC sold publicly a 54% stake in its Lyondell Petrochemical Co. for approximately $1.2 billion ($634 million, net).

Dividend Data

Dividends have been paid since 1927. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

Augat Inc.

NYSE Symbol AUG

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Sep. 1'89	1989					
14 1/8	15 3/8-11 1/2	NM	0.40	2.8%	B-	1.43

Summary

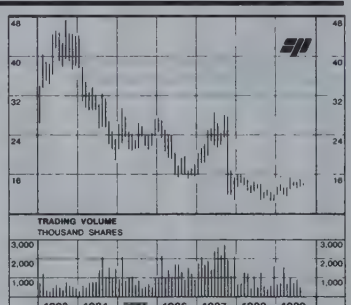
Augat is a leading manufacturer of electromechanical products and precision components used for the interconnection of circuits. Related services are also provided. Due to restructuring charges, in 1988 AUG incurred its second loss in the past three years. However, with sharply lower nonrecurring charges and consolidation costs, and assuming a reasonably healthy electronics market despite a substantial slowing of sales growth, profitability should be restored in 1989. A meaningful earnings increase is likely in 1990.

Current Outlook

Earnings for 1990 should reach $0.95 a share, in contrast to the $0.80 projected for 1989.

Continuation of the $0.10 quarterly dividend is the minimum expectation.

Assuming that the electronics industry experiences at least modest growth in 1990, revenues should rise approximately 5%. The gain is likely to be restrained by a decline in shipments to the automotive industry and the stronger dollar. Operating margins should benefit from the higher volume, reduced costs associated the relocation of a plant and continuing cost reductions, as well as improved controls and production efficiencies. Long-term results should benefit from the secular growth of the electronics industry and cost savings from the recent restructuring.



Net Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	80.4	80.0	75.2	64.4
Jun.	80.0	84.8	78.3	65.0
Sep.	---	81.3	78.8	66.5
Dec.	---	74.9	80.9	64.5
	---	321.0	313.2	260.4

Sales for the six months ended June 30, 1989 declined 2.7%, year to year, reflecting the absence of microcircuit packaging operations. Despite a $2.5 million (equal to $0.09 a share after taxes) charge related to the closing of a custom backplane facility, margins widened, and pretax income increased 41%. After taxes at 37.6%, versus 39.6%, and in the absence of minority interests, net income rose 44%, to $0.29 a share from $0.20.

Dec.	E0.31	0.10	0.19	d0.89
	E0.80	d1.28	0.65	d0.49

Important Developments

Jul. '89— AUG said that incoming orders for the second quarter were $76 million, virtually unchanged, year to year. The backlog at June 30, was $49 million, versus $56 million a year earlier. The company also said that it expected a nonrecurring gain in the second half to offset a nonrecurring charge in the first half.

Next earnings report expected in late October.

Business Summary

Augat manufactures electromechanical products and precision components used for the interconnection of circuits, and provides related services, for the electronics industry. Sales contributions by major product area in recent years were:

	1988	1987	1986
Interconnection products	56%	58%	61%
Automotive	30%	29%	25%
Communications	14%	13%	14%

Foreign operations accounted for 20% of sales and 42% of operating income in 1988.

Electronic components used in electronic equipment must be mechanically mounted and electrically interconnected to perform their specified functions. Augat's products relate to mounting components and interconnecting or controlling the flow of electricity among components or boards and other assemblies within electronic equipment. The company's principal products and services are integrated circuit sockets and accessories, connectors, coaxial cable network and fiberoptic interconnection products, subminiature switches, high reliability packages for microcircuits, packaging panels, high density backplanes, computer aided design and wiring services, interconnection test probes and systems, and custom connector assemblies for the automotive and telecommunications industry.

Dividend Data

Dividends have been paid since 1970. A "poison pill" stock purchase right was adopted in 1988.

Summary

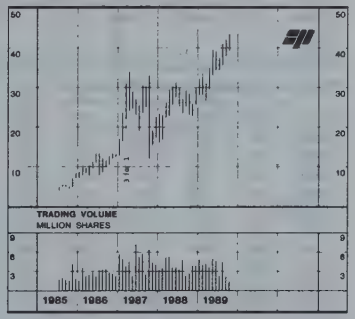
Formed in 1982, Autodesk develops and markets computer-aided design and drafting (CAD) software for use on desktop computers and workstations. Recent results benefited from the continued success of the AutoCAD software package, including both new orders and product updates. In June 1989, the company declared a special dividend of $1.50 a share and said it planned to pay quarterly dividends beginning in late 1989-90.

Business Summary

Autodesk, Inc. designs, develops, markets and supports computer-aided design and drafting (CAD) software for use on desktop computers and workstations. Organized in 1982, the company was active mainly in software development until November of that year, when its AutoCAD program was introduced. Sales of AutoCAD and its extension packages accounted for substantially all of the company's revenues through 1984-5, over 95% in 1986-7 and over 93% in 1987-8 and 1988-9. The product is believed to be the most widely used general-purpose CAD program, with more than 210,000 packages sold as of 1988-9 year-end.

AutoCAD automates the design and drafting process by enabling users to interactively create, store and edit a wide variety of drawings. The drawing data may be exchanged with other applications software, databases and mainframe CAD systems. In contrast to traditional hardware-based CAD systems, AutoCAD operates on most desktop computers, including the IBM PC family, and supports more than 140 graphic peripheral devices. The AutoCAD package was originally designed strictly for use on 16-bit microcomputers and graphic peripheral devices. However, since its introduction, the product has been expanded, enhanced and adapted for use on additional graphic peripheral devices and on 32-bit engineering workstations, including those with the UNIX operating system.

Other software packages sold by the company are AutoCAD AEC, which customizes AutoCAD for professional designers in the architecture, engineering or construction fields; AutoSketch, a low-cost, full-function drawing program, which can be used on personal computers; AutoShade, a full color rendering package which transforms AutoCAD drawings into three dimensional shaded images; AutoFlix, a group of programs that allows AutoCAD and AutoShade customers to produce animated walkthroughs or fly-bys of their designs; and AutoSolid, a conceptual design package which uses solid



modeling technology to create analytical models of three dimensional components and assemblies.

Marketing is aimed at both computer dealers and computer manufacturers. The domestic dealer network consists of more than 1,000 dealers, including franchisees of computer stores such as ComputerLand, Entré and Businessland. Internationally, Autodesk's products are sold in more than 60 countries by dealersand distributors. The company has five foreign subsidiaries, in Australia, England, Japan, Sweden and Switzerland. Foreign sales accounted for some 48% of net revenues in 1988-9 (43% in 1987-8).

Important Developments

May '89— Autodesk acquired privately held Generic Software, Inc., a market leader in low-cost CAD software, for $6.3 million in cash. The acquisition increased the company's installed base to about 500,000 users.

Next earnings report expected in mid-November.

Dividend Data

In June 1989, the company declared a special dividend of $1.50 a share, payable August 10, 1989, to holders of record July 20, 1989. Autodesk also announced that it intended to pay quarterly dividends of about $0.10 a share commencing at the end of the third quarter of 1989-90.

Finances

In September 1989, Autodesk said it would deploy its new Autodesk Strategic Developer program which is designed to build closer associations with developers in strategic markets. The program offers a variety of vertical solutions encouraging developers to share interface, database and layering protocols. Earlier, in August, the company began to offer a customized version of AutoCad specifically for architects.

In June 1989, Bear, Stearns & Co. Inc., the sole underwriter, sold publicly in a secondary offering 1,265,000 common shares of Autodesk (including 165,000 shares to cover over-allotments) for $36.75 a share. All of the shares were sold for three employees of Autodesk, including 1,150,000 shares sold by John Walker, a founder of the company.

Research and development expenditures, which consist primarily of salary costs for software developers and the cost of computer equipment used in software development, totaled $10,921,000 (9.3% of net revenues) in 1988-9, versus $7,206,000 (9.1%) in the preceding year.

Early in the development of AutoCAD, the company entered into a license agreement with an independent developer for the unrestricted, non-exclusive use of certain source code software. Under this agreement, Autodesk must pay a royalty equal to 10% of net revenues from the basic AutoCAD package. The company has also entered into several other agreements similar to this type with third-party software developers. During 1988-9, Autodesk made royalty payments totaling $1,983,000 ($1,118,000 in 1987-8).

45⅜	45¾-35¾	18	0.60	1.3%	A+	1.16

Summary

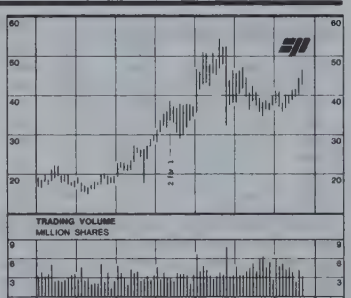
This company is the largest independent computing services firm in the U.S., with over $1.5 billion in revenues and 200,000 clients. A modest increase in revenues is projected for fiscal 1990, reflecting the effects of recent dispositions of certain businesses. Share earnings will benefit from a slight reduction in AUD's tax rate and a stock repurchase program.

Current Outlook

Earnings for the fiscal year ending June 30, 1990 are projected at $2.80 a share, versus fiscal 1989's $2.53.

Dividends should continue at $0.15 quarterly.

Revenues for fiscal 1990 are projected to advance less than 4%, reflecting the effects of recent disposals of certain businesses combined with ongoing pruning activities; growth should accelerate once inter-year comparisons are no longer affected by these dispositions. Although R&D expenses are expanding faster than revenues, margins should ultimately benefit as AUD focuses on shifting clients to a personal computer-based payroll system from the highly labor-intensive road payroll system, and as AUD accelerates the rollout of its new stock quotation system at Merrill Lynch and Shearson Lehman Hutton. A slight reduction in AUD's tax rate and a stock repurchase program will benefit share earnings.



Revenues (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Sep.	---	396	361	321
Dec.	---	409	377	334
Mar.	---	454	418	374
Jun.	---	418	393	355
	---	1,678	1,549	1,384

Revenues for the fiscal year ended June 30, 1989 (preliminary) rose 8.3% from those of the preceding year, as continued growth in the employer services and dealer services segments was partially offset by lower brokerage services revenues. A sharp rise in systems development expenses coupled with lower interest income stemming from the repurchase of about 5.6 million shares held the gain in pretax income to 6.6%. After taxes at 31.0%, versus 33.2%, net income was up 10%. Share earnings were $2.53 on 4.3% fewer shares outstanding ($2.46 fully diluted), versus $2.20 ($2.14).

Jun.	E0.80	0.73	0.63	0.52
	E2.80	2.53	2.20	1.76

Important Developments

Aug. '89— AUD sold its banking information services business to Welsh, Carson, Anderson & Stowe. Earlier in the year AUD had sold its automated teller machine business and real estate service. In July AUD acquired Automatic Business Centers, Inc., a provider of payroll-related services to about 11,000 companies from 15 processing centers, primarily in the Northeast.

Next earnings report expected in mid-October.

Business Summary

AUD provides a broad range of data processing services, including employer services, financial services, and specialized services. It believes that it is the largest independent computing services firm.

Employer services account for about 50% of AUD's revenues. Payroll services, with nearly 200,000 clients, are the largest contributor, including both payroll processing and a rapidly growing tax filing service.

Brokerage services (about 20% of revenues) include brokerage processing, order matching, on-line trading, record-keeping, database and stock quotation services.

Other businesses are automotive dealer services (10% of revenues; includes inventory control, lease management, parts invoicing and repair order billing); collision estimating services (5% of revenues; preparing estimates of the cost to repair auto damage and related claims management information); accounting services (accounts receivable, accounts payable and general ledger); and network services (general and specialized management-oriented on-line services to corporate, institutional and government clients).

Dividend Data

Dividends were initiated in 1974.

Finances

AUD said that it planned to post a sizable increase in net cash flow during fiscal 1990. Capital spending was expected to decrease to about $100 million in 1990 from $139 million in 1989, reflecting the completion of large multi-year brokerage capital investments.

Dec. 13'89	1989					
32	33¼-21	17	0.56	1.8%	A	1.13

Summary

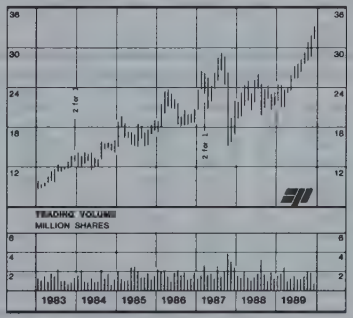
This company is a leading worldwide manufacturer of self-adhesive base materials, labels, tapes, office products and specialty chemicals. AVY markets its own proprietary products and produces pressure sensitive materials for other manufacturers and converters. AVY completed a restructuring program in fiscal 1988 which included the divestment and reorganization of several businesses. Record earnings are expected for fiscal 1989 and 1990, reflecting continued growth in core businesses.

Current Outlook

Share earnings for the fiscal year ending November 30, 1990 are projected at $2.25, versus the $2.00 expected for fiscal 1989.

Dividends at $0.14 quarterly are the minimum expected.

Sales for fiscal 1990 are expected to rise about 10%, reflecting continued good volume growth in the pressure-sensitive materials products for key markets such as information processing and packaging, aided by product line expansion and the start-up of major new and expanded production facilities. Profits should benefit from the recent decline of raw material costs, partly offset by the stronger U.S. dollar. Profitability will also be aided by the return to profitability of the French label unit during 1990, and expected improvements in the U.S. films and industrial label businesses.



Net Sales (Million $)

Quarter:	1988-9	1987-8	1986-7	1985-6
Feb.	414	374	331	250

Nov.	E0.56	0.48	d0.18	0.34
	E2.00	1.77	0.81	1.23

Important Developments

Oct. '89— AVY said that third-quarter earnings benefited from strong performances in the core U.S. materials, specialty tapes, office products and Soabar tag businesses. However, a stronger U.S. dollar plus a large translation loss in Brazil affected results, while profitability was unsatisfactory in the U.S. industrial label business and European roll material business.

Feb. '89— AVY completed most of the restructuring program announced in 1987, including the sale of two divisions, the closing of seven factories and the reorganization of its French label operations. In addition, AVY reorganized its domestic label and Soabar divisions. Capital spending for fiscal 1989 was budgeted at $95 million, and several new plants in the U.S. and Europe were expected to start up.

Next earnings report expected in late January.

Business Summary

Avery International operates in two principal industry segments; the manufacture of self-adhesive base materials, and the production of converted products such as labels, tags and decorative devices. Industry segment contributions:

Fiscal 1988	Sales	Profits
Materials units	61%	63%
Converting units	39%	37%

Foreign operations, primarily in Western Europe, accounted for 40% of sales in fiscal 1988 and 44% of operating profits.

The Materials Group produces pressure sensitive and self-adhesive coated papers, foils and films, retro-reflective products and graphic systems. The Specialty Tapes and Adhesives Group includes tapes, coated films, foils and foams, decorative films, and acrylic adhesives and polymers for industrial, automotive, electronic, medical and consumer disposable markets.

The Label Group produces custome labels for automotive, durable goods and consumer packaged goods, label application machinery, and date processing labels and computer supply products. The Soabar Products Group produces electronic imprinting systems, point-of-sale tickets, tags, and labels, and packaging components for apparel, retail, textile and industrial markets. Office Products include consumer and office stationery, labels, tapes, information processing and copier products, business forms, notebook and vinyl binders, and desk and office accessories.

Dividend Data

Dividends have been paid since 1964. A dividend reinvestment plan is available. A new "poison pill" stock purchase right was adopted in 1988.

Avnet, Inc.

NYSE Symbol AVT Options on ASE (Feb-May-Aug-Nov)

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 6'89	1989					
26⅝	29¾-20⅝	16	0.60	2.3%	B	1.27

Summary

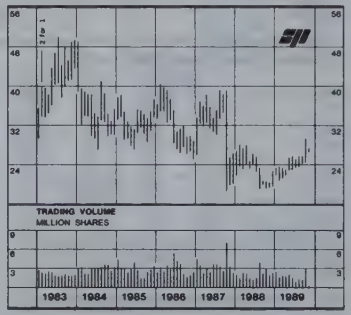
Avnet is the world's largest distributor of electronic components and computer products for industrial and military customers. It also makes home entertainment products and distributes electronic devices. Following sharply higher profits in fiscal 1988, earnings rose only modestly in fiscal 1989 as industry growth slowed and costs increased. Well controlled costs and the absence of certain unprofitable units should allow for significantly higher earnings in fiscal 1990, despite limited growth in the semiconductor industry.

Current Outlook

Earnings for the fiscal year ending June 30, 1990 are likely to reach $1.95 a share, up from the $1.51 reported for fiscal 1989.

The $0.15 quarterly dividend is likely to be increased in late 1990.

Sales for fiscal 1990 are expected to decline, reflecting weakness in the company's major markets and the absence of certain businesses. Growth in the semiconductor industry is expected to be limited, although the company should continue to gain market share. In addition, sales of computer products and other segments should improve. Margins are likely to be widen, due to well controlled costs, the consolidation and sale of underperforming units, and improved asset management. Long-term prospects should benefit from the rapid secular growth of the electronics industry.



Net Sales (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Sep.	438	491	441	363
Dec.	---	495	429	376
Mar.	---	475	467	379
Jun.	---	457	480	422
	---	1,919	1,817	1,539

Sales for the quarter ended September 29, 1989 declined 11%, year to year, reflecting lower sales in each segment caused by sluggish markets. However, margins widened significantly, due primarily to reduced operating expenses, improved asset management and the elimination of losses from several unprofitable units. Pretax income increased 42%. After taxes at 39.2%, versus 38.1%, net income rose 39%, to $0.45 a share from $0.33.

Common Share Earnings ($)

Business Summary

Avnet is a diversified marketer and manufacturer in the electrical and electronics field. Contributions by segment in fiscal 1989:

	Sales	Profits
Electronic Marketing	79%	79%
Video Communications	10%	8%
Electrical & Industrial	11%	13%

The Electronic Marketing group is the leading distributor of electronic components and computer products which are sold to the electronic industry. Products include semiconductors, computer products, connectors, capacitors, resistors and other devices. Components are shipped either as received or with assembly or other value added.

The Video Communications group designs and develops TV signal receiving hardware aimed at the TV and data signal processing industry. It includes Channel Master, the nation's largest supplier of TV antennas and related products.

The Electrical and Industrial group distributes electric motors and parts, measuring instruments and control equipment.

Summary

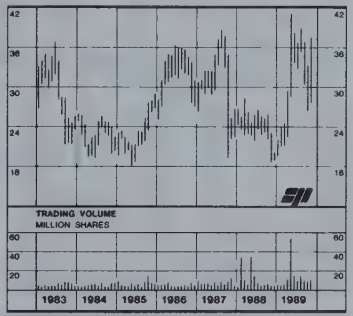
This company is the leading door-to-door marketer of cosmetics, toiletries and fragrances with nearly 1.5 million sales representatives worldwide. Avon also markets fashion jewelry and sells prestige fragrances in retail outlets. Chartwell Associates, an investment group, recently announced the acquisition of a 6.9% interest in Avon. AVP said that it would continue to oppose unsolicited takeover attempts.

Current Outlook

Share earnings for 1990 are projected at about $2.70, up from the $1.90 estimated for 1989.

Common dividends are expected to continue at $0.25 quarterly.

Sales from present businesses for 1990 are expected to show further progress. Despite possible continued softness in the U.S. direct selling division, volume should benefit from good sales growth in overseas beauty care operations. Further gains are also seen for the retail fragrance units, which may be sold in 1990. Profitability should benefit from the better volume, extensive cost controls and reduced interest expense.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	705	622	552	609
Jun.	778	704	640	712

Important Developments

Nov. '89— Avon said that it "was prepared to fight again" to remain independent following news that Chartwell Associates had acquired a 6.9% stake in AVP. Chartwell is an investment group whose investors include a top executive of Mary Kay Cosmetics, members of the Fisher real estate family of New York, and the Getty family trust. In August Avon rejected a $41-a-share buyout offer from Minneapolis investor Irwin Jacobs, and a $39-a-share bid from Amway Corp. was turned down in May. Mr. Jacobs still holds a 10.3% interest in Avon. Citing softer-than-forecast trends in U.S. direct selling, Avon noted that earnings for 1989 and 1990 will be lower than earlier expectations. AVP also noted that it was considering the sale of its Giorgio Beverly Hills and Parfums Stern retail fragrance units.

Next earnings report expected in early February.

Business Summary

Avon Products is the world's leading door-to-door marketer of beauty care products. It also sells upscale fragrances through retail outlets (AVP is considering the sale of this business). Health care related operations have been discontinued. Business segment contributions in 1988 were:

	Sales	Profits
Cosmetics, fragrances and toiletries	69%	72%
Gift & decorative items	15%	15%
Fashion jewelry	16%	13%

Foreign operations accounted for about 51% of sales and 55% of profits in 1988.

At the end of 1988 AVP had some 425,000 active representatives in the U.S. (up from 400,000 a year earlier) and 1,050,000 abroad (1,000,000).

Cosmetics, fragrances and toiletries include perfumes, colognes, sachets, soaps, bath products, makeup, skin care, nail and hand care items, hair care products, men's toiletries, personal care items, and children's and teen products. This segment also includes the retail sale of upscale fragrances, including Giorgio, Oscar de la Renta, Perry Ellis, and Valentino.

Avon is the nation's largest maker of fashion jewelry. Gift and decorative items include ceramics, glassware, collectibles, unscented candles and ornaments.

Summary

This huge British-based multinational company is the world's largest tobacco products manufacturer, and also has important interests in retailing, paper production, insurance and other financial services. Shareholders recently approved a restructuring plan designed to fend off Sir James Goldsmith's $21.1 billion takeover bid for the company.

Business Summary

B.A.T Industries p.l.c. is the world's largest manufacturer of tobacco products, and also has interests in retailing, paper production, financial services, and other areas. Contributions in 1988:

	Revs.	Profits
Tobacco	40%	46%
Retailing	23%	12%
Paper	10%	13%
Financial services	22%	27%
Other trading activities	5%	2%

Contributions by geographic area:

	Revs.	Profits
North America	30%	42%
Europe	27%	12%
United Kingdom	24%	28%
Other	19%	18%

Tobacco operations are conducted by British-American Tobacco Co., with over 240 brands in use throughout the world; Brown & Williamson Tobacco Corp., the third largest U.S. producer; and many other subsidiaries and affiliates worldwide.

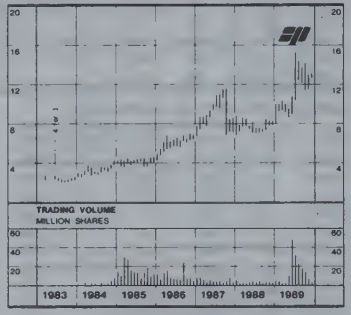
Retailing interests include over 230 Argos Distributors catalog showrooms in the U.K.; and Saks Fifth Avenue, Marshall Field's, Ivey's and Breuners.

Paper operations include Appleton Papers (U.S.), the world's largest producer of carbonless copying paper; and Wiggins Teape, which is responsible for all non-U.S. paper interests.

Financial service companies include Farmers Group, Inc., the third largest auto and homeowners insurance issuer in the U.S., acquired for $5.2 billion in December 1988; Eagle Star Holdings, a British insurance company, purchased for $1.37 billion in January 1984; Allied Dunbar, an English life insurance company; and numerous other subsidiaries worldwide.

Important Developments

Dec. '89— B.A.T agreed to sell its 69% stake in VG Instruments, a British scientific-instrument company, to Fisons PLC for £270.2 million pounds ($432 million).



Oct. '89— Shareholders approved a restructuring plan designed to fend off a £13.35 billion ($21.1 billion) takeover bid from Hoylake Investments Ltd., a Bermuda corporation formed by a group led by Sir James Goldsmith. The hostile bid was subsequently dropped, but Hoylake plans to make a new offer; at mid-December 1989, Hoylake was awaiting the outcome of certain regulatory problems. The restructuring proposes to break up B.A.T by spinning off or selling about £6 billion in assets; the company would sell its U.S. retailing businesses, including Saks Fifth Avenue and Marshall Field stores, in a transaction that could raise £1.2 billion. B.A.T also proposed a 50% dividend increase and the repurchase of up to 10% of its shares. The aim of the restructuring is a higher share price and a company refocused on tobacco and financial services.

Next earnings report due in late March.

Review of Operations

Total revenues for the nine months ended September 30, 1989, advanced 20%, year to year, benefiting from the inclusion of Farmers Group and strong performances from Eagle Star, Allied Dunbar and Canada Trust. Tobacco results also improved. Margins widened, primarily in the financial services group, but increased interest expense limited the gain in pretax income to 17%. After taxes at 36.9%, versus 36.7%, and higher minority interest, income was up 17%, to £721,000,000, from £616,000,000. In U.S. dollars translated at 1£=$1.62 in 1989, and 1£=$1.69 in 1988, share earnings were $0.77 and $0.69 in the respective periods. Results exclude extraordinary credits of £193,000,000 ($0.27 a share) and £13,000,000 ($0.02) in the respective interims.

Dividend Data

Dividends have been paid since 1928. Recent payments, after 15% British tax to U.S. residents:

Amt. of Divd. $	Date Decl.	Ex-divd. Date	Stock of Record	Payment Date

0.166 Apx.	---	Dec. 1	Dec. 7	Feb. 22'90

Finances

In July 1989, B.A.T withdrew its $400 million 9 3/8% Eurobond issue due 1994, as a result of Hoylake's hostile bid for the company (see Important Developments). B.A.T said investors would have faced substantial losses and liquidity problems had the issue been completed.

Summary

This company's main subsidiary, Bell Canada, is the largest supplier of telecommunications services in Canada, providing most of the telephone service in the provinces of Ontario and Quebec. The Northern Telecom subsidiary is Canada's largest manufacturer of telecommunications equipment. BCE also has interests in natural gas transportation, oil and gas operations, printing, and real estate.

Business Summary

BCE Inc. (formerly Bell Canada Enterprises) is a holding company which has interests in telecommunications services and equipment manufacturing, energy, printing and real estate. Through its Bell Canada unit, BCE is the largest supplier of telecommunications services in Canada, with major concentration in Ontario and Quebec. Industry segment contributions:

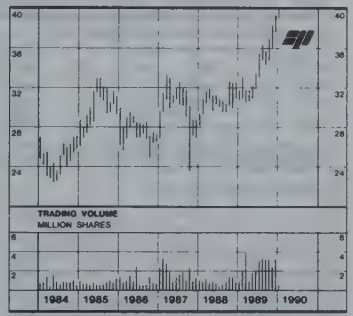
1988	Sales	Profits
Telecommunications	47%	85%
Manufacturing	43%	12%
Other	10%	3%

In 1988 Canada accounted for 65% of revenues, the U.S. 32%, and other 3%.

As of 1988 year-end Bell Canada provided telephone service to some 8,472,000 network access lines, up from 8,117,000 a year earlier. In addition to providing basic telephone service, operating units offer specialized telecommunications services and telecommunications equipment.

Northern Telecom Ltd. (NT), 53%-owned by BCE (the remainder publicly held), is the second largest manufacturer of telecommunications equipment in North America. Sales to BCE and its affiliates accounted for about 25% of NT's sales in 1988.

Bell-Northern Research (indirectly owned) is Canada's largest industrial research and development organization. Other interests include Trans-Canada PipeLines Ltd. (49.1% owned) which owns and operates Canada's sole natural gas transmission system; BCE Development Corp. (67% owned), a Vancouver-based real estate investment and development company; BCE Mobile Communications Inc. (81% owned) provides cellular telephone, paging and other services.



Important Developments

Nov. '89— BCE said 1989 year-end results would reflect its share of an expected substantial provision by BCE Development Corp. against the carrying values of its real estate assets. A review of carrying values was underway and was expected to be completed in the 1989 fourth quarter. Earlier, Olympia & York Development Ltd. terminated its offer to purchase all the common stock and other securities of BCE Development Corp. because certain conditions of the offer had not been satisified. BCE had agreed to tender its BCE Development securities, including its 67% interest in the common stock.

May '89— BCE said that it expected annual earnings growth of more than 5% over the next five years. BCE planned to reduce the dividend payout ratio to 50% over the next five years, with about 60% to be paid out in 1989.

Next earnings report expected in early February.

Summary

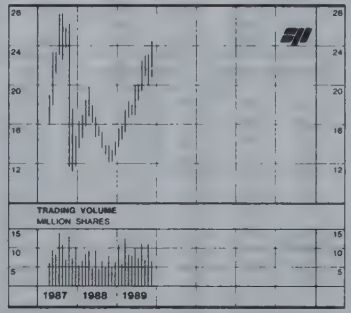
Baker Hughes is a leading factor in the oil well equipment and services industry; it is the world's largest producer of drilling bits and tool joints. BHI was formed through the mid-1987 combination of Baker International Corp. and Hughes Tool Co., a merger was designed to improve the combined entity's earnings power in a soft drilling environment. An improved outlook for natural gas drilling and favorable prospects for BHI's process equipment segment should enhance near-term profitability.

Current Outlook

Share earnings for the fiscal year ending September 30, 1990 are projected at $0.85, versus the $0.64 reported for fiscal 1989.

Dividends should continue at $0.11½ quarterly.

Revenues in fiscal 1990 should benefit from generally improved economic conditions throughout the industry. Margins are projected to strengthen primarily in the production tools and process equipment segments. The company can be expected to increase market share. BHI can consider selected acquisitions that would enhance its market position while diversifying its product line.



Revenues (Million $)

Quarter:	1988-9	1987-8	1986-7	1985-6
Dec.	566	546	463	---

Important Developments

Nov. '89— Baker Hughes reported that earnings in fiscal 1989 benefited from a more favorable mix in the type of wells drilled and continued strength in the markets served by Baker Hughes Process Equipment. Drilling activity for crude oil remained depressed. Drilling for natural gas was improving because gas is more environmentally compatible than oil. The company expects drilling to be stable in Europe and Africa, to increase modestly in the U.S. and Far East, and to decline slightly in Latin America. BHI reported the outlook for Baker Hughes Process Equipment is favorable. The company said that emphasis on the environment, and specifically on clean water, is expected to lead to increased demand for equipment used in waste water treatment, for both municipal and industrial applications.

Next earnings report expected in late January.

Business Summary

Baker Hughes was formed in early 1987 through the merger of Baker International Corp. and Hughes Tool Co. The company provides a wide range of equipment and services used in the drilling, completing and reworking of oil and gas wells. It also makes process equipment for pumping and treating liquids, and specialty chemicals for water treatment and paint production. On June 1, 1989 BHI purchased Bird Machine Co. a supplier of liquid/solid separation equipment. Industry segments in fiscal 1988 (profits in million $):

	Revs.	Profits
Drilling	29%	$191.2
Completion, remedial & production	44%	47.2
Mining	18%	-21.1
Other	9%	5.0

International sales accounted for 45% of revenues in fiscal 1988 and operating income of $36.0 million. About 23% of revenues were derived from services and rentals.

Drilling products manufactured include a broad range of rolling cutter and diamond bits and basic drilling rig equipment. The company believes it is the leading maker of rock bits. The company also produces drilling fluids for oil and gas well drilling, and provides fishing tool services to locate and retrieve objects downhole.

Completion, remedial and production products and services are used after oil and gas wells are drilled to achieve safety and long-term productivity. Packers, a major product line, are used to seal the space between the tubing and casing to protect the casing from reservoir pressures and to maintain separation of production zones. BHI also makes centralizers, which fit around the casing to keep it centered, and liner hanger tools, which are used to suspend strings of casing pipe in wells. Services include acidizing and fracturing processes to improve formation permeability, and gravel packing to prevent sand from entering the well bore.

On July 31, 1989 BHI sold an 89% interest in its Mining Equipment Group. The 11% portion of the unit that was not sold is the hydraulic drill business in France and the U.S., for which the U.S. Government has requested additional information. BHI intends to sell the 11% interest once legal determination is received. The Mining Equipment Group has made mining machinery, ore processing equipment, mining and construction rock bits, and cutters, control systems and pumps.

Dividend Data

Baker International had paid dividends since 1929 and Hughes Tool since 1973. Payments by the merged company began in 1987. A "poison pill" stock purchase right was adopted in 1988.

Ball Corp.

NYSE Symbol BLL In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 14'89	1989					
30¼	34⅜-25¼	30	1.12	3.7%	A	1.02

Summary

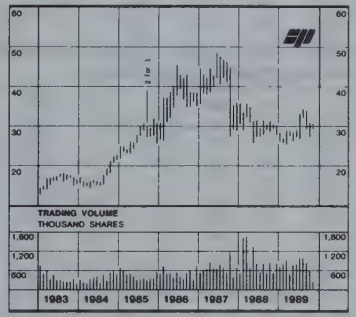
This company manufactures metal beverage containers and other packaging products, and has interests in aerospace and other technical fields. BLL has a 50% interest in Ball-Incon Glass Packaging, a joint venture with TBG Europe nv. Earnings for the first nine months of 1989 were impacted by lower margins in packaging products, but good performances by aerospace systems and diversified products, and the absence of 1988's restructuring charge, should lead to higher earnings for the full year 1989. The outlook for 1990 is enhanced by better pricing for metal containers.

Current Outlook

Earnings for 1990 may rise to $2.25 a share from 1989's estimated $1.95.

Dividends should continue at $0.28 quarterly.

Sales of packaging products in 1990 are expected to remain flat as Ball continues to operate its metal container plants at near-capacity and limits plant additions. However, industrywide capacity reductions should result in improved metal container pricing, and along with lower interest rates and good results at the aerospace and diversified products divisions, should result in favorable earnings comparisons.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	257	241	284	241

Sep.	321	293	267	282
Dec.	---	233	215	252
	---	1,073	1,054	1,070

Sales for the nine months ended September 30, 1989 rose 9.0%, year to year. Hurt by pricing pressures in packaging products, higher interest costs, and the absence of 1988's $5.9 million pretax gain ($0.16 a share after tax) on the sale of an investment, pretax income declined 24%. After taxes at 29.5%, against 34.0%, net income was down 19%, to $1.49 a share from $1.89, which excludes a special credit of $0.77.

	E1.95	1.40	2.80	2.56

Important Developments

Oct. '89— Earnings for the first nine months of 1989 were adversely affected by pricing pressures in the metal container manufacturing business and higher interest costs. Substantial improvement in plastic packaging products was due to elimination of losses from the blow molded plant that was closed in 1988. Ball said that industrywide can manufacturing capacity reductions have resulted in an apparent firming of announced container price increases for 1990. BLL added that the Ball Packaging Products Canada joint venture was performing above expectations, while the Ball-Incon Glass Packaging joint venture, though profitable, continued to suffer from margin pressure. Improved pricing was expected in early 1990. Interest expense for the first nine months of 1989 totaled $14.6 million. Capital expenditures for all of 1989 are expected to total $70 million.

Next earnings report expected in mid-February.

Business Summary

Ball is a large producer of metal containers and makes other packaging and diverse industrial items, and aerospace products. In mid-1987 it spun off commercial glass lines to a 50-50 joint venture with TBV Europe nv called Ball-Incon Glass Packaging. Results by business segment in 1988 were divided as follows:

	Sales	Profits
Packaging products	62%	63%
Aerospace products	24%	22%
Diversified products	14%	15%

Food jars, freezer jars and jelly glasses are produced for the home food preservation market. Ball makes two-piece aluminum and steel beverage cans for beer and soft drinks firms. Over the past three years, beer and soft drink can and end sales accounted for about 50% of total sales. Sales to Anheuser Busch alone accounted for 21% of sales in 1988. Ball's share of the net income of the joint venture glass operations with TBV is included in profits of the packaging products segment.

Aerospace systems is comprised of five businesses: electro-optics/cryogenics, communications, space systems, time/frequency standards and systems engineering. Sales to agencies of the U.S. government accounted for some 25% of 1988 sales.

Diversified products include fabricated zinc for coin blanks, coextruded plastic sheet and associated containers, injection molded and extruded/thermoformed plastics and automated x-ray and vision inspection businesses. Light-gauge sheet metal is also cut, coated and lithographed.

Dividend Data

Dividends have been paid since 1958. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

Nov. 8'89	1989					
17⅛	29¾-16	21	0.30	1.8%	B-	1.46

Summary

This major gaming company operates four casino/hotels in Atlantic City and Nevada, manufactures slot machines, and sells products and services to lottery operators. In addition, BLY is the largest U.S. operator of fitness centers. Earnings in 1989 have largely come from a gain on the sale of BLY's Aladdin amusement business.

Current Outlook

For the company as currently constituted, earnings for 1990 are estimated at roughly $0.60 a share, compared with the $0.95 (including a net benefit of $0.81 from nonrecurring items) expected for 1989.

The dividend may remain at $0.07½ quarterly.

Recent profit declines in BLY's major casino/hotel and health club businesses are of some concern. Future results in Atlantic City could be boosted by BLY's opening of a new 800-room hotel tower. However, in 1990 BLY is expected to be facing formidable competition from the opening of new casino/hotels in Las Vegas and Atlantic City.

	E0.95	1.12	d0.60	0.81

Important Developments

Oct. '89— BLY said that its third quarter 1989 results were hurt by a lag in revenue associated with expansion projects in its casino/hotel and fitness center businesses. Also, BLY's retention of financial advisors could contribute to a restructuring of the company in an effort to enhance shareholder value. Previously, BLY had made efforts to restructure, including a proposed division of BLY into two entities and, separately, a proposed initial public offering of the health club business, but these plans were not actualized. Meanwhile, BLY's 1989 second quarter included a net benefit of $0.81 a share from nonrecurring items, including the sale of the Aladdin amusement center business. Also, within the next 12 months, it is expected that BLY will be facing additional gaming competition from two new, large casino/hotels in Las Vegas and one in Atlantic City.

Next earnings report expected in late February.

Business Summary

Bally Manufacturing is a major leisure-time company whose assets have become increasingly concentrated in casino/hotels in Nevada and Atlantic City. Other businesses include health and tennis clubs, and gaming and lottery equipment. An amusement center business was sold in 1989. Contributions by business segment in 1988:

	Revs.	Profits
Casino hotels	48%	54%
Health and fitness	36%	32%
Gaming equip./serv.	10%	6%
Amusement games/serv.	6%	8%

BLY's casino/hotels include two facilities in Atlantic City and two in Nevada. In April 1986, BLY acquired MGM Grand Hotels, which included casino hotels in Las Vegas and Reno, and, in June 1986, BLY acquired the 16% interest it did not previously own in Atlantic City's Bally Park Place. In March 1987, BLY acquired Golden Nugget's Atlantic City casino/ hotel and various real estate parcels. Based on annual gaming revenues ($671 million in 1988), BLY is the largest casino operator in the U.S.

Bally's Health & Tennis Corp., a subsidiary, is the largest operator of fitness centers in the U.S.; as of early 1989, it operated about 315 fitness centers (including some in pre-opening development) under various names. BLY is also a leading maker of slot machines. In 1989 BLY sold its Aladdin amusement center business. In 1987 BLY sold its Six Flags theme park business.

Baltimore Gas & Electric

NYSE Symbol BGE In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 29'89	1989					
32⅜	33⅝–28½	11	2.10	6.5%	A	0.32

Summary

This leading electric and gas utility serves much of central Maryland. The company is currently negotiating a rate filing for costs associated with its idle Calvert Cliffs nuclear facility. As part of the case, BGE is also seeking to recover expenditures for its Brandon Shores coal plant which is scheduled for completion in 1991's second quarter. Longer-term prospects are favorable owing to excellent cash flow, the diversified commercial and industrial economy, and the development of nonutility businesses.

Current Outlook

Share earnings for 1990 are projected at $3.25, up from the $3.05 estimated for 1989.

Dividends are expected to continue at $0.52½ quarterly.

Share earnings for 1990 should benefit from the restart of Unit 1 of the Calvert Cliffs nuclear plant (expected in late 1989), and increased contributions from nonutility businesses. Share earnings for 1989 were restricted by the extended outage of both units at Calvert Cliffs.

Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	524	503	523	533
Jun.	435	389	392	395
Sep.	560	545	507	488
Dec.	---	426	388	418
	---	1,864	1,809	1,834

Revenues for the nine months ended September 30, 1989 rose 5.7%, year to year, reflecting higher kwh sales, increased gas sales, and a greater contribution from diversified activities. Increased production costs narrowed margins, and operating income declined 7.0%. Following greater interest charges, pretax income dropped 13%. After taxes at 24.1%, versus 25.9%, net income was down 11%. Share earnings were $2.61, compared with $3.01.

Common Share Earnings ($)

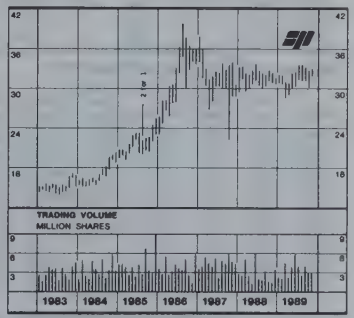
Dec.	E0.44	0.46	0.53	0.52
	E3.05	3.47	3.47	3.15



Important Developments

Nov. '89— BGE said that the Maryland PSC had concluded its investigation of the reasonableness of BGE's rates by issuing an order authorizing lower gas base rates equivalent to a decrease of $2.8 million in annual revenue. The PSC found that present electrical base rates are not excessive, and deferred consideration of the company's May, 1989 application for a base rate increase of $120.2 million until the processing of the application is completed in December, 1989. Separately, BGE said that it had revised its estimated restart schedule for Unit 1 of the Calvert Cliffs nuclear plant to year-end 1989 from the end of October; Unit 1 was shut down in May following the discovery of minute cracks in the pressurizer of Unit 2. Unit 2 has an in-service date of the spring of 1990.

Next earnings report expected in late January.

Business Summary

Baltimore Gas & Electric provides electric and gas service to a population of over 2.4 million in Maryland. The local economy is composed of heavy industry, service businesses, and the port of Baltimore. The company is supplementing earnings through an extensive diversification program. BGE's Constellation group of companies coordinates nonutility businesses in energy and environmental projects, real estate, senior living and health care, and investment and financial services. As of September 30, 1989 BGE's nonutility assets totaled some $788.4 million; the investment portfolio totaled $305.9 million. In 1988 electricity accounted for 77% of revenues, gas 20% and diversified activities 3%. Electric revenues by customer class in recent years:

Revenues	1988	1987	1986	1985
Residential	43%	42%	41%	41%
Commercial	20%	20%	20%	20%
Industrial	36%	37%	38%	38%
Other	1%	1%	1%	1%

Sources of power in 1988 were 47% coal, 46% nuclear, 4% oil, 3% hydro and other. Peak demand in 1988 was 5,381 mw and capability totaled 5,930 mw for a capacity margin of 9.3%. Gas sales in 1988 were 109,529,392 DTH, versus 102,941,315 DTH in 1987.

Dividend Data

Dividends have been paid since 1910. A dividend reinvestment plan is available.

Summary

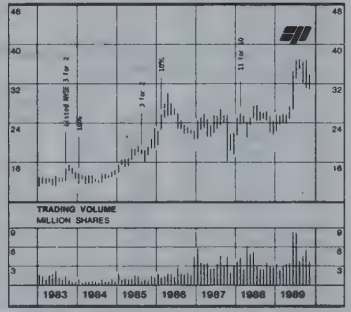
This Ohio-based bank holding company, the nation's 26th largest, has grown rapidly through acquisitions, extending its territory into Indiana and other midwestern states, while maintaining rapid earnings growth. ONE's strength is in retail banking, including its extensive credit card processing operations. In June, 1989 it agreed to acquire an initial 7.5% stake in the failed banks of MCorp., Texas, for $38 million. With the FDIC absorbing the risk of bad loans there, the acquisition should boost earnings growth.

Current Outlook

Earnings for 1990 could reach $3.45 a share, up from the $2.80 projected for 1989.

The $0.26 quarterly dividend may be raised in 1990.

A cooling economy should result in slowing loan growth through 1990. Credit card loan growth could continue to be rapid, as ONE gains market share in a consolidating industry, though not all growth will show up on the balance sheet if ONE continues to sell credit card receivables. These sales, an alternative way of funding credit card operations, replace net interest income with fee income. Credit quality is good, and the provision for loan losses may grow only in line with loans. ONE's expertise in managing technology should keep fee income, particularly from card processing, growing rapidly. ONE has a long record of acquiring banks and rapidly improving their profitability. This management ability has resulted in minimal dilution from its aggressive acquisition program. With the FDIC assuming the risk of bad loans at MCorp, ONE should be able to graft its retail banking expertise on to those banks and realize cost efficiencies (estimated at $50 million annually) which could help the Texas operations contribute over $0.30 a share in 1990 and much more in 1992 when ONE's stake may be raised to 100%.



Review of Operations

Net interest income for the nine months ended September 30, 1989 advanced 7.1%, year to year, as earning assets were 8.9% higher, while the net interest margin narrowed, reflecting the securitization of credit card receivables, and a less favorable mix of deposits. The provision for loan losses was 11% higher, at $148 million. Income on credit card processing advanced 18%, but securities losses of $7.6 million, versus a $3.9 million gain, held the rise in noninterest income to 5.6%. With noninterest expense up 7.8%, pretax income rose 2.6%. After taxes at 20.7% (including a $14.6 million credit for effect of an accounting change), versus 24.0%, net income was up 7.0%. Share earnings were $2.07, versus $1.94.

Dec.	E0.73	0.67	0.62	0.45
	E2.80	2.61	1.98	1.94

Important Developments

Oct. '89— ONE said that during the third quarter it experienced a slowing in commercial loan demand and an increase in troubled commercial credits. Average commercial loan volume of $7.06 billion fell 1.8% from the second quarter. ONE noted that the lack of growth in low-cost checking and savings account balances hurt margins.

Next earnings report expected in mid-January.

Business Summary

Banc One Corp. is the largest bank holding company in Ohio, where it owns 20 banks with 317 offices; it also owns 12 banks in Indiana with 143 offices, four banks in Michigan (24), 21 in Wisconsin (72), and one each in Illinois and Kentucky (10). The company emphasizes retail banking, and has extensive credit card processing operations with over 6.7 million accounts, including 3 million of its own. Lending to middle market corporations is also important. Banking related subsidiaries engage in trust ($11.5 billion managed), consumer finance (51 offices), leasing, mortgage banking, travel services, discount brokerage and life insurance. Exposure to LDC countries has been eliminated.

During 1988 average earning assets of $21.1 billion were divided: commercial loans 37%, real estate loans 16%, consumer loans 24%, investments 23%. Average sources of funds were demand deposits 21%, time deposits 58%, borrowings 11%, long-term debt 1%, equity 8%, and other 2%.

At year-end 1988 nonperforming assets were $240 million (1.38% of loans), up from $207 million (1.32%) a year earlier. Net charge-offs were 0.98% of average loans in 1988, against 1.27% in 1987.

Dividend Data

Dividends have been paid since 1935. A dividend reinvestment plan is available.

Bandag, Inc.

NYSE Symbol BDG

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Dec. 26'89	1989					
83	89¼-64¼	16	1.00	1.2%	A+	0.97

Summary

This company is a leading manufacturer of tread rubber, equipment and supplies used in a patented "cold" bonding process for the recapping of truck and bus tires. Sales and earnings have been in an uptrend over the past decade, and dividends have been increased in each year since their initiation in 1976. Foreign operations accounted for 37% of sales and 26% of operating earnings in 1988. The Carver family controls about 72% of the voting power.

Current Outlook

Earnings for 1990 may rise to $5.45 a share from the $5.10 expected for 1989.

The quarterly dividend has been raised 11.1%, to $0.25 from $0.22½, with the January 24, 1990 payment.

Unit demand for Bandag's line of retread products should continue to advance in 1990, reflecting higher prices and greater market penetration overseas as manufacturing capacity is increased. Margins may narrow, reflecting higher raw materials costs and market development expenses. Foreign currency translations should have a favorable impact. Share earnings will be boosted by an ongoing share repurchase program.

Net Sales (Million $)

Quarter:	1990	1989	1988	1987
Mar.	---	114.3	105.0	90.1
Jun.	---	128.6	122.4	103.4
Sep.	---	136.4	125.5	109.9
Dec.	---	---	137.7	119.7
	---	---	490.6	423.0

Sales for the nine months ended September 30, 1989 advanced 7.5% year to year, reflecting increased unit volume. Higher prices were offset by the adverse impact of foreign currency translations. Pretax income rose 8.9%. After taxes at 38.5%, against 38.2%, net income rose 8.5%. Share earnings were $3.70 (on 3.0% fewer shares), versus $3.31.

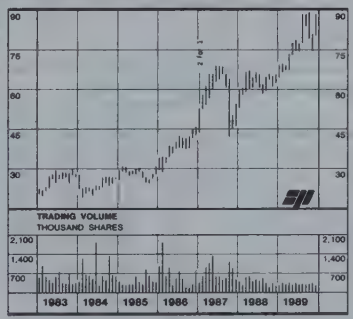
Dec.	E1.50	E1.40	1.37	1.10
	E5.45	E5.10	4.68	3.90



Important Developments

Oct. '89— Bandag said that the 8.7% increase in sales for the third quarter of 1989 reflected increased retread material unit volume and that the strengthening of the dollar resulted in a reduction in the translated value of foreign currency denominated sales. Domestic price increases, which were fully effective as of the second quarter, were not enough to offset the negative currency translation. Gross profit margin in the third quarter was down from the first half of the year, due to scheduled plant shutdowns for maintenance and equipment installation and the start-up of a plant addition. During the first nine months of 1989 BDG repurchased 164,400 common shares on the open market for $11.1 million. At September 30 BDG had cash and cash equivalents totaling $12.2 million and marketable equity securities valued at $25.3 million.

Next earnings report expected in late January.

Business Summary

Bandag is engaged primarily in the manufacture of pre-cured tread rubber, equipment and supplies for the retreading of tires by a "cold" bonding reaction. More than 90% of the tread rubber sold by the company continues to be for retreading tires used on trucks and buses, with the balance for retreading industrial and light commercial, and passenger car tires. In 1988 and 1987 tread rubber, cushion gum, and retreading supplies accounted for 86% of total sales, and other products (including retreading equipment and rubber components) accounted for 14%.

Bandag in 1988 had operating earnings of $20.3 million (17% of the total) in Western Europe and $11.3 million (9.4%) in other foreign countries. The company produces completely cured strips of tread rubber with tread patterns fully formed. The more than 1,000 franchised dealers bond the tread to a buffed tire casing under optimum heat and pressure. While the initial cost of a Bandag Process retread is typically higher than the initial cost of retreads produced by the long-used "hot-cap" retreading process, the Bandag Process produces longer-wearing tread rubber and minimizes damage to the casings, resulting in increased mileage and lower user cost per mile.

Summary

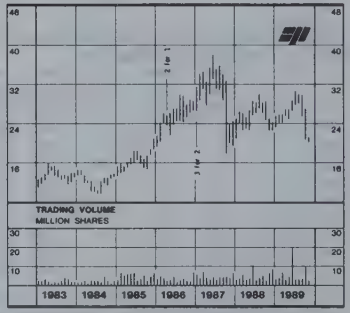
This bank holding company, the 14th largest in the U.S., is the parent of First National Bank of Boston, the largest in New England, and banks in Maine, Connecticut, Vermont and Rhode Island. It also has significant international operations. In 1989's third quarter BKB sharply boosted reserves for problem real estate loans, resulting in a loss for the quarter and expected lower earnings for the year. Earnings will likely rebound in 1990 but the weak real estate market and a cooling regional economy will restrain the recovery.

Current Outlook

Earnings for 1990 are expected to rebound to $4.60 a share from the $1.75 estimated for 1989.

Dividends should continue at $0.31 quarterly.

Profitability should improve in 1990, assuming the majority of problem real estate loans have been identified and reserved for. Domestic loan growth will be minimal at best, as the robust New England economy cools. The net interest margin could remain under pressure from high levels of nonperforming assets. The risk represented by LDC loans has been eliminated; the remaining $250 million of long-term loans are 100% reserved for. However, problem domestic commercial real estate loans are increasing (they were $1.1 billion, or 18% of those outstanding, at September 30, up $185 million for the quarter); they are the major reason for 1989's depressed profits. While BKB's conservative accounting methods may serve to inflate problem loans, higher loan loss provisions may be necessary. Leveraged buyout financing, (BKB had a $2.5 billion portfolio at September 30) which contributes significantly to the high profitability of BKB's corporate banking activities, may experience lower volume in the future. BKB is trying to boost profitability of its New England retail banking operations, partly through expense controls and merging of functions. BKB plans to cut about $150 million in expenses by 1991.



Review of Operations

Net interest income for the first nine months of 1989 advanced 5.4%, year to year, reflecting 6.8% growth of earning assets, partially offset by the impact of higher nonperforming assets. The provision for loan losses increased 4-fold to $442 million, primarily reflecting weakness in the real estate sector. With noninterest expense up 1.9% and noninterest income flat, pretax earnings fell 82%. After lower taxes, net income was down 74%. Primary share earnings were $0.73 on 6.5% more shares, versus $3.47.

Dec.	E1.00	1.18	d0.69	1.03
	E1.75	4.66	0.10	3.69

Important Developments

Oct. '89— BKB said that the $370 million boost in reserves for possible credit losses in the third quarter reflected an expected increase in nonaccrual loans, continued weakness in the real estate industry, softness in general economic conditions and a large individual credit in its portfolio of highly leveraged transactions. BKB expected a fourth quarter provision of $45 million.

Next earnings report expected in mid-January.

Business Summary

Bank of Boston is a New England regional bank holding company that also has significant international operations. It owns the First National Bank of Boston, the nation's 13th largest bank, as well as eight smaller Massachusetts banks and one each in Connecticut, Rhode Island, Vermont and Maine. In addition to traditional strengths in providing financial services to corporations, BKB engages in investment management and trust operations ($13.7 billion managed), commercial real estate lending and mortgage banking ($13 billion servicing portfolio). International operations (18% of assets) include financing trade and investment and indigenous banks in Argentina and Brazil. Retail operations are conducted through 265 New England branches.

During 1988 average earning assets of $30.4 billion were divided domestic loans 69%, foreign loans 12%, investment securities 11%, money market investments 8%. Average sources of funds were demand deposits 12%, savings deposits 19%, time deposits 19%, foreign deposits 14%, short-term borrowing 22%, long-term debt 5%, equity 6%, and other 3%.

At year-end 1988 nonperforming assets were $1,215 million (4.6% of loans and related assets), including $359 million of LDC loans, down from $$1,393 million (5.7%) a year earlier. The reserve for loan losses was 2.61% of loans, versus 2.98%. Net charge-offs during 1988 were 0.79% of average loans (including $93 million of LDC loans) against 1.26% in 1987.

Summary

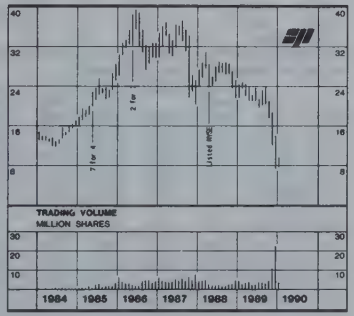
This Massachusetts-based regional bank holding company owns banks in four New England states, including Connecticut Bank & Trust and Bank of New England (Boston). In December, 1989, responding to the deterioration in the New England real estate market and its loan portfolio, NEB said it would significantly increase its loan loss reserve. Shortly thereafter, NEB rescinded its previously declared $0.34 quarterly dividend. A large loss is expected to be reported for 1989. NEB said it was exploring alternatives to maximize shareholder value, including potential mergers and the sale of assets.

Current Outlook

Earnings for 1990 could approximate $2.90 a share, versus the $5.00 loss estimated for 1989.

In December, 1989 directors rescinded the previously-declared $0.34 quarterly dividend which would have been payable January 19, 1990.

Earnings are expected to resume in 1990, but the rebound will likely be restrained by the slowing in the New England economy. Loan growth will be limited, reflecting the regional malaise. In particular, commercial real estate lending, which fueled much of the rapid loan growth in recent years, will slow, reflecting overbuilt markets in New England. Real estate loans account for about one-third of NEB's total loans, or $8.5 billion. Loan quality in this area has been deteriorating, and nonperforming assets have been on the rise. At year-end 1989 they may have totaled $1.6 billion, versus $900 million at September 30, 1989 and $419 million at December 31, 1988. While the worst is probably over, further reserve boosting is likely. The net interest margin could continue under pressure from intense competition for deposits. The sale and consolidation of branch offices, along with other cost saving measures, will help.



Review of Operations

Net interest income for the nine months ended September 30, 1989 fell 5.6%, year to year, due to a slowing in the growth of earning assets, a rise in nonperforming assets, and a narrower net interest margin. The provision for loan losses was 162% higher, at $207 million, to cover higher nonperforming assets and boost reserves. Aided by a 213% advance in income from asset sales, a 5.9% rise in fee income, and higher securities transaction and foreign exchange income, noninterest income was 13% higher. Noninterest expense was up 2.6%, and pretax earnings dropped 48%. After taxes at 25.6%, versus 34.3%, net income fell 41%, to $1.73 a share from $3.00.

Important Developments

Dec. '89— NEB said it would raise its loan loss reserve to over $1 billion (an increase of about $650 million) in response to the continuing decline in the New England real estate market. NEB said it would explore alternatives to maximize shareholder value, including potential mergers and sales of assets. In January, 1990 NEB agreed to sell its vehicle leasing unit.

Next earnings report expected in mid-January.

Business Summary

Bank of New England Corp. is a regional interstate bank holding company that owns Connecticut Bank & Trust, the largest bank in Connecticut (acquired in mid-1985), Bank of New England, Massachusetts' second largest bank, as well as seven other banks in Maine, Rhode Island and Massachusetts, which together operate 468 branches. In addition to retail and wholesale banking services, the company provides trust services and commercial and asset-based finance services through bank and non-bank affiliates.

During 1988 average earning assets of $27.8 billion (up 13% from 1987) were divided: commercial loans 38%, real estate loans 33%, consumer loans 12%, foreign loans 1%, and investment securities 16%. Average sources of funds were demand deposits 13%, savings deposits 28%, time deposits 32%, (total deposits were $22.2 billion), short-term borrowing 18%, long-term debt 2%, equity 5%, and other 2%.

At year-end 1988 nonperforming assets were $419 million (1.68% of loans), against $388 million (1.78%) a year earlier. The reserve for loan losses was 1.30% of loans, down from 2.16%. Net chargeoffs were 1.18% of average loans in 1988, versus 0.25% in 1987, reflecting chargeoffs of LDC loans.

Dividend Data

Prior to ommission in December, 1989, common dividends had been paid by the company and its predecessors since 1830. Payments in the past 12 months:

Summary

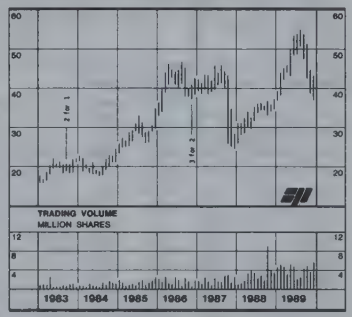
This bank holding company acquired its New York City rival, Irving Bank, for $1.4 billion in cash, stock and warrants in 1988, creating the seventh largest banking organization in New York. In the third quarter of 1989 a $600 million addition to its provision for loan losses, primarily related to BK's LDC portfolio, led to a loss in the quarter, and will result in sharply lower earnings for 1989. Efficiencies from the merger and the absence of further special reserving should benefit earnings in 1990.

Current Outlook

Earnings for 1990 could reach $7.25 a share ($7.00 fully diluted), versus the $0.40 estimated for 1989.

The quarterly dividend was raised 10%, to $0.53 from $0.48, with the November, 1989 payment.

Loan growth could be moderate in 1990, reflecting a slowing economy. However, larger lending limits gained from the Irving merger will enable BK to bid for new corporate business. Revenues will be enhanced from BK's growing pool of credit card receivables. The net interest margin may improve slightly as the benefits of a centralized funding process offset competition for retail deposits. No significant hikes to the LDC reserves (about 65% of BK's $1.47 billion medium term loans) are expected in 1990. While nonperformers have risen slightly, reserves for problem loans appear in good shape. BK's well diversified $3.1 billion LBO portfolio will likely run off in 1990, given the slowing pace of LBO's. BK has been cutting overhead costs in connection with the Irving acquisition, (savings of about $110 million in 1989 and with another $60-$70 million in 1990) which will further benefit earnings.



Review of Operations

Net interest income for the nine months ended September 30, 1989 rose 83%, year to year, reflecting the acquisition of Irving. The provision for loan losses was substantially higher, at $740 million, primarily due to increased reserves for LDC loans. Noninterest income increased 101%, while noninterest expenses were up 82%. A pretax loss of $97.6 million was posted, versus income of $223.7 million. After tax credits of $41.7 million, versus taxes at 29.2%, the net loss was $55.9 million, compared with net income of $158.3 million. Following preferred dividends, the per-share loss was $1.18 (on 105% more shares), versus earnings of $4.52 ($4.16 fully diluted).

Important Developments

Dec. '89— BK signed a definitive agreement to purchase the credit card business of First City Bancorp of Texas for a premium of 24.2% above the $544 million in outstanding receivables. In October BK said it allocated $400 million of the $600 million special addition to its loan loss provision in the third quarter to its LDC exposure. That action was prompted by recent developments in LDC debt negotiations.

Next earnings report expected in mid-January.

Business Summary

Following the acquisition of Irving Bank in November, 1988 this company became the seventh largest banking organization in New York, and the 10th largest in the nation. Wholesale banking services are provided to corporate clients. Retail banking services, including 2.2 million credit card accounts, are provided through 250 branches, largely in the suburbs of New York City. Securities clearing and processing is an important part of business, particularly for mutual funds, as is trust management. The company is also a primary dealer in Government securities. Nonbank subsidiaries include mortgage banking, leasing and insurance. International operations account for 23% of assets. BK has an agreement to acquire Northeast Bancorp, should law permit.

During the first nine months of 1989 average earning assets of $42.5 billion were divided: domestic loans 52%, foreign loans 29%, investment securities 11%, money market investments 8%. Sources of funds were interest-bearing deposits 54%, interest-free deposits 16%, short-term borrowings 17%, long-term debt 2%, equity 5% and other 6%.

At September 30, 1989 nonperforming assets were $1,213 million (3.3% of loans), compared with $963 million (2.9%) at year-end 1988. The reserve for loan losses was 4.16% of loans, versus 2.84%. Net chargeoffs were $157 million during the first nine months of 1989.

Dividend Data

Summary

This bank holding company, the third largest in the U.S., returned to profitability in 1988 after three consecutive years of losses , benefiting from a cost reduction program and substantial progress in working out its high levels of domestic problem loans. New management has refocused the bank on its domestic regional banking businesses, with only limited wholesale international capabilities. Profits and significant assets sales in recent years have helped restore capital, permitting BAC to reinstate a modest cash dividend in February, 1989.

Current Outlook

Earnings could rise to $5.40 a share in 1990 versus the $4.85 estimated for 1989.

Dividends should continue at $0.15 quarterly.

Consumer loans, now 23% of BAC's portfolio compared with 19% a year earlier, should continue to grow rapidly through 1990, as it attempts to regain market share lost in California during the period of its financial difficulties. New products and services should help to achieve this goal. BAC is also emphasizing lending to smaller companies, while scaling back on international wholesale banking. The net interest margin should benefit with the improved mix of assets. Management has largely finished reconfiguring the consumer banking network, which has resulted in substantial cost savings. Loan quality remains strong: domestic nonperforming loans were $763 million at June 30, 1989, down from $1.4 billion a year earlier. However, LDC loans of $8.4 billion continue to represent substantial risk, and reserves (about 30%) may be boosted.

Dec.	E1.34	0.97	0.27	0.44
	E4.85	2.77	d6.43	d3.74

Review of Operations

Net interest income for the six months ended June 30, 1989 advanced 27%, year to year, reflecting $100 million of interest payments by Brazil, lower levels of nonperforming assets, and a greater proportion of higher-yielding consumer loans. The net interest margin widened to 4.67% from 3.70%. The provision for loan losses was 24% higher, at $280 million. Despite lower trading profits, higher foreign exchange income and increased fees and commissions led to a 1.9% rise in noninterest income. With noninterest expense declining less than 1.0%, pretax earnings gained 113%. After taxes at 41.5%, against 41.9%, net income was up 115%. With 13% more shares outstanding in the 1989 interim, share earnings were $2.20 ($2.12 fully diluted), versus $1.05 ($1.05), before tax credits of $0.68, versus $0.36.

Important Developments

Aug. '89— BAC said that second quarter results reflected the expansion of domestic loans and deposits, with strong growth in the consumer loan and residential mortgage portfolios. BAC said net interest income advanced sharply on the strength of increases in both the net interest margin and loan volumes. In August BAC redeemed all of its outstanding shares of convertible preferred stock into 3,275,000 common shares.

Next earnings report expected in mid-October.

Business Summary

This holding company owns Bank of America, the nation's second largest bank, and Seattle-First National Bank. Retail banking services for consumers and smaller corporations are provided through 1,060 branches worldwide and include mortgage banking, finance, insurance and trust. Lending and capital market services for corporate and institutional clients are also provided through 59 offices worldwide (international assets were 24% of the total in 1988) and include trade finance, corporate finance, risk management products and trading in financial instruments.

Average earning assets during 1988 of $85.7 billion were divided: real estate loans 18%, consumer loans 15%, commercial and other loans 22%, investment securities 9%, temporary investments 14%. Average sources of funds were noninterest-bearing deposits 17%, other domestic deposits 44%, other foreign deposits 18%, short-term borrowings 7%, long-term debt 4%, equity 4% and other 6%.

At year-end 1988 nonperforming assets were $4.8 billion (6.9% of loans and related assets; including $2.2 billion of LDC loans), down from $5.2 billion (8.5%) a year earlier. The reserve for loan losses was 5.22% of loans versus 5.06%. Net chargeoffs during 1988 were 0.28% of average loans, versus 1.25% in 1987.

Dividend Data

Paid since 1933, common dividends were omitted in January, 1986, and have been resumed with the following payments:

Summary

This bank holding company, the sixth largest in New York City, has moved out of consumer banking to concentrate its efforts on corporate services, including money and securities markets activities, corporate finance, and fiduciary services; international operations are substantial. Earnings in 1988 rebounded following the sharp drop in 1987, which was related to the LDC debt-related charges. The strong capital position and focused business strategy could aid continued growth in the future.

Current Outlook

Earnings for 1990 could rise to $8.40 a share from 1989's estimated $8.10.

A modest boost to the $0.52 quarterly dividend is expected.

BT's strategy of selling a substantial portion of the loans it originates to other investors will likely limit growth of the loan portfolio. Although non performing domestic assets rose to $462 million at mid-1989 from $322 million at year-end 1988, largely due to a $100 million real estate loan, domestic loan quality appear good. However, concerns regarding the state of third world debt situation, could lead to a significant boost to the provision for loan losses. BT's $3.1 billion of medium and long-term LDC loans are 32% reserved for; boosting reserves to the 40% level would add about $250 million, or about $3.00 a share, pretax, (excluded from our estimate). Fee income from stable sources such as trust and various processing businesses should continue its steady growth. BT's emergence into the merchant and investment banking businesses should also aide long-term results. BT derives a large portion of earnings from volatile sources such as bond and currency trading, which is difficult to predict.

Review of Operations

Net interest income for the six months ended June 30, 1989 rose 2.3%, year to year, primarily reflecting a 1.9% increase in average interest earning assets, and the receipt of about $37 million of Brazilian interest income (virtually none received during the 1988 period). The provision for loan losses was $100 million, compared with $15 million, due to higher provisions for refinancing countries. A 3.7-fold increase in foreign exchange income, and a 33% gain from trading results led to a 28% gain in noninterest income. With noninterest expense increasing 15%, pretax earnings rose 8.1%. After taxes at 26.8%, versus 29.9%, net income was up 13%.

Important Developments

Aug. '89— BT sold $250 million of fixed/adjustable rate preferred stock. Proceeds from the issue will be used to make equity investments in BT Securities Corp., BT's wholly-owned securities subsidiary. The company said the investment would raise BT Securities equity capital to approximately $480 million.

Next earnings report expected in late October.

Business Summary

This company is the parent of Bankers Trust Co., the nation's ninth largest bank. Having completed the divestment of its retail operations, BT concentrates on wholesale banking. The core businesses are commercial banking, including corporate finance, and trading in money and securities markets. A significant portion of earnings are also derived from the PROFITCo. division, which derives fee income from employee benefit plan administration, cash management, private banking, securities processing, and investment management services. The BT Securities subsidiary, with $252 million of capital, underwrites and deals in permissible securities. International operations are extensive (accounting for 46% of assets in 1988).

During 1988 average earning assets of $49.2 billion (down 0.6% from 1987) were divided: commercial loans 20%, real estate loans 5%, other domestic loans 5%, foreign loans 21%, investment securities 8%, temporary investments 41%. Average sources of funds were interest-free deposits 10%, other domestic deposits 10%, foreign deposits 31%, short-term borrowings 30%, long-term debt 4%, equity 6%, and other 9%.

At year-end 1988 nonperforming assets were $1.3 billion (5.4% of loans; including $969 million of LDC loans), up from $1.2 billion (4.4%) a year earlier. The reserve for loan losses was 5.45% of loans, against 4.96%. Net chargeoffs were 0.14% of average loans during 1988, against 0.59% in 1987.

Dividend Data

Dividends have been paid since 1904. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1988.

Banner Industries

284P

NYSE Symbol BNR

Price	Range	P–E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 13'89	1989					
15⅜	16⅞-8⅛	5	None	None	B-	1.05

Summary

This company is a leading worldwide supplier of aviation replacement parts and aircraft tires and a leading manufacturer of aerospace fasteners. BNR also manufactures tooling and injection control systems for the plastics industry, water purification and pollution control equipment, and mechanical power tranmission components, and provides telecommunications services in commercial office buildings. BNR has expanded operations in recent years through a number of acquisitions, most notably the June, 1989 acquisiton of Fairchild Industries.

Business Summary

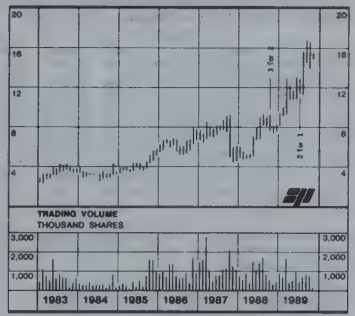
Banner Industries is engaged, through subsidiaries, in three principal business segments: aerospace, industrial products, and communications. BNR also maintains a significant investment portfolio. Revenue and pretax profit contributions from consolidated, ongoing operations in fiscal 1989:

	Revs.	Profits
Aerospace	76%	61%
Industrial products	22%	7%
Other, net	2%	16%
Equity Investments	---	16%

BNR distributes a diversified line of over 400,000 different aircraft replacement parts from more than 150 manufacturers, including the company's manufacturing operations. Parts are distributed to both commercial and military customers through subsidiaries, including Burbank Aircraft which supplies parts to most of the world's commercial airlines.In June, 1989 BNR became a leading manufacturer and supplier of aircraft fasteners through the acquisition of Fairchild Industries, Inc. in a two step transaction for a total cost of approximately $272 million. Some 55% of distribution sales were to foreign customers in fiscal 1989, while international markets accounted for about 7% of manufacturing sales.

The industrial products segment consists primarily of the industrial design group, which manufactures and sells pre-engineered, standardized, mold bases and components and related tools and supplies to the plasitic industry under the name D-M-E Co. Also a part of industrial products is the wasterwater treatment group which designs and makes equipment for water purification and pollution control purposes.

Communications services operations are conducted under contracts to provide services for about 20,000 telephone lines in 50 buildings in six metropolitan areas. Customers tend to be small to mid-size offices.



Investments are held through Banner Investments, formed through the March, 1989 acquisition of the 44% of Trancontinental Services Group N.V., a Netherlands Antilles investment company, which BNR did not already own. The company completed the acquisition of 100% of TSG for approximately $136 million. BNR maintains a 40% interest in Rexnord Corp., primarily a power transmission components manufacturer, following the sale of 60% to outside investors in August, 1988. Rexnord was formed through the reorganization of the business of Rexnord, Inc. (acquired in 1987), and the acquisiton of PT Components, Inc. in August, 1988 for about $178 million.

Important Developments

Aug. '89— BNR completed the sale of the space and defense electronics operations of Fairchild to a U.S. subsidiary of Matra S.A. for a total of $261 million including expenses.

Next earnings report expected in December.

Summary

Barclays is the largest banking organization in Britain and the 19th largest in the world. It conducts extensive retail banking operations in the U.K. (2,712 branches) and worldwide (1,200 offices). Investment banking and specialized financial services are also important. A slowing U.K. economy and mounting competition, particularly in the retail banking sector, could restrict core earnings growth in 1989 and 1990, as could dilution from a capital raising program to facilitate further expansion, particularly in Europe. Exposure to LDC loans also represents risk.

Current Outlook

Earnings for 1990 could reach $6.15 per ADS, assuming $1.62 per £1, versus 1989's estimated $5.60, before possible provisions for LDC loans.

Dividends from 1989 earnings should approximate the $1.78 per ADS (after 15% British tax) paid from 1988 earnings.

The robust growth of the U.K. economy could moderate in 1990, leading to slower loan growth. The retail banking business, which has been aggressively expanded in the U.K., should experience narrower margins as competition has become heated and fees have been cut, although increased volume and an emphasis on corporate lending could keep profits growing. While domestic loan quality has improved, exposure to LDC loans remains a threat to future earnings growth. Reserves against such loans were recently raised to 48% of outstandings. Investment banking could stay modestly profitable until trading volume picks up in London markets. U.S. retail banking operations are being scaled back. The issuance of new shares will dilute earnings, but the additional capital improves ratios and permits further business expansion, particularly in Europe.

Review of Operations

Net interest income (in £) for the first half of 1989 rose 19%, year to year, as growth of earning assets was offset by the effects of a less favorable funding mix, competitive pressures and rising interest rates. Higher trading, fee and other income led to a 17% rise in noninterest income. Operating expenses were up 11%. The provision for loan losses more than tripled, mainly due to a sharp rise in provision for LDC loans. Following a 25% drop in equity income, pretax income was down 8.1%. After taxes at 31.5%, versus 36.0%, net income declined 1.7%, to $2.21 per ADS (translated at £1=$1.55) from $3.08 (translated at £1=$1.71; restated for rights offering and accounting change).

Important Developments

Nov. '89— BCS agreed to sell its U.S. consumer lending unit, Barclays American/Financial, to Primerica Corp. for $1.35 billion. The transaction was to be completed in early 1990. In September Barclays Bank filed for a shelf offering of about $500 million of noncumulative, dollar denominated preferred shares.

Next earnings report expected in late February.

Business Summary

Barclays PLC, the largest banking organization in the U.K. and the 19th largest in the world, is the parent of Barclays Bank U.K. Ltd. as well as other banks and associated companies in 76 countries.

In the U.K. Barclays Bank (51% of total assets) provides retail banking services, including home mortgage operations, and a full range of corporate financial services, including extensive money market and currency trading activities. The central retail services division comprises credit card operations (8.9 million cardholders) and travellers checks. Other U.K. subsidiaries provide consumer and commercial finance and leasing services, insurance and trust services. Barclays de Zoete Wedd (BZW) is a leading U.K. investment bank.

Barclays conducts local retail and commercial banking operations through banks in the U.S. and worldwide. Other international offices provide commercial and consumer finance and leasing services. Foreign assets were 35% of total assets.

Pretax earnings in recent years (before special provisions for LDC loans in 1987) were divided:

	1988	1987	1986	1985
UK Bank.....	55%	52%	47%	50%
Other UK.....	30%	26%	29%	26%
United States	3%	16%	7%	4%
Other foreign.....	12%	6%	17%	20%

During 1988, average earning assets of £85.6 billion were divided: U.K. loans 52%, foreign loans 18%, securities 3% and short-term funds 27%. Average sources of funds were demand deposits 11%, savings deposits 13%, other time deposits 58%, borrowings 4%, equity 5% and other 9%.

At year-end 1988, nonperforming loans were £1.6 billion (2.4% of loans) against £1.5 billion (2.8%) a year earlier. Net chargeoffs during 1988 were 0.74% of average loans, against 0.75% in 1987. (Ratios not comparable to U.S. banks due to accounting differences).

Dividend Data

An interim dividend is normally paid in October of each year and a final dividend in April of the following year. As payments are in U.S. $ the dividends will fluctuate along with dollar/sterling exchange rates. The UK withholds 15% of payments, which can be used as a tax credit.

Bard (C. R.)

NYSE Symbol BCR Options on Phila (Jan-Apr-Jul-Oct) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 17'89	1989					
20¼	26½-18¾	15	0.40	2.0%	A+	1.09

Summary

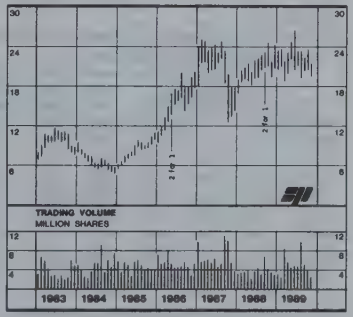
C.R. Bard produces and distributes disposable medical, surgical, diagnostic, and patient-care devices. It is the world's largest manufacturer of disposable urological products, and a leading producer of coronary angioplasty catheters. In August, 1989 Bard suspended shipments of its new Probe angioplasty catheter because of an FDA determination that the product requires prior approval from the agency. Assuming early resumption of shipments, an earnings recovery is likely in 1990 after the decline expected for 1989.

Current Outlook

Assuming resumption of Probe catheter shipments early in the year, earnings for 1990 could rebound to about $1.60 a share from the reduced $1.20 estimated for 1989.

Some increase in the dividend, presently at $0.10 quarterly, is likely in mid-1990.

Sales for 1990 should rise, aided by anticipated FDA approval and resumption of sales of the Probe catheter and continued growth in most other key cardiovascular, urological, surgical and general health lines both in the U.S. and abroad. Margins are expected to benefit from the better volume and productivity improvements.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	197.2	180.0	151.1	128.4
Jun.	201.0	193.1	160.4	135.5

Dec.	E0.25	0.37	0.29	0.23
	E1.20	1.38	1.07	0.86

Important Developments

Oct. '89— The company said that it now expected 1989 earnings to be reduced by about $0.33 a share because of the recall of its new Probe angioplasty catheter (BCR had previously estimated the penalty at about $0.25 a share). The product was recalled in August, 1989 after the FDA determined that the product required review and prior approval by the agency. Bard anticipates the return of the product to the U.S. market with FDA approval in 1990.

Jun. '89— During the second quarter, Bard acquired Catheter Technology Corp. (Cathtech) and Radi Medical Systems, AB for about $60 million. Cathtech makes vascular access devices and Radi is a Swedish firm which has for several years been the source of Bard's Biopty line of biopsy products.

Next earnings report expected in late January.

Business Summary

C.R. Bard manufactures and distributes medical, surgical, diagnostic, and patient-care products, most of which are used once and then discarded. Hospitals, physicians and nursing homes account for some 90% of sales. Foreign operations (excluding exports) accounted for about 20% of sales and 14% of earnings in 1988.

Cardiovascular products (50% of 1988 sales) include angiographic catheters, introducers and guide wires; recanalization devices such as balloon angioplasty catheters, atherectomy catheters, related items and developmental laser devices; electrophysiology products include electrode products and cardiac mapping systems; vascular access catheters; a cardiopulmonary support system; and blood oxygenators, cardiotomy reservoirs, and other products used in open-heart surgery.

In urological products (21%), the Foley catheter, which is used extensively in postoperative bladder drainage, is complemented by a line of urological specialty items. Catheters and accessories are also sold as complete procedural trays.

Surgical products (20%) include blood vessel replacements, hip prostheses and other surgical devices and implants. General health care products (9%) consist of medication dispensing systems; ostomy items; aids for the incontinent; skin care and wound management products; and disposable obstetrical instruments.

Dividend Data

Dividends have been paid since 1960. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1985.

Summary

Barnett Banks, Florida's largest bank holding company, has expanded rapidly in recent years, both internally and through an aggressive program of acquisitions. It has also secured a small foothold in the rapidly growing Atlanta, Ga. region. Through a 560-office decentralized network, it focuses primarily on retail banking services, although increasing attention is being directed to commercial lending. Long-term prospects are favorable, reflecting the rapidly growing Florida economy.

Current Outlook

Earnings for 1990 could rise to $4.55 a share from the $4.10 projected for 1989.

The quarterly dividend should continue at $0.30 a share.

Loan growth is expected to moderate in 1990, to about a 12% rate, down somewhat from the 14% pace of 1989, reflecting a slight slowing of the robust Florida economy. BBI continues to gain market share of deposits (currently 23%), particularly with new residents, who are arriving at a rapid rate. The net interest margin could be squeezed, however, with mounting competition. While credit quality remains solid, (BBI has no LDC loans) and its $5.5 billion commercial real estate portfolio is well diversified, nonperforming assets have been on the rise ($338 million at September 30, 1989, versus $249 million a year ago). Thus, with the allowance for loan losses at 60% of NPA's, the provision for loan losses could follow suit. BBI's strategy of increasing market share has fostered heavy investments in new branches and a decentralized management structure. While this has resulted in higher overhead, efficiency could improve as growth moderates, keeping profitability at high levels. BBI has already shown a willingness to acquire out-of-state banks in high-growth areas such as Atlanta, and could expand such purchases.

Dec.	E1.06	0.98	0.87	0.75
	E4.10	3.75	3.26	2.99

Review of Operations

Net interest income for the nine months ended September 30, 1989 advanced 7.3%, year to year (1988 restated for acquisitions), reflecting an 11% increase of earning assets and a declining net yield on those assets (4.67%, versus 4.82%). The provision for loan losses was 37% higher, at $109 million, reflecting higher chargeoffs. Higher service charges, credit card fees and other income led to a 20% increase in noninterest income. With noninterest expense up 6.9%, pretax earnings gained 12%. After taxes at 24.8%, versus 25.1%, net income was up 13%. Share earnings were $3.04, compared with $2.73 (restated).

Important Developments

Oct. '89— BBI attributed the third-quarter earnings increase to continued growth of earning assets and control of noninterest expense, which offset earnings pressure from lower net interest margin and a higher loan loss provision. In August BBI acquired for $14 million Investors Trust Financial Corp., a Georgia-based bank holding company with assets of approximately $58 million.

Next earnings report expected in mid-January.

Business Summary

Barnett Banks is the largest bank holding company in Florida and the 25th largest in the nation. With a decentralized system of 35 banks (including a savings bank) with 508 offices in Florida and 37 offices in Georgia, it focuses on retail banking, although commercial lending is becoming increasingly important. In recent years, it has been increasing market share of deposits through both internal growth and acquisitions. Nonbanking subsidiaries include trust ($4.4 billion of assets managed), credit card, mortgage banking ($6.5 billion of loans serviced), discount brokerage (17 offices), fixed-income securities sales, and reinsurance services.

During 1988 average earning assets of $21.8 billion (up 9.9% from 1987) were divided: commercial loans 16%, real estate loans 43%, consumer loans 24%, investment securities 16%, money market instruments 1%. Average sources of funds were demand deposits 13%, savings deposits 39%, time deposits 35% (deposits were $21.0 billion, up 11%), short-term borrowings 5%, long-term debt 2%, equity 6%, and other 1%.

At December 31, 1988 nonperforming loans were $247 million (1.22% of loans), up from $244 million (1.26%) a year earlier. The reserve for loan losses was 1.11% of loans, versus 1.10%. Net chargeoffs during 1988 were 0.48% of average loans, versus 0.57% in 1987.

Dividend Data

Dividends have been paid since 1945. A dividend reinvestment plan is available.

Sep. 18'89	1989					
36¼	40-34¾	16	1.00	2.8%	B	1.15

Summary

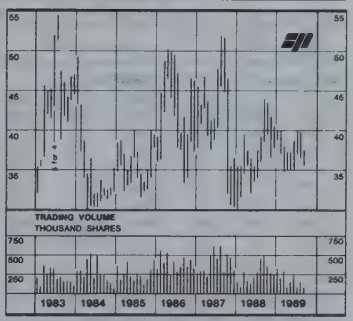
In addition to wood furniture for bedroom, dining room, living room and nursery use, Bassett produces upholstered furniture and other related products. Earnings declined in fiscal 1988, mainly reflecting weakness in the overall furniture industry, and should remain flat in fiscal 1989 as consumer spending on furniture remains soft. Earnings should rebound in fiscal 1990, however.

Current Outlook

Earnings for fiscal 1989 should be $2.20 a share, equal to the fiscal 1988 level. Fiscal 1990's earnings per share could rebound to $2.40.

Dividends are expected to continue at $0.25 a share quarterly.

Sales for fiscal 1989 should rise only slightly, as a soft housing market, weakness in consumer durable spending and import competition offset benefits from new product introductions. A more profitable product mix, manufacturing efficiencies and plant modernization may be outweighed by higher raw material costs and pricing pressures, causing margins to remain about the same.



Net Sales (Million $)

Quarter:	1988-9	1987-8	1986-7	1985-6
Feb.	108.7	114.0	107.6	99.5
May	119.1	112.9	124.3	102.6
Aug.	---	111.8	116.4	104.0
Nov.	---	127.4	126.7	115.5
	---	466.1	475.0	421.6

Net sales for the six months ended May 31, 1989, rose marginally, year to year. Results for the 1987-8 period include seven months of sales for the E.B. Malone Corporation, a consolidated subsidiary whose fiscal year was changed in 1988 from October 31 to November 30. Margins narrowed, but with other income 65% higher, pretax earnings were up 4.1%. After taxes at 27.6%, versus 34.0%, net income rose 14%, to $8,222,000 ($0.99 a share), from $7,209,000 ($0.87).

	E2.20	2.20	2.65	2.32

Important Developments

Jul. '89— Bassett said the sales backlog for the casegoods division at May 31 was less than it was a year earlier, while backlogs for the other divisions were about the same. BSET added that retail sales were the slowest it had experienced since the early 1980s or mid-1970s. One of its biggest challenges was the uncertain financial future of many retail accounts that have leveraged their businesses as a result of restructuring, which has forced BSET to limit its credit exposure to many accounts. The company also said that its gallery program was continuing to grow, with 164 galleries either open or under construction.

Feb. '89— In its annual report for the year ended November 30, 1988, Bassett said a major program to modernize its Wood Products division, as well as other divisions, was under way. Bassett also said its backlog was $67.2 million, versus $85.9 million at November 30, 1987.

Next earnings report expected in early October.

Business Summary

Bassett Furniture Industries, one of the country's leading wood furniture manufacturers, produces a broad range of bedroom, dining room and living room furniture, as well as occasional chairs, tables, wall units, office furniture, upholstered furniture and mattresses and box springs.

Bassett's products are sold by commissioned representatives at furniture markets throughout the U.S. Most of the output is sold to retail furniture dealers; a smaller amount goes to mail-order houses and to department stores. About 14% of fiscal 1988 sales were to J.C. Penney Company, versus 17% in fiscal 1987.

During 1984, Bassett acquired Impact Furniture, Inc., a manufacturer of popular-priced occasional and bedroom furniture. Montclair Furniture, a promotional upholstery company, was purchased in 1982. In 1980, Bassett purchased Fame Furniture Co. of Los Angeles, which produces upholstered furniture for the West Coast market. During the latter part of 1979, the company purchased certain assets and inventories of Weiman Co.; included in the transaction were an upholstery plant in Christiansburg, Va., and a table plant in Ramseur, N.C.

Dividend Data

Cash has been paid each year since 1935. A "poison pill" stock purchase rights plan was adopted in May 1988.

Amt. of Divd. $	Date Decl.	Ex-divd. Date	Stock of Record	Payment Date
0.25	Nov. 2	Nov. 7	Nov. 14	Nov. 30'88

Finances

As of November 30, 1988, working capital amounted to $178 million, compared to $170 million at fiscal 1987 year-end. Funds generated by operations have been sufficient to meet past requirements and are expected to be adequate in the future. There were no material commitments for capital expenditures at November 30, 1988.

Oct. 27'89	1989					
59	64-40¾	16	1.16	2.0%	A-	1.06

Summary

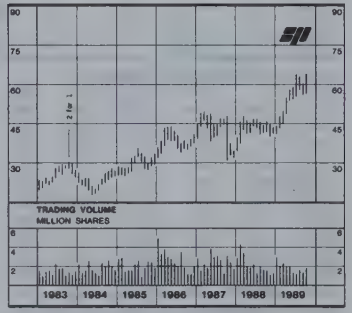
The world's leading maker of contact lenses and related solutions and accessories, Bausch & Lomb also produces pharmaceuticals and other healthcare products, dental plaque removal devices, sunglasses and other consumer optical items. Laboratory animals and various biomedical products and services are also offered. Above-average growth seen for major markets coupled with expected contributions from new products enhance longer-range prospects.

Current Outlook

Earnings for 1990 are projected at about $4.35 a share, up from the $3.80 estimated for 1989.

An increase in the $0.29 quarterly dividend is likely in early 1990.

Sales for 1990 should post another good advance, aided by continued gains in established contact lens and solutions lines (especially overseas), sunglasses and dental care items. New products such as disposable contact lenses and a new hearing aid device should also contribute to the gain. Sales and earnings growth is also seen for the biomedical products division. Profitability should benefit from the better volume, cost efficiencies and possible improvement in foreign exchange.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	276.3	213.2	188.6	151.0

Important Developments

Sep. '89— BOL acquired an 80% interest in Voroba Hearing Systems. Voroba has developed a new hearing aid with a soft shell, combining comfort with improved performance.

Apr. '89— Daniel E. Gill, chairman and CEO, said that the company's objective of reaching net sales of $1.2 billion by 1990 appeared "achievable" in 1989. Looking further into the future, Mr. Gill targeted $250 million in net earnings on sales of $2.5 billion for BOL by 1995.

Dec. '88— BOL acquired Dental Research Corp. (DRC) of Atlanta, Ga., for $133 million in cash. DRC manufactures and markets the patented interplak line of dental plaque removal devices.

Next earnings report expected in late January.

Business Summary

Business segment contributions in 1988:

	Sales	Profits
Healthcare products	65%	68%
Optics	35%	32%

Foreign operations accounted for about 37% of sales and 48% of profits in 1988.

Healthcare products include personal health, medical and biomedical products. Personal health items consist of solutions used for the care of contact lenses and relief of eye irritation sold under the Sensitive Eyes, ReNu and other names; contact lens accessories; over-the-counter pharmaceuticals; and the Interplak line of home plaque removal devices. Medical products include contact lenses and lens material, prescription drugs, surgical products, a vision care service plan, a contact lens frequent replacement program and insurance for lens wearers.

Biomedical products include specialized laboratory animals such as rats, mice and guinea pigs from Charles River Laboratories; and biotechnical products and services, primarily for the production of monoclonal antibodies.

The optics segment includes consumer products such as Ray-Ban sunglasses and Bushnell and Bausch & Lomb binoculars, readers, magnifiers, telescopes and riflescopes; and optical thin film coating services.

Dividend Data

Dividends have been paid since 1952. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1988.

Dec. 4'89	1989					
25⅝	25⅞-17½	18	0.56	2.2%	A-	1.05

Summary

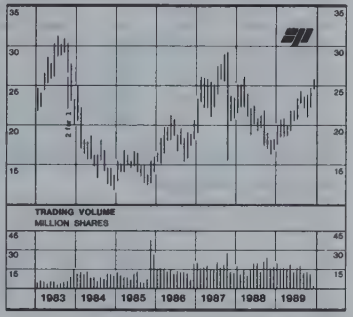
Baxter International is the world's leading manufacturer and distributor of hospital supplies and related medical equipment. The company offers some 120,000 products and has leading positions in the growing diagnostics, blood-therapy and medical specialty devices markets. Benefits from Baxter's dominant positions in growing medical device markets, superior marketing strengths and new product developments enhance longer-range prospects.

Current Outlook

Earnings for 1990 are projected at about $1.70 a share, up from the $1.50 estimated for 1989.

An increase in the $0.14 quarterly dividend is likely in early 1990.

Sales for 1990 are expected to show further progress. Despite competitive pricing conditions in parenterals and certain other lines, volume should be helped by continued growth in established hospital and medical products and contributions from new products. Profitability should benefit from the better volume, further cost cutting in marketing and administration and lower interest expense.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986

Important Developments

Dec. '89— BAX and Alza Corp. announced the development of a new intravenous drug delivery system developed under license from Alza.

Nov. '89— BAX sold its NDM electrosurgical products business to LecTec Corp. for $42 million. In September the company sold $150 million of 9 notes, due September, 1996. Proceeds were used to repay existing debt. Also, in September BAX and IBM announced plans to form a 50/50 partnership to provide software and services for the health care industry. Earlier in the year, BAX and Kraft Foodservice agreed to provide food and supplies to most hospitals in the 662-hospital Voluntary Hospitals of America (VHA) alliance. BAX also added Blue Cross/Blue Shield to its mail order drug service customer list.

Next earnings report expected in late January.

Business Summary

Substantially broadened with the purchase of American Hospital Supply Corp. in 1985, Baxter International (formerly Baxter Travenol Laboratories) is now the largest factor in the hospital supply business, manufacturing and marketing a wide range of medical care products and services in the U.S. and abroad. Sales and profit contributions by business segment in 1988 were:

	Sales	Profits
Hospital products & services	53%	51%
Medical systems	23%	20%
Alternate site items	18%	23%
Industrial products	6%	6%

Foreign operations accounted for about 22% of sales and 37% of profits in 1988.

Hospital products include intravenous solutions, administration sets, catheters, and related I.V. items; procedure trays, hypothermia and hyperthermia devices; drapes, gowns and gloves; respiratory therapy items; urological products; and surgical instruments.

Medical systems and specialties include products used for patient care, blood therapy and diagnostics purposes, and custom and computerized information systems. Alternate site items include medical products and services for home patients and alternate-site providers. Industrial products consist of products for industrial and government laboratories and other uses.

Dividend Data

Dividends have been paid since 1934. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1989.

Summary

Bear Stearns Companies Inc., is the holding company for Bear Stearns & Co., a leading investment banking and brokerage firm. BSC ranked as the 8th largest NYSE member firm at December 31, 1988 as measured by total capital. During fiscal 1989 BSC repurchased about 1.59 million common shares, as adjusted for the 5% stock dividends distributed in May and in August of 1989. During 1989 BSC changed its fiscal year end to June 30 from April 30.

Business Summary

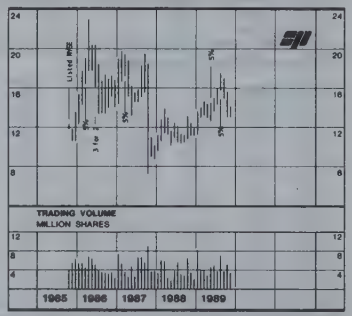
The Bear Stearn Companies is the holding company for Bear Stearns & Co., a leading investment banking and brokerage firm serving U.S. and foreign corporations, governments, institutional and individual investors. Revenue contributions in recent fiscal years:

	1989	1988	1987
Commissions	15%	21%	20%
Principal transactions	22%	21%	23%
Investment banking	10%	13%	16%
Interest & dividends	53%	45%	41%

BSC provides brokerage services primarily to institutional and high net worth clients. The company is a member of the NYSE, all other principal U.S. securities and commodities exchanges.

The company manages and participates in public offerings of debt and equity securities for a broad range of corporate clients, governments and agencies. BSC also provides advice and execution to clients on a wide range of financial matters.

BSC is one of the largest dealers making markets in corporate debt and equity securities, as well as mortgage-related and municipal securities, a "primary" dealer in U.S. Government securities. BSC also conducts trading activities in Eurodollar securities in London and trading activities in foreign securities in the U.S. Other activities include securities clearance, fiduciary services, real estate brokerage and finance, securities research and insurance.



Important Developments

Oct. '89— BSC said that it was pleased with reveneus and earnings for the first quarter of fiscal 1990, because several of its departments that deal as principal were operating in a very difficult environment. The company noted that it was continuing to strengthen its investment banking and underwriting capabilities. First quarter commission revenues advanced 31%, year to year, reflecting an increase in retail activity and generally higher trade volume. Investment banking revenues were 25% higher, principally due to an increase in underwriting revenues. Revenues from principal transactions declined 6.0%, primarily reflecting a decline in revenues in the risk arbitrage area and reduced profitability from the government bond trading area.

Aug. '89— The company said that during fiscal 1989 it repurchased 1,585,085 shares (adjusted) of its common stock.

Next earnings report expected in late January.

Finances

As a member firm of the NYSE, Bear Stearns is subject to the net capital rule, which specifies minimum net capital requirements for registered brokers and dealers. As of September 29, 1989 BSC had consolidated net capital of approximately $497.5 million, which exceeded the minimum requirement by $394.7 million.

On October 29, 1985 underwriters headed by Bear, Stearns & Co. offered in the initial public sale 19,534,922 common shares of The Bear Stearn Companies Inc. at $12.38 each (both adjusted). Concurrently, Bear, Stearns & Co., a New York limited partnership, transferred substantially all of the assets relating to its ongoing business to Bear Stearns Companies in exchange for 60,849,839 (adjusted) common shares and 700,000 shares of Series A cumulative convertible preferred stock of Bear Stearns and the assumption by BSC of $60 million of long-term notes.

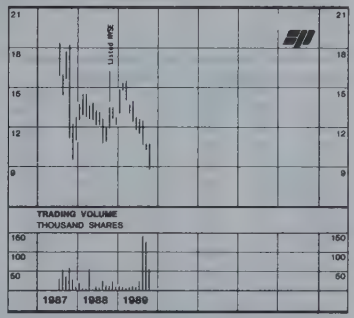
Summary

This British homebuilding, contracting, and building materials company has expanded into the U. S. since 1985 by purchasing Gifford-Hill & Co. and Koppers Co. and by making acquisitions in homes and contracting companies. Earnings have risen in each year since fiscal 1983. Management said in March, 1989 that the spread and balance of the company's businesses should enable it to have another successful year in fiscal 1989.

Business Summary

Beazer PLC is a holding company of a group which is involved in homes and property, contracting, and building materials. In the fiscal year ended June 30, 1988 the company derived 67% of total sales and 67% of trading profits from the United Kingdom, 26% and 31%, respectively, from the U. S., and 7% and 2% from other countries. Sales and trading profits by industry segment in fiscal 1988 were divided:

	Sales	Profits
Homes & property	37%	67%
Building materials	19%	24%
Contracting	44%	9%



Beazer Homes & Property completed more than 6,250 houses in fiscal 1988 in the United Kingdom at an average sales price of about $101,000, ranging from one bedroom single person apartments that sell for less than $60,000 to five bedroom executive style homes that sell for more than $850,000. About 25% of total output was directed toward the first-time buyer. Headquartered in Atlanta, Ga., Beazer Properties, Inc. increased the number of completions in fiscal 1988 by nearly 80% to almost 1,000 homes at an average price of $97,000. Commercial and industrial projects also are being developed in the U. K. and the U. S.

The Building Materials division consists of Gifford-Hill & Co. of the U. S., which produces cement and construction materials, including crushed stone, sand and gravel, ready-mixed concrete, concrete pipe and other products, fly ash, and construction chemicals; and Beazer Materials & Services (formerly Koppers Co.), which ranks as the second largest supplier of construction aggregates in the U. S. and the second largest producer of bituminous concrete, the primary material for resurfacing roadways. It also supplies crushed stone, sand, gravel, and ready-mix concrete, and performs various construction services.

The Kier Limited contracting business has the expertise and resources to undertake building and civil engineering projects throughout the world. Operations include heavy civil, marine and industrial contracting, urban renewal and major commercial schemes, refurbishment and restoration work, and mining, tunnel, and office building projects.

Important Developments

Aug. '89— BZR's Beazer Materials & Services (BMS) subsidiary sold to Silver Lakes Partnership, for $15.7 million, 2,200 acres of Florida land which would be developed to accommodate about 6,000 upper income housing units. BMS will retain an interest in the development through a profit sharing arrangement.

Next earnings report expected in late October.

6 Mos. Dec.	1,406	1,093	---
9 Mos. Mar.		---	---
12 Mos. Jun.		2,300	1,671

Sales (in British pounds) for the six months ended December 31, 1988 advanced 34%, year to year. Housing and property operations were at record levels in the U. K., but the contracting business suffered from rapidly increasing costs and some difficult contracts. Although Texas remained a poor market, building materials activities elsewhere in the U. S. were good and the contracting business showed improvement. Following sharply higher other income (net) and 32% higher net interest costs, pretax net gained 30%. After taxes at 35.2%, against 34.0%, profits on ordinary activities rose 28%. Earnings per ADS (before extraordinary charges) increased to $0.88 from $0.69 (both translated at £1=$1.8085).

Finances

On June 15, 1988 49%-owned BNS Inc. acquired by means of a tender offer 96.4% of the common stock of Koppers Co., Inc. The total cost to finance the purchase approximated $1.81 billion. Later in 1988, Beazer bought out its partners in the Koppers acquisition, which was renamed Beazer Materials & Services and has been treated as a wholly-owned subsidiary since January 1, 1989.

In November, 1988 Beazer restructured its debt, raising $2.3 billion through a syndicate of banks. The new debt facilities provide more permanent financing at a considerable saving in interest. The company also completed the major sales of the chemical assets and certain other assets out of the old Koppers business. Gross proceeds to date of $854 million were well in excess of original expectations.

Dividend Data

An interim dividend from each year's earnings is declared generally in March and a final dividend in October after fiscal year-end. Payments on the ADSs in the past 12 months:

Dec. 8'89	1989					
59¾	62¼-48⅜	15	1.08	1.8%	A	0.93

Summary

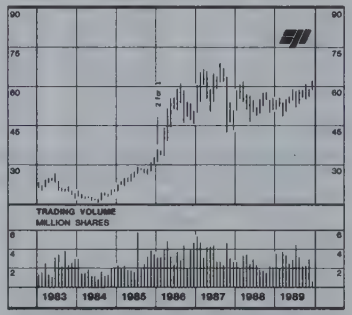
Becton, Dickinson is a major factor in the medical and hospital supply fields, offering a broad range of medical and diagnostic products. Earnings growth achieved over the past several years should continue in the years ahead, aided by the company's low-cost producer status and benefits from aggressive new product and foreign expansion programs. In June, 1989 BDX sold its Edmont industrial gloves business for $228 million, completing its divestiture program of non-health care businesses.

Current Outlook

Earnings from continuing operations for the fiscal year ending September 30, 1990 are projected at about $4.50 a share, up from fiscal 1989's $4.00.

Dividends have been increased 8.0%, to $0.27 quarterly from $0.25, effective with the January 2, 1990 payment.

Sales from continuing businesses for fiscal 1990 are expected to show further progress. Despite probable continued weakness in medical gloves, good growth is seen for most of BDX's other established medical and diagnostic products lines. Volume should also benefit from new products. Margins should be helped by the higher volume and cost efficiencies.



Net Sales (Million $)

	E4.50	4.00	3.69	3.42

Important Developments

Sep. '89— Sales of medical products (accounting for 59% of Becton's fiscal 1989 sales) in fiscal 1989 increased 2.8%, year to year, while sales of diagnostic products (41%) rose 11%.

Jun. '89— BDX completed the sale of its Edmont industrial gloves business to Pacific Dunlop Ltd. for $228 million. Becton retained Edmont's medical glove product line. Earnings from discontinued Edmont operations were equal to $0.28 a share in fiscal 1989. Proceeds from the sale were used to reduce debt and repurchase common stock.

Apr. '89— BDX acquired the Scientific Products division of Marion Laboratories. That unit, which has annual sales of about $27 million, makes microbiological and diagnostic products.

Next earnings report expected in mid-January.

Business Summary

Becton, Dickinson manufactures and sells a broad range of medical, diagnostic and other products. Contributions by business segment in fiscal 1988:

	Sales	Profits
Medical	61%	73%
Diagnostic	39%	27%

Operations in the U.S. represented about 62% of sales and 70% of profits in fiscal 1988; Europe 24% and 17%, respectively; and other foreign 14% and 13%.

Major products in the medical segment consist of disposable and reusable hypodermic equipment, including disposable hypodermic needles and syringes, diabetes care products, and prefillable syringe systems; and intravenous and operating room products, comprising intravenous and cardiovascular catheters, surgical gloves, surgical products and related items. This segment also produces suction products, elastic support products, surgical blades, examination gloves and thermometers. BDX is believed to be the world's leading maker of single-use hypodermic needles and syringes. Contract packaging services are also offered. BDX sells these products through distributors and directly to hospitals, laboratories and other end-users.

Diagnostic products include the Vacutainer line of blood collection equipment, consisting of needles, evacuated tubes and microcollection devices; laboratory ware and supplies; manual and instrumented microbiology products; hematology instruments; and other diagnostic systems, including immunodiagnostic test kits and instrumentation systems.

Dividend Data

Dividends have been paid since 1926. A dividend reinvestment plan is available.

Nov. 8'89	1989					
102¼	104⅝-69⅜	15	4.40	4.3%	A-	0.63

Summary

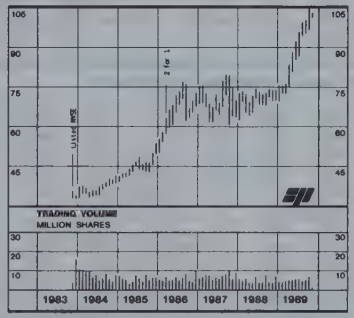
Bell Atlantic is the fourth largest provider of exchange telephone services in the U.S. BEL's seven telephone subsidiaries serve six mid-Atlantic states and the District of Columbia. In September, 1989 the company announced plans for a major restructuring effort which could result in earnings at or slightly above breakeven in the 1989 fourth quarter. A good earnings recovery is projected for 1990.

Current Outlook

Earnings for 1990 are are projected at approximately $7.40 a share, compared with the depressed $5.45 estimated for 1989.

The $1.10 quarterly dividend is likely to be raised about 6% in the first half of 1990.

Telephone operating revenues for 1990 should advance moderately, due primarily to growth in access lines and rising demand for network services. Margins could widen slightly, as cost savings from streamlining efforts are partly offset by increased employment and other operating expenses. Contributions from unregulated units should increase. Interest expense may decline.



Revenues (Billion $)

Quarter:	1989	1988	1987	1986
Mar.	2.77	2.63	2.46	2.36
Jun.	2.88	2.72	2.64	2.47
Sep.	2.91	2.76	2.59	2.49
Dec.	---	2.77	2.60	2.60
	---	10.88	10.30	9.92

Revenues for the nine months ended September 30, 1989 were up 5.5%, year to year. Margins widened, and operating income advanced 9.9%. After other expenses and an 8.1% rise in interest costs, pretax income gained 9.2%. Following taxes at 32.0%, versus 29.8%, net income advanced 5.8%, to $5.43 a share from $5.12.

	E5.45	6.65	6.24	5.85

Important Developments

Sep. '89— BEL announced plans for a number of initiatives, including an organizational realignment, force reductions, the restatement of assets, debt refinancing, and the establishment of a trust for future costs of medical and dental benefits for nonmanagement retirees. The initiatives could result in fourth quarter earnings at or slightly above break-even. Financial incentives would be provided for managers to elect voluntarily to retire or leave the business, which could reduce the work force some 1,000 to 1,200 by the end of 1989. Some network operations would be consolidated; the headquarters of BEL's C&P Telephone unit would be merged into other operations; and efficiency and cost controls were expected to be enhanced by reducing layers of management. The initiatives were expected to positively affect future earnings.

Next earnings report expected in late January.

Business Summary

Bell Atlantic is the fourth largest provider of exchange telephone service in the U.S., based on 1988 revenues. The company's seven telephone operating subsidiaries serve some 16,541,000 customer access lines in New Jersey, Pennsylvania, Maryland, Virginia, Delaware, West Virginia, and Washington, D.C. BEL's telephone units also publish telephone directories and engage in other related activities.

Other communications and related services include: Bell Atlantic Mobile Systems, which operates cellular telephone systems in BEL's geographic service area and owns a significant minority interest in a partnership serving the New York City area; BEL's customer service unit maintains computer equipment and associated peripherals and sells and repairs computer parts; Bell Atlantic International, Inc. provides telecommunications consulting services outside of the U.S.; other units sell computer and office supplies and accessories, and market and maintain CPE equipment primarily in the mid-Atlantic region and Texas. Paging services are also provided.

Financial and real estate services are provided through BEL's Bell Atlantic Capital Corp. (BACC) and Bell Atlantic Properties (BAP). Through its TriCon leasing unit, BACC leases CPE, office, medical and other equipment sold by many vendors and provides other types of financing; BACC also leases computer and other high technology equipment leasing aand finacing. BAP, which invests in and develops real estate holdings, in 1986 acquired a commercial real estate portfolio consisting of 39 office buildings, about 300 acres of undeveloped real estate, and a 50% interest in two other office buildings. BAP is developing a 53-story office building in Philadelphia, in which Bell of Pennsylvania would occupy about 50% of the rentable space.

BEL jointly owns, with the six other regional Bell holding companies, Bell Communications Research, which provides technical assistance and consulting services to the companies.

Dividend Data

Dividends were initiated in 1984. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1989.

Amt. of Divd. $	Date Decl.	Ex-divd. Date	Stock of Record	Payment Date

1.10	Sep. 26	Oct. 3	Oct. 10	Nov. 1'89

Next dividend meeting: Dec. 19 '89.

Finances

Construction expenditures for network additions amounted to $2.4 billion in 1988, up from $2.3 billion in 1987. BEL estimated such expenditures at $2.4 billion for 1989.

On January 1, 1984 AT&T spun off its 22 Bell operating companies in the form of BEL and six other regional holding companies (RHCs). That action was taken pursuant to a divestiture agreement settling Federal antitrust action.

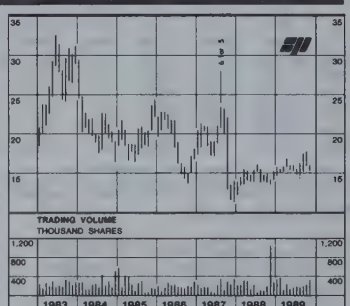
Summary

Bell Industries is one of the nation's largest distributors of electronics components. The company also manufactures electronic components and distributes construction, graphic arts, and automotive related products. Earnings for fiscal 1989 were sharply lower, reflecting the absence of a onetime gain; but Bell said in October that it expected substantially higher earnings for fiscal 1990, barring a severe deterioration in market conditions.

Business Summary

Bell Industries is primarily a distributor of electronic components. It also distributes building and construction, graphic arts and automotive related products, and manufactures computer and electronic components. Contributions by business segment in fiscal 1989:

	Sales	Profits
Electronics	61%	58%
Distribution	53%	51%
Manufacturing	8%	7%
Building products	21%	14%
Motor vehicle parts and accessories	6%	14%
Graphic arts	12%	14%



Electronics distribution involves the sale of semiconductors, passive components, computers, power supplies, and board level products from 34 sales and warehouse facilities, including five computer sales offices in 20 states. Comp-Fast (acquired fiscal 1987) sells passive and electromechanical components and semiconductors.

Electronics manufacturing involves the production of high-precision, close tolerance products for the computer and aerospace markets. Products include switches, push buttons, electro-luminescent panels, and hydraulic valve subassemblies, and multi-layered printed circuit boards.

The Building Products group distributes heating, ventilating, air conditioning, and plumbing products through 11 California facilities. The group also manufactures custom sheet metal products used for ductings, fittings, and ventilation.

The Motor Vehicle Parts and Accessories Group distributes replacement parts for motorcycles, mobile homes, and recreational vehicles to dealers and wholesalers in the midwestern U.S. Product offerings include marine equipment, and motorcycle helmets.

The Graphics Arts Group distributes film, chemicals, printing supplies, sophisticated cameras, and lithographic plates throughout California to the electronics and printing industries.

Computer memory manufacturing operations, or disk operations, were sold in April, 1988.

Important Developments

Oct. '89— Bell said that it expected substantially higher earnings for fiscal 1990, barring a severe deterioration in market conditions.

Oct. '89— Directors voted to raise the dividend 43%, to $0.10 quarterly from $0.07, with the February, 1990 payment. Separately, Bell said that the improved profit margins on lower sales in the fiscal 1990 first quarter reflected benefits from it's organizational restructuring and continuing programs to control costs, improve productivity, and increase operating efficiencies.

Next earnings report expected in early February.

Jun.		105.7	113.1	102.3
		418.2	431.6	357.1

Sales for the three months ended September 30, 1989 declined 7.8%, year to year. Lower operating profits for electronics distribution, building products and graphic arts were more than offset by the profit turnaround for electronics manufacturing, combined with a 7.2% increase in motor vehicle parts operating profits. Pretax income advanced 80.4%. After taxes at 41.6%, versus 41.4%, net income increased 79.8%. Earnings per share were $0.37 based on fewer shares outstanding, compared with $0.19.

Finances

In November, 1988 Bell repurchased 605,220 shares of its own common stock in the open market at an average price of $14.00 a share.

In April, 1988 Bell sold its computer memory division to Furukawa Electronics Co. Ltd., Tokyo, for $15 million in cash. Proceeds were used to reduce bank debt. BI realized a gain on the sale of $5.7 million ($0.88 a share).

BellSouth Corp.

NYSE Symbol BLS Options on ASE (Jan-Apr-Jul-Oct) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Oct. 25'89	1989					
53⅜	55⅜-39	15	2.52	4.7%	A-	0.76

Summary

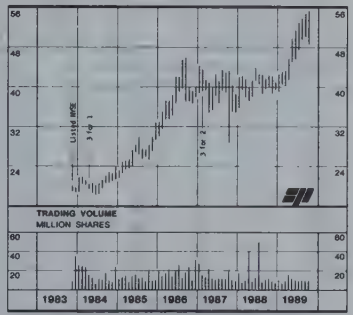
BellSouth, the second largest telephone holding company in the U.S., provides local exchange telephone service in nine Southeastern states. In April, 1989 BLS acquired Mobile Communications Corp. of America, which provides mobile communications and paging services, for some $710 million of stock. In September BLS agreed to merge its cellular properties with those of LIN Broadcasting Corp. in exchange for 50% of the new company. McCaw Cellular Communications made a rival bid for LIN.

Current Outlook

Earnings for 1990 are projected to reach approximately $3.80 a share, compared with the $3.55 estimated for 1989.

The $0.63 quarterly dividend is likely to be increased moderately in early 1990.

Revenues from telephone opertions in 1990 could modestly increase, as continued growth in access lines and calling volume is partly offset by lower rates; revenues from unregulated operations should increase rapidly, reflecting primarily the fast growing cellular and paging operations. Margins are anticipated to be relatively unchanged—telephone margins could continue to be adversely affected by rate cuts, but substantial improvement is expected from nonregulated operations.



Revenues (Billion $)

Quarter:	1989	1988	1987	1986
Mar.	3.37	3.11	2.95	2.81
Jun.	3.47	3.21	3.03	2.93

Dec.	---	3.58	3.17	2.82
	---	13.60	12.27	11.44

Revenues for the nine months ended September 30, 1989 rose 3.6%, year to year. Margins narrowed, and operating income declined 2.2%. After a 13% increase in interest expense, pretax income was down 3.5%. Following taxes at 31.1%, versus 32.4%, net income fell 1.6%, to $2.58 a share from $2.61, before a special credit of $0.09 (net) in the 1989 period.

Important Developments

Sep. '89— BLS definitively agreed to merge its domestic cellular operations into LIN Broadcasting Corp. in exchange for newly-issued shares amounting to 50% of LIN's post-merger common stock. Prior to the merger, LIN would spin off its television broadcasting subsidiaries to its stockholders and pay each pre-merger LIN shareholder $20 a share in cash. Subject to various approvals, the combined company would serve some 500,000 customers in more than 40 markets; net pops (service area population adjusted for percent ownership) would total about 46 million. BLS didn't expect any significant earnings or balance sheet effects from the merger. McCaw Cellular Communications, Inc. made a competing bid for LIN, offering $125 a share in cash for 22 million LIN shares not already owned, or about 45% of the total. If successful, McCaw would own slightly more than 50% of LIN.

Next earnings report expected in late January.

Business Summary

BellSouth is the second largest telephone holding company in the U.S., based on 1988 revenues. The company's telephone subsidiaries, South Central Bell and Southern Bell, furnish exchange telecommunications and access service in Alabama, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, and Tennessee for approximately 16.9 million customer access lines. Communications services provided by the telephone subsidiaries accounted for about 77% of total revenues in 1988.

Bell South Enterprises, Inc. was established on January 1, 1986 as a holding company for most of BLS's nonregulated subsidiaries: the Advertising and Publishing Group publishes and markets Yellow Pages advertising and White Pages telephone directories, and produces specialized directories; other units sell, lease and maintain customer premises equipment, computers and related office equipment.

Following the April, 1989 acquisition of Mobile Communications Corp. of America, BellSouth became one of the world's largest providers of mobile communications. As of September 30, 1989 BLS served some 272,417 cellular subscribers (based on BLS's percentage ownership in each market) in 36 markets, and approximately 587,183 paging customers in 63 markets.

Bell Communications Research, which is jointly owned with the six other regional Bell holding companies, provides technical and consulting services.

Dividend Data

Dividends were initiated in 1984. A dividend reinvestment plan is available.

Amt. of Divd. $	Date Decl.	Ex-divd. Date	Stock of Record	Payment Date
0.59	Nov. 28	Jan. 4	Jan. 10	Feb. '89
0.63	Mar. 27	Apr. 4	Apr. 10	May '89
0.63	Jun. 26	Jul. 6	Jul. 12	Aug. '89
0.63	Sep. 25	Oct. 4	Oct. 11	Nov. '89

Next dividend meeting: late Nov.'89.

Finances

Capital spending totaled $3.2 billion in 1988, and was projected at $3.3 billion for 1989.

On April 4, 1989 BLS reissued approximately 17.1 million common shares in connection with the acquisition of Mobile Communications Corp. of America. Some 17 million BLS shares had been repurchased in the open market during 1988.

On January 1, 1984 AT&T spun off its 22 Bell operating companies in the form of BLS and six other regional holding companies (RHCs). That action was taken pursuant to a divestiture agreement settling Federal antitrust action.

Bemis Co.

NYSE Symbol BMS In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Dec. 22'89	1989					
31	37½-22½	18	0.60	1.9%	A	1.18

Summary

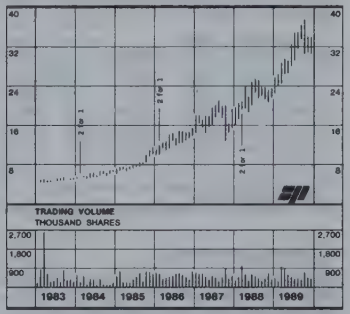
Through acquisitions and internal development, Bemis has become an important producer of a broad range of packaging items and equipment, specialty chemicals, and fabrics. While profits will remain subject to cyclical economic trends, benefits from BMS' capital program, which has stressed increased production of specialty films for food packaging, should aid long-term growth.

Current Outlook

Earnings for 1989 are projected at $2.10 a share, compared with the $1.80 estimated for 1989.

The $0.15 quarterly dividend should be raised early in 1990.

Sales for 1990 are expected to show another modest increase, as long as the general economy does not deteriorate. Earnings should be helped by continued improvement in the flexible packaging business where BMS has invested heavily.



Net Sales (Million $)

Quarter:	1990	1989	1988	1987
Mar.	---	265	246	226
Jun.	---	280	276	236
Sep.	---	262	277	226
Dec.	---	---	271	242
	---	---	1,070	930

Sales for the nine months ended September 30, 1989 rose 1.1%, year to year. Margins widened on the increased sales and a reduction in raw material costs. Net income increased 20%. Share earnings were $1.24 on 2.6% fewer shares outstanding, compared with $1.01.

Common Share Earnings ($)

Dec.	E0.65	E0.56	0.47	0.37
	E2.10	E1.80	1.48	1.18

Important Developments

Oct. '89— The company said that the decline in third quarter sales reflected soft market conditions and very competitive pricing in several segments of its business, as well as the elimination of several small product lines. The growth in third quarter earnings was attributed to careful cost control.

Sep. '89— Bemis' Hayssen Manufacturing Co. subsidiary sold its line of extrusion blow-molding machines to Cincinnati Milacron Inc. Terms were not disclosed.

Aug. '89— Directors approved a shareholder preferred stock purchase rights plan as an anti-takeover move. The company said it had no knowledge of an impending takeover attempt.

Next earnings report expected in late January.

Business Summary

Bemis manufactures a wide range of consumer and industrial packaging materials, packaging machinery and industrial products. Business segment contributions in 1988:

	Sales	Profits
Packaging	72%	66%
Specialty coated & graphics products	28%	34%

Foreign operations, conducted in Europe, Canada, and Latin America, accounted for about 17% of sales and 19% of operating income in 1988.

Packaging products include coated and laminated specialty films, multiwall and small paper bags, polyethylene bags and liners, pressure sensitive labels, color separations and rotogravure cylinders, injection molded plastic containers, and various other materials and converted products. Primary markets are the food and agricultural products industries.

The Specialty Coated and Graphics Products group is a producer of pressure sensitive adhesive materials and related applicating machinery. The group also produces presensitized printing plates; chemicals and processing equipment; and expanded, calendered and laminated vinyls. Products are sold to the printing, automotive, home furnishings, furniture and other industries.

Dividend Data

Dividends have been paid since 1922. A "poison pill" stock purchase right was adopted in 1989.

Summary

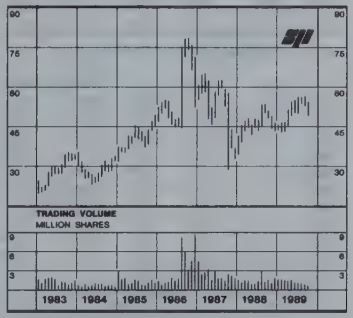
This leading consumer finance company specializes in loans to middle-class Americans for major purchases, education, debt consolidation, and home improvement. More than 60% of its loans are secured by real estate. During 1987 BNL shed its credit card, annuity, and property and casualty insurance units to focus on its core consumer credit business. Profits gains for 1989 and 1990 are expected to result from growth in consumer receivables and strong credit quality.

Current Outlook

Earnings for 1990 are projected at $5.35 a share, up from the $4.95 estimated for 1989.

The minimum expectation is for dividends to continue at $0.55 quarterly.

Consumer finance receivables are expected to grow about 4%-7% in 1990, primarily reflecting the continued willingness of consumers to borrow as well as BNL's aggressive marketing efforts. Spreads are likely to come under pressure from increased competition for real estate products and the effect of somewhat higher funding costs experienced earlier in the year. Good expense control should continue to help operating comparisons. Beneficial is well reserved against potential loan losses, and credit quality should be excellent, barring a major downturn in the economy.



Review of Operations

Net finance and other revenues for the six months ended June 30, 1989 rose 12%, year to year, primarily reflecting growth in the balance of receivables outstanding, partially offset by a decrease in the lending spread due to higher funding costs. Pretax income was up 13%. Following taxes at 40.1%, against 36.8%, net income increased 7.2%. Earnings per share were $2.38, compared with $2.18 in the year-earlier period.

	E4.95	4.19	5.58	3.25

Important Developments

Aug. '89— In the second quarter report to shareholders, BNL said that while short-term money costs did not decline noticeably until late in the quarter, lending spreads were wider than in the first quarter, benefiting from 100 basis points (1.0%) of upward repricing on April 1 on the $1.3 billion of variable-rate revolving credit loans. BNL's gross yield on the entire loan portfolio was 18.66% in the second quarter, and the lending spread improved to 9.11% from 8.86% in the first quarter. BNL also said that it expected further improvement in the spread in the third quarter.

Apr. '89— Beneficial announced that it had filed a shelf registration statement covering $750 million of debt securities.

Next earnings report expected in late October.

Business Summary

Beneficial Corp. is a consumer oriented financial services company. In 1986 and early 1987 BNL disposed of the bulk of its nonconsumer finance businesses, which included credit card operations, life and property-casualty insurance, investment real estate leasing and most of its commercial loan portfolio.

Consumer finance operations are conducted through 1,073 offices in the U.S. (901), Canada (105), the United Kingdom (58) and West Germany (9). Finance receivables rose 7.6% in 1988 to $6.6 billion. Real estate secured loans accounted for 63% of the receivables portfolio, personal loans 29%, and sales finance contracts 8%. Other operations include a mortgage banking subsidiary, a commercial bank unit, and credit insurance and real estate development businesses.

Net chargeoffs in 1988 amounted to $68.6 million (1.09% of average finance receivables), versus $64.9 million (1.08%) in 1987. Credit loss reserves were $212.8 million at the end of 1988 (3.23% of finance receivables), versus $210.6 million (3.43%). Consumer loan receivables more than two months delinquent were 0.59% of the total, against 0.61%.

At December 31, 1988 BNL's funding base was 61.5% long-term debt (57.1% in 1987), 32.3% short-term debt (37.3%), and 6.2% deposits payable (5.6%).

Dividend Data

Dividends have been paid since 1929. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1987.

Nov. 24'89	1989					
8,325	8,875-4,625	22	None	None	B+	0.96

Summary

The diverse interests of this firm include property and casualty insurance, the manufacture and retailing of candy, publication of educational materials, manufacture of vacuum cleaners, newspaper publication, and the retailing of home furnishings. BRK's investment portfolio includes a 17% interest in Capital Cities/ABC Inc. and 44% of GEICO Corp. In July and August, 1989 respectively, BRK bought preferred shares representing 11% and 12% voting interests in Gillette Co. and USAir. In September, it recieved about $400 million from the public sale of zero coupon convertible notes.

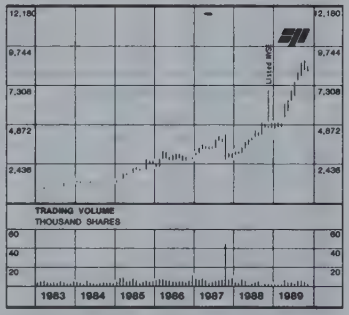
Business Summary

Berkshire Hathaway is a diversified company engaged, through subsidiaries, in the underwriting of property and casualty insurance, the publication of a daily newspaper in Buffalo, N.Y., the manufacture and sale of candy, the retail sale of home furnishings, the publication of encyclopedias and other reference materials, the production of home cleaning products, and the manufacture and distribution of uniforms. It also has interests in a savings and loan holding company and a precision steel warehouse through its 80.1%-owned Wesco Financial Corp. Principally through its insurance subsidiaries, Berkshire makes significant investments in the capital stock of other companies. Segment contributions in 1988:

	Revs.	Profits
Insurance	35%	47%
Encyclopedias	14%	6%
Candy	7%	7%
Home furnishings	7%	4%
Home cleaning products	6%	6%
Newspaper	6%	9%
Other	25%	21%

Through 12 units headed by National Indemnity Co. in Omaha, Neb., the company conducts a nationwide property and casualty insurance business on both a direct and reinsurance basis.

In 1986 the company acquired Scott & Fetzer Co., a diversified manufacturer, whose product lines include Kirby brand vacuum cleaners and encyclopedias and related educational materials sold under the World Book and Childcraft names. Also in 1986 Fechheimer Brothers Co., a manufacturer of uniforms, was acquired. Through transactions in 1978 and 1983 Berkshire acquired Blue Chip Stamps, a Los Angeles-based trading stamp company. Blue Chip also owned See's Candies (with over 200 retail shops in 12 states), The Buffalo News, and an 80.1% interest in Wesco Financial



Corp. Also in 1983 the company acquired a 90% interest in Nebraska Furniture Mart Inc.

Important Developments

Sep. '89— BRK received about $400 million from the sale of $902.64 million principal amount of zero coupon convertible subordinated notes due 2004. That sale price reflected an original discount rate and yield to maturity of 5.5% per annum. Each $10,000 face amount of note may be converted at any time on or prior to maturity, unless previously redeemed or otherwise purchased by BRK, into 0.4515 share of common stock, such conversion ratio to be adjusted only upon occurrence of certain dilutive events affecting the common stock.

Aug. '89— BRK said that it may seek approval to raise its stake in Coca Cola to 15% from about 6.8%.

Next earnings report expected in February.

Finances

In August, 1989 BRK bought from USAir Group, Inc. (NYSE: U), for $358 million, 358,000 shares of 9¼% Series A cumulative preferred stock at $1,000 a share. After two years, each share will be convertible into 16²/₃ common shares of USAir. On an "as converted" basis, the preferred shares are equivalent to about 12% of USAir's voting rights. USAir may call the shares for redemption at $1,100 a share in the eight year period between August 7, 1991 and August 7, 1999, when they must be redeemed at their issue price.

At September 30, 1989 BRK's equity holdings had a total market value of $5.1 billion, compared with a cost of $1.8 billion, and its holdings of fixed maturity obligations (preferred stock and bonds) had a carrying value of $2.3 billion. Investments included an 17% stake in Capital Cities/ABC Inc., a 44% stake in GEICO Corp., a 13% stake in the Washington Post Co., a 12% voting interest in Salomon Inc, an 11% voting interest in Gillette Co (bought in July, 1989), and a 12% voting interest in USAir (bought in August, 1989).

Summary

Bethlehem is the second largest domestic steel producer, with products directed largely to heavy construction and capital goods markets. After sustaining losses for five consecutive years through 1986, improved industry conditions and $130 million in investment tax credit refunds allowed a return to profitability in 1987. Increased shipments and higher realized prices led to sharply higher earnings in 1988. However, earnings are expected to decline in 1989 and 1990. Dividends were resumed in July, 1989.

Current Outlook

Earnings for 1990 are estimated at $2.70 a share, versus the $3.00 expected for 1989.

Common dividends, omitted in late 1985, were reinstated at $0.10 quarterly in July, 1989.

Sales are expected to decline in 1990, reflecting lower shipments and along with decreased sales from the steel related unit as a result of a joint venture. Lower operating rates will offset the impact of a declining raw material costs and result in narrower margins. The likely absence of charges will aid operating income but not sufficiently to offset lower gross profits, and earnings will probably decline in 1990.

Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	1,403	1,329	1,131	1,169
Jun.	1,434	1,396	1,128	1,109
Sep.	1,270	1,432	1,157	1,033
Dec.		1,332	1,205	1,022
		5,489	4,621	4,333

Sales for the nine months ended September 30, 1989 fell 1.2%, year to year, mostly reflecting declines in the steel related unit and weakness in third quarter steel shipments. Higher raw materials and increased labor costs along with an unexpected outage at a blast furnace led to a contraction in gross margins. Following $105 million of restructuring charges, pretax income fell 6%. After taxes at 4.8%, versus tax credits of $4.0 million, net income was down 40%. Share earnings were $2.35 on 7.3% more shares, versus $4.40, before special credits of $0.16 in 1988.

Important Developments

Oct. '89— BS announced that its BethForge unit had agreed in principle to form an equally-owned joint venture with Chavanne-Ketin of France to produce and sell cast iron mill rolls to the metal working industry.

Oct. '89— BS reported a 56% decline in share earnings on an 11.3% decline in sales for 1989's third quarter. BS said that net income and earnings for the quarter and nine months ended September 30 were adversely affected by increased raw material and labor costs, an unexpected power outage, work stoppages at its coal operations, and $105 million in pretax charges mainly for restructuring of the BethForge and Baltimore Marine divisions. BS noted that third quarter steel shipments fell as a result of reduced demand from the auto market and service centers together with intensified competition in the construction market.

Next earnings report expected in late January.

Business Summary

Bethlehem Steel is the second largest domestic steel producer, and has fabricating and other operations. Segment contributions in 1988 (profits in million $):

	Sales	Profits
Basic steel	93%	$528
Steel related	7%	-$102

Raw steel production totaled 12.9 million net tons in 1988 (11.5 million in 1987). Shipments were 10.3 million tons (9.4 million in 1987). BS used 80.3% of its production capacity in 1988 versus 72.2% in 1987.

Steel mill products include sheet, strip and tin mill (48.9% of 1988 sales); bar, rod, and semi-finished (12.1%); plates (13.8%); structural shapes and piling (9.8%); and other (8.7%). Major markets included service centers, processors and converters (46.6%); transportation (19.7%); construction (16.5%); machinery (6%); and other (11.2%).

Steel related operations include the manufacture and fabrication of a variety of steel products, including railroad cars and parts, and forgings and castings. BS's marine construction operations are also part of this segment.

Dividend Data

Common dividends, omitted in October, 1985, were resumed in July, 1989. A "poison pill" stock purchase right was adopted in 1988.

Summary

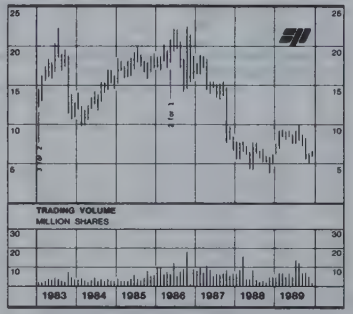
This company, the nation's largest owner/operator of nursing homes, is in the midst of a major divestiture program under which some 370 homes are to be divested by the end of 1990, representing a 36% reduction in the number of beds from mid-1989. A restructuring charge associated with this program of about $1.93 a share was taken in the first nine months of 1989. Following several years of losses, a return to profitability is anticipated for 1990.

Current Outlook

Earnings of about $0.20 a share are projected for 1990, in contrast to 1989's estimated deficit of $1.97 a share, which includes a restructuring charge of $1.93.

Dividends on both the common and cumulative preferred shares were omitted in January, 1988.

Revenues for 1990 are expected to decline from the $2.08 billion estimated for 1989, reflecting the ongoing nursing home divestiture program. However, profitability should benefit from BEV's retention of its more profitable homes, cost efficiencies, fewer staffing problems and reduced interest expense.



Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	511	496	527	464

Important Developments

Dec. '89— A company spokesman noted that BEV sold 45 nursing homes in Iowa in August and had contracted to sell an additional 160 facilities in five other states, subject to financing arrangements. These divestitures were part of the BEV's announced plans in July, 1989 to sell 370 nursing homes with over 38,000 beds. A net restructuring charge of $1.93 a share related to this program was taken in the first nine months of 1989. Cash proceeds from the sales are estimated at about $235 million. In addition, the planned sales would eliminate $134 million of existing facility debt. By 1992, BEV's goal is to reduce its debt-to-capital ratio to the 55%-60% range and to have pretax margins approaching the stronger levels of profitability achieved in the mid-1980s.

Next earnings report expected in early February.

Business Summary

Beverly Enterprises is the largest operator of skilled and intermediate care nursing homes in the U.S. The company also operates retirement living and congregate living projects, home health care units and pharmacies. Revenues in recent years were derived as follows:

	1988	1987	1986	1985
Medicaid	61%	61%	59%	59%
Medicare	5%	3%	4%	6%
Other (mostly private sources)	34%	36%	37%	35%

As of October 31, 1989 BEV was operating some 927 skilled and intermediate care nursing facilities with some 101,881 licensed beds ranging in capacity from 20 to 388 beds in some 36 states and the District of Columbia (a major nursing home divestiture program is planned; see Important Developments). Of total licensed beds of 996 as of January 31, 1989, about 55% were leased, 42% were owned, and 3% were facilities managed for others. Patient days in 1988 totaled 36,191,000, down from 39,140,000 in 1987 and 38,817,000 in 1986.

Skilled care facilities provide convalescent, rehabilitative and sustaining care over extended periods of time, while intermediate units offer similar care on a less extensive basis. The average occupancy at the company's facilities was 88% in 1988 and 1987, and 90% in 1986, 1985 and 1984.

As of the end of October, 1989 BEV was also operating 45 retirement and congregate living projects with about 2,515 apartment units, 29 pharmacies and pharmacy related entities, and 12 home health care agencies.

Dividend Data

Dividends were omitted in early 1988 after having been paid since 1979. The most recent payment was $0.05 on January 11, 1988.

Dec. 14'89	1989					
20¼	25¼-18⅛	40	0.40	2.0%	B	1.37

Summary

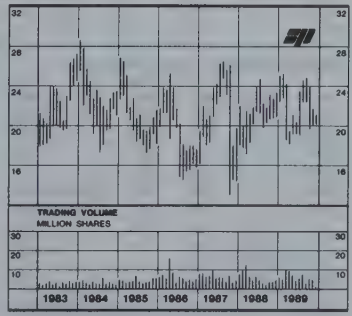
This company is the world's largest producer of power tools, and a leading supplier of household products. Earnings for fiscal 1989 were penalized by costs related to the $2.8 billion acquisition in April of Emhart Corp., a diversified multinational producer of industrial and consumer products and information and electronic systems. However, earnings should rebound in 1990. BDK is changing its fiscal year-end from September to December in 1990.

Current Outlook

Earnings for the new fiscal year ending December 31, 1990 could reach $1.50 a share, up from $0.51 for the fiscal year ended September 30, 1989.

The quarterly dividend should be remain at $0.10.

Sales for 1990 should double, reflecting the Emhart acquisition, as well as continued new product introductions and increased sales of existing products in the U.S. and in non-U.S. markets. Benefits from plant closings and other cost containment programs will be offset by costs associated with assimilating Emhart, causing operating margins to narrow. Interest charges should be lower, reflecting the divestiture of several Emhart subsidiaries.



Net Sales (Million $)

Quarter:	1988-9	1987-8	1986-7	1985-6
Dec.	706	612	529	522
Mar.	571	538	439	415
Jun.	855	539	465	417
Sep.	1,059	592	502	438
	3,190	2,281	1,935	1,791

Sales for the fiscal year ended September 30, 1989 (preliminary) rose 40%, year to year, reflecting the Emhart acquisition and strong demand for BDK's power tools and household products. Following various acquisition expenses and substantially higher interest charges, margins narrowed, and pretax income fell 50%. After taxes at 52.3%, versus 22.8%, net income declined 69%, to $0.51 a share from $1.65.

Important Developments

Nov. '89— BDK said that it was strategically positioned to continue outperforming the markets it serves, with new products primarily generating the sales momentum. BDK said that power tool sales had exceptional growth in fiscal 1989, with a double-digit sales increase on a worldwide basis. Among new product lines acquired with Emhart, Kwikset locks and hardware, Price Pfister faucets and fixtures, and True Temper recreational products also achieved strong results for the fourth quarter. BDK said it was proceeding with an aggressive divestiture program to reduce debt by about $1 billion, and had recently agreed to sell Bostik chemical adhesives and sealants business for $345 million. BDK was also restructuring its interest rate hedge, which had reduced earnings by $0.36 a share in the fourth quarter.

Next earnings report expected in late January.

Business Summary

Black and Decker makes a wide range of power tools, household products, and accessories. Sales by product group in recent fiscal years:

	1988	1987
Power tools	42%	41%
Household products	33%	34%
Accessories	11%	10%
Outdoor products	8%	8%
Services	6%	7%

Some 48% of sales in fiscal 1988 were domestic, 32% European, and 20% other countries.

Principal products are sold in consumer and professional markets and include a wide range of corded and cordless portable electric power tools, household products, stationary tools and other labor saving devices. Power tools include drills, screwdrivers, saws, sanders, grinders, car care products, Workmate Workcenters, stationary woodworking tools, and a variety of other related tools. Household products include a variety of home cleaning and lighting products, and a full line of small home appliances, including irons, toasters, toaster ovens, coffee makers, can openers, hand mixers, blenders and food processors. Accessories are made for power tools and outdoor products. Outdoor products include a variety of lawn and garden care products such as hedge and lawn trimmers, edgers, electric mowers and electric chain saws.

Dividend Data

Dividends have been paid since 1937. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

0.10	Nov. 15	Dec. 4	Dec. 8	Dec. 22'89

Finances

At fiscal 1988 year-end BDK had $258 million available to offset future financial statement taxable income. Tax basis carryforwards consisted of $223.6 million (expiring 1989-2002) and other tax credits of $15.1 million. With adoption of SFAS No. 96 at 1987 year-end, BDK may use these credits as a direct offset of Federal income taxes.

Summary

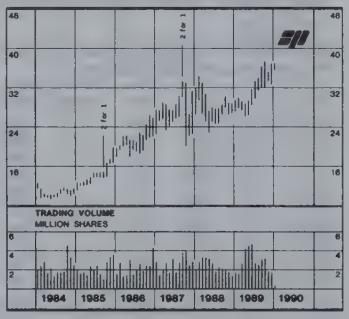
This company is the largest preparer of Federal income tax returns for individuals, completing over 10% of individual returns filed in 1989, and over 11% of returns filed in Canada. Earnings have risen steadily for more than a decade, owing in part to diversification into service oriented businesses, including personnel placement, computer services, and business seminars. Long-term prospects are buoyed by continued growth in new services and businesses, gains in market share, and ongoing operating synergies. Cash dividends have been raised in each calendar year since 1962.

Current Outlook

Earnings for the fiscal year ending April 30, 1990 are projected at $2.15 a share, versus the $1.90 reported for fiscal 1988-9.

The $0.32 quarterly dividend is expected to be raised late in calendar year 1990.

Revenues in fiscal 1989-90 should benefit from gains in all segments, reflecting volume and price increases. Margins will be aided by increasing computerization and operating synergies among HRB's four business segments. Growth in market share will also contribute to greater efficiencies. Over the longer term, revenue and earnings gains should continue for this well-managed company.



Total Revenues[1] (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Jul.	132.2	112.1	93.7	82.2
Oct.	149.6	133.0	113.1	92.2
Jan.		139.4	118.7	101.7
Apr.		515.2	468.6	434.4
		899.6	794.1	710.4

Revenues for the six months ended October 31, 1989 advanced 15%, year to year. The seasonal pretax loss from tax preparation widened by nearly 17%, but after sharply improved profitability at Path Management and CompuServe, the net loss narrowed to $4,408,000 ($0.08 a share) from $5,651,000 ($0.11).

Important Developments

Oct. '89— HRB and MicroBilt Corp. said that they had terminated their July merger agreement which provided for MicroBilt to be acquired for some 4.3 million shares of HRB common stock. MicroBilt, based in Atlanta, supplies low-cost, application-specific data communications systems to a wide range of industries that require communication with numerous remote locations.

Apr. '89— HRB sold its 9% equity interest in National Data Corp. for about $28.3 million in a negotiated transaction.

Feb. '89— HRB and its franchisees operated 8,778 tax return preparation offices worldwide in the 1989 tax filing season, versus 8,793 in the 1988 season.

Next earnings report expected in late February.

Business Summary

Segment contributions to operating revenues and profits in fiscal 1988-9:

	Revs.	Profits
Tax return preparation	51%	71%
Supplemental personnel services	24%	9%
Computer services	19%	20%
Other	6%	Nil

HRB operated and franchised a total of 8,778 tax preparation offices during the 1989 tax filing season, compared with 8,793 in the 1988 period. In addition to the U.S., offices are located in Canada, Europe, New Zealand and Australia. About 13,116,700 returns were prepared during the 1988-9 fiscal year, up 4.4% from the 12,563,400 prepared in 1987-8.

HRB's Personnel Pool of America subsidiary provides supplemental medical, industrial, food service and clerical personnel through 173 owned and 332 franchised offices throughout the U.S., Canada, and Puerto Rico. Path Management Industries offers full-day and half-day seminars for business personnel throughout the U.S. and internationally.

CompuServe provides information processing needs and specialized computer programs to a variety of organizations and individuals throughout the U.S. Other firms are licensed to market these services in Japan, Europe and parts of the Far East. The company is the leading vendor of point-of-sale credit card authorization services.

Dividend Data

Dividends have been paid since 1962. A "poison pill" common stock purchase right was adopted in 1988.

NYSE Symbol BV Options on CBOE (Feb-May-Aug-Nov) & ASE (Jan-Apr-Jul-Oct)

Price	Range	P–E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 6'89	1989					
18	21⅝–9⅞	38	None	None	B–	1.58

Summary

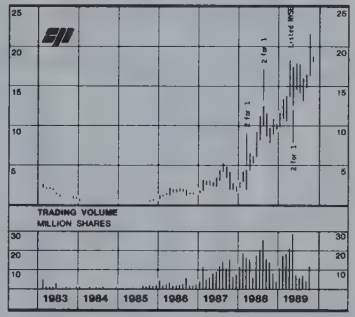
This fast-growing company operates and licenses more than 800 videocassette retail stores. In August, 1989 BV acquired its largest franchisee, which operated about 105 BV stores. BV's common stock began trading on the NYSE in April, 1989. The shares were split 2-for-1 in May.

Current Outlook

Earnings for 1990 are estimated at $0.89 a share, up from the $0.57 expected for 1989.

Initiation of cash dividends is not expected.

Revenues will continue to rise in 1990, aided by the maturation and openings of stores. Further sales of hardware on which to play videocassettes, and the lower prices of video rentals, relative to theater prices, are favorable to industry growth. Also, BV's increasing size is likely to provide economies of scale. However, in the future, sales (rather than rentals) of videos by other retailers, and alternate delivery systems for filmed entertainment may increasingly become competitive threats to BV.



Net Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	---	17.9	6.1	0.2
Jun.	[3]165.7	28.9	10.2	0.8

Important Developments

Oct. '89— An offering of BV zero-coupon subordinated convertible notes was expected to generate gross proceeds of $92 million. The notes, totaling a principal amount of $300 million, are due in November 2004. Part of the proceeds were expected to be used to reduce existing debt, and BV said this would save about $2 million a year in interest expense. In August, BV completed the acquisition of its largest franchisee, which operated about 105 stores, for about 7.8 million shares. The transaction has been treated as a pooling-of-interests, which leads to BV's restatement of previous financial results. BV was expected to end 1989 with at least 1,000 units, including about 400 stores opened during the year. The opening of about 400 additional stores was expected in 1990.

Next earnings report expected in early February.

Business Summary

Blockbuster Entertainment operates and licenses retail stores that rent and sell prerecorded videocassettes. BV is one the largest video chain retailers in the U.S., and has grown through both internal development and acquisitions. As of late October, 1989 BV's video retail system had 942 stores, of which 521 were company-owned and 421 were franchised. In comparison, BV had only 19 stores at year-end 1986. As of October, 1989 BV had stores in 42 states, Canada, the United Kingdom, and Guam.

Historically, BV's "superstores" have generally carried 7,000 to 13,000 video cassettes and have ranged in size from 3,800 to 10,000 sq. ft. The company believed that its stores were larger, offered a broader selection of video cassettes, stayed open longer hours, and had faster and more convenient computerized check-in/check-out procedures than most of its competitors. The stores sold prerecorded and blank video cassettes, but did not sell video hardware.

Prior to January 1988, BV entered licensing agreements under which each licensee was granted an exclusive territory and was required to open and operate a minimum number of superstores in that area. New agreements allow for the opening of a single store. From franchisees, BV's revenue sources include initial fees, sales of proprietary software, and royalties which typically range from 3% to 7% of a store's gross revenues.

Dividend Data

No cash has been paid. Stock splits of 2-for-1 each were effected in March and August 1988, and in May 1989.

Finances

BV has an unsecured credit line of $125 million, under which $54 million had been borrowed as of July 31, 1989.

Under pooling-of-interests accounting, in which BV's results are restated to include the historic results of its largest franchisee and of Major Video Corp., BV had 1988 revenues and net income of $179.0 million and $17.5 million ($0.25 a share), respectively. In January, 1989 BV acquired Major Video Corp. for about 8.4 million (adjusted) common shares. Major Video operated 39 stores and had 136 franchises.

In September 1989, BV agreed to sell Cox Enterprises, Inc., 1.0 million of common shares for $15 each. Also, BV and Cox had a letter of intent which could lead to Cox operating about 100 video stores as a franchisee of BV.

In August 1988, warrants to acquire about 9.0 million (all figures adjusted for a subsequent stock split) BV shares for about $2.38 each were purchased by United Cable Television, BV chairman H. W. Huizenga, and others from F. F. Flynn and J. J. Melk, both of whom were directors of BV.

Capitalization

Long Term Debt: $92,348,000 (8/89).

Common Stock: 70,585,209 shs. ($0.10 par).
Officers and directors own or have the right to acquire equity positions totaling more than 15%. United Cable Television Corp. owns about 11%.
Shareholders of record: 3,068.

Jan. 3'90	1989-90					
63	63¼-38½	19	1.20	1.9%	B+	1.03

Summary

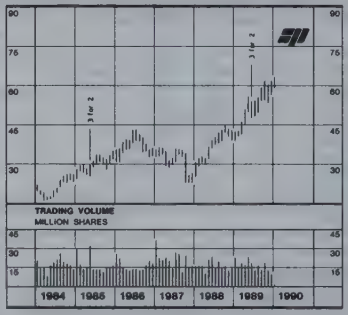
Boeing is the leading manufacturer of commercial jets and also produces military aircraft and missiles. BA has built a record backlog on the strong uptrend in commercial transport orders in recent years, which should produce improving earnings for the next few years, despite losses on some defense programs. Production problems and a machinists' strike hampered profits in 1989, but acceleration of deliveries should lead to strong earnings growth in 1990.

Current Outlook

Earnings for 1990 are projected at $5.85 a share, up from the $3.40 estimated for 1989.

Dividends should continue at $0.30 quarterly.

Sales for 1990 should rise more than 20% from approximately $19 billion estimated for 1989. With production rates for 737s and 757s scheduled to rise, commercial deliveries should increase strongly from strike-depleted 1989 totals. Margins on commercial business should improve as 1989's production problems are worked out. Revenues from military programs could be up slightly, with some reduction in losses likely. Losses on deHavilland operations should decline. Investment income should be somewhat lower.



Sales[1] (Billion $)

Quarter:	1990	1989	1988	1987
Mar.	---	4.00	3.64	3.76

Important Developments

Dec. '89— Deliveries of jet transports totaled 283 units in 1989, including 49 in the fourth quarter, when a 48-day machinists' strike occurred. BA had originally expected to deliver 328 jets.

Dec. '89— BA announced that it would accept orders for a new jet transport, the 777, a twin-engine, twin-aisle aircraft seating about 350.

Nov. '89— The machinists union accepted a new three-year contract ending a 48-day strike.

Oct. '89— Total announced orders for the first nine months of 1989 consisted of 738 jets and 68 commuter aircraft valued at $39.3 billion, versus 497 jets and 45 commuters valued at $23.1 billion a year earlier.

Next earnings report expected in late January.

Business Summary

Boeing is the world's leading manufacturer of commercial jets. Industry segment data (profits in million $):

1988	Revs.	Profits
Commercial transportation	67%	$585
Military transportation	22%	-95
Missiles and space	8%	124
Other industries	3%	-28

Exports comprised 46% of sales in 1988, with 19% going to Europe, 14% to Asia, 7% to the Western Hemisphere, and 6% elsewhere.

As of September 30, 1989 BA had made the following deliveries (in units) of commercial jets:

Model	Deliveries
707	984
727	1,831
737	1,772
747	742
757	247
767	279

In early 1986 Boeing acquired de Havilland of Canada, maker of turboprop commuter aircraft.

Government sales were 28% of 1988 sales.

Major military and space programs include the Airborne Warning and control System aircraft and the Inertial Upper Stage. Important development programs include the V-22 tilt rotor aircraft, the short-range SRAM II missile, the Hard Mobile Launcher, the Sea Lance missile and the Advanced Technology Fighter. Boeing Vertol makes military and commercial helicopters.

Dividend Data

Dividends have been paid since 1942. A "poison pill" stock purchase right was adopted in 1987.

Boise Cascade

NYSE Symbol BCC Options on CBOE (Feb-May-Aug-Nov) In S&P 500

Price	Range	P–E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 9'89	1989					
41	48-39¾	6	1.52	3.7%	B	1.21

Summary

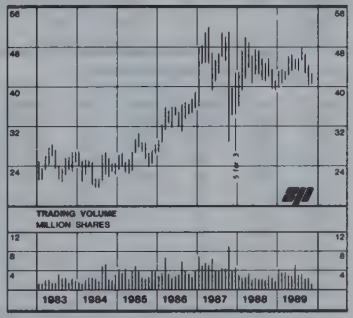
This leading forest products company is an important producer of building materials and paper products. Sales and earnings are very sensitive to cyclical economic fluctuations, but over the past several years BCC has steadily invested in the less cyclical paper side of its business and deemphasized investment in building materials. The outlook for the rest of 1989 and 1990 is good because of relatively strong markets for most paper and wood products.

Current Outlook

Earnings for 1990 are projected at $5.00 a share, compared with the $6.00 estimated for 1989.

The quarterly dividend has been raised 8.6%, to $0.38 from $0.35, with the January, 1990 payment.

Sales for 1990 are expected to show a modest increase, as markets for most paper grades and office products remain good. Moderately lower paper prices will cause margins to narrow. Building materials sales should benefit from relatively high prices caused by shortages of timber in the Pacific northwest. Earnings should benefit from ongoing cost reduction programs.



Sales (Million $)

Quarter:	1990	1989	1988	1987
Mar.	---	1,099	1,016	912
Jun.	---	1,091	1,007	936

Dec.	E1.25	E1.24	1.70	1.20
	E5.00	E6.00	6.34	3.70

Important Developments

Jul. '89— BCC sold a new issue of convertible preferred stock to the company's recently created employee stock ownership plan. In a related transaction, the company repurchased 4 million shares of its common stock at $45 a share.

Jun. '89— The company signed labor contracts with all of the unions at its International Falls, Minnesota pulp and paper mill and said it would proceed with its planned $535 million modernization of that mill.

Dec. '88— BCC adopted a new shareholder rights plan as an anti-takeover move and redeemed the rights issued under its previous plan at $0.10 per right.

Next earnings report expected in mid-January.

Business Summary

BCC is an important producer of building materials and papers. Segment contributions:

1988	Sales	Profits
Paper	59%	82%
Office products	21%	10%
Building materials	20%	8%

Canadian paper operations accounted for about 9% of sales and 20% of income in 1988.

Paper output in 1988 included 1,577,000 tons of printing and publishing papers, 830,000 tons of newsprint, and 613,000 tons of containerboard and paperboard. Packaging products included 7.3 billion sq. ft. of corrugated containers produced by BCC and 1.54 billion sq. ft. produced by joint ventures.

Wood products production in 1988 was 1.59 billion sq. ft. of plywood and veneer, 798 million bd. ft. of lumber and 166 million sq. ft. of particleboard. At the end of 1988 BCC owned in fee 2,894,000 acres of timberland (including joint ventures) and controlled another 3,353,000 acres. Approximately 42% of the fiber processed by the company's mills in 1988 came from BCC timberland.

Dividend Data

Dividends have been paid since 1935. A new "poison pill" stock purchase right was adopted in 1988. A dividend reinvestment plan is available.

Summary

This company designs and builds integrated wide-area digital communications networks; develops and markets packaged software products; develops, manufactures and markets high performance computers; and offers research, development and consulting services. Significantly lower hardware shipments, primarily to the U.S. Government, resulted in a net loss for fiscal 1989.

Business Summary

Bolt Beranek and Newman Inc. designs and builds integrated wide-area digital communications networks; develops and markets packaged software products; develops, manufactures, and markets high performance computers; and offers research, development, and consulting services in computer, information and physical sciences. Segment contributions in fiscal 1988:

	Sales	Profits
Computer & comm. products	64%	73%
Research, development & consulting	36%	27%

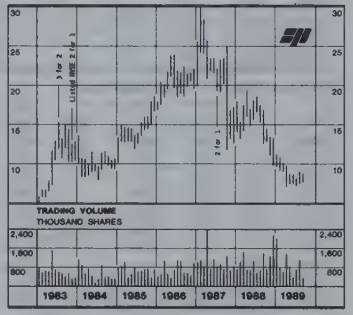
The U.S. Government accounted for about 68% of fiscal 1988 sales, against 75% the year before.

BBN Communications is a vertically integrated supplier of private wide-area, data communications network products and services for government and industry. The unit evaluates data communications requirements, designs, manufactures and installs the network, and provides on-site technical assistance.

BBN Software Products markets BBN's scientific software products, including the RS software line, a computer-aided analysis tool for scientists; Clinitrial, a data management system for clinical trials in the pharmaceutical industry; and DataProbe, an interactive time-series analysis and graphics tool with the ability to analyze recorded data from a variety of sources.

BBN Advanced Computers designs and markets high-performance parallel processor computers for use in the science and engineering markets. BBN's second generation parallel processor, the Butterfly computer, is used by organizations wishing to evaluate parallel processing, primarily in the high-level scientific and engineering fields.

BBN Systems and Technologies offers contract consulting, R&D, and systems capabilities in the fields of acoustics and computer and information sciences. Areas of specialization include architectural acoustics and environmental technologies, physical sciences, and graphics technologies.



Important Developments

Apr. '89— BBN said that the fiscal 1989 net loss reflected a $34 decrease in Government hardware sales, an $11 million charge due to a contract overrun, and costs associated with the new TC2000 high performance computer. Also, inventories and other assets were written down $16 million. The consolidation of manufacturing and other facilities resulted in a fourth quarter charge of $5.1 million. BBN was optimistic about prospects for a return to profitability in the second half of fiscal 1990, but said it would be dependent on increases of network sales and success in selling the new TC2000 computer.

Next earnings report expected in late October.

Jun.	71.9	77.4	72.4	49.3
	291.6	305.2	233.8	178.0

Revenues for the fiscal year ended June 30, 1989 (preliminary) decreased 4.5% from those of the previous year. After a $5.1 million resturucturing charge, a $46.5 million loss from operations was sustained, versus income of $28.8 million. A net loss of $31.5 million ($1.72 a share) was incurred, versus net income of $18.1 million ($0.96). Results for fiscal 1989 exclude a special credit of $6.4 million ($0.35) from the cumulative effect of a change in accounting for income taxes.

Summary

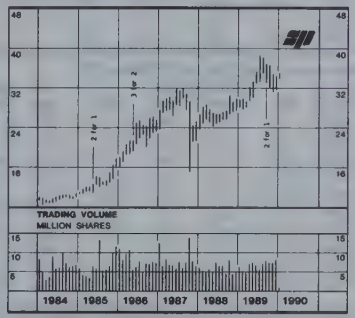
Borden makes a wide variety of foods, and is the nation's largest producer of dairy and pasta products. It also makes nonfood consumer items and specialty chemicals. The sale of its commodity chemicals business and acquisition of Meadow Gold Dairies in 1987, plus a series of smaller regional acquisitions, helped fuel earnings growth since 1986. Earnings for 1989 were hurt by a $2.73 a share charge to cover companywide plant closings and upgradings, including about 30% of dairy operations. The restructuring should allow a good earnings rebound in 1990.

Current Outlook

Earnings for 1990 should recover to $2.70 a share from 1989's estimated loss of $0.35, which includes a onetime charge of about $2.73.

The quarterly dividend, which was raised 6.7% in September, 1989, should remain at $0.24.

Sales for 1990 are estimated to increase approximately 7%, largely reflecting earlier acquisitions of regional dairy, snack, pasta and other consumer products companies. Growing production and distribution efficiencies, combined with greater purchasing power, companywide plant consolidations and upgradings, should continue to fuel profit growth. A companywide restructuring and sharp cutbacks in the dairy business, including exit from some non-growth markets, should improve profitability as well. Divestiture of non-strategic businesses should also aid a strong earnings uptrend.



Sales (Million $)

Quarter:	1990	1989	1988	1987
Mar.	---	1,803	1,602	1,428
Jun.	---	1,874	1,784	1,602
Sep.	---	1,963	1,874	1,680
Dec.	---	---	1,983	1,804
	---	---	7,244	6,514

Sales for the 1989 nine months rose 7.2%, year to year. Strong advances in operating income from pasta, cheeses, condensed milk, bouillon and soup mixes offset declines for the dairy and snack products divisions, due to higher materials costs and highly competitive markets. After a $404 million ($2.73 a share) charge in the third quarter to restructure dairy operations and reconfigure production and distribution in other areas, there was a net loss of $1.08 a share, compared with net income of $1.48, as adjusted for the September, 1989 2-for-1 split.

Dec.	E0.85	E0.73	0.64	0.55
	E2.70	Ed0.35	2.11	1.81

Important Developments

Nov. '89— BN created an after-tax reserve of $404 million to close or sell 65 of its 265 plants worldwide over two to three years. About 20 were dairy plants and branches in non-growth market areas, accounting for a third of total dairy sales. Remaining closings were to streamline and consolidate production in larger, more efficient plants. The program would cut employment some 15%, and was expected to improve operating income $340 million through 1993.

Next earnings report expected in late January.

Business Summary

Borden produces a broad range of food and chemical products. Business segment contributions in 1988 were:

	Sales	Profits
Foods	74%	68%
Non-food consumer & industrial	26%	32%

Foreign operations accounted for 22% of sales and 22% of operating profits in 1988.

Foods consist of national and regional branded dairy products (33% of sales) sold under the Borden, Meadow Gold, Viva, Louis Sherry, Hotel Bar and Keller's names; snacks (16%) such as Wise's, LaFamous, and New York Deli potato chips, and Cheez Doodles; pasta (8%), including Creamette, Prince, Ronco, Dutch Maid, Luxury, and Anthony's; niche grocery items (18%) including ReaLemon juice, Eagle Brand condensed milks, Kava instant coffee, Aunt Millies and other spaghetti sauces, Cracker Jacks and Campfire marshmallows; and nonfood consumer products (8%) such as Elmer's adhesives, Krylon spray paints, Rain Dance car care products, and wall coverings (Wall-Tex, Birge, Borden, James Seeman). Chemical specialties (17%) include resins, polyvinyl chloride films, and industrial adhesives. Commodity chemicals were spun off in late 1987 and 1988.

Dividend Data

Dividends have been paid since 1899. A dividend reinvestment plan is available. A "poison pill" stock purchase right adopted in 1986 was amended in 1988.

Nov. 14'89	1989					
27½	31⅛-24¾	NM	1.60	5.8%	B-	0.97

Summary

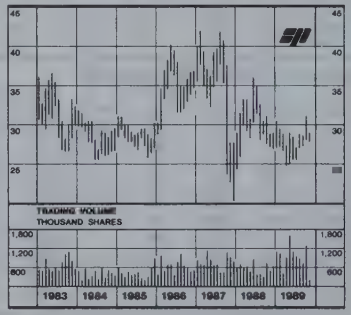
This company is the largest producer of small gasoline engines and automotive locks. By far the major portions of its engine sales are to manufacturers of lawn and garden equipment. BGG reported a $20 million net loss for fiscal 1989, reflecting lower engine shipments, higher costs and approximately $14 million of nonrecurring charges. In October, 1989 BGG said that it expected higher sales and a return to profitability in fiscal 1990.

Current Outlook

Earnings for the fiscal year ending June 30, 1990 are projected at $1.50 a share, versus the loss of $1.39 of fiscal 1989.

Dividends should remain at $0.40 quarterly.

Sales for fiscal 1990 are expected to rise, reflecting a projected recovery in engine unit shipments, higher service sales and some recovery of market share. Gross margins should improve as unabsorbed overhead decreases, and raw material costs decline. Aided further by probable declines in SG&A and engineering expenses, operations should return to profitability.



Sales (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Sep.	167.3	170.6	145.3	137.9
Dec.	---	207.8	244.3	169.7
Mar.	---	307.4	290.7	269.5
Jun.	---	190.5	233.7	207.5
	---	876.4	914.1	784.7

Sales for the three months ended September 30, 1989 declined 1.9%, year to year, reflecting a 9% decrease in engine unit shipments and a 4% increase in lock unit shipments. Following higher unabsorbed overhead resulting from lower production, gross profits fell 7.0%. Aided by lower engineering, selling, general and administrative expenses, the seasonal operating loss narrowed to $7.1 million from $9.3 million. However, after increased nonoperating expenses, the pretax loss was $10.9 million in both periods. After tax credits, the net loss was $7.3 million ($0.50 a share), versus $7.5 million ($0.52).

Jun.	E0.40	d1.74	0.39	0.46
	E1.50	d1.39	2.09	1.84

Important Developments

Oct. '89— BGG reported a $7.3 million ($0.50 a share) net loss on a 1.9% decline in sales for fiscal 1990's first quarter, versus a loss of $7.5 million ($0.52) in the year-earlier quarter. BGG noted that underabsorbed overhead rose, due to the decision to build fewer engines for inventory and resulted in a 30% decrease in manufacturing activity. Citing improved conditions in the domestic lawn and garden market, BGG stated that orders had picked up and that it had increased its assembly rate beginning in late September. BGG said that for the full year, it expected higher net sales and a profit.

Aug. '89— BGG signed a commitment letter for a $75 million revolving credit facility which had an initial term of three years and was classified as long-term debt.

Next earnings report expected in mid-January.

Business Summary

Briggs & Stratton is the world's largest manufacturer of air-cooled gasoline engines for outdoor power equipment and locks for use in automobiles and trucks. Contributions by industry segment in fiscal 1989 (profits in million $):

	Sales	Profits
Engines and parts	92%	-$13.6
Locks	8%	-2.5

Export sales accounted for 27% of total sales in fiscal 1989, versus 20% in fiscal 1988.

Engines are produced in models ranging from 2-to-18 horsepower, with 95% of output concentrated in air cooled aluminum alloy gasoline engines; less than 5% of engine sales were air cooled cast iron gasoline engines ranging from 9 to 16 horsepower. In fiscal 1989, over 84% of all engines produced by BGG were sold for use in walk-type power mowers, riding lawn mowers, riding garden tractors, garden tillers, snow throwers, and other home maintenance equipment such as lawn edgers, and yard vacuums; some 16% of output was sold for use in general industrial products including pumps, generators and light construction and agricultural equipment. In 1980 the company began production of a two-cycle engine intended for lightweight snowthrowers. While BGG manufactures most of its engine components, it buys parts such as piston rings, spark plugs, valves, fasteners and starter motors.

Sales to BGG's two largest customers, MTD Products Inc. and Murray Ohio Manufacturing Co. accounted for 21% of total sales in fiscal 1989 and 24% of sales in fiscal 1988.

Customers of the automobile lock business include all major automobile and truck manufacturers in North America.

Bristol-Myers Squibb

NYSE Symbol BMY Options on CBOE (Mar-Jun-Sep-Dec) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 8'89	1989					
53¾	55-44	19	2.00	3.7%	A+	0.81

Summary

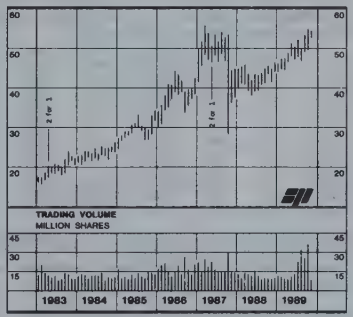
In October, 1989 Bristol-Myers completed a merger with Squibb Corp. through issuance of close to 240 million new BMY common shares, creating the world's second largest pharmaceutical company. Although the merger is expected to have an initial dilutive impact on earnings, strategic benefits, synergies and cost economies accruing from the combination enhance Bristol's longer-range prospects.

Current Outlook

Earnings for 1990 are projected at about $3.20 a share, up from the $2.75 (before likely nonrecurring charges) estimated for 1989.

An increase in the $0.50 quarterly dividend is likely over the near term.

Sales of Bristol-Myers Squibb in 1990 are expected to advance 7%-10% from the $9.2 billion indicated for 1989, aided by further growth in major pharmaceutical, medical and consumer products lines. Profitability should benefit from the better volume, as well as from synergies and cost economies accruing from the combination of the two companies.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	---	1,520	1,348	1,195
Jun.	[2]4,509	1,457	1,314	1,172

Dec.		0.68	0.61	0.53
		2.88	2.47	2.07

Important Developments

Oct. 4'89— Bristol-Myers completed its merger with Squibb Corp. through the tax-free exchange of 2.4 new Bristol common shares for each of Squibb's approximately 97 million common shares outstanding. Including shares issued for Squibb's options, about 240 million BMY common shares were issued. Squibb is a leading producer of cardiovascular, anti-infective and diagnostic products, including Capoten (the leading ACE inhibitor heart drug whose sales exceeded $1 billion in 1988). Besides new drug products, Squibb brings to Bristol important marketing strengths overseas, especially in Europe. Pro forma Bristol-Myers Squibb earned $1.25 billion ($2.39 a share) on net sales of $8.56 billion in 1988. Earnings for 1989 are likely to include nonrecurring charges associated with merger costs, plant consolidations and related reserves.

Next earnings report expected in mid-January.

Business Summary

The company's operations were substantially enlarged with the October, 1989 merger with Squibb Corp., a leading maker of ethical pharmaceuticals. Excluding Squibb, Bristol-Myers' 1988 sales and earnings broke down as follows:

	Sales	Profits
Pharmaceutical & medical ...	42%	42%
Non-prescription health	27%	35%
Toiletries & beauty aids	22%	17%
Household products	9%	6%

Foreign operations contributed 33% of Bristol's sales and 26% of its profits in 1988.

Pharmaceutical and medical products comprise prescription drugs, orthopaedic implants, surgical instruments and dental supplies. Key compounds are antibiotics and anti-cancer agents. Important Squibb products consist of cardiovascular (including Capoten) and anti-infective drugs and diagnostic agents.

Non-prescription products include Bufferin, Excedrin and Nuprin analgesics, Comtrex cough and cold remedy, Keri Lotion skin moisturizer, and Enfamil infant feeding formula. Vi-Sols and Natalins vitamins are also sold.

Toiletries and beauty aids encompass the Clairol line of hair care products, Nice 'n Easy and Clairesse hair colorings, Final Net hair spray, Short & Sassy hair conditioner, Vitalis hair preparation, Ban deodorant and other products. Household items include Windex window cleaner, Vanish bowl cleaner and Drano drain opener.

Summary

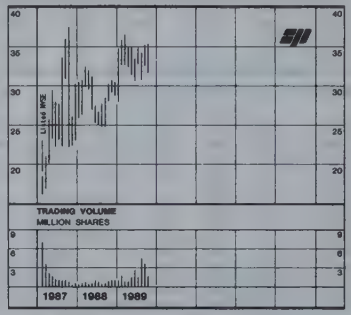
British Airways is one of the world's largest international airlines, with a route network reaching about 80 countries from London. BAB has agreed to invest $750 million in the proposed $6.8 billion buyout of UAL Corp., parent of United Airlines, with which it has had a joint marketing agreement since 1987. The association should provide long-term benefits in international markets. BAB acquired British Caledonian Airways in 1988.

Current Outlook

Earnings for the fiscal year to end March 31, 1990 are projected at $4.25 per ADR (£1 $1.60), compared with $4.11 for fiscal 1988-9 (£1 $1.69).

Dividends from fiscal 1989-0 earnings should be moderately larger than the year-earlier $1.47 (net of 15% U.K. tax).

Revenues for fiscal 1989-90 should rise at least moderately. Traffic growth in the summer months was restrained by a shortage of capacity, but a moderate pickup is likely later in the year as delayed aircraft deliveries are made. Average fare yield should be up somewhat, reflecting close management of discounts. Unit costs will increase under pressure of rising fuel costs and an increase in labor costs. Interest expense should be lower. Net income should be up about 10%.



Revenues (Billion $)

Period:	1989-90	1988-9	1987-8	1986-7
3 Mos. Jun.	1.82	1.74	1.44	---

12 Mos. Mar.		4.11	3.96	3.29

Important Developments

Sep. '89— The company entered into an agreement to participate, along with UAL management and employees, in the acquisition of UAL Corp. for $300 a share, or $6.8 billion. BAB would contribute $750 million, or 77.7% of the cash investment of $965 million, UAL employees $200 million, and management $15 million. BAB would receive 15% of voting power and a board seat. The company's investment would be in the form of three classes of preferred stock with an average return above the cost of funds. The Department of Transportation was reviewing the agreement and might request a reduction in the BAB participation. For financing BAB began a rights offering for £310 million of convertible capital bonds (not available to ADR holders).

Next earnings report expected in early November.

Business Summary

A Government-owned enterprise until early 1987, British Airways is one of the world's largest international airlines, operating flights to about 80 countries. It also operates an extensive domestic route network and through subsidiaries conducts charters and inclusive tours. During the fiscal year ended March 31, 1989 it carried 22,578,000 passengers in scheduled service. By geographical area, revenues and operating profits in fiscal 1988-9 were derived as follows:

	Revs.	Profits
Europe (incl. U.K.)	38%	5%
The Americas	32%	54%
Africa	8%	14%
Middle East, Far East, Australasia	22%	27%

As of March 31, 1989 the fleet consisted of seven Concordes, 40 747s, 17 L-1011s, eight DC-10-30s, 35 B-757s, four A320s, 49 B-737s, 34 BAC 1-11s, four BAe ATPs and 11 HS 748s. On order were 19 747-400s, 17 B-767-300s, three B-757s, 24 737s, six A320s and four ATPs for delivery from calendar 1989 through 1994. Also on order were three MD-11s, which are to be transferred to a new joint venture leasing operation in which the company is a participant. There are also options on a total of 58 aircraft.

Finances

Gross expenditures for aircraft during the 1989-90 fiscal year are estimated at approximately £950 million. Operating lease arrangements, however, are expected to account for about £800 million.

On February 11, 1987 the British Government sold 720,200,000 ordinary shares of British Airways at £1.25 per share. Of the total 583,262,177 were sold in the United Kingdom. In addition 6,225,653 American depositary receipts were sold in the U.S. (each ADR represented 10 ordinary shares). As of mid-August, 1989 there were approximately 11,200,000 ADRs outstanding.

Dividend Data

BAB expects to pay, in respect of each fiscal year, an interim dividend in January and a final dividend in July or August. Payments in the past 12 months:

Amt. of Divd. $	Date Decl.	Ex-divd. Date	Stock of Record	Payment Date

British Gas

NYSE Symbol BRG

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Jan. 9'90	1989-90					
38⅜	39¾-27⅝	11	[1]1.67	[1]4.4%	NR	NA

Summary

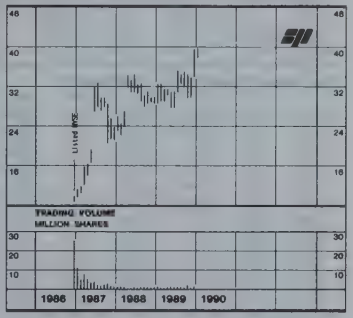
British Gas is the largest integrated gas supply company in the Western world, providing about 98% of the natural gas used in the United Kingdom. Other activities include natural gas exploration and production, and the sale, installation and servicing of gas appliances. In December, 1989 BRG agreed to increase its stake in the largest gas company in Spain.

Current Outlook

Earnings per ADS for the fiscal year ending March 31, 1990 are projected at $3.60, up slightly from fiscal 1988-9's $3.58.

Dividends from fiscal 1989-90 earnings are expected to exceed the $1.67 per ADS (after 15% British tax) paid from fiscal 1988-9 earnings.

Profits for fiscal 1989-90 from gas supply operations are expected to be slightly higher, assuming normal weather conditions and some customer additions; lower margins on sales to industrial and commercial customers are expected to restrict earnings growth. Nonutility operations should benefit from greater energy production and higher average energy prices, and increased sale of appliances. Earnings growth per ADS is expected to be hurt by unfavorable currrency translations.



Revenues (Billion $)

Period:	1989-90	1988-9	1987-8	1986-7
3 Mos. Jun.	---	---	---	2.39
6 Mos. Sep.	4.46	4.46	4.07	3.73
9 Mos. Dec.	---	---	---	---
12 Mos. Mar.	---	12.72	13.89	12.23

Sales (in pounds sterling) for the six months ended September 30, 1989 rose 4.4% from those of the preceding year, reflecting strength in exploration and production operations. Margins narrowed, and net income (historical cost basis) declined 91%, to £2 million from £22 million.

Important Developments

Jan. '90— BRG agreed to conduct joint exploration ventures with BHP Petroleum and Atlantic Richfield Co. in the Gulf of Mexico and the Gulf Coast region. In December, 1989 BRG agreed to purchase the 6.55% stake in Catalana de Gas (CG) held by Asland, a cement company, at a price of £48 million, bringing BRG's stake in CG to 7.75%; CG is the largest private gas company in Spain. Separately, the company said in October that it planned to construct a £50 research center in Loughborough, England.

Sep. '89— BRG and Amerada Hess jointly agreed to purchase Texas Eastern North Sea Inc. (TENSI) for a net purchase price of $673 million plus interest. Prior to the sale of certain holdings, TENSI had interests in 76 North Sea blocks in eight producing oil and gas fields.

Next semiannual report expected in June.

Business Summary

British Gas plc (a state-owned enterprise until 1986) is the largest integrated gas supplier in the Western world, supplying about 98% of the natural gas used in the United Kingdom. Other activities include natural gas exploration and production, and the sale, installation and servicing of gas appliances through a network of 724 showrooms. Sales and current cost operating profits in fiscal 1988-9 were derived as follows:

	Sales	Profits
Gas supply	86%	90%
Installation & contracting	5%	4%
Appliance trading	4%	2%
Exploration & other	5%	4%

In fiscal 1988-9 residential customers accounted for 55% of therms sold (67% of sales value), industrial customers 29% (18%), and commercial customers 16% (15%). Total gas sold through BRG's 152,500 mile transmission and distribution system in fiscal 1988-9 amounted to 18.0 billion therms, down from 18.7 billion therms in fiscal 1987-8. Customers served at fiscal 1988-9 year-end numbered over 17 million.

Appliances sold through showrooms are used for cooking, water and space heating; installation, contracting and essential services are provided.

In fiscal 1988-9 production from all properties totaled 115 Bcf of gas (133 Bcf in fiscal 1987-8) and 16.4 million barrels of oil (0.82). Proved reserves at March 31, 1989 amounted to 7,079 Bcf of natural gas and 156.9 million barrels of oil.

Dividend Data

Directors expect to recommend in respect of each fiscal year an interim and a final dividend normally payable around March of that year and October of the following fiscal year, respectively.

Amt. of Divd. $	Date Decl.	Ex-divd. Date	Stock of Record	Payment Date
0.52952*	---	Jan. 13	Jan. 20	Apr. 7'89
1.1407 *	---	Jul. 31	Aug. 4	Oct. 14'89

*Net aft. 15% British tax.

Finances

The company expects that its major cash needs, other than for acquisitions, will be met from presently available sources, including cash balances and cash flow.

On December 8, 1986 the British Government offered 3,968,085,389 ordinary shares of British Gas common stock at £1.35 each, effectively de-nationalizing Britain's natural gas industry. Of the shares, 166,636,500 (as represented by ADSs) were sold in the U.S.

Summary

British Petroleum is a leading integrated oil, gas and chemical enterprise. The company has a substantial presence in the North Sea following the 1988 acquisition of Britoil plc, and a preeminent position on the Alaskan North Slope after its 1987 acquisition of Standard Oil Co. The company is reorganizing its worldwide operations, including the divestiture of marginal properties and the streamlining of its management structure. BP will be emphasizing exploration and production in frontier areas of the world while it is expected to increase its refining capacity and expand its distribution market share.

Current Outlook

Earnings for 1990 are projected at $5.60 per ADS, compared with the $5.40 estimated for 1989, excluding special credits in both years.

Dividends from 1989 earnings should exceed the $3.28 (after 15% British tax) paid from 1988 earnings.

Revenues (in pound sterling) for 1990 are expected to benefit from greater natural gas volumes and increased gas prices. Refining margins should show modest gains while the contribution from the chemicals segment should increase. Volatile crude oil prices may reduce inventory holding gains.

[2]Net Sales (Billion $)

Period:	1989	1988	1987	1986
3 Mos. Mar.	11.59	12.25	11.13	12.55
6 Mos. Jun.	23.67	22.25	22.01	22.48
9 Mos. Sep.	35.80	35.03	33.81	29.89
12 Mos. Dec. ...		46.14	45.23	40.30

Revenues (£) for the nine months ended September 30, 1989 rose 10%, year to year, due to increased refining and marketing volumes. Benefiting from rising crude oil prices and a more favorable dollar exchange rate, net earnings (historical costs basis including inventory holding gains) rose 38%, to £1,296 million (before a £267 million special credit) from £938 million.

Important Developments

Oct. '89— BP agreed to sell its Australian coal properties to CRA Ltd. for gross proceeds of $275 million. The sale is expected to be closed in 1989's fourth quarter. The company has said that it intends to sell its entire coal operations. In September, 1989 BP signed an agreement with Oryx Energy (ORX) to sell ORX a package of worldwide exploration and production properties. The sale, expected to be completed in early 1990, was valued at $1.31 billion. The company will focus its exploration, in part, on high-risk, high-reward properties in frontier areas including Asia. The sale of the Australian coal properties and the oil and gas properties is part of BP's broader strategy to reorganize worldwide operations.

Next earnings report expected mid-February.

Business Summary

BP is one of the major international oil companies. In 1987 BP acquired the 45% of Standard Oil Co. that it did not already own. The profit for 1987 includes BP's interest of 55% of Standard Oil to May 13 and 100% thereafter. Some 40% of BP's fixed assets are in the U.S. In 1988, BP acquired Britoil plc which has given the company access to about 30% of the U.K. North Sea's acreage.

*Oper. Profits	1988	1987
U.K.	29%	27%
Other Europe	13%	11%
U.S.A.	45%	53%
Rest of World	13%	9%

*Replacement cost (before realized inventory holding gains or losses).

In 1988 BP's crude production averaged 1,550,000 barrels a day, natural gas sales 1,162 million cubic feet a day, refinery throughput 1,924,000 b/d, and refined product sales 2,576,000 b/d.

Net proved reserves at the end of 1988 stood at 5,224 million barrels of crude and 11,813 billion cubic feet of natural gas.

In 1989's first quarter, BP repurchased, as required by the British government, and later cancelled some 11.7% of the 21.6% ordinary shares which had been held by the State of Kuwait.

Dividend Data

Dividends have been paid since 1917. The company had paid an interim dividend in December and a final dividend in the following June. BP has begun payment of quarterly dividends.

Summary

BTY is the principal provider of telecommunications services and equipment in the United Kingdom. Earnings have risen steadily in recent years, reflecting primarily strong growth in demand for BTY's products and services. In June, 1989 the company acquired a 22% interest in McCaw Cellular Communications for some $1.37 billion.

Business Summary

British Telecom is the principal supplier of telecommunications services and equipment in the United Kingdom. Revenues and operating income (in million £) for fiscal 1988-9 were derived as follows:

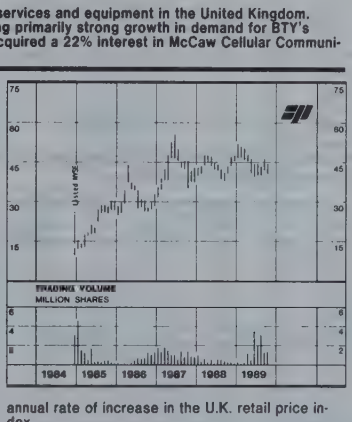
	Revenue	Oper. Inc.
UK Communications	72%	£2,101
International	17%	653
Communications Systems	11%	66
Other	---	-13

At March 31, 1989 British Telecom UK had a total of 23.9 million access lines in service, an increase of 4.8% from a year earlier. BTY rents, sells, installs and maintains telephone equipment in conjunction with local service.

In addition to local, long distance and international voice services, BTY provides specialized telecommunications services, including high speed data transmission, domestic and international telex, cable television, and a videotex service. The company also acts as the U.K.'s representative in the Intelsat, Eutelsat and Inmarsat international satellite organizations.

The Communications Systems division offers a portfolio of products, systems and applications for worldwide sales. In addition to the sale of business and consumer telephone equipment, operations include Yellow Pages and marketing services, national paging and voicemail services, a 60% interest in one of the two cellular mobile radio telephone networks licensed in the U.K., and a 22% interest in McCaw Cellular of the U.S.

BTY's earnings are not limited by regulation, as is the case for U.S. telephone companies. However, charges for line rentals and domestic calls (about 50% of total revenues) are subject to price regulation. Effective August 1, 1989 the weighted average increase in prices charged for these services must be at least 4.5 percentage points below the annual rate of increase in the U.K. retail price index.



Important Developments

Aug. '89— The company said that the modernization of its network was leading to improvements in the quality of its service and was encouraging business growth. Continued financial progress was expected during fiscal 1989-90 despite a less buoyant outlook for the U.K. domestic economy.

Jun. '89— BTY completed the acquisition of a 22% interest in McCaw Celular Communications Inc. for approximately $1.37 billion. BTY purchased 18.7 million newly-issued McCaw Cl. A common shares and 13.7 million newly issued McCaw Cl. B common shares at $42.35 per share (including interest). With 22% of the voting power of McCaw's stock, BTY also received the right to name four members of McCaw's board, which would be expanded to 19 members.

Next earnings report expected in mid-November.

Finances

In November, 1984 The British Government sold 3,012,000,000 BTY ordinary shares at £1.30 each through underwriters in the U.K., U.S., Canada and Japan, while retaining a 49.8% interest. In May, 1988 about 48,000,000 additional shares were issued, without further payment, to stockholders who held the shares since the initial public offering.

In May, 1988 BTY redeemed the remaining 250 million shares of 11.95% preference stock outstanding; 250 million preference shares had been called in December, 1987.

Dividend Data

BTY anticipated paying an interim dividend from each year's earnings around February and a final dividend around September of the following year.

Brooklyn Union Gas

NYSE Symbol BU

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Oct. 3'89	1989					
29	29⅜-23	10	1.78	6.1%	A	0.49

Summary

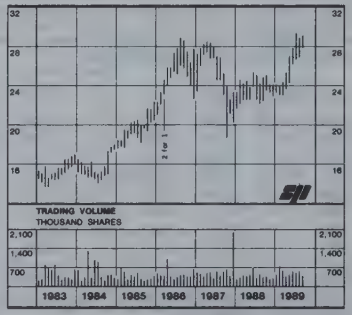
This company distributes natural gas in the New York City boroughs of Brooklyn, Staten Island and a large part of Queens. Reflecting many years of careful planning, BU's gas supply situation is adequate to supply both existing customers and new markets in the foreseeable future. Long-term utility earnings growth will be enhanced by the expansion of nonutility operations. Earnings for the first nine months of fiscal 1989 rose, reflecting an increase in gas sales and nonoperating income, and a lower tax rate.

Current Outlook

Share earnings for the fiscal year ending September 30, 1990 are projected at $2.70, up slightly from the $2.65 estimated for fiscal 1989.

The $0.44½ quarterly dividend is expected to be raised in December, 1989.

Utility profits for fiscal 1990 should rise slightly on a small increase in both the number of residential customers and the amount of gas sold to industrial customers. Nonutility operations should benefit from higher energy prices. Long-term prospects are enhanced by expansion of propane and cogeneration activities and an expected increase in gas usage for environmental reasons.



Operating Revenues (Million $)

Quarter:	1988-9	1987-8	1986-7	1985-6
Dec.	298	269	280	298
Mar.	366	348	360	405
Jun.	173	156	152	178
Sep.	---	126	133	126
	---	899	924	1,007

Operating revenues for the nine months ended June 30, 1989 rose 8.4%, year to year, reflecting higher gas sales volume. Higher nonoperating income and benefits from a lower tax rate more than offset higher interest charges, and net income advanced 18%. After preferred dividends, share earnings were $3.38, versus $2.93.

Important Developments

Jun. '89— BU reached an agreement with the New York Public Service Commission (NYPSC) under which BU would extend its current rates through September 1990 and the company would have an allowed rate of return of 12.5%, earnings in excess of the 12.5% return would have to be shared equally with BU's customers; the agreement was subject to regulatory approval. Separately, BU filed a request with the NYPSC for authorization to invest up to 25% of capitalization in unregulated energy-related businesses.

May '89— BU introduced in New York City a new specially designed natural gas taxi vehicle. Separately, BU issued $90 million of tax-exempt bonds; proceeds were to be used to finance utility construction through fiscal 1990.

Next earnings report expected in late October.

Business Summary

Brooklyn Union distributes natural gas in a territory of about 187 square miles in New York City, including the boroughs of Brooklyn, Staten Island, and part of Queens, with an estimated population of 4 million. Firm volume sales in fiscal 1988 totaled 109.6 Bcf, up from 104.1 Bcf a year earlier. Interruptible and other sales were 6.7 Bcf, versus 14.9 Bcf.

The company's five wholly-owned subsidiaries are Gas Energy Inc., which markets energy-related equipment; Star Enterprises Inc. holds an interest in Star Gas Inc. a propane distributor; Gas Energy Cogeneration Inc. is involved in a cogeneration venture; Fuel Resources Inc. stores and markets gas and through its subsidiary Brooklyn Union Exploration Co., Inc. is engaged in gas exploration and production activities; and through North East Transmission Co. holds an interest in the proposed Iroquois Gas Transmission System, a 370-mile pipeline which would deliver 400 MMcf of Canadian gas daily to the northeastern U.S.

Pipeline gas and underground storage are provided under long-term contracts primarily with Transcontinental Gas Pipe Line Corp., Texas Eastern Transmission Corp., Tennessee Gas Pipeline Co., Enron Gas Marketing, Inc. and Shell Oil Co. Gas purchased on the spot market accounted for 18% of total supplies in fiscal 1988. Other sources of supply include Canadian gas, BU's liquefied natural gas plant, and landfill gas.

Variations in revenues due to abnormal weather during the heating season are largely offset by a weather normalization adjustment in rates.

Dividend Data

Dividends have been paid since 1949. A dividend reinvestment plan is available.

Summary

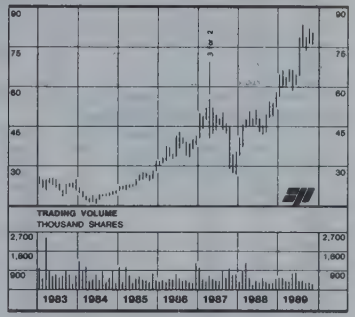
This leading distiller and importer of alcoholic beverages markets such major brands as Jack Daniel's, Canadian Mist, Early Times, Bolla and Southern Comfort. Following the writeoff of California Cooler assets, an improving product mix should aid earnings growth in the second half of 1989-90 and beyond.

Current Outlook

Earnings for the fiscal year ending April 30, 1991, are estimated at $6.10 a share, up from 1989-90's estimated $3.55, which includes a nonrecurring $2.14 charge, and a $0.41 one-time gain.

The quarterly dividend was raised 24% with the November 1989 declaration, to $0.52 a share.

Sales for 1990-91 are likely to continue in an uptrend, based on strong demand for alcoholic beverages worldwide and expansion of Lenox china product lines. Contributions from spirits should be improved by a strategic focus on higher-margin offerings and expansion abroad, while home furnishings profits should continue to benefit from growth in new, higher-margin products. Company-wide cost-cutting programs are also likely to help widen margins overall and allow earnings to advance some 15% from the 1989-90 level, excluding nonrecurring items.



[1]Net Sales (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Jul.	222	233	247	257
Oct.	317	303	309	310
Jan.	---	273	272	257
Apr.	---	196	238	274
	---	1,006	1,066	1,098

Sales for the six months ended October 31, 1989, rose 0.9%, year to year, as higher sales of spirits offset the discontinuance of California Cooler. Operations benefited from an improved product mix and modest price increases for spirits. However, after a $59.9 million writeoff of the company's remaining California Cooler investment, pretax income fell 29% and, after a higher tax rate and a gain from an accounting change, net income declined 44% (see Important Developments), to $1.30 a share, from $2.33.

Apr.	E0.95	0.76	0.63	0.73
	E3.55	5.15	3.25	2.78

Important Developments

Nov. '89— The company reported that net income for the six months ended October 31, 1989, included a $2.14 a share nonrecurring charge on the writeoff of remaining intangible California Cooler assets. The company also adopted FASB 96, which reduced deferred income tax liability and increased six month earnings by $0.41 a share. The wine and spirits segment was aided by continued growth for Jack Daniel's and Southern Comfort, and a turnaround in sales of Early Times. For consumer durables, sales rose 14% on rising demand for Lenox china.

Next earnings report expected in late February.

Business Summary

Brown-Forman Corp. (formerly Brown-Forman Distillers Corp.) is a leading producer and importer of alcoholic beverages. Operations also include Lenox china, crystal and glassware and Hartmann luggage. In 1988-9, sales and earnings were derived as follows:

	Sales	Profits
Wine and spirits	78%	79%
Consumer durables	22%	21%

The major American spirits produced are Jack Daniel's Black Label (sales of 3,975,000 nine-liter cases in 1988-9) and Early Times (1,490,000). Imported spirits include Canadian Mist (3,710,000). Major wine and specialty brands include Southern Comfort (2,445,000), Bolla (1,105,000), and Korbel Champagnes (1,205,000).

Consumer durables consist of Lenox china, crystal and giftware sold throug h retail outlets and five company-operated stores. This segment also now includes Hartmann Luggage. The ArtCarved Jewelry unit was sold in 1988.

Dividend Data

Cash on class A shares has been paid each year since 1945 and on class B since 1960. The classes share equally in all dividends. A dividend reinvestment plan is available.

Sep. 25'89	1989					
34⅛	35½-31⅜	24	1.60	4.7%	B+	0.95

Summary

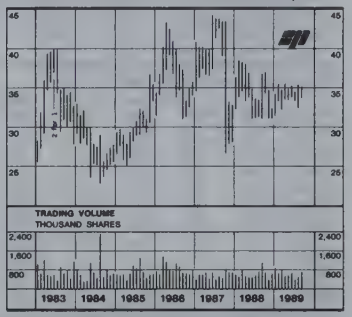
Brown Group, one of the largest manufacturers and retailers of branded footwear and a major fabric retailer, announced in February, 1989 a restructuring whereby BG would withdraw from its Meis, Linen Center, and Etage speciality retailing businesses; sell or close about 50 retail shoe stores; and discontinue its imported Jones and Budweiser shoe lines. Earnings declined in fiscal 1988-9 partially as a result of the restructuring, but profits should rebound in fiscal 1989-90 and fiscal 1990-1.

Current Outlook

Earnings for the fiscal year ending January 31, 1990 should rise to $2.30 a share from fiscal 1988-9's $1.74 from continuing operations. Earnings for fiscal 1990-1 could reach $2.60 a share.

The dividend should remain at $0.40 quarterly.

Sales for fiscal 1989-90 should increase moderately, reflecting strong footwear sales and international sales, as well as higher fabric sales. Benefits from increased footwear volume will be offset by weak shoe factory productivity, inventory clearances at Cloth World, and delayed shipments by Brown Shoe. Earnings comparisons will benefit from the absence of nonrecurring charges.



[1]Net Sales (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Apr.	437	396	392	340

Oct.	---	455	447	379
Jan.	---	463	449	375
	---	1,707	1,678	1,407

Sales from continuing operations for the six months ended July 29, 1989 advanced 9.6%, year to year, mainly reflecting strong footwear sales. Margins narrowed, and pretax income fell 33%. After taxes at 37.6%, versus 36.2%, net income was also down 34%, to $0.62 a share from $0.94. Results for the 1988-9 period are before a $0.24 a share loss from discontinued operations.

Jan.	E0.85	0.07	0.88	0.77
	E2.30	1.74	2.63	2.16

Important Developments

Sep. '89— BG attributed the sales rise in the seasonally slow second quarter to strong footwear sales, higher international sales, 3% higher sales at Wohl's, and a 6% increase in sales at Cloth World. However, earnings from continuing operations were hurt by late shipments by Brown Shoe Co. to its department store customers; by poor performance at Cloth World as inventory clearance continues; and by decreased shoe factory productivity due to lower production of private label shoes. BG said it was progressing with the divestiture plans announced February 10, 1989, and had sold the Meis Department stores and Etage division, and was continuing to seek a buyer for The Linen Center. BG said that early indications of fall business were encouraging, with the Naturalizer, Life Stride, and DeLiso brands selling well. BG also said it expected factory productivity to improve in the second half.

Next earnings report expected in late November.

Business Summary

BG operates in the footwear and specialty retailing segments. Contributions by business segment from continuing operations in fiscal 1988-9:

	Sales	Profits
Footwear	89%	99%
Specialty retailing	11%	1%

Through Brown Shoe Co., BG manufactures and sells a wide variety of women's, men's and children's dress, casual, sport and play shoes. Major women's brands include Connie, DeLiso, Fanfares, Footworks, Life Stride, and Naturalizer; men's brands include Levi's Shoes and Boots, Jean Pier Clemente, and Regal; and children's brands include Buster Brown, and Buster. The footwear is distributed to about 8,000 U.S. and Canadian retailers. Brown Shoe Co. also had arrangements with 1,327 regional chains and independent-owned stores to sell BG footwear, and 684 leased shoe departments.

Wohl Shoe Co. retails footwear and at the end of fiscal 1988-9 BG operated 1,798 footwear stores, including Naturalizer, Connie/Fanfares, Famous Footwear, Buster Brown, and Regal/Castleby.

Brown Group International is a supplier of imported footwear, with offices in Brazil, Italy, Taiwan, Korean, Hong Kong and Indonesia.

Specialty retailing includes 319 Cloth World stores.

Dividend Data

Dividends have been paid since 1923. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

Brown & Sharpe Mfg.

NYSE Symbol BNS In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Dec. 19'89	1989					
13⅜	18½-11¼	13	0.32	2.4%	B-	0.81

Summary

Brown & Sharpe makes precision measuring devices and machine tools for the auto, appliance, aerospace and equipment industries. After two consecutive years of losses, BNS returned to profitability in 1988, reflecting increased sales, improved margins and higher nonoperating income. Earnings for the first nine months of 1989 rose, reflecting higher shipments and wider margins. In October, directors authorized BSN to repurchase up to 300,000 Class A common shares from time to time in the open market or through private transactions.

Business Summary

Brown & Sharpe designs and manufactures measuring instruments and equipment, and machine tools. Segment contributions in 1988 (profits in million $):

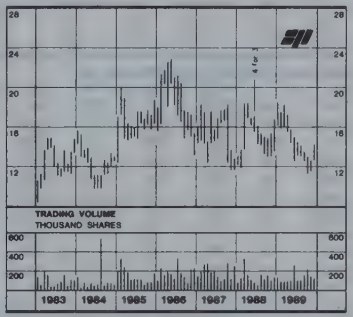
	Sales	Profits
Metrology	70%	$5.06
Machine tools	30%	-0.07

Foreign operations accounted for 54% of sales and 83% of operating profits in 1988.

Metrology products are precision measuring tools and instruments. They include small hand-held measuring tools such as micrometers and digital calipers; surface plate tools like the Digit-Hite Plus; special gauges such as the Tesa CQC 200, a multi-probe electronic fixture designed to simultaneously gauge many surfaces on a particular part; and large computer-controlled machines which measure quickly, automatically and accurately, like the Process Control Robot which is designed to operate in flexible manufacturing systems or transfer lines. These products are used by manufacturers worldwide to accurately measure, gauge and inspect parts to meet quality control and productivity objectives. The major markets for metrology products include manufacturers in the automobile and truck, off-the-road vehicle, aerospace and defense, machinery manufacturers, and casting oriented manufacturing industries.

Machine tool products consist of single-spindle automatic turning machines, surface grinding machines, profile grinding machines, and repair parts for these and other machine tools made by BNS. The major markets for these products include durable goods producers in the automotive, appliance, and industrial component industries, and subcontract machine shops which service these producers.

In 1984 BNS acquired a 10% interest in Applied Intelligent Systems, Inc., a computer image processing firm.



Important Developments

Oct. '89— BNS announced that directors had authorized the repurchase of up to 300,000 shares of its Class A common stock from time to time in the open market or in private transactions. BNS said that the shares purchased would be available for use in connection with the company's benefit plans or other corporate purposes.

Oct. '89— BNS reported share earnings of $0.10 on a 6.3% rise in sales for 1989's third quarter, versus a loss of $0.11 in the year-earlier period. BNS said that its improved operating earnings resulted from increased shipments and better margins. Orders received in the third quarter were $43 million, up 5% from 1988's third quarter, but down 16% from 1989's second quarter. Backlog totaled $42 million at September 30, 1989, equal to the backlog at July 1, 1989, and up from $32 million a year earlier.

Next earnings report expected in early February.

Browning-Ferris Industries

NYSE Symbol BFI Options on ASE (Mar-Jun-Sep-Dec) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Oct. 27'89	1989					
39⅜	42¾-26⅞	23	0.56	1.4%	A+	1.38

Summary

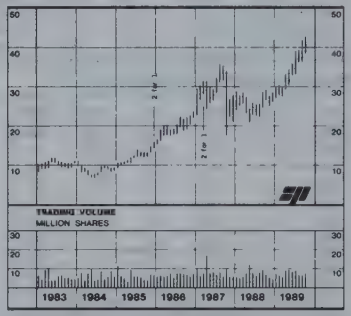
BFI is one of the largest providers of solid and liquid waste collection, processing, recovery and disposal services for commercial, industrial, governmental and residential customers. Its CECOS International unit collects and disposes of hazardous chemical wastes. The company is also involved in developing solid waste resource recovery facilities. BFI's long record of annual earnings and dividend increases is expected to continue for the foreseeable future.

Current Outlook

Earnings for the fiscal year ending September 30, 1990 may advance to $2.10 a share from the $1.75 estimated for fiscal 1989.

An increase in the $0.14 quarterly dividend is likely in December, 1989.

Revenues for fiscal 1990 are projected to advance over 20%, reflecting higher solid waste collection fees, greater landfill capacity, the continued acquisition of regional haulers, and new municipal contracts. The fast-growing medical waste disposal business will also aid revenue growth. Overall earnings will benefit from a greater profit contribution from the medical waste area and lower losses for the hazardous waste segment. The tax rate should be 38%. Long-term prospects appear favorable, based on an aggressive capital expenditures program, the strong growth seen for the solid waste collection industry, and the company's strong position in the industry as the nation's second largest trash hauler.



Revenues (Million $)

Quarter:	1988-9	1987-8	1986-7	1985-6
Dec.	583	479	375	316
Mar.	595	483	389	317
Jun.	661	542	426	337
Sep.	---	564	467	359
	---	2,067	1,657	[1]328

Revenues for the nine months ended June 30, 1989 rose 22%, year to year, reflecting strong growth for solid waste operations, which were aided by increases from the collection business, landfills and transfer stations. Margins narrowed slightly, as losses from chemical waste operations outweighed strong profit gains for the solid waste business. Following greater interest charges, pretax income was up 19%. After taxes at 38.0%, versus 37.0%, net income advanced 17%, to $1.26 a share from $1.08.

Common Share Earnings ($)

Jun.	0.47	0.41	0.31	0.27
Sep.	E0.49	0.43	0.33	0.28
	E1.75	1.51	1.15	0.95

Important Developments

Jul. '89— The company said it anticipated that operating losses in its chemical waste segment would continue into fiscal 1990, due primarily to the inability of the Williamsburg, Ohio, and Niagara Falls, N.Y., sites to accept waste, as the necessary Part B permits were either denied and under appeal or had been delayed. BFI noted that future profitability in this segment would be dependent upon successful permitting of these and certain other hazardous waste disposal sites.

Next earnings report expected in late November.

Business Summary

BFI collects, transports, processes and disposes of solid and chemical wastes for commercial, industrial, residential and governmental customers. It also develops solid waste resource recovery facilities. Revenues in recent fiscal years were:

	1988	1987
Solid waste:		
Comm'l./ind'l. collection	59%	62%
Residential collection	16%	17%
Processing & disposal	15%	13%
Special services	6%	3%
Chemical waste services	4%	5%

In fiscal 1988 foreign operations accounted for 6.9% of revenues and 7.1% of pretax income.

BFI's subsidiaries and affiliates collect solid waste in about 320 locations in the U.S. as well as in a number of foreign countries. Solid waste services involve the removal and disposal of unwanted paper, glass, metal and other matter. The company is also involved in resource recovery facilities, municipal and commercial sweeping operations, medical waste services, portable restroom services, asbestos abatement, recycling and public transportation.

CECOS International collects and disposes of various hazardous wastes. It operates treatment and disposal sites, deep well injection disposal systems and secure landfill disposal sites.

From time to time BFI may be the subject of investigations into alleged antitrust activities in the waste hauling industry and may face fines in connection with hazardous waste sites.

Dividend Data

Dividends have been paid since 1950. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1988.

Summary

This company is the world's largest manufacturer of recreational boats and a leading maker of marine engines. Its brands include Bayliner and Sea Ray boats, plus Mercury and Mariner outboard engines. BC also operates leisure-related and defense businesses; a variety of other businesses are expected to be sold. Earnings should recover somewhat in 1990 after a loss expected for 1989.

Current Outlook

Excluding possible asset sale gains, earnings for 1990 are estimated at $0.60 a share, versus a loss of $0.95 expected for 1989.

The dividend may remain at $0.11 quarterly.

Earnings in 1990 are expected to benefit from the absence of a sizable restructuring charge, lower expense related to amortization of goodwill, and recent efforts to cut costs and reduce inventory levels for marine products. Potential marine industry discounting is a concern, but efforts by BC to raise prices and a decline in aluminum prices could contribute to margin expansion. Long-term demographics are generally favorable to marine companies, but pleasure boats are a product in which purchases may be deferred if consumer spending becomes cautious.

Important Developments

Oct. '89— BC's 1989 third quarter included a pretax restructuring charge of $100.0 million. Most of the charge related to the company's marine business, and included asset writeoffs (principally intangibles) and estimated costs associated with consolidation and reorganization of operations. Also, BC said it had made cutbacks in marine product production, which helped to reduce dealer and BC inventory levels. Meanwhile, BC is planning to sell various businesses which had sales and operating profit in 1988 of about $180 million and $17 million (excluding asset writedowns), respectively. Net proceeds of about $150 million were expected from the sales, which would be used to reduce debt. After the asset sales, the company's remaining businesses would be marine products, recreation, and defense products.

Next earnings report expected in mid-February.

Business Summary

This company became the world's largest manufacturer of pleasure boats through the December, 1986 acquisitions of Bayliner Marine Corp. and Ray Industries. Subsequently, BC has acquired a number of other boat businesses. BC's operations also include outboard motors, defense, industrial and recreation products, and bowling centers. Segment contributions in 1988:

	Sales	Profits
Marine	75%	82%
Technical	14%	6%
Recreation	11%	12%

BC's important marine segment includes boat manufacturing and marine engines. BC's two boat divisions— U.S. Marine and Sea Ray— are the two largest boat builders in the world. Engine brands include Mercury and Mariner outboard motors and MerCruiser stern drive and inboard engines.

BC's technical segment includes a defense business which sells various products to the U.S. Government and major prime defense contractors. The technical segment includes various other businesses, most of which BC is expected to sell. The businesses to be sold include heating and air conditioning equipment used in transportation industries; valves, controls and pumps used in energy and process industries; and valves and controls for the aerospace industry.

BC's recreation segment includes the manufacture of bowling equipment, the ownership and operation of about 130 bowling centers, and the manufacture of fishing equipment.

Dividend Data

Dividends have been paid since 1969. A dividend reinvestment plan is available. A "poison pill" stock purchase rights plan was adopted in 1986, and amended in 1989.

Jan. 8'90	1989-90					
22½	30¼-20¼	12	0.68	3.0%	A-	1.23

Summary

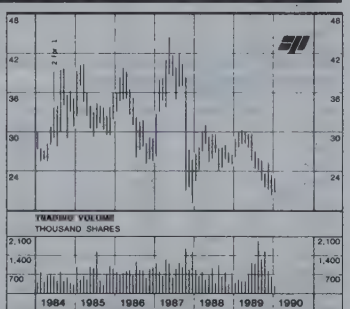
This company is a leading worldwide supplier of beryllium alloys and beryllia for the electrical/electronics industry and metallic beryllium for aerospace and defense applications. In December, 1989 BW announced a restructuring plan to reduce costs and streamline operations that would require a onetime charge of about $9.1 million ($0.56 a share) to net income in the fourth quarter of 1989.

Current Outlook

Earnings for 1990 are projected at $1.50 a share, up from 1989's estimated $1.05, which includes a $0.28 nonrecurring charge (net of gains).

Dividends should continue at $0.17 quarterly.

Sales for 1990 may decline modestly, as expected soft demand in electronics-related product lines in the first half will probably be counteracted by anticipated improved demand in the second half. Beryllium metal sales may decline slightly in the absence of sales to the U.S. Government's stockpile partially offset by a modest recovery in receipts from defense-related markets. As a result of efficiencies and lower costs related to the restructuring, earnings from operations should increase moderately.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	80.9	90.0	73.1	56.0
Jun.	83.6	89.5	75.7	64.5

Important Developments

Dec. '89— BW announced a restructuring whereby metal systems operations would be consolidated at the Lincoln, R.I. facility of its Technical Materials unit; the contour milling business of the Metals Engineering unit would be relocated to the R.I. plant; and remaining activities of Metals Engineering would be sold. BW also sought a partner or buyer for its clad metal systems operation in Japan. Directors approved issuance of up to $75 million of medium-term notes. The initial issuance planned for early 1990 would be used to retire some short-term debt. At October, 1989 BW had bought back over 2.7 million shares under a 3.9-million share repurchase authorization.

Jul. '89— BW reached a tax settlement, which increased second quarter net income by $0.17 a share. In March, 1989 BW completed the sale of Bucyrus Blades and Bucyrus Blades of Canada.

Next earnings report expected in late January.

Business Summary

Brush Wellman is the non-Communist world's only fully integrated producer of products containing beryllium, and also supplies specialty metal systems and precious metal products. International sales comprised 24% of total sales in 1988, compared with 1987's 26%.

Beryllium-containing products include beryllium alloys (principally beryllium copper) and metallic beryllium, which have high thermal and electrical conductivity, strength and hardness, excellent corrosion, wear and fatigue resistance, and good formability. Beryllium alloys are used in components such as connectors, switches, springs and relays in computers and in other electronic devices; and also by the automotive electronics, telecommunications and other consumer and industrial markets. Beryllium metal is the preferred material for many aerospace and defense components such as those used in guidance systems, satellite structures, optical platforms, mirrors and telescopes.

Materials Systems includes beryllia ceramic, metal systems and precious metal products. Beryllia ceramic is widely used with high density electronic circuits to dissipate heat. Specialty clad metals produced by Technical Materials, Inc. are used for the high-speed production of complex electronic and electrical components. Williams Advanced Materials (formerly Williams Gold Refining) makes precious metals products used in BW's metals systems and by the electronics industry as solder or braze material. In June, 1989 Williams changed its name to reflect its April purchase of Advanced Materials Technology for about $10 million cash.

Proved beryllium-bearing bertrandite reserves were 6,194,000 tons at year-end 1988, after processing of 95,000 tons of ore in 1988.

Dividend Data

Dividends have been paid since 1972. A dividend reinvestment plan is available. A "poison pill" stock purchase right was amended in 1989.

Summary

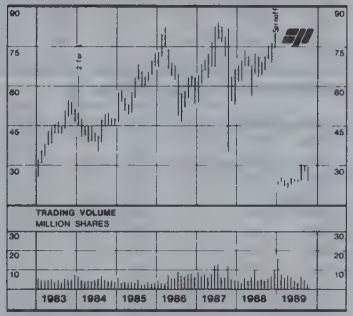
This western railroad spun off to shareholders at 1988 year-end its vast natural resource holdings through a tax-free distribution of its 87% stake in Burlington Resources Inc. Profit comparisons should improve only moderately in 1990 as the benefits from sharply higher grain traffic are largely offset by heavier depreciation charges and absence of the nonrecurring income realized in 1989.

Current Outlook

Profits for 1990 are estimated at $3.15 a share, versus the $3.00 anticipated for 1989.

Dividends at $0.30 quarterly are expected to be increased during 1990.

A sharp rebound for grain traffic is anticipated in 1990 after drought conditions cut volumes moved in 1989. No significant pick-up is expected for coal volumes or rates. While sluggish economic conditions will check growth for industrial freight, BNI should score solid gains for intermodal movements, reflecting strong demand for its "Expediter" service and new marketing arrangement with the Santa Fe. Flat rates, rising personal injury claims, and heavier depreciation charges will penalize margins. Also hurting earnings comparisons will be the absence of 1989's gain on the sale of Trailer Train stock.



Revenues (Million $)

Important Developments

Jun. '89— Pretax income in 1989's second quarter was penalized by an $11.3 million adjustment to reflect a miscalculation of fuel expense for prior years' joint coal movements.

Apr. '89— BNI sold half of its holdings in Trailer Train Co., a lessor of rail equipment, for $17 million, yielding a $14.9. million pretax gain.

Dec. '88— BNI completed the spin-off of its 87%-owned Burlington Resources Inc. unit to BNI shareholders. For each share of BNI held, shareholders received 1.7431 shares of BR. BNI, which sold 20 million BR common shares in July, 1988 for $25.50 each, said the decision to split the firm primarily reflected management's belief that the overall value for BNI's assets would be enhanced.

Next earnings report expected in mid-January.

Business Summary

Following the spin-off at 1988 year-end of BNI's natural resources operations, the company's sole activity is the operation of the Burlington Northern Railroad, a 25,504-mile system spanning 25 states and parts of Canada.

Contributions to rail revenues by traffic group in recent years:

	1988	1987	1986
Coal	33.0%	32.7%	35.3%
Grain	13.2%	12.0%	10.8%
Forest products	12.1%	12.9%	12.2%
Intermodal	9.8%	11.2%	9.9%
Food	7.3%	7.5%	7.7%
Chemicals	5.8%	5.5%	5.1%
All other	18.8%	18.2%	19.0%

BNI transported 144 million tons of coal in 1988, versus 130 million tons in 1987, of which 90% originates in the Powder River Basin field in Wyoming and Montana. Total ton-miles of freight transported in 1988 was 223.6 billion, compared with 206.3 billion in 1987.

BNI's equipment fleet at 1988 year-end consisted of 2,324 locomotives having an average age of 14.9 years and 56,766 freight cars averaging 16.8 years.

Virtually all of BNI's non-rail assets were transferred to Burlington Resources Inc. in 1988 and spun off to BNI shareholders at 1988 year-end. Among BR's operations are EL Paso Natural Gas, a 22,000-mile gas pipeline, oil and gas operations containing reserves of 84.4 million bbls. of oil and 2.8 trillion cubic feet of gas, 1.5 million acres of timberlands and 1.2 million acres of agricultural lands.

CBS Inc.

NYSE Symbol CBS Options on CBOE (Feb-May-Aug-Nov) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Oct. 23'89	1989					
200⅛	221-166	19	4.40	2.2%	B+	1.06

Summary

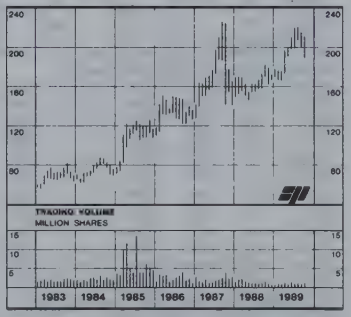
CBS operates one of the three major nationwide TV networks, has two radio networks, and owns five TV and 20 radio stations in major U.S. cities. A major restructuring was completed with the January, 1988 sale of CBS's records division; magazine and other publishing operations were sold earlier. Loews Corp. owns nearly 25% of the common stock.

Current Outlook

Earnings for 1990 are estimated at $11.80 a share, versus the $11.25 expected for 1989.

The $1.10 quarterly dividend is the minimum anticipated.

Higher earnings from CBS's television network may help earnings rise somewhat in 1990. Unless there is an acquisition(s), a sizable portion of profits will continue to come from interest income. The regulatory environment, including possible changes in current restrictions on CBS' ability to produce and have financial interests in shows that appear on its TV network, could influence both future acquisition activity by CBS and the company's appeal as a takeover target.



Net Sales[1] (Million $)

Quarter:	1989	1988	1987	1986
Mar.	731	697	730	1,167

	E11.25	11.02	5.21	7.54

Important Developments

Oct. '89— In the opening weeks of the new primetime network television season, CBS was the third-rated network, behind NBC and ABC. However, in the three weeks ended October 8, CBS's primetime shows were averaging 12.7% of TV households and 22% of the TV sets in use, up from 11.1% and 19%, respectively, in the year-earlier period, according to figures published in the trade newspaper "Variety." CBS said in mid-October that for the remainder of 1989 its TV network was expected to have improved results, aided by a robust advertising market and improved ratings. Also, at June 30, 1989 CBS had cash and marketable securities (net of liabilities to repurchase securities) totaling about $2.9 billion. In the first quarter of 1989 CBS acquired two radio stations and a Miami TV station.

Next earnings report expected in early February.

Business Summary

This major U.S. broadcaster completed a major reorganization with the January 1988 sale of its records division and the October 1987 sale of its magazines division. Current operations consist almost entirely of the CBS/Broadcast Group. The group includes five owned TV stations in New York (WCBS-TV), Chicago (WBBM-TV), Los Angeles (KCBS-TV), Miami (WCIX-TV), and Philadelphia (WCAU-TV), which collectively reach about 20.8% of U.S. households; eight owned AM and 12 FM radio stations in New York (WCBS-AM & FM), Chicago (WBBM-AM & FM), Dallas/Fort Worth (KTXQ-FM), Los Angeles (KNX-AM & FM), San Francisco (KCBS-AM & KRQR-FM), Philadelphia (WCAU-AM & WOGL-FM), Boston (WODS-FM), Houston (KLTR-FM), Washington, D.C. (WLTT-FM), St. Louis (KMOX-AM & KLOU-FM), Detroit (WWJ-AM & WJOI-FM) and Tampa/St. Petersburg (WSUN-AM & WYNF-FM).

The CBS Television Network division distributes programming to about 213 independently owned TV stations and five CBS-owned stations in the U.S., and to certain overseas and foreign affiliated stations. The CBS Radio division includes 20 owned and operated radio stations and serves as broadcast sales representative for the owned radio stations, plus a number of independently owned stations and networks. CBS also operates two radio networks which provide programming to more than 400 independently owned AM and FM radio stations in the U.S. Other CBS holdings include a 50% interest in a CBS/Fox home video business, and a 50% interest in a California film studio.

Dividend Data

Dividends have been paid since 1931. A dividend reinvestment plan is available.

Summary

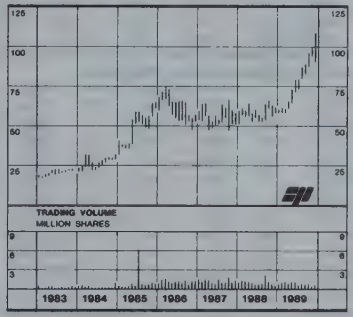
CNA Financial's principal interests are in the property-casualty and life insurance fields. Based on 1987 (latest available) premiums written, Continental Casualty Co. is the 11th largest p-c company in the U.S. While competitive industry conditions will likely slow premium growth and lead to underwriting losses, substantial realized investment gains and a favorable tax treatment will aid earnings growth. Loews Corp. owns about 82% of the stock.

Current Outlook

Net operating earnings (which exclude realized investment gains) for 1990 are expected to rise to $9.25 a share from the $8.25 anticipated for 1989. Both estimates assume a continued favorable tax treatment.

Common dividends are not likely to be resumed in the near future.

Earnings growth is expected to continue in coming periods, as gains in investment income and the realization of certain tax benefits will likely offset p-c underwriting losses caused by intense competition. A hefty book of specialty line business, where competition is less severe, and an expected firming in p-c pricing by mid-1990 should help. Moderately higher life insurance profits should partially offset the weaker p-c earnings. Net investment income will advance, reflecting a sizable increase in investable assets. A tax accounting change will also have a positive impact. Share buybacks will add per-share comparisons.



Review of Operations

Total revenues for the nine months ended September 30, 1989 rose 10%, year to year, primarily reflecting a 9.4% increase in premiums and an 18% gain in net investment income. Following a 13% rise in total benefits and expenses, pretax income fell 17%. After tax credits of $145.2 million, versus taxes of $96.2 million (19.4%), net income was up 39%. Share earnings were $8.88, versus $6.30, including realized investment gains of $2.25, versus $1.86.

Dec.		1.88	1.91	0.98
		6.32	6.50	4.02

Important Developments

Nov. '89— CNA's revenue growth for 1989's first nine months was offset by a greater rise in benefits and expenses, and pretax earnings declined. However, following a large tax credit arising from certain deferred tax benefits, net income advanced sharply. CNA also has a tax sharing agreement with Loews Corp. (LTR), under which CNA will be paid by LTR the amount, if any, by which LTR's consolidated Federal income tax is reduced by virtue of the consolidation of CNA onto LTR's tax return. Conversely, CNA must pay LTR the amount by which LTR's tax liability is increased by virtue of its ownership of CNA. Because of substantial investment gains incurred in 1989, CNA expects to pay taxes to Loews. A significant amount of deferred tax benefits, if recognized, would more than offset the tax liability to Loews.

Next earnings report expected early February.

Business Summary

CNA Financial is one of the largest multi-line insurers. The company's principal market for insurance is the U.S. Contributions to pretax operating income (in million $) in recent years were:

	1988	1987	1986
Comm'l. prop.-cas.	$458.1	$230.1	$20.6
Pers. prop.-cas.	-29.1	-8.0	-26.5
Other prop.-cas	-164.0	-130.5	-73.0
Individual life	12.8	10.7	19.5
Group life	71.3	18.5	35.1
Other & elim.	1.1	11.1	14.4

Property-casualty insurance operations are conducted through Continental Casualty Co. and its affiliates. Based on premiums written in 1987, Continental Casualty was ranked as the 11th largest property-casualty insurer in the U.S. Commercial premiums earned in 1988 totaled $4.36 billion, of which workers compensation accounted for 32%, general liability 23%, professional and specialty 19%, multi-peril 9%, reinsurance 11%, and accident and health and other 6%. Personal premiums amounted to $629 million. Private passenger auto accounted for 57%, personal property 33%, accident and health 9%, and other 1%. Products are marketed through independent agents and brokers.

Through Continental Assurance Co., CAF markets individual and group life and health insurance and annuities. Of $78.5 billion of life insurance in force at year-end 1988, individual life accounted for 80% and group 20%. Of $1.99 billion in total life premiums in 1988, group accident and health accounted for 73%, individual life 16%, group life 4%, group and individual annuities 6%, and individual accident and health 1%. Life insurance products are sold through licensed agents, most of whom are independent contractors who sell life insurance products for CNA and other companies on a commission basis.

CPC International

NYSE Symbol CPC Options on Pacific (Jan-Apr-Jul-Oct) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Oct. 26'89	1989					
66⅛	69⅜-49⅜	16	1.80	2.7%	A-	1.15

Summary

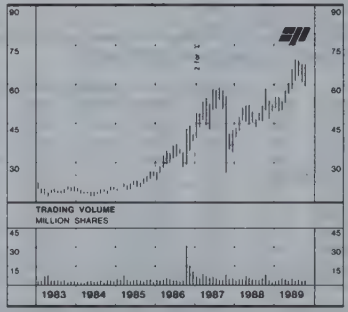
This major international food processor makes a broad line of branded grocery items, including Hellman's mayonnaise, Skippy peanut butter, and Knorr's dehydrated soups. In 1987 CPC completed a major restructuring, which included sale of the subpar European corn wet milling operations and Asian food interests and the repurchase of some 19% of its common shares. Expansion of now dominant grocery products businesses and recovery in domestic corn wet milling should fuel good growth in 1989 and 1990.

Current Outlook

Earnings for 1990 may rise to $4.90 a share, up 15% from the $4.25 estimated for 1989.

The quarterly dividend, which was raised 12.5% in July, 1989, should remain at $0.45.

Sales for 1990 should continue in a good uptrend, reflecting acquisitions and internal expansion of branded foods business abroad. Volumes in grocery products in the U.S. should see gains on product line extensions and continuation of aggressive marketing programs, while profit contributions improve on a better product mix as well as significantly lower ingredient costs. Corn wet milling operations should also benefit from price increases, when combined with lower commodity costs. Completion of a new Knorr's manufacturing plant in the U. S. should speed growth of the highly profitable dry soup business.



Net Sales (Million $)

Quarter:	1990	1989	1988	1987
Mar.	---	1,263	1,082	1,198
Jun.	---	1,255	1,226	1,317
Sep.	---	1,286	1,215	1,326
Dec.	---	---	1,176	1,061
	---	---	4,700	4,903

Sales for the nine months ended September 30, 1989 rose 8.0%, year to year. Although operating income for Latin American foods business fell 15%, gains in North American and European operations were offsetting. Combined with sharp gains in corn refining, pretax income rose 15%. The tax rate was virtually unchanged, and after lower minority interest, net income advanced 15%, to $3.05 a share from $2.62.

	E4.90	E4.25	3.68	4.34

Important Developments

Oct. '89— Operating income for the nine months ending September 30, 1989 from consumer foods worldwide rose 9.8% from a year earlier; volumes were 2.2% higher, due largely to a 9.8% increase in volume for European consumer products.

Next earnings report expected in late January.

Business Summary

CPC is a major worldwide producer of branded consumer foods and corn refinery products. In late 1987 it sold its European corn refining business and a 50% interest in its Far East foods operations. Contributions in 1988 were:

	Sales	Profits
Consumer foods	81%	80%
Corn refining	19%	20%

International operations represented 57% of sales and 57% of profits in 1988.

Consumer foods include Hellman's and Best mayonnaise, Mazola corn oil and margarine, Skippy peanut butter, Arnold breads, Thomas' english muffins, Mueller's pasta, Karo and Golden Griddle syrups, Niagra and Argo laundry starches, and Knorr soups, bouillons and sauces. Products sold in foreign markets also include Knorr soups, sauces, gravies, desserts and prepared meals; seasonings, condiments and spices; corn starch; quick energy products; cheeses and dairy products; mayonnaise, margarine and corn oil. The company also operates a foodservice distribution unit, Caterplan.

Corn wet milling operations produce sweeteners, starches, animal feeds and corn oil for industrial uses.

Dividend Data

Dividends have been paid since 1920. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

36⅜	38⅝-29¾	9	1.40	3.8%	B+	1.31

Summary

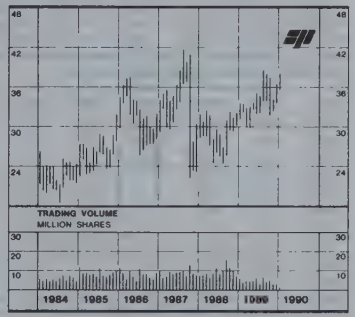
This diversified transportation firm has undertaken a major restructuring of operations. As part of the restructuring, CSX has repurchased 60 million common shares (39%) for $1.92 billion since late 1988. During 1989 CSX sold its resorts interests for $145 million, its gas pipeline unit for $577 million and a 50% stake in a telecommunications network for $183 million. While operating profits should improve moderately in 1990, earnings comparisons will be hurt by the absence of 1989's gains from asset sales.

Current Outlook

Earnings for 1990 are estimated at $4.00 a share, versus the $4.09 reported for 1989.

Dividends were lifted 13%, to $0.35 quarterly from $0.31, with the December, 1989 payment.

While rail traffic in 1990 will mirror the sluggish industrial sector, profits should recover, as costs related to the 1989 coal miners' strike and Hurricane Hugo are avoided and labor and equipment repair expenses are cut. A source of concern is fuel costs, which have risen sharply in early 1990. Further solid gains are anticipated for Sea-Land, reflecting a rebound for trans-Atlantic rates, continued good growth for westbound trans-Pacific and intra-Asian cargo and cost reduction measures. Firmer rates and growth for coal traffic should lift barge profits. While interest expense will decline, earnings comparisons will be penalized by the absence of 1989's gains from the sale of assets.



Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	1,844	1,743	1,893	1,689
Jun.	1,974	1,907	2,010	1,599

Important Developments

Dec. '89— CSX reached an agreement with the United Transportation Union providing for the operation of reduced train crews over CSX's Chesapeake & Ohio lines. The agreement brings to 70% the area of CSX's rail system operating with reduced crews.

Nov. '89— CSX completed its 60 million common share buyback program (39% of its shares outstanding) for $1.92 billion ($32.03 a share). CSX bought 43.1 million of the shares for $32 each through a "Dutch Auction" self-tender in October, 1988, with the balance acquired through open-market transactions. The program was funded through a sweeping restructuring program that has included the sale of CSX's resorts unit in July, 1989 for $145 million; its 50% stake in a telecommunications network in April for $183 million; and various energy properties for $1.2 billion.

Next earnings report expected in early April.

Business Summary

Contributions from continuing operations to CSX operating profits (in million $) by business segment in recent years:

	1988	1987	1986
Transportation	$12	$683	$620
Properties	173	101	159
Technology	-10	12	11

CSX operates a 19,800 mile rail network spanning 19 states and the Province of Ontario. CSX originated 174 million tons of coal 1988, generating 32% of rail revenues and accounting for 18% of U.S. coal production. In 1988 shipments of chemicals, forest products and intermodal cargo accounted for another 30% of rail revenues. Sea-Land Corp., the largest U.S.-flag containership operator, transported 874,000 container loads worldwide in 1988. American Commercial Lines, the nation's largest barge operator, derives 61% of its revenues from transporting coal and grain.

CSX Realty is active in the development of commercial, industrial and residential properties nationwide. CSX also operates the 700-room Greenbrier resort in West Virginia. In July, 1989 CSX sold its Rockresorts group, which primarily operates resorts in the U.S. Virgin Islands, for $145 million. The technology group consists primarily of LIGHTNET, a 4,500 mile fiber optic telecommunications venture with Southern New England Telecommunications which was sold in April, 1989.

In April, 1989 CSX sold its Texas Gas Transmission unit to Transco Energy Co., for $577 million. Texas Gas operates a 6,000-mile pipeline system spanning eight southern and midwestern states. In 1988 CSX sold its oil and gas operations for $612 million.

Dividend Data

A new "poison pill" stock purchase right was adopted in 1988.

Summary

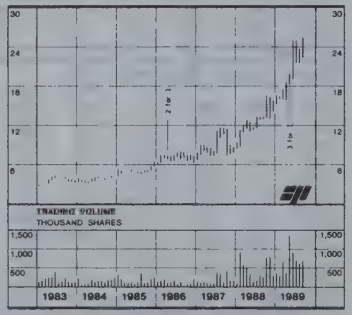
Originally formed as the holding company for Commonwealth Telephone Co. of Pennsylvania, C-TEC has diversified its operations to include information services, consulting, CATV and mobile services. In August 1989, the company acquired the Michigan cable television operations of Centel Cable Television Co. for $204 million, substantially increasing its subscriber base; cash dividends were suspended because of the financing needed to complete the acquisition.

Business Summary

C-TEC Corporation (formerly Commonwealth Telephone Enterprises, Inc.) was formed in 1979 as the holding company for Commonwealth Telephone Co., which provides telephone service in eastern Pennsylvania. The company also has cable television and communications operations.

Contributions in 1988 (profits in 000s) were:

	Revs.	Profits
Telephone	74%	$27,091
Cable television	15%	2,953
Communications services	7%	-977
Mobile services	3%	-1,793
Information services	1%	-4,681



Commonwealth supplies local exchange telephone service in 20 eastern Pennsylvania counties, with the vast majority of its more-than-165,000 customers served by single-party lines. The company is replacing electromechanical switching equipment with advanced digital technology, aiming to be fully digital by 1994. In 1988, Commonwealth spent more than $26 million to modernize its local exchange networks and, by year-end, 69% of all access lines were served digitally.

The company's state-of-the-art cable television network has grown rapidly following the 1986 acquisition of a controlling interest in Home Link Communications (Princeton, N.J.) and the acquisition in 1987's second quarter of a cable television facility in northeast Pennsylvania. At the end of 1988, cable television service was being provided to nearly 55,000 subscribers, up 10% from the year-earlier total.

The communications group provides information services, communications services and engineering and management consulting to clients throughout the U.S.; it also offers mobile services such as radio paging, voice mail and cellular mobile telephone service.

Important Developments

Sep. '89— The company offered to repurchase, until October 17, 1989, Class B common stock from shareholders (of record September 11) owning fewer than 100 shares.

Aug. '89— The company bought Centel Cable Television Co.'s Michigan cable television operations for about $204 million. The acquisition added approximately 108,800 customers. The company had suspended cash dividend payments on its common stock following the May 1989 payment, because of the need for significant financing required to complete the acquisition. In July 1989, the company said that it had agreed to purchase additional cable properties in Michigan for approximately $9 million.

Next earnings report expected in late October.

Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	36.40	34.64	33.19	28.03
Jun.	38.14	34.83	32.98	29.05
Sep.		36.40	33.79	32.08
Dec.		37.13	33.81	31.57
		142.99	133.77	120.73

Total revenues for the six months ended June 30, 1989, rose 7.5%, year to year, primarily reflecting increases in the telephone, cable and mobile services groups. Results were adversely affected by the absence of gross receipts tax refunds of $975,000 (net) recorded in 1988 and expenses associated with the company's stock option and stock appreciation rights plan. After taxes, these expenses reduced income by $841,000 ($0.05 a share). Net income declined 9.6%, to $6,490,000 ($0.39 a share), from $7,180,000 ($0.43, as adjusted).

Oct. 17'89	1989					
24	25⅝-22¼	NM	0.75	3.1%	B-	0.59

Summary

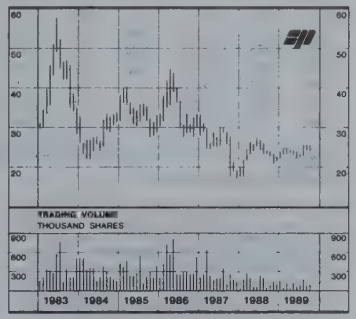
CTS Corp. produces a broad line of custom electronic components and subsystems for original equipment manufacturers in the electronic systems business. After a small loss incurred in 1988 due to a nonrecurring charge, substantial earnings are expected to be reported in 1989 despite a slowing of industry growth. However, a projected slowing of demand from the automotive industry in particular and only minimal growth in the electronics industry generally is likely to result in lower earnings in 1990. Dynamics Corp. of America owns about 30% of the stock. The dividend was recently raised 50%.

Current Outlook

Earnings for 1990 should decline to $2.40 a share from the $2.60 projected for 1989.

The dividend was raised 50%, to $0.18¾ quarterly from $0.12½, with the August, 1989 declaration.

Sales for 1990 are expected to decline somewhat due to lower sales to the automotive industry (25% of sales in 1988) in particular and only minimal growth in the electronics industry generally. The company's aggressive new product introduction program will be partially offsetting. Despite productivity improvements and aggressive cost reductions, margins are likely to narrow on the lower volume. Longer-term prospects are enhanced by new management and the company's increased product engineering and sales efforts.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	67.9	72.2	62.4	59.7
Jun.	70.7	71.4	65.1	58.3
Sep.	---	66.8	62.8	62.0
Dec.	---	65.1	70.8	65.5
	---	275.6	261.1	245.5

Sales for the six months ended July 2, 1989 declined 3.5%, year to year. Operating margins narrowed on the lower volume, and operating profit declined 13%. However, with net interest expense significantly lower and higher other income, pretax income was down only 2.2%. After taxes at 19.4%, versus 19.6%, net income decreased 2.3%, to $1.41 a share from $1.35. Results exclude a special charge of $0.11 in the 1988 interim.

Dec.	E0.63	d2.24	0.59	d4.29
	E2.60	d0.39	1.85	d4.71

Important Developments

Jul. '89— CTS said that the decrease in second quarter sales from a year earlier was primarily the result of the absence of a onetime order received in the second quarter of 1988, lower sales of hybrid microcircuits and resistor networks, and the sale of its modem business.

Next earnings report expected in late October.

Business Summary

CTS Corp. designs, manufactures and sells electronic components and subsystems for custom requirements of original equipment manufacturers in the electronic systems business.

Products sales classified by leading product categories in recent years as follows:

	1988	1987
Automotive control devices..	22%	16%
Resistor networks.....	20%	20%
Electronic connectors..... ...	13%	12%
Frequency control devices...	12%	13%
Variable resistors.....	10%	11%

Other products include hybrid microcircuits, programmable switches, selector switches, modems, loudspeakers, backpanels, memory subsytems and industrial electronics.

Sales are made to the following industries: automotive (25% of sales in 1988), data processing (22%), communications (17%), military (16%), instruments and equipment (10%), distributor (6%), consumer (3%) and nonelectronic (1%).

Foreign operations accounted for 19% of sales and 84% of operating profit in 1988.

Summary

Following a two-year restructuring program, this major British food company is now engaged mainly in the manufacture and marketing of confectionery and soft drinks worldwide. During 1988, Cadbury completed an agreement to franchise its U.S. confectionery business to Hershey Foods Corp. for $270 million in cash and $30 million of debt. In 1989 it acquired Crush Int'l (soft drinks) for some $220 million.

Business Summary

Cadbury Schweppes plc is the holding company for a group of international firms engaged primarily in the manufacture and sale of confectionery and soft drinks, sold through wholesale and retail outlets of the confectionery, licensed, catering and grocery trades in more than 100 countries.

Sales and profit contributions by industry segment in 1988 were:

	Sales	Profits
Confectionery	43%	52%
Beverages	57%	48%

The sales and profit breakdown by geographic area for 1988 was:

	Sales	Profits
United Kingdom	44%	46%
Europe	17%	19%
North America	16%	9%
Rest of world	23%	26%

A broad range of chocolate and other confectionery items is produced and marketed internationally in the form of bars in various sizes and weights, bagged products, assortments and chocolate eggs. In August 1988, Cadbury franchised its U.S. confectionary business (1987 sales of $270 million) to Hershey Foods Corp. for $270 million cassh, assumption of $30 million in debt and license fees

Cadbury produces a wide range of soft drinks, sold in cans, glass bottles, plastic containers and, recently, aseptic packages. These products include the Schweppes and Canada Dry lines of carbonated and fruit-flavored beverages; Malvern Water (carbonated and still); Mott's Apple Juice and Apple Sauce; Rose's Lime Juice; nonalcoholic mixers and ingredients from Rose Holland House; Clamato juice; Grandma's Molasses; and a wide variety of other carbonated drinks, squashes and fruit juices developed for specific markets.

The most significant beverage and food business is that in Australia, which consists mainly of Cottee's General Foods Limited, engaged mainly in the processing and sale of coffee, fruit juices, cordials and jams.

Important Developments

Oct. '89— The company completed the acquisition of Procter & Gamble's Crush Int'l. (profits of $9 million on revenues of $71 million from soft drinks) for approximately $220 million. The acquisition was expected to raise Cadbury's beverage sales by 30%. Acquisition of Trebor (a leading U.K. sugar confectionary company with annual sales of £117.8 million) for £110.3 million is pending. Other significant European confectionary acquisitions in 1989 included Chocolat Poulain SA, Lion Confectionary Co. Ltd. and Bassett Foods.

Next earnings report expected in May.

Review of Operations

Sales for the 26 weeks ended June 17, 1989 rose 11%, year to year, led by advances of 21% for European markets and 18% for U.K. operations, which reflected in part the acquisition of Bassett Foods in March. Margins continued to widen on an improved product mix and higher volume. Trading profits were up 8.7% in the U.K., reflecting a 60% increase for Coca-Cola and Schweppes beverages; 17% in Europe; 43% in North America, also on improved soft drink operations; and 13% in Australasia and other countries. Overall, trading profits advanced 14%. Combined with an 18% decrease in net interest expense, profits before taxation moved ahead 16%. After taxes at 29.9% versus 26.1% and sharply lower contributions from minority interest, net income rose 16% to £61.9 million from £53.5 million. Results for 1988 excluded £29.8 million from a special onetime credit for a change in accounting for advance corporation tax. On 6.2% more shares, earnings per share rose 19% to $6.34 from $5.31, as converted at the June 17 exchange rate of £1 = $1.54, before special credits of $0.51 in 1988.

Finances

Cadbury's strategy in recent years has been to concentrate on high-volume products with the potential for sales worldwide, while at the same time improving productivity by consolidating and automating its production facilities. This has involved the restructuring and closing of a large number of facilities, resulting in extraordinary charges against net income of £3.5 million in 1986, £8.2 million in 1985 and £7.4 million in 1984.

In line with the strategy of concentrating on the core international businesses, a health and hygiene business, which operated only in the United Kingdom, was sold at the end of 1985, and the beverage and foods businesses in the United Kingdom, Ireland and France were sold in May 1986. In July 1986, Cadbury purchased the Canada Dry worldwide soft drinks business from RJR Nabisco Inc. This included certain rights to the Sunkist brand for carbonated soft drinks sold under that name in the U.S. Under a separate agreement, the Canada Dry bottling business in Canada was sold to Coca-Cola Co. in December 1986; the net consideration paid for the businesses retained was U.S. $140 million.

In August 1986 and January 1987, Cadbury acquired convertible preference shares in Dr Pepper Co. for U.S. $20.4 million. The restructuring of Dr Pepper and Seven-up Co. in 1988 led to a cash receipt by Cadbury of $90 million, and Cadbury retains an 8% interest in the new merged company.

Summary

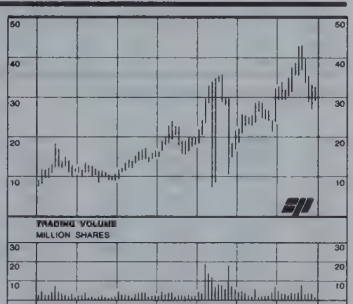
This major gaming company has three casino/hotels in Nevada and Atlantic City and four resort hotels in the Pocono Mountains. CAW is making a sizable investment in its Caesars Palace facility in Las Vegas, including a casino expansion which recently opened. However, in fiscal 1990 CAW is expected to be facing major, new competition in Las Vegas and Atlantic City.

Current Outlook

Earnings for the fiscal year ending July 31, 1990 are estimated at $2.65 a share, versus fiscal 1989's $2.72.

Payment of a cash dividend is not expected.

In fiscal 1990 CAW will face new competition from the expected opening of two new major casino/hotels in Las Vegas and one large new facility in Atlantic City. Capital investments, particularly at Caesars Palace in Las Vegas, are expected to help CAW face new and expanded competing facilities. Also, the recent purchase of substantially all of CAW's leased property in Atlantic City is expected to help profitability in fiscal 1990.



Total Revenues (Million $)

Important Developments

Nov. '89— A major new competitor, Golden Nugget's Mirage casino/hotel, opened near Caesars Palace on the Las Vegas Strip. In September the company had opened a 40,000-sq.-ft. casino expansion at Caesars Palace, increasing the casino's size to about 115,000 sq. ft. In addition, Caesars Palace is moving toward a greater emphasis on suites, and groundbreaking for a new shopping complex near the gaming facility is expected to occur in February, 1990. Another large new gaming facility, Circus Circus Enterprises' Excalibur, is expected to open in Las Vegas in 1990. In Atlantic City, competition is coming from Donald Trump's Taj Mahal, which is also expected to open in 1990. To increase its revenue from slot machines, CAW is building a new transportation center in Atlantic City.

Next earnings report expected in late February.

Business Summary

Caesars World operates two casino/hotels in Nevada and a casino/hotel in Atlantic City, N.J. In recent years CAW has had the leading casino, in terms of gaming revenues, in both Las Vegas and Atlantic City. CAW's non-casino interests include four resorts in Pennsylvania's Pocono Mountains. Business segment contributions in fiscal 1989:

	Revs.	Profits
Nevada casino/hotels	55%	67%
Caesars New Jersey	38%	39%
Pocono Resorts	5%	8%
Other, incl. corp. exp.	2%	-15%

Caesars Palace in Las Vegas has been the leading revenue-producing casino in Nevada. In September 1989, a 40,000-sq.-ft. expansion increased the casino's size to about 115,000 sq. ft. Also, was planning to create 75 new suites, which would reduce the total number of rooms and suites to 1,505. Caesars Palace also includes a showroom, a theatre, restaurants, bars, shops, meeting rooms, and athletic facilities. A shopping complex near the facility is planned. In fiscal 1989 Caesars Palace average hotel occupancy rate was 86.4%, with about 30.7% of the available rooms going to people who received complimentary lodging.

Caesars Tahoe has about 440 rooms and suites, and a 48,000-sq.-ft. casino, a showroom, convention space, and recreation facilities.

Caesars Atlantic City, which is operated by 86.6%-owned Caesars New Jersey, has 644 rooms and suites, a 60,000-sq.-ft. casino, a 1,000-seat showroom, shops, and other recreational facilities. The casino is among the leaders in gaming revenues in the 11-casino Atlantic City market.

CAW's four resort hotels in the Pocono Mountains are Cove Haven, Paradise Stream, Pocono Palace and Caesars Brookdale.

Dividend Data

No cash dividends have been paid since 1962. A "poison pill" stock purchase right was adopted in 1989.

Finances

In October, 1987 CAW purchased 11 million of its common shares for $327,245,000, including fees and expenses. In fiscal 1987's fourth quarter CAW issued 4.9 million common shares upon conversion (at $22.97 a share) of 6⅞% debentures.

Capitalization

Long Term Debt: $415,389,000 including $21,304,000 of capitalized leases (7/89).

Minority Interest: $25,112,000.

Common Stock: 24,847,300 shs. ($0.10 par). Institutions hold about 76%.
Shareholders of record: About 8,400.

Summary

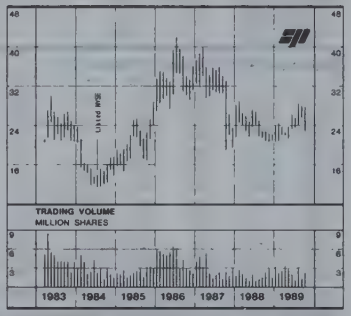
This holding company is the parent of California Federal Bank, FSB, the nation's fourth largest savings and loan based on assets of $26 billion at September 30, 1989. Other businesses include real estate and life insurance operations. CAL has substantially reduced its sensitivity to interest rate movements in recent years by emphasizing adjustable rate mortgages. A slight improvement in earnings is expected for 1990, resulting from a wider interest rate spread.

Current Outlook

Earnings for 1990 are estimated at $3.10 a share, up from the $3.00 likely for 1989.

Dividends at $0.35 quarterly are the minimum expectation.

Mortgage origination volume for 1990 is expected to be flat to moderately higher, primarily due to increased competition to issue ARMs in a rate environment in which consumers have historically expressed a preference for fixed rate products. Spreads should widen dramatically with projected lower interest rates because CAL funds itself with a greater proportion of short-term deposits than does the typical thrift. Credit quality has been good, but could weaken with a drop in home sales. General and administrative expenses should increase. A large balance of goodwill on the company's balance sheet is a permanent drag on earnings since goodwill is a nonearning asset the company must incur interest expense to fund.



Review of Operations

Net interest income for the nine months ended September 30, 1989 fell 8.2%, year to year, reflecting narrower interest rate spreads. The provision for loan losses decreased 9.0%, to $41.5 million, aided by the continued appreciation of home prices in California. Noninterest income rose 20%, helped by sharply higher insurance premiums and policyholder fees earned. Noninterest expenses were up 19%. Pretax income declined 45%. After taxes at 35.5%, versus 30.4%, net income fell 49%. Earnings per share were equal to $2.34 ($2.23 fully diluted), versus $4.59 ($4.20).

Important Developments

Oct. '89— Reflecting the company's renewed emphasis on funding itself with retail deposits and the upward adjustment in the cost of funds index, CAL's interest rate spread widened to 2.05% at September 30, 1989, an increase of 51 basis points from the 1.54% reported at June 30, 1989.

Oct. '89— During the third quarter of 1989, CalFed took a number of actions to sharply reduce its direct investment in real estate, including the planned sale of interests in 28 properties and 80% of its interest in the general partner of a real estate management firm, the sale of a 50% stake in a Los Angeles office complex, and the replacement of CAL's own development unit with an independent outside firm to complete several residential projects.

Next earnings report expected in mid-February.

Business Summary

This holding company is the parent of California Federal Bank, FSB, the nation's fourth largest savings and loan based on assets of $27.5 billion at December 31, 1988. The company operates some 187 offices in California, Florida, Georgia, Arizona, and Nevada. CAL is also involved in annuity, life insurance, and real estate development operations. Mortgage banking activities were discontinued in 1988.

Of net loans of $20.6 billion outstanding at year-end 1988, 82% were adjustable rate loans and 18% long-term fixed rate. The one-year gap (excess of liabilities maturing in one year over assets maturing in one year) was 7.5% at 1988 year-end. Nonperforming assets represented 1.31% of total assets at 1988 year-end, down from 1.35% a year ago.

Of total deposits of $17.31 billion at year-end 1988 (excluding brokered deposits of $1.6 billion), 5% were passbook, 14% money market and NOW accounts, 37% certificate accounts paying 6% to 7.99%, 43% certificate accounts paying 8% to 9.99%, and 1% other.

Beneficial Standard Life Insurance Co. sells tax-deferred annuity products and single premium life insurance products.

Dividend Data

Common dividends were initiated in mid-1984. A "poison pill" stock purchase right was adopted in 1988.

Campbell Soup

NYSE Symbol CPB Options on NYSE (Feb-May-Aug-Nov) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 20'89	1989					
47⅞	60⅝-30½	NM	1.00	2.1%	A-	0.96

Summary

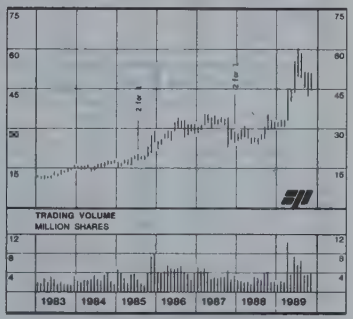
Campbell is the largest producer of canned soups and a leading factor in convenience foods with such lines as Swanson frozen prepared dinners, Prego Spaghetti sauce, and Pepperidge Farm bakery products. A $202 million onetime charge to consolidate and cut back excess capacity hurt fiscal 1989 earnings, but should cut some $150 million in costs through 1993. Price increases, aggressive marketing, and cost savings should fuel good earnings growth in fiscal 1990.

Current Outlook

Earnings for the fiscal year ending July 31, 1990 are expected to advance to $2.65 a share from fiscal 1989's $0.10, which included $2.02 in one-time charges to restructure operations.

The quarterly dividend has been raised 8.7%, to $0.25 from $0.23, with the payment in January, 1990.

Sales for fiscal 1990 should continue to rise, supported by strength in soups, frozen breakfast and dinner entrees, and expanding foodservice business. Higher ingredient costs and aggressive marketing programs, particularly for soups and product line extensions, may restrain margins, but plant closings and other cost-saving programs are expected to be somewhat offsetting. Currency translations will continue to be an important factor in earnings progress.



Net Sales (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Oct.	1,524	1,333	1,179	1,115
Jan.	---	1,582	1,336	1,249
Apr.	---	1,455	1,207	1,128
Jul.	---	1,302	1,146	999
	---	5,672	4,869	4,490

Sales for the three months ended October 29, 1989 rose 14%, year to year. Higher volume in soups, pasta, V8 juice, Prego spaghetti sauce, Le Menu frozen meals, and food service products, along with selective price increases, helped widen margins. Operating earnings were up 23%. Following a favorable swing in unallocated corporate expenses and sharply higher interest costs, pretax earnings gained 24%. After taxes at 41.4%, against 39.1%, net income advanced 20%. Earnings were equal to $0.64 a share, compared with $0.54 in the first quarter of fiscal 1989.

Business Summary

Campbell Soup is the largest U.S. manufacturer of condensed and ready-to-serve soups, vegetable and tomato juices, pickles, and frozen prepared seafood and frozen dinners. Other major products include canned beans, canned pasta products, spaghetti sauces, frozen meat pies, frozen prepared chicken, bakery products and frozen sweet goods.

The Campbell U.S.A. division (58% of sales and 71% of operating earnings before nonrecurring charges in fiscal 1989) includes such products as Campbell 's soups, beans and juices; Franco-American canned spaghetti; Prego spaghetti sauce; Swanson frozen dinners and entrees; V-8 vegetable juice, Vlasic pickles and Mrs. Paul's frozen seafood products.

The Pepperidge Farm division (10% and 11%) produces bread, cakes and related products. Campbell Enterprises (6% and 5%) includes foodservice distribution business and Godiva chocolates. Campbell International (26% and 13%) consists of Campbell Soup Co. of Canada, Campbell Europe Food and Confectionary and Campbell's Australian operations.

Products are distributed to chain stores, wholesalers, and distributors servicing institutional and industrial customers, convenience and club stores and government agencies.

In September, 1987 members of the Dorrance family formed a 34.4-million-share voting trust.

Summary

Canadian Imperial Bank of Commerce (CIBC), one of North America's 10 largest banks, operates four strategic business units: the Individual Bank, the Corporate Bank, the Investment Bank and the Administrative Bank.

Business Summary

Formed through the 1961 merger of Canadian Bank of Commerce (which dated back to 1858) and Imperial Bank of Canada (founded in 1875), Canadian Imperial Bank of Commerce (CIBC) is Canada's second largest chartered bank, with total deposits of some $72.6 billion at October 31, 1988.

The bank maintains more than 1,600 branches, offices, agencies and subsidiaries throughout Canada and in 24 other countries worldwide. In 1986, CIBC effected a corporate restructuring, dividing the company into four global strategic business units: the Individual Bank, to provide financial services for individuals, independent businesses, automobile dealers and farm customers; the Corporate Bank, to serve corporate, government and other financial institution accounts; the Investment Bank, to market investment banking products to existing and prospective customers and to engage in direct dealing for CIBC's account; and the Administrative Bank, which provides highly specialized administrative support to the other three business units. Operations of the Investment Bank were significantly expanded by the June 1988 acquisition of a 62% interest in Wood Gundy Inc., a major Canadian investment dealer, for about $203 million in cash and stock.

At October 31, 1988, loans outstanding (net of the provision for losses) totaled $87.3 billion, up 5.8% from $63.6 billion a year earlier. Some 72% of the loans were in Canadian currency. Mortgages in Canada accounted for 26% of loans outstanding, personal loans to Canadians for 18% and business loans for 56%.

In fiscal 1988, the practice of charging the income statement with a provision for loan losses calculated by formula was discontinued. The bank is now required to charge all loss experience directly to income and establish and maintain an allowance for credit losses account. The provision for loan losses totaled $493 million in fiscal 1988, down from $546 million—excluding a special pretax provision of $850 million for loans to lesser-developed countries (LDCs)—in fiscal 1987.

At 1988 fiscal year-end, loans to lesser-developed countries totaled $1,958 million, while provisions against these loans increased to $880 million, or 45% of the exposure. Through various transactions, the company's net exposure to these loans was 27% of common equity, down from 53% a year earlier.

On a taxable-equivalent basis, the average yield on interest-earning assets was 10.19% in fiscal 1988 (9.45% the year before), while the average rate paid on interest-bearing liabilities was 7.29% (6.77%), for a net interest margin of 2.90% (2.68%).

Important Developments

Sep. '89— CIBC said that it had added $15 million to the general provision during the third quarter of fiscal 1989, primarily to safeguard against a worsening LDC debt situation. At July 31, 1989, the bank's net LDC exposure stood at $770 million (17% of common equity), after deduction of the 45% country risk provisions of $726 million and the general provision of $118 million.

Review of Operations

For the nine months ended July 31, 1989, total interest income advanced 25%, year to year, reflecting greater consumer loan volume. With a 30% increase in interest expense, net interest income was up 14%. The provision for loan losses fell 17% and other income rose 25%, while other expense increased 20%. Pretax income expanded 31%. After taxes at 40.5%, versus 37.2%, net income rose 38%, to $577,000,000 ($3.10 a share), from $417,000,000 ($2.38).

Summary

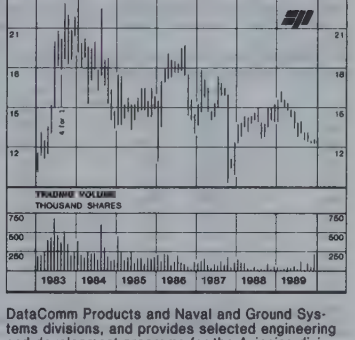
Earnings of this long-established manufacturer of communications and other electronics equipment, 51.6%-owned by The General Electric Co. plc (U.K.), were virtually unchanged, year to year, in the first half of 1989-90.

Business Summary

Canadian Marconi Co. (CMC) is a leading Canadian high technology firm and one of the oldest companies in the field of communications and electronics. It was founded in 1903 by inventor Guglielmo Marconi, who developed the world's first trans-oceanic wireless transmission. It is 51.6% owned by The General Electric Co. plc (U.K.). Exports accounted for about 66% of sales in 1989-9, the bulk of which were to the U.S.

CMC consists of seven product divisions. The Avionics division produces navigation systems, Microwave Landing System airborne receivers and control and display systems for rotary and fixed wing aircraft. The Commercial Communications division offers sales and service of electronic test equipment, land communications systems and marine electronics. The Components division supplies multi-layer printed circuit boards, hybrid microcircuits, power conversion systems, electronic components, precision machined parts, and illuminated panels. The DataComm Products division produces telex and low speed data switching systems. The Defence Communications division manufactures tactical communications systems, which include line-of-sight multi-channel radios, multiplexers, field switchboards and ancillary equipment, and sheltered communications systems. The Naval and Ground Systems Division produces surveillance and navigation radars for naval, submarine and helicopter applications. The company is the only Canadian supplier of a full line of ground-based navigational aids such as Microwave Landing Systems, Instrument Landing Systems, VHF Omni-directional range equipment, VOT, DME and RMMS. The Special Services division provides installation and maintenance, repair, overhaul and calibration of communications and electronics equipment.

The company's executive offices and main manufacturing plant are based in Montreal. A second plant, located in Kanata, Ontario, houses the DataComm Products and Naval and Ground Systems divisions, and provides selected engineering and development programs for the Avionics division. In 1988, a third facility was opened—in Cornwall, Ontario—for the manufacture of a line of tactical communications systems.



Canadian Marconi also has two U.S. subsidiaries—CMC Electronics, Inc., in Eatontown, New Jersey, and Cincinnati Electronics Corp. (CE), Cincinnati, Ohio. CE, which was acquired in 1988 for $39 million, designs and manufactures aerospace and tactical communications equipment. As a prime contractor for U.S. military communications systems, CE is a leading developer and producer of manpack transceivers, antennas and intercommunications sets. It is also the leading producer of range safety receivers for space launch vehicles; its receivers have been used on half of all U.S. spacecraft launch missions in the past five years.

Next earnings report expected in late January.

Mar.		108.6	70.7	68.7
		315.6	220.2	227.7

Revenues for the six months ended September 30, 1989, climbed 33%, year to year, aided by the inclusion of operations of Cincinnati Electronics, which was acquired in September 1988. Operating costs and expenses rose more rapidly, and pretax income fell 5.1%. After taxes at 15.2%, versus 19.3%, net income slipped fractionally, to $9,958,000 ($0.42 a share), from $9,990,000 ($0.42).

Summary

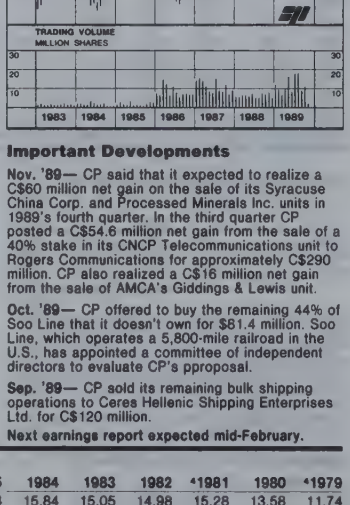
This Canadian-based conglomerate has restructured operations in recent years, redeploying assets from slow to faster growth industries. Corporate initiatives have included the purchase of a 22% stake in ADT Ltd., an electronic security services firm, for over C$390 million, the purchase of a 17.3% equity interest in Laidlaw Transportation for C$491 million plus 12 million new ordinary shares, and the sale of remaining tanker operations in September, 1989 for C$120 million. Dividends were recently raised 21%.

Current Outlook

Profits for 1990 are estimated at C$2.05 a share, versus the C$2.00 from continuing operations anticipated for 1989.

Dividends were raised 21%, to $0.23 quarterly from $0.19, with the October, 1989 payment.

Rail profits in 1990 will post a limited recovery from 1989's depressed levels. While grain traffic should rebound, reflecting a better wheat crop, little improvement is seen for shipments of forest products, containers or sulfur. Shipping profits will remain under pressure from intensifying competition on westbound movements as volumes flatten. PanCanadian should post a solid earnings gain as energy prices remain firm and production is buoyed by acquisitions. Coal profits will benefit from higher prices, productivity gains and ouput from a new steam coal mine in Alberta. Profits for forest products will remain under pressure as excess industry capacity, together with slackening demand and housing activity, check prices and volume growth. Hotel profits should advance on higher room and occupancy rates. Comparisons for telecommunications will be penalized by the absence of 1989's nonrecurring gain. AMCA International should have a stronger year in a better capital goods market.



Review of Operations

Revenues for 1989's first nine months fell 0.7%, year to year. Income from continuing operations declined 12%. Share earnings were $1.48, versus $1.73.

Important Developments

Nov. '89— CP said that it expected to realize a C$60 million net gain on the sale of its Syracuse China Corp. and Processed Minerals Inc. units in 1989's fourth quarter. In the third quarter CP posted a C$54.6 million net gain from the sale of a 40% stake in its CNCP Telecommunications unit to Rogers Communications for approximately C$290 million. CP also realized a C$16 million net gain from the sale of AMCA's Giddings & Lewis unit.

Oct. '89— CP offered to buy the remaining 44% of Soo Line that it doesn't own for $81.4 million. Soo Line, which operates a 5,800-mile railroad in the U.S., has appointed a committee of independent directors to evaluate CP's proposal.

Sep. '89— CP sold its remaining bulk shipping operations to Ceres Hellenic Shipping Enterprises Ltd. for C$120 million.

Next earnings report expected mid-February.

Summary

While deriving the majority of its revenues from the sale of business machines, this Japanese company is also the world's largest manufacturer of 35mm compact cameras and a major producer of 35mm single-lens reflex cameras. Earnings for 1988 advanced sharply from those of the year before, on brisk sales of office equipment and optical products, as well as effective cost-cutting efforts. A 10% stock dividend was effected in mid-1989.

Business Summary

Founded in Japan in 1937, Canon Inc. designs and manufactures high-technology products in the photographic and office equipment fields.

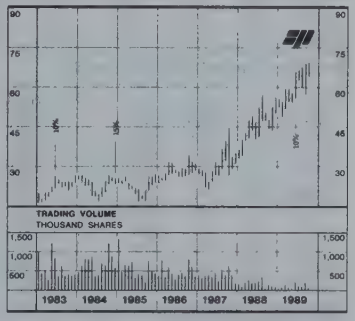
Sales by product line in recent years were:

	1988	1987
Cameras	14.4%	18.2%
Business machines:		
Copiers	39.5%	40.3%
Other business machines	39.3%	35.1%
Optical & other products	6.8%	6.4%

Canon is the world's largest manufacturer of 35mm compact cameras and a major producer of 35mm single-lens reflex cameras (SLRs). In 1987, Canon introduced its new EOS line, which features the most sophisticated technology available in SLR cameras; in 1988, Canon expanded the line with new and more affordable SLRs. During 1986, Canon became the first company to market Still Video cameras, which feature a complete electronic still-image recording system. The company also manufactures 8mm home video camera-recorders, VHS videocassette recorders and a line of OEM video camera lenses.

Copiers remain the company's principal business machine product. The Color Laser Copier, introduced in 1986, was one of the company's leading sellers in 1988. Canon also manufactures printers, facsimile transceivers, electronic typewriters, word processors, calculators, micrographic products and microcomputers.

Optical and other products include aligners, which are used in the production of semiconductors. In addition, the company manufactures a line of medical equipment, including x-ray products and ophthalmic equipment. Other products include broadcast and closed circuit optics and measuring instruments.



The company's products are marketed worldwide under the Canon brand name. During 1988, approximately 69% of consolidated net sales were generated outside of Japan, with sales in North America representing 30% of total sales, Europe 31% and other areas 8%.

Important Developments

Jul. '89— Drexler Technology Inc. reported that it had made a license sale for its optical memory cards and reader/writer devices with Canon Inc. in January 1989, but had agreed to keep Canon's name confidential until June 1989. Initial net proceeds to Drexler were $9 million. Estimated royalty payments were $10 million yearly to 1995, at which point Canon estimated its market share would be $230 million of a $1 billion market.

Next earnings report expected in March.

Net Sales¹ (Million $)

Period:	1989	1988	1987	1986
6 Months: Jun.	4,359	3,922	3,114	2,717
12 Months: Dec.		8,778	7,941	5,523

Net sales for the six months ended June 30, 1989 advanced 20%, year to year, reflecting increased sales of office equipment, computers and peripherals. Following charges for liquidation of inventories, pretax income was up 3.1%. After taxes at 51.9%, versus 54.4%, and a 48% rise in minority interest, net income rose 3.4% to ¥16,538,000 from ¥15,995,000. As adjusted for the 10% stock dividend in 1989, earnings per ADR (based on the exchange rates prevailing at the ends of the years) were $0.77, versus $0.83.

Finances

In June 1989, the company announced that it had purchased a 16.7% interest in Next Inc., a computer concern formed by Steven Jobs, for $100 million. Canon also obtained the right to market Next's desktop computer in Asia.

In April 1989, Canon agreed to purchase, for $1.2 million, the technology of Rise Technology Inc.

In February 1989, Canon issued U.S. dollar notes with warrants due 1993 in the amount of $1 billion. The proceeds would be used mainly for capital expenditures for 1989.

R&D expenditures absorbed 5.9% of net sales for 1988, compared with 5.8% in the preceding year.

Capitalization

Nov. 3'89	1989					
529	568-353	21	0.20	NM	A	0.97

Summary

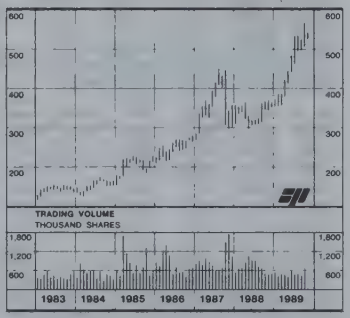
Capital Cities/ABC was formed by the January, 1986 merger of two major media companies. CCB operates a national TV network and six radio networks, owns TV and radio stations in major U.S. markets, is a major publisher of magazines and newspapers, and has equity interests in three cable TV channels. Berkshire Hathaway Inc. owns about 17% of the common stock.

Current Outlook

Earnings for 1990 are estimated at $29.00 a share, versus the $26.25 expected for 1989.

The quarterly dividend should continue at $0.05 over the near term.

Earnings for 1990 are expected to benefit from higher prices for advertising on the ABC television network. However, accounting adjustments related CCB's 1986 acquisition of the ABC network are expected to benefit earnings by only about $1.50 a share, compared with an expected boost of approximately $3.00 a share in 1989. An acquisition by CCB appears possible, but regulatory restrictions limit diversification prospects in the filmed entertainment/TV broadcasting area.



Net Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	1,120	1,289	959	912
Jun.	1,226	1,159	1,127	1,066
Sep.	1,101	1,010	946	959
Dec.	---	1,316	1,408	1,187
	---	4,773	4,440	4,124

Revenues for the six months ended October 1, 1989 declined 0.3%, year to year. However, pretax income increased 20%, aided by lower net interest expense. After taxes at 43.2%, versus 44.4%, net income was up 23%, to $16.97 a share (on 4.6% more shares), from $14.43.

Dec.	E9.27	7.76	6.91	4.90
	E26.25	22.31	16.46	11.20

Important Developments

Oct. '89— In 1989's third quarter broadcasting revenues rose 11%, year to year, while publishing revenues increased 3%. Overall operating profit was up 8.3%. Reductions to fair market value of certain programming rights acquired by the ABC television network boosted the quarter's net earnings by about $0.50 a share, versus an approximate $0.65 benefit in the year-earlier period. In the new primetime TV season, ABC's ratings have been second to those of NBC, although the gap between the two networks closed, compared with the year-earlier period. Overall demand for TV network advertising appears to have been quite strong. However, low October ratings for ABC's earthquake-disrupted broadcast of baseball's World Series are likely to hurt fourth quarter earnings somewhat.

Next earnings report expected in late January.

Business Summary

Capital Cities/ABC, Inc. was formed in January 1986 by the merger of American Broadcasting Companies into a subsidiary of Capital Cities Communications.

The broadcast division includes the ABC television network with 222 primary affiliates; six radio networks with about 2,100 affiliates; eight owned TV stations; and 21 owned radio stations (11 AM and 10 FM). The TV stations are: WPVI-TV, Philadelphia; KTRK-TV, Houston; WTVD, Durham; KFSN-TV, Fresno; WABC-TV, New York; KABC-TV, Los Angeles; WLS-TV, Chicago; and KGO-TV, San Francisco. CCB's radio holdings include stations in New York (WABC), Los Angeles (KABC), Chicago (WLS); and San Francisco (KGO), where CCB also owns TV stations. In mid-1989, in relation to these holdings, CCB received a permanent waiver from the Federal Communications Commission relating to restrictions on dual (radio-TV) media property ownership.

The publishing division publishes nine daily newspapers in seven markets, weekly papers in five states and shopping guides in six states. Also, CCB owns Fairchild Publications, whose products included Women's Wear Daily, W, M, MIS Week, and Electronic News; ABC Publishing, whose products included consumer magazines COMPUTE!, Los Angeles Magazine, and McCall's Needlework & Crafts, and numerous trade and agricultural publications; Institutional Investor; Practical Homeowners; and two philatelic publications.

CCB also has equity interests in three cable television channels— ESPN (80%); Arts & Entertainment Network (38%); and Lifetime (33.3%).

Summary

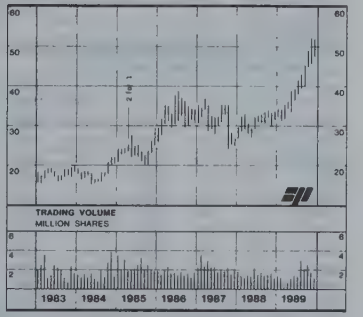
Capital Holding owns several life insurance companies which write a large volume of ordinary insurance primarily in the Southeast, operates a small property-casualty company, and has a 97% interest in a consumer finance unit. Marketing efforts are targeted on the middle income segment of the population. In September, 1989 CPH acquired, for $156 million in cash and stock, Southlife Holding Co., a Nashville, Tenn.-based life insurer with about $1.5 billion of insurance in force.

Current Outlook

Earnings for 1990 (excluding capital gains and losses) are estimated at $4.85 a share, versus the $4.20 a share anticipated for 1989.

The quarterly dividend was raised 8.0%, to $0.27 from $0.25, with the December, 1989 declaration.

Most segments should attain modest earnings growth in coming periods. Life operations will benefit from increased demand for annuities. Lower interest rates anticipated for 1990 will spur demand for other investment products. The resulting strong cash flow from these two segments will lead to strong advances in net investment income. Health profits have been impaired by an erosion in the direct response market, and this is likely to continue. P/C premium growth will slow, but new product introductions and an improved combined ratio will partially offset this. Advances from credit card operations should also aid earnings.



Review of Operations

Total revenues for the nine months ended September 30, 1989 rose 23%, year to year, as a 0.6% drop in premiums and other considerations was more than offset by a 32% advance in net investment income, sharply higher other income, and the inclusion of realized inivestment gains of $91.3 million versus losses of $3.1 million. With total benefits and expenses up 19%, pretax earnings advanced 60%. After taxes at 28.0%, versus 25.1%, net income was up 54%. Following preferred dividends, share earnings were $4.15 on fewer shares, compared with $2.64. Operating earnings were $3.15 a share, versus $2.72.

Important Developments

Nov. '89— CPH said the Agency Group's pretax income (before realized gains) for 1989's first nine months rose 1.8%, year to year, as a 6.3% increase in life profits offset a 14% decline in the health area. Direct Response Group profits advanced only 2.1%, reflecting lower life and health profits, compensated partly by improving p/c margins. Accumulation and Investment Products Group profits were up on higher average deposits, while the banking unit's profits more than tripled. Separately, the company reported that it had acquired Southlife Holding Co. for $156 million in cash ($37 million), CPH common stock (about 1.1 million shares), and the assumption of debt ($80 million). Southlife, with $1.5 billion of insurance in force, operates in Florida, Georgia, South Carolina, and Virginia.

Next earnings report expected in early February.

Business Summary

Capital Holding Corp. ranks among the nation's 10 largest stock life insurance companies, providing life, annuity, accident and health, and property-casualty insurance through several affiliated companies. The company also owns a 97% interest in First Deposit Corp., which owns a consumer bank, a savings and loan association and a life insurance company. Contributions to pretax earnings (in million $) in recent years:

	1988	1987	1986
Agency Group	$129.7	$179.1	$169.6
Direct Response	78.6	73.7	78.3
Accumulation & Inv.	83.6	14.2	107.2
Banking	13.6	7.1	1.1
Corp.	-46.2	-22.2	-21.4

The Agency Group markets individual life and health products principally through home service agents. The direct response group markets life and health products using television, print media, direct mail, and also markets personal lines property-casualty insurance through Worldwide Insurance. The Accumulation and Investment group markets single premium life and annuity contracts, and IRA products to individuals via brokerage firms, banks and financial planners, and markets GIC's funding agreements and structured settlements to banks, pension funds and other financial institutions.

Dividend Data

Dividends have been paid since 1941. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1987.

Carlisle Companies

NYSE Symbol CSL

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 13'89	1989					
34½	44⅜-33½	13	1.20	3.5%	B	1.04

Summary

Carlisle manufactures a diverse line of rubber, plastic and metal products, magnetic computer tape, computer peripheral equipment and automotive equipment. Rapid growth has been experienced for single-ply rubber roofing systems for commercial and industrial buildings, but competition in this field has intensified. In June, 1989 Carlisle announced an agreement to form a joint venture to manufacture rubber roofing products in the Soviet Union.

Business Summary

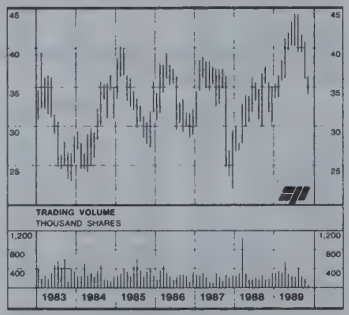
Carlisle Companies (formerly Carlisle Corp.) derived its sales and operating profits in 1988 from the following markets:

	Sales	Profits
Construction materials	29%	56%
Data communications/electronics	36%	4%
Automotive/industrial	35%	40%

Carlisle SynTec Systems makes elastomeric membranes (EPDM) and related products for roofing systems and water barrier applications. It is the largest U.S. producer in the single-ply segment of the roofing market. Re-roofing demand represents about two-thirds of the market for nonresidential roofing materials. Other construction materials consist of custom-manufactured rubber and plastic products.

Data communications/electronics products include half- and quarter-inch magnetic computer tape products; finely-drawn, plated and stranded wire conductor and high- and medium-temperature insulated wire and cable; quarter-inch cartridge, cassette and minicassette tape drives; computer hardware systems integration; and high-performance peripheral controllers. In 1988 CSL sold the International Wire Products Co. for $8.8 million.

Automotive/industrial products include heavy-duty brake linings for truck and trailer applications; custom rubber and plastic components for use in passenger cars, appliances and other purposes; and small pneumatic tires, tubes and wheels used by most major lawn and garden equipment manufacturers. Production of motorcycle tires was discontinued in late 1987. The company continues to market a line of imported bicycle tires.



Important Developments

Oct. '89— Carlisle said that its third quarter performance was adversely affected by continuing softness in the commercial roofing market and by severe price competition in the computer tape business. The company added that the automotive and industrial products groups turned in excellent results which should continue in the fourth quarter of 1989.

Jun. '89— Carlisle announced an agreement to form a joint venture company to manufacture EPDM single-ply roofing materials in the Soviet Union. CSL will contribute managerial and technical expertise, while an agency of a major Soviet construction ministry will build a large scale manufacturing facility that will duplicate CSL's latest manufacturing technology and methods.

Next earnings report expected in late January.

Carolina Freight

NYSE Symbol CAO

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Oct. 3'89	1989					
23½	27¼-22	16	0.60	2.6%	A-	1.00

Summary

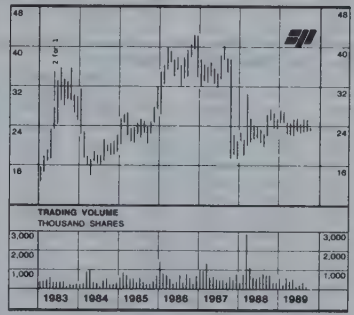
This company operates one of the nation's 10 largest general freight carriers as well as two regional truckers and a growing truckload hauler. In February, 1988 CAO terminated its Texas intrastate activities, citing a difficult competitive environment. While rate discounting pressure has hurt profits during the past three years, a partial recovery is anticipated in 1990 as CAO benefits from the restructuring of its terminal network and attracts greater volume through shortened transit times.

Current Outlook

Profits for 1990 could rebound to $1.75 a share from the $1.20 anticipated for 1989.

Dividends at $0.15 quarterly are unlikely to be increased during the next 12 months.

Profits for 1990 should rebound sharply, as Carolina Freight Carriers benefits from improved productivity following the completion of the restructuring of its terminal network, and moderate volume growth as shippers are attracted by the resulting shortened transit times. Aiding comparisons will be relatively rate stability and easing insurance and claims expenses. G.I. Trucking should remain in the black, stemming from improved platform productivity, better utilization rates for new long-haul routes and reduced administrative costs. Red Arrow should move closer to profitability following the downsizing of its operations.



Operating Revenues (Million $)

Period:	1989	1988	1987	1986
12 Wks: Mar. ...	149.5	145.7	132.9	123.0
12 Wks: Jun.	157.4	145.8	133.5	138.2
12 Wks: Sep.	152.1	151.5	136.5	138.8
16 Wks: Dec. ...	---	207.3	191.9	191.2
	---	650.2	594.9	591.3

Revenues for the 36 weeks ended September 9, 1989 rose 3.6%, year to year. Net income declined 11%, as higher operating profits were outweighed by the inclusion in the 1988 period of nonrecurring gains. Share earnings were $0.70, versus $0.73.

16 Wks: Dec. ...	E0.50	0.77	0.17	0.64
	E1.20	1.50	1.30	2.53

Important Developments

Sep. '89— Citing intense competitive pressures, management cut its 1989 revenue projection to $666 million from the $685 million seen in July and down from its original estimate of $720 million. The latest projection represents a 2.4% improvement over the $650.2 million in revenues generated in 1988. Separately, CAO anticipated a "substantial" operating cost reduction and improved transit times following the completion of the firm's newlinehaul/consolidation plan. As part of that program, CAO will spend $40.9 million in 1989 for land and structures, versus $14.1 million in 1988. CAO will add four terminals, including a $12.4 million, 230-door, break-bulk facility in Atlanta and a $4.3 million, 130-door terminal in Cincinnati. CAO also plans to spend $27.3 million in 1989 for revenue equipment, down from $34.2 million in 1988.

Next earnings report expected in late January.

Cardinal	0.2	Nil	0.3

CAO's Carolina Freight Carriers unit, one of the nation's 10 largest motor carriers, serves 32 eastern states through a network of 163 terminals and agents. Carolina moved 2.5 million tons of freight in 1988, versus 2.3 million tons in 1987. Carolina, whose average length of haul is 790 miles, generates 78% of its volumes and 89% of revenues from LTL shipments.

G.I. Trucking Co. serves nine western states and Hawaii through a network of 25 terminals. G.I., whose average haul is 473 miles, moved 430,125 tons of freight in 1988, versus 368,003 tons in 1987. LTL shipments accounted for 85% of total volume in 1987.

Red Arrow Freight Lines, which serves five western states, transported 191,000 tons of freight in 1988, versus 673,810 tons. Red Arrow's average length of haul is 631 miles. Intrastate Texas service (accounting for 63% of revenues) was discontinued in early 1988. Cardinal Freight Carriers, which provides truckload service in the eastern U.S., moved 335,032 tons of freight in 1988, compared with 267,887 tons in 1987.

Dividend Data

Dividends have been paid since 1963. A dividend reinvestment plan is available.

Summary

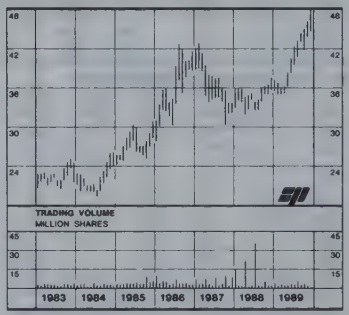
This electric utility, serving the robust regional economy of North and South Carolina, has completed its fuel diversification program into nuclear energy. The rate structure for the nuclear program was completed in 1988. In November, 1989 the North Carolina Supreme Court ordered the NCUC to reclassify up to an additional $389 million of CPL's plant costs from rate base to abandoned plant. Accordingly, the company could incur a write-off of about $60 million, or $0.75 a share, in the 1989 fourth quarter.

Current Outlook

Share earnings for 1990 are projected at $4.20, up from the $4.10 estimated for 1989, which excludes a write-off expected in the fourth quarter following the North Carolina Supreme Court's ruling ordering the reclassification of plant costs.

The $0.71 quarterly dividend may be raised some 3.0% with the February, 1990 payment.

Share earnings for 1990 will benefit from continued sales growth, and better controlled costs. The longer-term outlook is enhanced by the completed construction program and strong cash flow.



Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	604	564	515	528
Jun.	558	483	456	453
Sep.	712	666	604	577
Dec.	---	561	507	483
	---	2,273	2,082	2,041

Revenues for the nine months ended September 30, 1989 rose 9.5%, year to year, owing to higher rates and increased sales. Following a less rapid increase in fuel costs, offset in part by reduced deferred operating credits, operating income was up 20%. After $145.6 million in write-offs related to the Harris plant in the 1988 third quarter, net income more than doubled. Share earnings were $3.62, compared with $1.59.

Important Developments

Nov. '89— CPL reported that on November 9 the North Carolina Supreme Court issued its decision upholding the North Carolina Utilities Commission's (NCUC) decision permitting the company to recover abandoned plant costs over a 10-year period without a return on the unamortized plant balance. The NCUC's decision had been appealed to the Court. However, the Court ordered the Commission to reclassify up to an additional $389 million of plant costs from rate base to abandoned plant for portions of the facilities originally designed to serve four units but now serving only one. Accordingly, the company reported that it could incur a write-off of approximately $60 million, or $0.75 a share, in the 1989 fourth quarter.

Next earnings report expected in late January.

Business Summary

Carolina Power & Light provides electric service to a population of over 3,000,000 in a service area consisting of about half of North Carolina and one-fourth of South Carolina. Revenues by class of customers in recent years:

Revenues	1988	1987	1986	1985
Residential	33%	33%	32%	31%
Commercial	20%	20%	20%	19%
Industrial	26%	27%	27%	28%
Other	21%	20%	21%	22%

Sources of generation in 1988 were coal 58%, nuclear 41% and 1% water and other. Peak demand in 1988 was 8,523 mw and capability totaled 9,529 mw for a capacity margin of 11%.

The Harris 1 nuclear plant, which went into commercial operation in May, 1987 completes CPL's base load construction program for the foreseeable future. The rate structure was completed in 1988, resulting in a $1.89 per share charge. In 1981 CPL abandoned Harris 3 & 4 and in 1983 abandoned Harris 2. The company is amortizing its investment in the three abandoned facilities over a ten-year period. The recovery of abandoned property was challenged in the North Carolina Supreme Court. In November, 1989 the N. C. Supreme Court upheld the allowance of recovery of abandoned plant costs. Auditors noted on their report of the company's 1988 financial statements uncertainties with the appeal of the rate order permitting recovery of abandoned property.

Oct. 30'89	1989					
47 1/4	54 5/8-44 7/8	14	2.10	4.4%	B-	0.99

Summary

Carpenter Technology produces stainless and tool steels, high temperature and electronic alloys, and other special purpose metals. Major markets include the electronics and electrical equipment, transportation, general industrial machinery, aerospace, fabricated metal products, and power generation industries. Earnings for fiscal 1989 were restricted by a $1.50 a share onetime charge for a plant closing. In June, 1989 directors authorized the repurchase of 1.2 million common shares.

Current Outlook

Earnings for the fiscal year ending June 30, 1990 are projected at $5.10 a share, versus fiscal 1989's $3.16.

The $0.52½ quarterly dividend may be increased in fiscal 1990.

Sales are expected to rise less rapidly in fiscal 1990 as forecasted declines in volume begin to negate favorable pricing. Stable operating rates, probable declines in raw material costs and the shift to higher priced products will maintain margins. Aided further by lower interest expense, the absence of unusual charges, and share buybacks, share earnings should rise in fiscal 1990.

Net Sales (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Sep.	133.6	142.2	115.2	117.4
Dec	---	151.3	125.9	110.5
Mar.	---	169.6	147.5	125.4
Jun.	---	171.2	166.8	127.2
	---	634.3	555.5	480.5

Sales for the three months ended September 30, 1989 fell 6.0%, year to year, as a 17% decrease in unit volume shipments outweighed a higher valued sales mix. Margins benefited from improved efficiencies at the Reading plant along with the elimination of Bridgeport plant costs, and pretax income advanced 17%. After taxes at 38.7%, versus 40.0%, net income rose 20%. Share earnings were $0.86, versus $0.72.

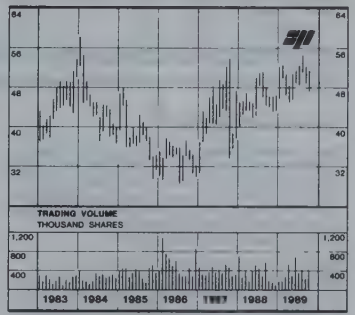
Jun.	E1.54	1.48	1.20	0.25
	E5.10	3.16	2.67	0.50



Important Developments

Jun. '89— Directors authorized the repurchase of up to 1.2 million CRS common shares to be held as treasury stock for corporate purposes. The timing and amount of the purchases would depend on various factors, including market conditions and CRS's business and financial condition. CRS stated that substantially all the funds for the repurchase program would come from internal sources. CRS added that in light of the company's improving performance, the dividend policy would be reviewed in fiscal 1990.

May '89— In the third quarter 10-Q document CRS stated that fiscal 1989's third-quarter earnings were adversely affected by a $13.8 million after-tax ($1.50 a share) charge related to the closing of its Bridgeport, Conn. plant.

Next earnings report expected in late January.

Business Summary

CRS is a leading manufacturer, fabricator and international marketer of specialty steels and metals in a broad range of types, forms, and sizes for a variety of end-use markets. Revenues by product line in recent fiscal years:

	1989	1988	1987	1986
Stainless steel	58%	60%	58%	60%
Special alloys	35%	32%	34%	32%
Tool steel	7%	8%	8%	8%

In fiscal 1989 the transportation equipment market accounted for 16% of sales, aerospace 16%, metal producing and distribution 13%, electrical/electronic equipment 12%, general industrial equipment 10%, consumer durables 6%, metal working equipment 6%, chemical and petroleum processing 5%, power generation and distribution 5%, instruments and controls 4%, housing and construction 3%, and miscellaneous 4%.

Stainless steels include a broad range of corrosion resistant alloys, including conventional stainless steels and many proprietary grades for special applications.

Special alloys include those other than stainless steels that are used in critical components such as bearings and fasteners; heat resistant alloys such as those with a complex nickel or cobalt base; alloys for electronic/electrical applications; and zirconium base alloys for nuclear reactors.

Tool steels include extremely hard alloys used for tooling and other wear-resisting components in stamping, extrusion and machining operations.

Dividend Data

Dividends have been paid since 1907. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

Summary

Carter Hawley Hale operates 114 department stores in the Sunbelt region, consisting of The Broadway-Southern California, The Broadway Southwest, Emporium Capwell, Thalhimers and Weinstock's. The company transferred its specialty store operations to The Neiman Marcus Group in August, 1987. An improved outlook for women's apparel sales and streamlined costs should boost earnings in fiscal 1990.

Current Outlook

Earnings for the fiscal year ending July 31, 1990 are projected at $0.75 a share, versus the $0.34 of fiscal 1989.

Dividends are not in prospect.

Sales for fiscal 1990 should increase modestly, reflecting improved sales of women's apparel and the remodeling of stores. Gross margins should widen and expense ratios improve, aided by cost controls and operational consolidations.

Sales (Million $)

13 Weeks:	1988-9	1987-8
Oct.	637	611
Jan.	931	866
Apr.	595	546
Jul.	624	595
	2,787	2,617

Sales for the fiscal year ended July 29, 1989 (preliminary) rose 6.5% from those of the preceding year. Gross margins remained level and SG&A expenses declined as a percentage of sales. Following nonrecurring costs of $6 million and much higher interest expense, pretax income decreased 20%. After taxes at 40.3%, versus 40.0%, net income declined 20%. Per-share earnings were $0.34, against $0.33. Results exclude special credits of $0.28 and $0.39 a share, respectively.

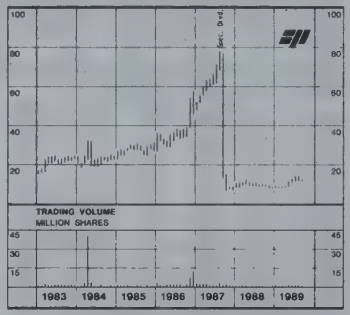
Apr.	d0.15	d0.20
Jul.	d0.35	d0.35
	0.34	0.33



Important Developments

Sep. '89— Comparable store sales for fiscal 1989 rose 5.6%. Operating earnings increased 14.3%, reflecting the improved sales trend, despite a $6 million pretax charge in the fourth quarter, which reflected the closing of the company's buying office. On a comparable store basis, sales for the fourth quarter rose 4.2% and operating earnings increased 25.9%. Earnings in fiscal 1989 of $7.4 million excluded a special charge of $9.3 million, primarily comprised of unamortized costs relating to the early retirement of debt, and a special credit of $15.3 million due to a change in accounting for income taxes. Separately, in order to reduce distribution costs and increase productivity, CHH is improving its distribution facilities; the program will take about two years to complete.

Next earnings report expected in mid-November.

Business Summary

Carter Hawley Hale is one of the largest department store retailers in the U.S. At the end of fiscal 1988 the company operated 112 stores in the Sunbelt regions of the country through five department store divisions, catering to middle to upper-middle class customers ($40,000 to $80,000 family income), generally 25 to 45 years old.

Broadway-Southern California is the largest regional department store chain in southern California in terms of sales, with 43 department stores in 38 communities. Broadway-Southwest operates 11 department stores in Arizona, Colorado, Nevada and New Mexico.

Emporium Capwell operates 22 department stores located primarily in major shopping centers in the greater San Francisco area. Merchandise includes women's, men's and children's apparel, accessories and home furnishings.

Thalhimers emphasizes fashion in its 24 department stores located in 15 cities in Virginia, North Carolina, South Carolina and Tennessee.

Weinstock's, headquartered in Sacramento, Calif., operates 12 department stores in California, Utah and Nevada.

The company also operates two service divisions. Information services provides information management and systems support for the company. Market services is responsible for the development of private label merchandise and large scale purchasing programs.

During fiscal 1988 two Broadway-Southwest stores in Denver were sold. In addition, the company sold its interest in a shopping center in northern California while retaining its department store in the center. Proceeds from both transactions were used to reduce debt and for general corporate purposes.

The company entered into a three year agreement with The Neiman Marcus Group to provide information services for an annual fee of $14.2 million beginning in July, 1987. Neiman Marcus may extend the agreement for any period up to an additional two and a half years.

Dividend Data

Dividends were omitted in mid-1987 at the time of the corporate restructuring. Resumption of payments is not expected in the foreseeable future.

Finances

In August, 1987 the company effected a restructuring in which public shareholders received for each CHH share held one Neiman-Marcus Group common share and $17 in cash. (Shareholders could elect other combinations of CHH stock, NMG stock and cash). General Cinema Corp., which held 3,555,000 CHH common shares and 1,000,000 CHH preferred shares, received 16,292,073 NMG adjustable voting common shares and 1,000,000 shares of 6% adjustable voting preferred stock, convertible into 8,054,737 shares of adjustable voting common, plus some $124.6 million in cash. About $1.1 billion was required to finance payment of the distribution and other expenses through a combination of real estate financing, bank borrowings, and the sale in a public offering of subordinated notes and debentures.

Capitalization

Long Term Debt: $913,977,000, incl. capital lease obligations.

Nov. 16'89	1989					
58⅜	58½-39⅛	18	0.82	1.4%	A+	1.23

Summary

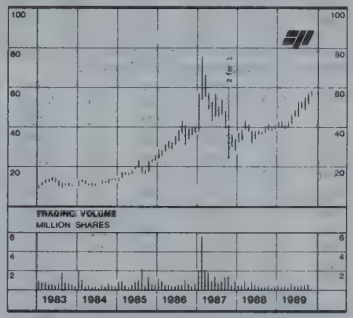
This company generally derives well over half its earnings from a broad range of ethical drugs, and is well established in the highly competitive consumer products market with its Arrid antiperspirant and numerous other lines. Its Trojan brand of condoms has over half of the U.S. retail market. Growth in major drug and consumer lines coupled with expected contributions from new products should lead to healthy earnings gains in the years ahead.

Current Outlook

Earnings for the fiscal year ending March 31, 1991 are estimated at about $3.70 a share (on the combined Class A and B shares), up from the $3.35 projected for fiscal 1989-90.

Dividends should continue at $0.20½ quarterly.

Sales for fiscal 1990-91 should show further growth, aided by gains in principal health care and consumer product lines. Contributions from new products should also contribute to the rise. Profitability is expected to benefit from the better volume, productivity improvements and other cost efficiencies.



Net Sales (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7

Important Developments

Oct. '89— The company introduced a line of condoms that are larger than standard latex condoms under the Magnum brand. Mentor and Magnum condom brands were purchased from Mentor Corp. in March, 1989 for about $4.2 million. An additional $1.5 million is to be paid upon completion by Mentor of certain product developmemnt and testing and up to $4 million more is payable based on future sales.

Mar. '89— New products introduced during fiscal 1988-9 included an Arrid non-whitening solid formula deodorant; a "No Offensive Odor" formula in the Nair depilatory line; Trojan extra-strength and Trojan-Enz with spermicidal lubricant; an Answer ovulation test; Rynatan-S antihistamine; Wampole One-Step hCG pregnancy test; three pet care products; and several new diagnostic tests.

Next earnings report expected in late January.

Business Summary

Business segment contributions in fiscal 1988-9:

	Sales	Profits
Health care	48%	66%
Anti-perspirants and Deodorants	25%	14%
Other consumer	27%	20%

The U.S. accounted for about 75% of sales and 86% of operating profits in fiscal 1988-9; other North America for 11% and 7%, respectively; and other countries for 14% and 7%.

Health care products include tranquilizers, muscle relaxants, laxatives, antibiotics, expectorants/mucolytics, topical antibacterial and antifungal agents, drugs for rheumatoid arthritis, antihypertensives, xanthine bronchodilators, cough/cold products, throat lozenges, sedatives, analgesics, anti-ulcer drugs, antacids, anti-nauseant drugs, and toothbrushes. Also produced are tests for pregnancy, herpes, streptococcal infections, rheumatoid factor, mononucleosis, meningitis, rubella and other ailments.

The consumer products segment is heavily dependent upon the Arrid line of anti-perspirants and deodorants, which are available in sprays, roll-ons and creams. Other consumer products include Trojan condoms (which have over half of the U.S. retail market) and Pearl Drops tooth polish. Also produced are laxatives, depilatories, pregnancy tests, oral hygiene products, tapes and bandages, shampoos, hair lotion, and footcare and pet care items.

Summary

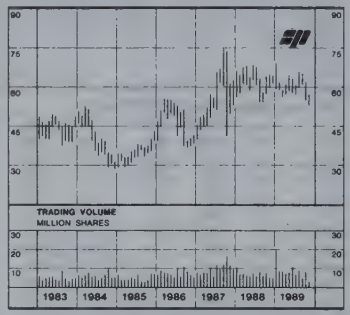
This company is the largest manufacturer of earthmoving machinery and equipment, and is a major producer of diesel and natural gas engines and turbines. Earnings for the first nine months of 1989 retreated somewhat from the year-earlier level, reflecting slower sales growth and higher costs. Both sales and earnings are expected to trend lower in 1990.

Current Outlook

Earnings for 1990 are projected at $5.25 a share, down from the $5.50 estimated for 1989.

Dividends should continue at $0.30 quarterly.

Sales for 1990 are expected to decline from the 1989 level, reflecting the slowing of certain sectors of the U.S. economy. Forecasted weakness in residential and nonresidential construction markets along with slower growth in the mining, farming and forest products industries will likely lead to a decrease in domestic demand and total sales. Sales outside the U.S. are expected to equal those of 1989 and prices should remain firm. The sales mix may improve as sales of higher margin large machines increase as a percent of total sales, but operating rates will likely trend lower. Assuming little change in materials costs and continued high spending levels for factory modernization, margins will likely contract.



Sales (Billion $)

Quarter:	1989	1988	1987	1986
Mar.	2.63	2.35	1.65	1.74
Jun.	2.98	2.56	2.04	1.99

Dec.	---	2.61	2.24	1.78
	---	10.26	8.18	7.32

Sales for the nine months ended September 30, 1989 rose 7.1%, year to year. Margins narrowed, and operating profits fell 16%. With lower nonoperating income, pretax income was down 23%. After taxes at 27.9%, versus 32.9%, consolidatated net income fell 17%. Following higher profits from affiliates, net income was off 14%, to $3.85 a share from $4.46.

Dec.	E1.65	1.61	1.37	d1.50
	E5.50	6.07	3.20	0.77

Important Developments

Oct. '89— CAT reported a 43% decline in share earnings on a 6.0% decrease in sales for 1989's third quarter. CAT attributed the decline in sales to lower volume which resulted from having eight fewer days in 1989's third quarter, versus the year earlier quarter. In addition to the adverse impact of lower sales volume, third quarter earnings decreased as a consequence of higher material, labor, new program and new product introduction costs, combined with an $11 million charge for bad debt related to certain Latin American receivables. CAT said that still expected sales for 1989 to improve over 1988, although sales growth would be less than originally expected. The company stated further that fourth quarter profit was expected to be somewhat higher than that of the third quarter, but profit for the year would be lower than levels attained in 1988.

Next earnings report expected in late January.

Business Summary

Caterpillar, Inc. (formerly Caterpillar Tractor) is the largest manufacturer of earthmoving and construction machinery, and also produces diesel and natural gas engines and turbines. Business segment contributions in 1988:

	Sales	Profits
Machinery & equipment	80%	79%
Engines	20%	21%

Sales outside the U.S. were 50% and 48%, of consolidated sales in 1988 and 1987, respectively.

Machinery and equipment manufactured includes track-type tractors, bulldozers, rippers, track and wheel loaders, lift trucks, pipe layers, motor graders, wheel dozers, compactors, paving equipment, excavators, and off-highway trucks. These products have a variety of uses in construction, logging, mining, agricultural, and other industrial activities. Diesel and natural gas engines range from 42 to 7,300 hp, for use in earthmoving and construction machines, on-highway trucks and marine, petroleum, agricultural, industrial and other applications. CAT also makes electric power generation systems.

CAT has 17 plants in the U.S., consisting of 11 large plants (more than 500 people) and 6 smaller plants. Outside the United States, CAT has 10 large plants and five smaller plants. It also uses contract manufacturers in the U.S., Canada, Finland, France, Norway, South Korea, Sweden, the U.K., and West Germany.

Dividend Data

Dividends have been paid since 1914. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

Summary

Majority-owned by Hoechst Celanese Corp., this company is one of the largest Canadian producers of synthetic fibers, textiles and chemicals. In early 1989, Hoechst Celanese's $35 a share tender offer to acquire the remaining common shares of Celanese Canada was unsuccessful. Earnings have been in a strong uptrend in recent years, but results in the first half of 1989 have been restricted somewhat by lower chemical prices which are expected to affect earnings for the remainder of the year.

Business Summary

Celanese Canada Inc., one of the largest Canadian producers of synthetic fibers, textiles and chemicals, derived its 1988 sales and operating income as follows:

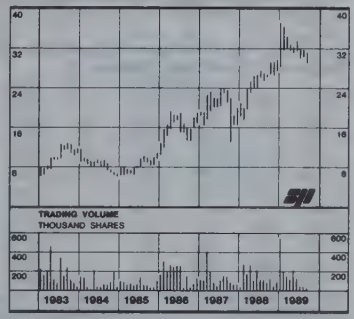
	Sales	Profits
Polyester	32%	16%
Cellulosic Fibers	13%	7%
Chemicals	34%	48%
Industrial Products	21%	29%

Foreign sales were 47% of the 1988 total.

Polyester "Fortrel" is made at Millhaven, Ontario, in the form of tire yarn, staple fiber and industrial filament yarn. Principal end-uses are wearing apparel, home furnishings, fiberfill, carpets, industrial coated fabrics, nonwoven fabrics, sewing thread, automotive tires, seat belts, conveyor belts and hoses.

The company manufactures cellulose acetate (cellulosic) fibers at its plant in Drummondville, Québec. In August 1987, Celanese sold its wholly owned Monterey Textiles, Inc. subsidiary, thereby withdrawing from the fabrics business. This will allow the company's textile group to concentrate on its fiber-manufacturing business, with Monterey remaining a major customer of the group.

Chemicals, produced at Edmonton, Alberta, include acetic acid, acetic anhydride, vinyl acetate monomer, solvents, methanol, formaldehyde and pentaerythritol. These are used to make resins, synthetic fibers, fine chemicals, pharmaceuticals, water-based paints, adhesives, paper and textile finishes, vinyl and nitrocellulose lacquers, de-icing solutions, plastics, explosives and synthetic lubricants. Methanol is being tested as an octane enhancer for gasoline and as an alternate fuel.



Also made at Edmonton are industrial products, primarily cellulose acetate flake and cigarette tow, used in textile and filter products, lacquer and specialty coatings and cigarette filters.

Important Developments

Jul. '89— The company said that earnings in the second half of 1989 are expected to be lower than those achieved in the first half, reflecting lower chemical prices, particularly methanol.

Feb. '89— Hoechst Celanese Corp., which holds a 56% stake in the company, announced that its $35 a share tender offer for the remaining Celanese Canada common stock was unsuccessful, as an insufficient number of shares were tendered. The offer was contingent upon acceptance by holders of at least two thirds of the shares not already controlled by Hoechst.

Next earnings report expected in early October.

Net Sales (Million Can. $)

Quarter:	1989	1988	1987	1986
Mar.	101.6	96.9	80.7	84.1
Jun.	100.8	104.4	87.5	90.9
Sep.		92.6	81.5	78.4
Dec.		113.3	101.5	91.9
		407.2	351.2	345.2

For the six months ended June 30, 1989, net sales rose fractionally, year to year. Strength in the industrial products (increased capacity and higher prices) and cellulosics segments (increased capacity) outweighed lower chemical prices, particularly methanol; net income was up 5.3%, to C$25,600,000 ($1.85 a share, after preferred dividend requirements), from C$24,300,000 ($1.75).

Summary

This company provides telephone service in nine states through the 11th largest telephone system in the nation. Following the October, 1988 acquisition of cellular and paging operations from United TeleSpectrum Inc. for $775 million, CNT became the second largest cellular service provider in terms of markets served. A special $1.00 a share dividend was paid in October, 1989.

Current Outlook

Earnings for 1990 are tentatively projected at $1.00 a share, versus 1989's estimated $0.25, which excludes a projected gain from sale of cable operations).

The $0.31 quarterly dividend is the minimum expectation; a $1.00 special dividend from the sale of cable TV properties was paid in October, 1989.

For 1990, earnings from telephone operations are expected to increase modestly, reflecting strong growth in access lines and demand for the company's network services, offset by rate cuts. Earnings from electric utilities could be off slightly. Losses from cellular operations should begin to decrease, reflecting a rapid growth in the customer base and revenues. Interest costs should fall. Share earnings should reflect fewer shares.

Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	282	257	344	318
Jun.	298	267	363	341
Sep.	303	287	382	348
Dec.	---	284	387	364
	---	1,095	1,476	1,370

Revenues for the nine months ended September 30, 1989 rose 8.9%, year to year. Operating income fell 22%. After sharply higher interest expense, a pretax loss of $420,000 contrasted with income of $120.9 million. After tax items, net income was $2.4 million ($0.03 a share), versus $88.6 million ($1.37). Results for the 1989 interim exclude income related to discontinued operations of $3.65 a share and a special credit of $0.19.

Important Developments

Oct. '89— CNT announced that its cable television subsidiary had sold its CATV operations in Illinois to Jones Intercable Inc. for $340 million. Earlier, CNT sold its CATV properties in central Florida, Michigan and Ohio. CNT has definitive agreements to sell its CATV properties in Kentucky and southeastern Florida; the sale of those two CATV operations was expected to be completed in the fourth quarter of 1989. Earlier, CNT revised its estimate of the after-tax gain on the sale of its cable television operations to $440 million (previously estimated at $525 million) due to revisions in certain accounting estimates. In March, 1989 Centel reached a definitive agreements to sell its six cable operations for more than $1.4 billion. Net proceeds, after transaction costs and taxes, were expected to approximate $750 million.

Next earnings report expected in early February.

Business Summary

This company (formerly Central Telephone & Utilities Corp.) operates the 11th largest telephone system in the U.S. The company is also one of the largest providers of cellular mobile telephone service in the U.S, and operates electric utilities. Segment contributions (operating profits in million $) in 1988:

	Revs.	Profits
Telephone	78%	$222.2
Cellular	5%	-8.3
Electric	15%	31.5
Other	2%	-14.0

At 1988 year-end the telephone companies served 1,503,192 customer lines, up 5.6% from a year earlier, in Florida, Illinois, Iowa, Minnesota, Nevada, North Carolina, Ohio, Texas and Virginia.

Centel Cellular Co. was significantly enlarged with the October, 1988 acquisition of cellular mobile communications and paging operations of United TeleSpectrum Inc. Following that acquisition, Centel had operating control in 40 markets with a total population of 13 million, making Centel second in total number of markets served.

Electric utilities operations in Colorado and Kansas served 135,886 customers at 1988 year-end, unchanged from the prior year.

Centel planned to sell its cable television and business systems operations; consequently, those operations were classified as discontinued as of 1988 year-end.

Dividend Data

Dividends have been paid since 1939. A dividend reinvestment plan is available.

Summary

This northern Ohio utility holding company is emerging from an extensive nuclear construction program. In January, 1989 the Ohio PUC approved a rate settlement agreement resolving rate and prudency issues for the company's Perry 1 nuclear plant, the Beaver Valley 2 nuclear plant, and the Davis-Besse nuclear facility. Following the rate settlement, the $0.40 quarterly dividend (cut 38% in early 1988) is projected to be maintained. In their report on the company's 1988 financial statements, auditors noted uncertainties associated with the 58% completed Perry 2 nuclear plant.

Current Outlook

Share earnings for 1990 are projected at $2.30, up from the $2.15 estimated for 1989.

The quarterly dividend, cut 38% to $0.40 from $0.64 with the May, 1988 payment, is projected to be maintained at $0.40.

Share earnings for 1989 through 1991 will reflect increased rates due to the January, 1989 rate settlement, and are projected to approximate the earnings cap specified by the 1989 settlement. CX's earnings quality will be materially improved. The company's last remaining regulatory issue is the unfinished Perry 2 nuclear plant. CX may resume construction of the Perry 2 plant due to power requirements projected for the Midwest and East Coast.

Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	555	507	487	484
Jun.	577	483	484	443
Sep.	638	587	561	521
Dec.	---	461	413	470
	---	2,038	1,946	1,917

Revenues for the nine months ended September 30, 1989 rose 12%, year to year, owing primarily to higher rates. After a less rapid increase in operating expenses, operating income was up 50%. However, following a 38% decline in nonoperating income due mostly to a change in the accounting treatment of deferred operating costs and carrying charges, and substantially higher Federal income taxes in the current period, net income was held to a 13% gain. Share earnings were $1.81, versus $1.60. Earnings for the 1988 period exclude a $0.20 a share gain from the cumulative effect of an accounting change.

Important Developments

Nov. '89— CX reported that for the 1989 third quarter total electric sales declined 5.9% from those in the year-earlier period. Residential electric sales decreased 7.9%, mostly owing to the reduced use of air conditioning due to more normal summer temperatures. Commercial sales increased 1.7%, while industrial sales fell 6.2%, and other electric sales were off 27%.

Next earnings report expected in late January.

Business Summary

Centerior Energy, formed in 1986 through the merger of Cleveland Electric Illuminating Co. and Toledo Edison Co., supplies electricity and to a lesser extent gas to some 2.6 million people in northern Ohio. In recent years the industrial economy in Ohio has experienced a turn-around, led primarily by the steel industry. Also, commercial construction has been strong. Electric revenues by customer class in past years (1985 pro forma):

Revenues	1988	1987	1986	1985
Residential	31%	33%	31%	31%
Commercial	26%	28%	27%	27%
Industrial	33%	36%	35%	37%
Other	10%	3%	7%	5%

Peak load in 1988 was 5,673 mw and capability at year-end 1988 totaled 6,677 mw for a capacity margin of 15%. Internal generation in 1988 was derived from coal 62%, nuclear 28% and other 10%. CX owns 51% of the Perry nuclear project, which entered commercial operation in November, 1987. CX has access to 44.4% of the Beaver Valley 2 nuclear station, which also entered commercial service in November, 1987. The company also owns the Davis-Besse nuclear plant. In January, 1989 the Ohio PUC approved a settlement agreement resolving rate and disallowance issues with the three nuclear plants. As a result of the settlement, CX wrote off some $534.4 million, pretax ($2.48 a share, net) of disallowed projects costs retroactive to 1988's fourth quarter.

Dividend Data

The merged company initiated common dividends in mid-1988. A dividend reinvestment plan is available.

Amt. of Divd. $	Date Decl.	Ex-divd. Date	Stock of Record	Payment Date

0.40	Sep. 26	Oct. 16	Oct. 20	Nov. 15'89

Next dividend meeting: early Jan. '90.

Finances

In their report on the company's 1988 financial statements auditors noted the existence of uncertainties associated with Perry 2 nuclear plant. The company has not decided whether to resume construction or to cancel the 58% completed project. CX had invested some $867.0 million in the plant, as of June 30, 1989.

Nov. 27'89	1989					
33⅞	41⅞-27¼	10	0.40	1.2%	B+	1.07

Summary

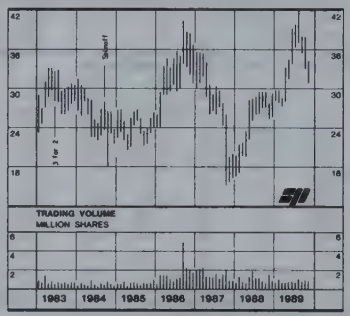
Centex is a major homebuilder, and has operations in construction products (cement, aggregates, readymix concrete and gypsum wallboard) and general construction. Sales and earnings are very sensitive to cyclical economic fluctuations, and especially to the level of mortgage interest rates.

Current Outlook

Earnings for the fiscal year ending March 31, 1990 are estimated at $3.70 a share, compared with the $2.64 of fiscal 1988-9.

The $0.10 quarterly dividend will likely be raised in 1990.

Homebuilding revenues are expected to increase in fiscal 1989-90, reflecting a rising backlog and relatively moderate mortgage interest rates. The general construction segment should do well. Cement prices will continue to be hampered by import competition.



Revenues (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Jun.	465	439	368	347

Dec.	---	462	354	302
Mar.	---	487	387	303
	---	1,845	1,460	1,304

Revenues for the six months ended September 30, 1989 rose 9.8%, year to year, reflecting strong gains in homebuilding. Revenues from the general construction and construction products segments were down. Margins widened, and pretax earnings increased 60%. After taxes at 25.1%, versus 33.9%, net income was up 81%. Earnings per share were $2.01, compared with $1.13.

Common Share Earnings ($)

Mar.	E0.80	0.87	0.33	0.39
	E3.70	2.64	1.50	2.47

Important Developments

Oct. '89— The company said that the backlog of homes sold but not closed as of September 30, 1989 was 3,012 units, up 29%, year to year. The backlog of uncompleted construction contracts was $1.0 billon, up 4%. There were 1,991 home closings in the fiscal second quarter, up 21%, year to year.

Feb. '89— The company announced the completion of a joint venture with Lone Star Industries to produce cement at Laramie, Wyo.

Dec. '88— CTX invested $26 million to acquire four insolvent savings and loan associations in Texas. The thrifts have total assets of approximately $675 million.

Next earnings report expected in late January.

Business Summary

Centex Corp. is one of the nation's largest homebuilders, and is also engaged in real estate, general building construction, and cement production. Oil and gas operations were spun off to shareholders in September, 1984. Business segment contributions in fiscal 1988-9:

	Revs.	Profits
Homebuilding	42%	66%
General construction	50%	18%
Construction products	7%	16%
Savings and loan	1%	---

CTX is among the largest multi-market onsite housing producers in the U.S. Single-family detached homes constitute the majority of housing sales, but the percentage of multi-family units is increasing. Closings in fiscal 1988-9 were 6,539 units, up from 5,296 the year before.

The general construction operations build a range of structures including office buildings, hospitals, hotels, airport terminals, condominiums, museums and commercial and industrial buildings.

The construction products division includes four cement plants in Texas, Nevada, Wyoming and Illinois, and other operations producing aggregates, readymix concrete and gypsum wallboard.

Dividend Data

Dividends were initiated in 1973. A "poison pill" stock purchase right was adopted in 1986.

Amt. of Divd. $	Date Decl.	Ex-divd. Date	Stock of Record	Payment Date
0.10	Feb. 15	Mar. 13	Mar. 17	Apr. 6'89
0.10	May 18	Jun. 8	Jun. 14	Jul. 6'89
0.10	Aug. 17	Sep. 8	Sep. 14	Oct. 5'89
0.10	Nov. 20	Dec. 8	Dec. 14	Jan. 5'90

Next dividend meeting: mid-Feb.'90.

Finances

Revenue from single-family projects is recognized as homes are completed and title passes. Revenues from sales of condominium units and from long-term construction contracts are usually reported on a percentage of completion method.

Capitalization

Long Term Debt: $138,050,000.

Summary

This medium sized utility serves portions of central and southern Illinois, with the major portion of revenues derived from electric service and the balance natural gas. Almost all of the company's power generation is provided by coal-fired plants. No additional generating capacity is planned until the late 1990s. The company plans to reorganize as a holding company in order to achieve higher returns in unregulated businesses.

Current Outlook

Earnings for 1990 are estimated at $2.40 a share, up from the $2.35 likely for 1989.

The $0.45 quarterly dividend is the minimum expectation.

Earnings for 1990 are expected to increase slightly, principally reflecting greater electric kwh sales to industrial customers due a strong regional economy, and negligible increases in operating expenses as no plant outages are scheduled. One major uncertainty is whether regulators will allow CIP to retain the benefits of a lower Federal income tax rate for 1989. All of Central Illinois' capital requirements for 1989-1993 are expected to be met from internally generated funds.

Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	162.8	165.0	153.5	163.4
Jun.	133.1	131.6	135.3	140.1

Important Developments

Oct. '89— In its third quarter earnings release, CIP said that since January, 1988 revenues collected subject to refund total $41 million (excluding related interest). If the entire amount was refunded, including related interest expense, earnings for common stock would be reduced by $26.8 million ($0.78 a share).

Jul. '89— Central Illinois said that a contract agreement had been reached with the labor union which represents about 950 division operations and certain power station employees. The three year contract will remain in effect through June 30, 1992. Another contract, with a labor union which represents some 500 power station employees expired June 30, but both parties have agreed to extend the contract from meeting to meeting.

Next earnings report expected in early February.

Business Summary

Central Illinois Public Service supplies electricity and natural gas in rural central and southern Illinois. Wholesale power is furnished to rural electric cooperative and municipal systems.

Electric operations accounted for 81% of revenues and 96% of operating income in 1988, and gas 19% and 4%, respectively. Electric revenues by class of customer in recent years:

	1988	1987	1986
Residential	40%	39%	37%
Commercial & industrial (small)	17%	17%	17%
Commercial & industrial (large)	36%	36%	35%
Other	7%	8%	11%

Over 99% of electricity in 1988 was generated by CIP's five coal-fired plants. Gross peak load in 1988 was 2,108 mw, and capacity at time of peak was 2,680 mw, for a capacity margin of 21.3%. Electric sales in 1988 were 7,444 million kwh, up 2.1% from those of 1987.

CIP has no electric generating units under construction. Capacity is expected to meet customer demand into the 1990s.

Dividend Data

Dividends have been paid since 1947. A dividend reinvestment plan is available.

Summary

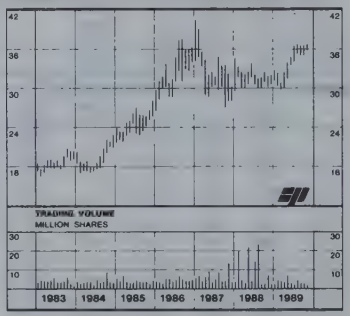
This Texas-based utility holding company has a 25.2% interest in the South Texas nuclear project. Unit 1 was placed in commercial operation in 1988's third quarter and unit 2 began commercial operation late in 1989's second quarter. Rate proceedings associated with the South Texas nuclear project are expected to be completed in mid-1990 and should be reasonably supportive.

Current Outlook

Share earnings for 1990 are projected at $3.50, up from the $3.13 estimated for 1989.

The $0.65 quarterly dividend may be increased some 4% with the February, 1990 payment.

Share earnings for 1990 will benefit from higher kwh sales and increased rates following the conclusion of the South Texas nuclear project rate case, expected to be completed by mid-year. The longer-term outlook is enhanced by the completed construction program and favorable regulatory prospects.



Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	576	559	542	587
Jun.	598	590	582	619
Sep.	764	794	748	800
Dec.	---	569	564	550
	---	2,512	2,436	2,555

Revenues for the nine months ended September 30, 1989 declined fractionally (0.3%), year to year. Despite increased production costs, deferred operating charges associated with the South Texas nuclear project led to a 2.7% gain in operating income. However, after lower AFUDC, net income fell 14%. Share earnings were $2.73, compared with $3.15.

	E3.13	3.43	3.92	3.75

Important Developments

Nov. '89— CSR said that its Southwestern Electric Power subsidiary intends to purchase any and/or all of its $70.69 million outstanding 11.375% First Mortgage Bonds, due 2015. The offer would be funded, at least in part, by proceeds from the subsidiary's late October sale of $50 million of 9.125% First Mortgage Bonds, due 2019.

Sep. '89— On September 1 CSR began collecting $39 million annually, subject to refund, in interim rates on its South Texas nuclear project. Also, the company was proceeding with its South Texas rate case filed with the PUC of Texas in February, 1989. In July the PUC staff recommended a first-year increase of $106 million, as opposed to the $154 million first-year increase CSR requested. A final decision on permanent rates is expected from the Texas PUC in mid-1990.

Next earnings report expected in late January.

Business Summary

Central & South West Corp. is an integrated holding company. Its subsidiaries, Central Power & Light, Public Service of Oklahoma, Southwestern Electric Power, and West Texas Utilities provide electricity to more than four million people in Texas, Oklahoma, Louisiana and Arkansas.

Revenues	1988	1987	1986	1985
Residential	36%	37%	36%	33%
Commercial	26%	27%	27%	25%
Industrial	22%	24%	26%	27%
Other	16%	12%	11%	15%

Gas accounted for some 45% of electric generation in 1988, coal and lignite 53%, and nuclear 2%. Peak demand in 1988 was 10,138 mw and system capability totaled 13,563 mw for a capacity margin of 25%.CSR owns about 25.2% of the two unit 2,500 mw South Texas nuclear project.

Much of CSR's regional economy is dependent on the soft oil and gas industry. Load from exploration and production customers remains depressed. Petrochemical production has been strong and refining has been improving. CSR projects system kwh sales to increase some 2.4% annually over the next 5 years.

The company has considered acquiring a fifth operating utility. In 1988 CSR held preliminary discussions with the City of San Antonio about buying the city's municipal utility system. The City of San Antonio has reported it does not anticipate acting on a possible sale before 1991.

Dividend Data

Dividends have been paid since 1947. A dividend reinvestment plan is available.

Summary

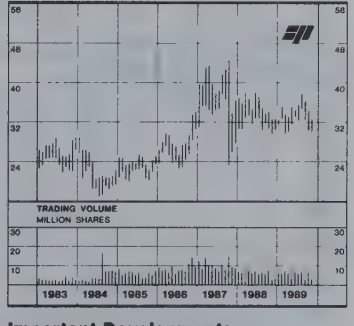
This company is one of the world's largest paper producers, with important positions in pulp, printing and writing papers, and newsprint. CHA is also a major producer of lumber, plywood and other building materials. Recent earnings have benefited from relatively high paper and wood products prices, and prospects for 1990 are generally favorable, although a slight decline in profits is expected.

Current Outlook

Earnings for 1990 are projected at $4.40 a share, compared with the $4.60 estimated for 1989.

The quarterly dividend should remain at $0.27½.

Paper sales should continue strong in 1990 as long as the general economy avoids a recession. Building products sales should be helped by strong prices stemming from an industry-wide shortage of timber caused by environmental lawsuits that have reduced the logging of Federal timber. Earnings should benefit from continuing cost reduction programs.



Net Sales (Million $)

Quarter:	1990	1989	1988	1987
Mar.	---	1,289	1,266	1,097
Jun.	---	1,289	1,262	1,161
Sep.	---	1,318	1,286	1,199
Dec.	---	---	1,314	1,157
	---	---	5,129	4,615

Sales for the nine months ended September 30, 1989 rose 2.2%, year to year, reflecting gains in both the paper and wood products segments. Margins narrowed in paper, and pretax earnings declined 0.9%. After taxes at 41.2%, versus 40.5%, net income was down 2.1%. Per-share earnings were $3.48, compared with $3.54.

Important Developments

Nov. '89— The company said that it had repurchased 2.8 million of its common shares under a 10 million share buyback program authorized in May.

Nov. '89— CHA estimated capital spending for 1990 and 1991 would be approximately $900 million per year, little changed from the capital spending level of 1989.

Oct. '89— The company said third quarter earnings had been hurt by production problems following the rebuild of a coated paper machine at the Bucksport, Me. paper mill.

May '89— CHA said that would close its plywood mill in Newberry, S. C. if a suitable buyer could not be found. The mill, which employs 339 persons, had been consistently unprofitable.

Next earnings report expected in mid-January.

Business Summary

Champion is one of the largest paper producers in the world and is also a significant producer of lumber and plywood. Business segment contributions:

1988	Sales	Profits
Wood products	22%	8%
Paper	78%	92%

Foreign operations, principally in Canada and Brazil, accounted for 19% of sales and 24% of operating income in 1988.

CHA manufactures a wide variety of building products in the U.S. and Canada. Major products include softwood plywood, lumber, hardwood plywood, fir specialties and particleboard.

Paper operations include the production of printing and writing papers, milk cartons, industrial products, envelopes and office products.

Most of CHA's packaging operations were sold to Stone Container Corp. in February, 1986.

The company owns or controls about 6.4 million acres of timberland in the U.S. and significant other timber resources in Canada and Brazil.

Dividend Data

Dividends have been paid since 1940. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

Summary

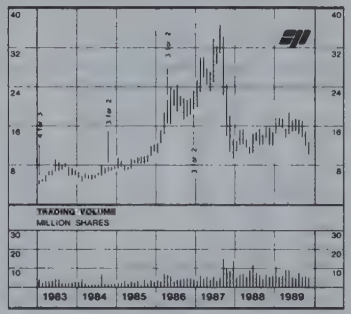
This retailer operates nearly 1,000 women's specialty stores featuring moderately priced apparel in junior, misses and women's sizes. Earnings growth, which was rapid in the mid-1980s as a result of an aggressive store opening program, has moderated. New store openings and cost controls should allow earnings to continue to improve in 1990-1.

Current Outlook

Earnings for the fiscal year ending February 2, 1991, are projected at $1.00 a share, versus the $0.82 estimated for 1989-90.

The quarterly dividend should remain at $0.03 a share.

Sales for 1990-1 should increase moderately, reflecting new stores and modest same-store gains. Gross margins should benefit from fewer markdowns and promotions, offset by higher buying and occupancy costs. Expense ratios should improve, reflecting a decline in advertising outlays. Acquisitions are a possibility.



Net Sales (Million $)

Important Developments

Nov. '89— During the first 39 weeks of 1989-90, the company opened 80 new stores, bringing the total number in operation to 990; an additional 29 stores were expected to open by year-end, bringing the total to 1,012. In addition, the company will expand or remodel about 50 existing stores this year. Management said that operating results for the fourth quarter of 1988-9 were helped by changes in the company's merchandising strategies and the enhancement of its merchandise procurement system. During 1988, the company borrowed $30 million through a private placement at an annual interest rate of 9.3% for 10 years; however, the company expects to continue to finance its growth through internally generated funds.

Next earnings report expected in early March.

Business Summary

Charming Shoppes Inc. operates a chain of women's specialty stores under the tradenames Fashion Bug and Fashion Bug Plus. As of January 28, 1989, a total of 926 stores were in operation, located in 36 states throughout the East, South and Midwest. The greatest concentration of stores was in Pennsylvania, followed by Ohio, Maryland, New Jersey and Illinois. In 1988-9, 107 stores were opened and 21 were closed, following the addition of 176 locations (net) in 1987-8. The stores are located in both enclosed malls and strip shopping centers. Fashion Bug stores range in size from 6,000 sq. ft. to 9,000 sq. ft., while Fashion Bug Plus stores range from 3,000 sq. ft. to 4,500 sq. ft.

The company's Fashion Bug stores sell a wide variety of junior, misses and women's size apparel and accessories at moderate and popular prices. Some outlets are testing girls' and children's wear. Stores sell both brandname merchandise and specially manufactured garments under the company's private labels. The Fashion Bug Plus stores cater primarily to the large-size woman and often adjoin the Fashion Bug stores ("double front" stores with separate entrances).

Charming's wholly owned contracting and buying subsidiary is located in Hong Kong but conducts its operations throughout the world.

The company encourages sales through its own charge account (administered by two outside banks). At 1988-9 year-end, there were 3.2 million charge cards outstanding.

Dividend Data

Cash payments began in 1976. A "poison pill" stock purchase right was adopted in 1989.

Summary

This bank holding company owns New York's second largest bank and the nation's third largest. Chase has an important position in the domestic and international credit markets. Extensive New York retail banking operations are augmented by smaller operations in other states. In September, 1989 CMB announced it would take a third quarter charge of $1.3 billion primarily related to increasing its LDC loan loss reserves. A large loss is expected for 1989. CMB plans to raise over $500 million via a 14 million common stock offering.

Current Outlook

Earnings for 1990 are expected to rebound to $7.50 a share, versus the estimated $8.00 a share loss of 1989.

Dividends should continue at $0.59 quarterly.

CMB's recent restructuring provisions will lead to a large loss in 1989, but earnings prospects for 1990 have been significantly enhanced. The $1.15 billion special provision for LDC debt brings reserves to 46% (from about 29%) of CMB's total $6.2 billion medium and long-term LDC portfolio. This should give CMB greater flexibility in dealing with this situation in the future. CMB had been adding $50 million quarterly to reserves. The provision for problem Arizona real estate assets and the exit from certain securities trading areas should aid future profitability as well. CMB expects to realized approximately $200 million in additional yearly earnings from these steps. Future earnings and book value will benefit from CMB's tax benefits which total about $580 million. CMB's plan to raise some $500 million via a common stock offering, while dilutive, provides additional financial muscle to expand.

Review of Operations

Net interest income for the six months ended June 30, 1989, advanced 5.3%, year to year, reflecting 3.4% growth of earning assets and cash collection of $97 million of interest payments by Brazil (virtually none received in the 1988 period). The net interest margin slipped to 2.02% from 2.33%. The provision for loan losses was flat, at $300 million, and included $100 million for LDC countries. The absence of $311 million from the sale of assets led to a 24% decline in noninterest income. With noninterest expense rising 3.5%, pretax earnings fell 41%. After taxes at 31.5%, versus 24.6% (reflecting higher tax credits), net income was off 47%, to $2.59 a share from $5.53.

Important Developments

Sep. '89— CMB said it would charge third quarter earnings $1.31 billion pretax, reflecting a $1.15 addition to reserves for LDC countrie, a $126 million charge at its Arizona banking unit, and a $38 million charge related to securities trading activities. CMB estimated it would incur a third quarter loss of $1.15 billion. CMB filed a prospectus to sell 14 million common shares.

Next earnings report expected in mid-October.

Business Summary

This company is the parent of Chase Manhattan Bank, the nation's third largest bank, which provides wholesale banking services, including investment banking, trust and capital markets trading, to large corporations worldwide. CMB also provides specialized lending, transaction processing and information services for corporations, governments, and financial institutions. Retail banking (34% of assets) services, including over 4 million credit card accounts, are increasingly important, and are provided through over 400 offices in New York State (including Chase Lincoln First Bank), Arizona, Delaware, Maryland, Ohio and Florida. International operations in 55 countries accounted for 36% of assets in 1988.

Average earning assets during 1988 of $84.1 billion (down 1.6% from 1987) were divided: domestic loans 48%, foreign loans 32%, investment securities 8%, and temporary investments 12%. Average sources of funds were interest-free deposits 15%, other domestic deposits 22%, foreign deposits 31%, short-term borrowings 17%, long-term debt 4%, equity 4% and other 7%.

At year-end 1988 nonperforming loans were $4.3 billion (6.2% of loans), including $2.8 billion of Latin American loans, down from $4.4 billion (6.4%) a year earlier. Net chargeoffs during 1988 were 1.06% of average loans, versus 0.71% in 1987.

Summary

This money center bank, the nation's sixth largest, has traditionally provided worldwide wholesale banking services to large corporations. More recently it has been emphasizing retail banking and lending to smaller companies, augmenting its extensive New York operations with the acquisition of Texas Commerce in 1987 and Horizon Bancorp (New Jersey) in 1989. In the third quarter of 1989 CHL boosted its provision for loan losses by $900 million, resulting in a large loss. Earnings are expected to resume in 1990. In November CHL raised some $423 million through the sale of 14 million common shares.

Current Outlook

Earnings for 1990 could approximate the $5.60 a share, in contrast to the deficit of $8.50 a share projected for 1989.

Dividends should continue at $0.68 quarterly.

While a return to profitability is expected in 1990, the rebound could be tempered by additional reserve boosting. LDC loan reserves were increased by $600 million in 1989's third quarter to $1.84 billion (equal to 42% of CHL's medium/long-term LDC loans); however, economic and political considerations could mandate increases. Sluggish loan demand in New York and Texas should restrict loan growth in 1990. The recent sale of 14 million common shares strengthens the balance sheet, but is dilutive to earnings. CHL has approximately $500 million in tax benefits to shield future earnings.

Review of Operations

Net interest income for the nine months ended September 30, 1989 declined 4.0%, year to year, as average earning assets were 4.0% lower. The provision for loan losses was 3.8-fold higher, at $1.07 billion, reflecting higher reserves for LDC and Texas real estate loans. Noninterest income fell 3.9%. With noninterest expense up 8.5%, a pretax loss of $531 million was posted, against income of $602 million. After taxes of $47.2 million, versus taxes at 22.8%, the net loss was $578 million ($9.75 a share), versus net income of $465 million ($7.36).

Important Developments

Nov. '89— CHL sold through underwriters 14 million common shares (excluding 2.1 million shares to cover over-allotments) at $31.25 a share. Proceeds to the company approximated $423 million.

Oct. '89— In releasing results for the third quarter, CHL said that the loss included a $600 million provision for loan losses to LDC countries, and a $300 million provision at its Texas Commerce Bancshares subsidiary. The net loss for the quarter was about $825 million, or $12.89 a share. At September 30, 1989 the adjusted additional retained deficit of Texas Commerce Bancshares was $608.3 million, or $17.62 per Class B common share. Management's nonbinding intent is to pay dividends on Class B shares of at least 28% of CHL's rate.

Next earnings report expected in mid-January.

Business Summary

This holding company (formerly Chemical New York Corp.) is the parent of Chemical Bank, the nation's sixth largest, with some 220 branches in the New York metropolitan area, Texas Commerce Bank (acquired in 1987), the second largest bank in Texas, and Chemical Bank New Jersey (acquired in 1989), with 128 branches. Foreign operations accounted for 19% of assets in 1988.

Average earning assets during 1988 of $67.2 billion were divided: commercial loans 29%, other domestic loans 24%, international loans 17%, investment securities 15%, money market assets 15%. Average sources of funds were demand deposits 16%, other domestic deposits 36%, foreign deposits 18%, short-term borrowings 18%, long-term debt 3%, equity 4%, and other 5%.

At year-end 1988 nonperforming assets were $3.5 billion (8.2% of loans and related assets), including $1,341 million of LDC loans, against $3.3 billion (6.6%) a year earlier. The reserve for loan losses was 4.91% of loans (62% of which was against LDC loans), versus 4.15%. Net chargeoffs during 1988 were 0.70% of average loans, versus 0.86% in 1987.

Dividend Data

Dividends have been paid since 1827. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1989.Common dividends in the past 12 months:

Summary

This company, 81%-owned by Waste Management, is the largest provider of comprehensive hazardous waste management services in the U.S., including transportation, treatment, resource recovery and disposal services. Integrated site remediation services and low-level radioactive waste management services are also provided. Continued strong earnings growth is projected for the next several years, reflecting the favorable prospects for the company's services. A 2-for-1 stock split is pending.

Current Outlook

Earnings for 1990 may rise to $1.75 a share from the $1.45 estimated for 1989, unadjusted for the pending 2-for-1 stock split.

The dividend has been raised 20%, to the equivalent of $0.06 quarterly from $0.05, with the October, 1989 payment.

Revenues for 1990 are projected to continue to advance strongly, primarily reflecting continued strength in the base business of hazardous waste treatment, resource recovery and disposal services. The increase will stem from aggressive capacity expansion and from a growing number of wastes excluded from land disposal. Gains are also seen for the site remediation business as more Superfund contracts are awarded. Margins will benefit from higher prices. Long-term prospects are enhanced by the strong growth prospects seen for hazardous waste management services stemming from more stringent regulations, greater public awareness of environmental contamination, and expansion efforts into other high-growth areas such as asbestos control and abatement.

Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	189.8	142.4	113.7	85.3
Jun.	221.8	155.1	135.2	99.3
Sep.	---	184.9	156.1	111.2
Dec.	---	217.8	153.6	122.3
	---	700.2	558.6	418.1

Revenues for the six months ended June 30, 1989 rose 38%, year to year, reflecting strength in the company's base hazardous waste treatment and disposal business and in the remediation projects division. Margins narrowed, and pretax income advanced 31%. After taxes at 38.9%, versus 38.7%, net income was up 30%, to $0.63 a share from $0.49.

Important Developments

Aug. '89— CHW reported that its Chem-Nuclear Systems subsidiary had signed contracts to design, build and operate low-level radioactive waste disposal facilities in Illinois and North Carolina and was selected as the preferred bidder for a similar project in Pennsylvania. The three states will be the host states serving the low-level radioactive waste disposal needs of a total of 14 states which constitute the three regional compacts in the U.S. producing the greatest volume of such waste.

Next earnings report expected in mid-October.

Business Summary

Chemical Waste Management (81%-owned by Waste Management, Inc.) is the largest provider of comprehensive hazardous waste management services in the U.S. Its hazardous waste services include transportation, treatment, resource recovery, and disposal. The company also provides integrated site remediation services through its Environmental Remedial Action (ENRAC) division and low-level radioactive waste management services. Contributions to revenues in recent years:

	1988	1987
Transportation	10%	11%
Treatment, resource recovery and disposal	63%	69%
Special services (including ENRAC)	27%	20%

Chemical wastes handled by CHW include industrial byproducts and residues that have been identified as hazardous, as well as other materials contaminated with a wide variety of chemical substances. The company operates chemical waste treatment, storage and disposal facilities in 15 states serving principally commercial and industrial customers, in addition to other waste management companies and governmental entities.

Chemical waste may be collected from customers and transported by CHW or delivered by customers to the company's facilities. CHW operates a fleet of some 275 tractors and 565 trailers from 20 transportation centers. The company also operates several facilities at which waste collected from or delivered by customers is analyzed and consolidated prior to further shipment.

Treatment and resource recovery operations involve processing chemcial wastes through thermal, physical, chemical or other treatment methods. CHW operates a rotary kiln incinerator in Chicago capable of PCB destruction. Four incinerators are operated in Sauget, Illinois, including one unit scheduled to be commercially available in the second half of 1989. The company has also begun construction of a rotary kiln incinerator at its Port Arthur, Texas, facility, and has under development proposals to construct incinerators at three of its other facilities. CHW also has eight secure land disposal facilities. In addition, the company holds a 49% interest in The Brand Companies, a leading provider of asbestos abatement services.

Dividend Data

Dividends were initiated in 1987. A dividend reinvestment plan is available.

Amt. of Div. $	Date Decl.	Ex-divd. Date	Stock of Record	Payment Date
0.04	Nov. 28	Dec. 15	Dec. 21	Jan. 5'89
0.04	Feb. 13	Mar. 16	Mar. 22	Apr. 6'89

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 6'89	1989					
64⅝	69⅜-45⅜	17	2.80	4.3%	A-	0.79

Summary

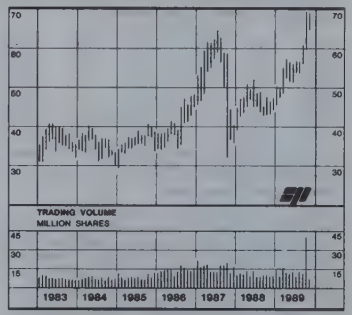
This worldwide oil and chemical concern is strengthening its U.S.-based integrated energy operations. In 1988's fourth quarter the company acquired substantial natural gas properties in the Gulf of Mexico, making CHV the largest gas producer in the U.S. The company is one of the largest leaseholders in the Gulf of Mexico and holds extensive acreage in California and Alaska. Financially, CHV has successfully pared its debt level from the 1984 acquisition of Gulf Corp. The company's expanding exploration and production potential coupled with its high refining and marketing profile enhances prospects.

Current Outlook

Share earnings for 1990 are estimated at $5.00, compared with the $4.50 projected for 1989.

The $0.70 quarterly dividend is the minimum expectation.

Revenues for 1990 should show some modest improvement, reflecting greater natural gas production and increased gas prices. Downstream margins are expected to firm as crude feedstock prices may give back some increases from 1989. Financing costs are projected to narrow.



Sales & Oper. Revenues[1] (Billion $)

Quarter:	1989	1988	1987	1986
Mar.	7.54	7.09	6.48	8.45
Jun.	8.02	6.98	6.89	6.48
Sep.	7.78	6.92	7.45	5.65
Dec.	---	6.73	7.28	5.67
	---	27.72	28.11	26.25

Revenues for the nine months ended September 30, 1989 rose 11%, year to year, reflecting higher crude oil prices and increased natural gas volumes. Due to a more rapid increase in production costs and absence of 1988's asset sales, pretax income declined 3.9%. After taxes at 52.1%, versus 35.2%, which included tax benefits from the asset sales, net income fell 29%. Share earnings were $3.31, compared with $4.66.

Dec.	E1.19	0.51	0.64	d0.25
	E4.50	5.17	2.94	2.09

Important Developments

Nov. '89— U.S. exploration and production operating earnings in 1989's third quarter were improved over a year earlier due to higher crude oil prices, increased liquids production, and a sharp increase in natural gas production. Operating earnings from the U.S. refining and marketing business were restricted by higher feedstock costs, although benefiting from increased sales volumes. Earnings from operations in the international petroleum segment were aided by higher crude oil prices. In the chemical business, earnings from operations were limited by a reduction in prices for plastic resins. For the nine months ended September 30, 1989 overall earnings comparisons were limited by the absence of a year-earlier net nonrecurring gain of $343 million. The principal component of the gain was the sale of properties in Angola.

Next earnings report expected in late January.

Data as orig. reptd. 1. Incl. equity in earns. of nonconsol. subs. 2. Reflects accounting change.

Business Summary

Chevron (formerly Standard Oil of California) is one of the major integrated international oil companies.

Oper. Profits	1988	1987
U.S. expl. & prod.	1%	28%
U.S ref. & mkt.	30%	8%
Foreign expl. & prod.	34%	41%
Foreign ref. & mkt.	2%	4%
Chemicals	21%	18%
Minerals	12%	1%

In 1988 worldwide gross production of crude oil and natural gas liquids averaged 1,309,000 barrels a day, production of natural gas 2.7 billion cubic feet a day, refinery input 1,907,000 b/d, and petroleum product sales 2,410,000 b/d.

Net proved reserves at the 1988 year-end stood at 3,317 million barrels of crude, condensate, and natural gas liquids and 10,710 billion cubic feet of natural gas. CHV sold its 16% stake in AMAX, a hard minerals company, in May, 1988 and in October, 1988 CHV bought substantial crude oil and natural gas reserves from Tennneco Inc.

Finances

CHV restated earnings for 1987 and 1986 to conform with the provisions of SFAS 96. The change reduced retained earnings by $1.88 billion, to $11.88 billion. The restatement resulted in a $1.4 billion ($4.12 a share) net loss in 1986, but in an increase in 1987 net income to $1.25 billion ($3.65 a share). Changes are shown here from their January, 1988 effective date; prior years are not restated. The changes mainly reflect the recording of deferred taxes related to the company's 1984 $13.3 billion acquisition of Gulf Crop. The changes would not affect CHV's liquidity.

Dividend Data

Dividends have been paid since 1912. A dividend reinvestment plan is available.

Chicago Milwaukee

NYSE Symbol CHG

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 29'89	1989					
146	147½-131	10	[1]---	[1]---	B	0.40

Summary

CHG is a closed-end, nondiversified management investment company. Its primary subsidiary, CMC Real Estate Corp. (formerly Chicago, Milwaukee, St. Paul, and Pacific Railroad Co.), emerged from bankruptcy in 1985. With some $300 million in cash and equivalents, CHG primarily invests in U.S. Government securities. In early 1989 a lawsuit was filed which alleged, among other things, that a special $20 per share dividend paid by CHG in December, 1988 and a plan to spin off CHG's real estate business were in violation of the liquidation preference afforded to preferred shareholders. CHG called the suit "totally without merit," and added that it still intends to spin off the real estate business.

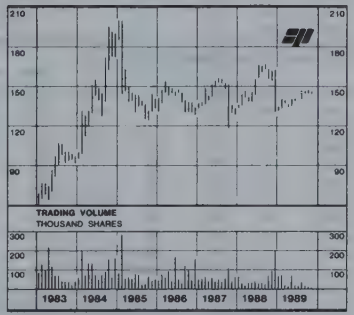
Business Summary

Chicago Milwaukee is a closed-end nondiversified management investment company, the principal subsidiary of which is CMC Real Estate Corp. (formerly Chicago, Milwaukee, St. Paul and Pacific Railroad Co.), which is engaged in the management, sale and development of former railroad property. Primarily through the sale of assets since 1981, CHG had $297.4 million in cash and equivalents at June 30, 1989, which it plans to continue investing primarily in U.S. Government securities. After reviewing an acquisition program, directors decided in mid-1988 that CHG would not actively seek acquisitions.

Revenues in 1988 consisted of interest and gains on investments (75%), property sales (14%), timber sales (6%) and rental income (5%).

At December 31, 1988 properties consisted of approximately 30,000 acres of scattered parcels in 12 states, including former rail yards, roundhouses, special purpose buildings, railroad right-of-way and track, vacant land in both rural and urban areas, several old railroad depots, and 910 acres of industrial sites located primarily in the state of Washington. The company also owned approximately 34,000 acres of timberland, most of which was also located in Washington (sold in January, 1989).

In 1977 CMC filed a petition for reorganization under Section 77 of the Bankruptcy Act. CMC emerged from bankruptcy in November, 1985 following the sale of certain timber and railroad properties for a total of $368.5 million in cash, and control of the remaining assets of the railroad was returned to shareholders. The company's food service equipment, food distribution, concrete paving, and metal fabricating businesses were classified as discontinued operations in 1985, and were subsequently sold for over $92 million.



Important Developments

Nov. '89— CHG said that once the period for a notice published by the SEC under the Investment Co. Act of 1940 concerning its application to spin off its real estate business expires, CHG will hold a meeting to allow shareholders to vote on the proposed spin off. When CHG announced its intention to spin off the real estate business in February, a suit alleged, among other things, that a special $20 a share dividend paid in December, 1988 and its spin off plan violated the liquidation preference afforded preferred shareholders. Separately, in February CHG said it will develop a $300 million complex in Milwaukee's Menomee Valley.

Mar. '89— CHG said that it had received 309,070 of its common shares (12.6% of those outstanding) in a modified "Dutch auction" for up to 400,000 shares at $139.50 each.

Next earnings report expected in late December.

Dec.		13.2	8.5	19.1
		41.9	102.1	44.2

Revenues for the nine months to September 30, 1989 advanced 73%, year to year, reflecting the sale of Milwaukee Land Co. timberland for $23.9 million in the first quarter. Boosted by a net gain of $22.7 million from the sale, net income rose to $26.2 million from $11.6 million. After preferred dividends, share earnings were $11.56, versus $4.33, before tax loss carryforward credits of $5.57 a share, versus $2.92.

		7.00	12.70	5.87

Finances

In January, 1989 CHG sold its 31,500 acres of timberland in Washington (with a book value of $768,000) to John Hancock Mutual Life Insurance Co. for $23.9 million.

At September 30, 1989 the reserve for claims and liabilities under CHG's Plan of Reorganization was $12 million; cash and marketable securities totaled $341.6 million at September 30, 1989.

In September, 1987 CHG sold its remaining 85 miles of commuter railroad line and related facilities to the Regional Transportation Authority of Illinois for $67.9 million.

Dividend Data

No regular common dividends had been paid since 1967. However, a special dividend of $20 per share, representing return of capital, was paid December 31, 1988 to holders of record December 27. Dividends on the $5 preferred were initiated in mid-1988.

Dec. 6'89	1989					
35	44 1/8-20 3/8	NM	---	---	B	1.11

Summary

Under an agreement reached in May, 1989, Warner Communications (WCI) will spin off its 40% interest in CCN's BHC unit to shareholders. In July CCN, which owned some 24% of WCI, received about $1.6 billion (a net gain of $454 million) in the first step of Time Inc.'s acquisition of WCI. CCN's remaining interest in WCI will be acquired by Time for a combination of securities, for a net gain of about $245 million. Chris-Craft is particularly interested in acquiring media, entertainment and communications assets with the proceeds.

Current Outlook

Earnings for 1990 are tentatively projected at roughly $3.00 a share, versus 1989's estimated $29.00, which includes about $28.00 in capital gains.

No cash dividends have been paid since 1969.

Revenues in 1990 are expected to show only modest improvement, with small gains in TV advertising. Profits for TV will be impaired by advances in programming costs. The substantial capital gains in 1989 will overshadow the strong investment income anticipated in 1990, leading to an unfavorable earnings comparison.

Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	58.8	53.1	49.9	45.1
Jun.	71.1	67.5	64.6	59.6
Sep.	63.0	58.7	56.4	51.7
Dec.		71.6	70.6	67.6
		250.8	241.3	224.0

Revenues for the nine months ended September 30, 1989 rose 7.8%, year to year. Operating income plunged 65%, largely due to higher programming costs. After other items, including sharply higher income associated with the investment in WCI, net income advanced to $467,599,000 ($19.07 a share) from 10,343,000 ($0.42; restated).

		0.88	0.43	0.61

Important Developments

Aug. '89— CCN said that Warner Communications (WCI) will spin off WCI's 40% equity interest in CCN's BHC Inc. to shareholders under an agreement reached in May which settled a dispute over the interpretation of shareholder agreements between WCI and CCN. In July CCN received about $1.46 billion as part of the first step of Time Inc.'s $14 billion purchase of WCI. BHC also sold to WCI its 1,304,078 shares of WCI Series B preferred stock for $144.1 million. The two transactions resulted in a net gain of $1.3 billion and, accounted for about $454 million of CCN's third-quarter net income. CCN will record a fourth quarter net gain in the fourth quarter of about $245 million on its remaining WCI interests when Time completes its acquisition of WCI for a package of securities.

Next earnings report expected in late January.

Business Summary

Chris-Craft Industries is primarily engaged in television broadcasting. CCN also produces plastics; its interest in Warner Communications, Inc. is being acquired by Time Inc. Industry segment contributions in 1988:

	Sales	Profits
Television	92%	94%
Industrial	8%	6%

BHC Inc. (57.5%-owned) operates VHF television stations in Los Angeles (KCOP) and Portland, Ore. (KPTV). United Television (UTV), which is 50.4%-owned by BHC, owns and operates three VHF and two UHF television stations: KMSP Minneapolis, KTVX Salt Lake City, KMOL San Antonio, KBHK San Francisco and KUTP Phoenix.

The industrial division manufactures plastic flexible films, water-disposable hospital laundry bags, nonwoven sound control and insulation padding, fiber carpet underlay, latex and plastic flexible foams and foam mattress cores.

Finances

In January, 1984 CCN transferred BHC preferred stock (convertible into 42.5% of BHC's common) to Warner Communications (WCI), and BHC received in return an equity interest in WCI, that through subsequent transactions grew to 23.7% by year-end 1988.In August, 1989 BHC was recapitalized, pursuant to which WCI's preferred stock holdings in BHC were converted into Cl. A stock, having a 40% equity and a 6% voting interest in BHC.

Dividend Data

No cash dividends have been paid on the common since 1969. The following stock dividend was paid on both the common and Class B:

Chrysler Corp.

NYSE Symbol C Options on CBOE (Jan-Apr-Jul-Oct) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 7'89	1989					
20	29⅝-19¼	3	1.20	6.0%	B	1.65

Summary

Although Chrysler's share of the car and truck market declined moderately in the first nine months of 1989, earnings comparisons were boosted by the introduction of several new models to replace the K-car line, increased production of Jeeps and minivans, the absence of 1988's nonrecurring charge for plant closures, and a gain from the sale of Mitsubishi Motors stock. In June Chrysler acquired Thrifty Rent-A-Car System for $262 million, and in July Chrysler announced a $1.0 billion cost cutting program.

Current Outlook

Earnings for 1990 may decline to $5.50 a share from the $5.82 estimated for 1989.

The dividend should continue at $0.30 quarterly.

Industrywide car and truck sales are expected to decline moderately in 1990. However, a more favorable mix of new car models with higher margins, continued strong demand for Jeeps and minivans, a continued rise in export sales, and savings generated by Chrysler's $1.0 billion cost control program should boost operating profits. The absence of 1989's $1.32 a share gain from the sale of Mitsubishi Motors Corp. stock could result in lower net income.

Revenues[1] ($Billion)

Quarter:	1989	1988	1987	1986

	---	35.47	26.28	22.59

Revenues (including Chrysler Financial) for the nine months ended September 30, 1989 increased 8.4%, year to year. Factory vehicle sales declined 1.4% on a 3.4% drop in North American sales. Following a $503 million pretax gain on the sale of Mitsubishi Motors Corp. stock ($309 million or $1.32 a share after taxes), and in the absence of 1988's $150 million pretax provision for plant closings ($93 million or $0.42 a share after taxes), pretax income advanced 67%. After taxes at 38.1%, against 37.9%, net income was up 66%, to $4.38 a share from $2.77.

Important Developments

Oct. '89— Chrysler said that it may close one or two plants because of production overcapacity in the U.S. market.

Sep. '89— Chrysler sold 75 million shares of Mitsubishi Motors Corp. stock (45% of its holdings) for $598 million. An after tax gain of $309 million or $1.32 a share was reported for the third quarter of 1989. The sale cut Chrysler's holdings in Mitsubishi stock to 12.1% from 21.8%, but the company said that it would not affect their 18-year working partnership.

Jul. '89— Chrysler announced a $1.0 billion cost control program which would include an 8% (2,300 person) salaried work force reduction, purchased materials and manufacturing cost cuts, improved product design, and elimination of line and staff redundancies.

Next earnings report expected in mid-February.

Business Summary

Chrysler, the third largest U.S. motor vehicle producer, expanded its automotive operations through the 1987 acquisition of American Motors Corp. and its Jeep/Eagle line of vehicles. The Chrysler Technologies division owns Gulfstream Aerospace, a producer of business jets, and Electrospace Systems, a supplier of electronic systems and services to military, government and commercial customers worldwide. Chrysler Financial provides vehicle and other financing and insurance. In June, 1989 Chrysler acquired Thrifty Rent-A-Car System for about $263 million. Contributions to revenues and net income in 1988:

	Revs.	Net Inc.
Automotive	86%	67%
Financial services	10%	25%
Aerospace	4%	4%
Other	Nil	4%

In 1988 pretax earnings were derived 79% in the U.S., 10% in Canada, and 11% elsewhere.

Various Chrysler, Plymouth, Dodge, and Eagle car models accounted for 11.3% of total domestic registrations (including foreign-built cars) in 1988. The comparable figure for trucks (including Jeeps) was 19.4%. Chrysler has about 5,324 dealers, including 1,263 Jeep/Eagle dealerships.

Of the 2,566,920 cars and trucks manufactured by Chrysler in 1988, 1,726,084 were built in the U.S., 493,531 in Canada, 195,670 in Japan (by 12.1%-owned Mitsubishi Motors), and 151,635 in Mexico and elsewhere.

Dividend Data

Following a four-year hiatus, dividends were resumed in 1984. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1988.

Summary

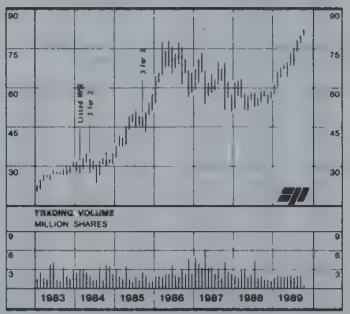
This company is a large, broadly based property-casualty insurance organization, with a better than average underwriting record; it also has interests in life and health insurance and real estate development. Despite an $0.84 a share charge for claims and expenses in connection with the rain insurance program, earnings increased in 1988. While increased competition will restrain profits, a further advance in earnings is expected for 1989 and 1990.

Current Outlook

Excluding "fresh start" tax benefits, net operating earnings for 1989 are estimated at $9.00 a share, compared with 1988's $8.85. Share earnings for 1990 could reach $10.20.

The $0.58 quarterly dividend is the minimum expected.

Intense industrywide competition is expected to continue through 1989, which will limit earnings growth. CB is somewhat insulated from this growing competition because its specialty coverages are expected to continue to attract both unit growth and price increases. While premiums in the aggregate will at best post only modest gains, CB's underwriting prowess should result in only a marginal drop in underwriting profits. Because of premium pressures, growth of cash flow will likely slow, and increases in investment income should moderate. P-C earnings comparisons will also benefit from the absence of 1988's rain insurance settlement, which cost CB $0.84 a share. An expected recovery in the group health area would benefit the life operations. Modest advances in real estate operations are expected. Earnings for 1990 should benefit from a likely firming of p-c insurance rates.



Review of Operations

Total revenues for the six months ended June 30, 1989 rose 6.0%, year to year (1988 restated), primarily reflecting marginally higher property-casualty premiums, a 9.1% rise in life insurance premiums, and a 17% increase in investment income. Total benefits and expenses were up 5.6%, and following realized capital gains of $17.6 million versus losses of $3.5 million, pretax income rose 18%. After taxes at 24.6%, versus 22.3%, net income advanced 14%. Share earnings were $5.02 (including $0.28 in realized capital gains), compared with $4.41 ($0.07 of losses).

Important Developments

Apr. '89— CB reported that property-casualty premiums written in 1989's first half fell 1.9%, while premiums earned edged up less than 1%. The underwriting profit declined to $200,000 from $24.0 million. The combined ratio was 99.8%, versus 97.7%. Life and health profits advanced 57%, to $20.7 million from $13.2 million, while real estate profits increased 19%, to $19.4 million.

Next earnings report expected in late October.

Business Summary

Through subsidiaries, Chubb Corp. is engaged primarily in property-casualty insurance domestically and abroad, life and health insurance and real estate.

In 1988 Chubb wrote $2.77 billion in property-casualty premiums, of which standard commercial lines accounted for 37%, specialty commercial lines 38% and personal lines 25%. Total written premiums in 1988 were divided: fidelity and surety 18%, commercial casualty 17%, commercial multi-peril 16%, ocean and inland marine 6%, commercial auto 3%, other specialty commercial lines 15%, homeowners 12%, personal auto 7%, and other personal lines 6%. The property-casualty group is represented by more than 3,000 independent agents and accepts business on a regular basis from some 370 insurance brokers.

The life and health insurance group is composed of Chubb Life Insurance Co. of America and its subsidiaries, The Colonial Life Insurance Co. of America, United Life and Accident Insurance Co., and Volunteer State Life Insurance Co. and Sovereign Life Insurance Co. of California (acquired 1987). Total life insurance in force at year-end 1988 amounted to $38.3 billion. The life group offers participating and non-participating individual life insurance, as well as group life and health insurance and individual health and annuity contracts on a non-participating basis only. Invested assets of the life and p-c companies totaled $7.1 billion at year-end 1988.

Bellemead Development Corp. is an industrial, commercial and residential real estate development company active in New Jersey and Central Florida. Real estate activities accounted for 4% of revenues in 1988.

Summary

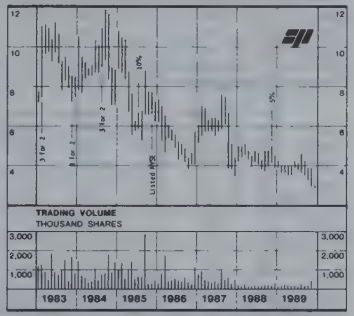
In November, 1989 CHY and Midwest Communications Corp. announced an agreement in principle to merge into a new holding company that would operate CHY and Midwest as separate entities. Pending execution of a definitive agreement, a shareholder vote on the proposal is expected in March, 1990. CHY produces digital electronic graphics equipment and videotape and film editing equipment.

Business Summary

Chyron Corp. manufactures high performance electronic digital titling and graphics equipment used by the television industry, video production and post-production studios, and by educational, training and communication facilities. It also produces computer-assisted videotape editing equipment for use principally by post-production facilities in support of broadcast operations. In 1987 the company developed an editor for the film industry. In 1988 the company formed CMX Laser Systems, Inc. (49%-owned), which rents editing equipment to the film industry. The company also manufactures digital video effects systems and electronic paint systems used in video production.

CHY's electronic digital character graphics equipment utilizes a digital computer and electronic storage to permit an operator to create images and use colors which can either be superimposed upon images being broadcast or be televised alone, and which can be manipulated to create numerous graphic effects. Digital video effects equipment includes systems designed to manipulate video through the twisting and curving of pictures, and to create such simulated effects as a page turning or a flat picture curving into a sphere. The company's digital compositing system creates special effects in digitalized format which allow the user to compose numerous images for overlay onto a video background.

CHY's videotape editing equipment includes large-scale systems designed to improve tape editing by enhancing creativity and improving user productivity. Two low-cost, medium scale editing systems are marketed to industrial and commercial markets for use in post-production of training and educational videotapes. During the latter part of fiscal 1987, the company introduced an editor for the film industry which is a random access type system using laser discs as media for editing purposes. This system is sold to the post production industry and, through 49%-owned CMX Laser Systems, is rented on a daily, weekly, monthly or seasonal basis to film producers.



The company's computer paint and animation systems provide full graphics-creation functions in two- and three-dimensional modeling / animation.

Important Developments

Nov. '89— CHY and Midwest Communications Corp., a distributor of CHY products, agreed in principle to form a new holding company that would operate the two companies as separate entities. Under the merger agreement, shares of the new holding company would be exchanged for CHY shares on a one-for-one basis and each Midwest share (some 3,000,000 outstanding) would be exchanged for 2.67 shares of the new concern. The holding company would have a 10-member board, with CHY and Midwest each naming five directors. CHY chairman Alfred O.P. Leubert would become chairman of the holding company and David K. Barnes, president of Midwest, would be its president and CEO. Midwest earned $1.0 million in fiscal 1989 on sales of $161.4 million.

Next earnings report expected in February.

		44.16	46.01	42.20

Sales for the three months ended September 30, 1989 advanced 21%, year to year. Benefiting from a program to consolidate selected procurement, manufacturing, marketing, sales and administrative functions, operating income totaled $317,000, versus an operating loss of $756,000. Following higher interest expense, there was a net loss of $256,000 ($0.02 a share), against a loss of $645,000 ($0.06).

Finances

Due principally to CHY's operating loss in fiscal 1989, it did not meet certain of its loan covenants under the company's loan agreements. As of June 30, 1989, the company's entire bank debt had been reclassified as a current liability. CHY and its banks were negotiating to enter into new agreements with revised loan covenant terms.

In January, 1989 the company acquired the 19.45% interest in CMX Corp. not already owned by it for 336,800 common shares.

d-Deficit.

Dividend Data

Cash dividends were initiated in 1981. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1987.

Dec. 26'89	1989					
59	66¾-45⅞	13	2.96	5.0%	B-	0.77

Summary

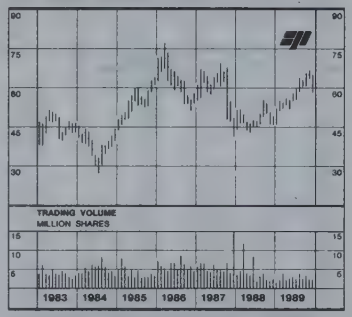
One of the largest insurance-based financial services organizations, CIGNA Corp. is a major participant in the property-casualty, group life/health insurance, annuity and financial services fields. As part of a plan to focus on commercial markets, CI sold its individual insurance products unit in late 1988 for $140 million. The Horace Mann subsidiary was sold in August, 1989 for about $484 million. The acquisition of a large group insurance and managed health care concern is being considered.

Current Outlook

Excluding "fresh start" tax benefits and realized investment gains or losses in both years, earnings of $4.25 a share are expected for 1990, compared with the $3.00 anticipated for 1989.

The $0.74 quarterly dividend is the minimum expected.

The higher income forecast for 1990 is predicated upon continued growth in earnings from the group health business that will more than offset flat property-casualty profits. A firming of p-c prices is expected by mid-1990, but this will not significantly benefit earnings until 1991. Until then, soft p-c pricing due to intense competition is expected to continue and, together with higher storm and earthquake related losses, will likely impair earnings for this segment. Sizable rate increases in both the traditional indemnity and HMO lines should aid earnings in coming periods. Group retirement profits should benefit from an increased asset base.



Review of Operations

Revenues for the nine months ended September 30, 1989 rose 5.8%, year to year (1988 restated). A return to profitability in the group life and health area and increased contributions from individual financial services were offset by sharply lower p-c profits, and pretax earnings were down 7.3%. After taxes at 20.6%, versus 21.4%, net income declined 6.4%, to $3.22 a share (including $0.67 in realized investment gains) from $3.35 ($0.01). Results exclude income from discontinued operations of $1.32 a share, versus $0.53.

Sep	0.70	1.20	1.94	1.70
Dec.		1.50	2.06	2.43
		4.89	7.25	6.34

Important Developments

Nov. '89— CI said most segments other than p-c reported higher earnings for 1989's first nine months. P-C profits were restrained by competitive pricing pressures, and sharply higher catastrophe losses of $178 million (including $138 million from Hurricane Hugo), versus $37 million, exacerbated this situation. Also during the quarter CI repurchased about 85% of its preferred stock for $188 million; it acquired the balance in October for $32 million. CI said it was considering acquiring Equicor, a $2.4 billion (1988 revenues) group insurance and managed health care joint venture owned by The Equitable Life Assurance Society of the U.S. and Hospital Corp. of America.

Aug. '89— CI sold the Horace Mann Companies (excluding California p-c lines) to an investor group for about $484 million.

Next earnings report expected early February.

Business Summary

CIGNA Corp., formed through the 1982 combination of Connecticut General Corp. and INA Corp., is one of the largest investor-owned insurance organizations in the U.S. Contributions (in million $) to pretax income in recent years:

	1988	1987
Group life & health	$31.1	$90.6
Group retirement & svgs.	203.8	160.1
Ind. fin'l services	92.7	90.9
Property-casualty	234.3	424.5
Other	-53.8	16.2

The property-casualty group ranks among the largest in the U.S. Earned premiums totaled $6.35 billion in 1988 ($6.16 billion in 1987), of which commercial lines accounted for 86%, personal lines 8%, and other 6%. The agency division markets a wide range of insurance products and services to businesses and individuals, primarily through agents. The broker division services large commercial accounts through brokers. The international division is a major source of insurance products and services in about 90 countries, and the reinsurance division provides reinsurance domestically and internationally.

The employee life and health benefits segment markets a full line of group life and health insurance products and conducts CI's health care delivery operations. The employee retirement and savings benfits segment provides pension, profit sharing and retirement savings programs to companies of all sizes. Individual financial services businesses market life insurance, disability coverages, investment products and financial planning to small businesses and individuals. CIGNA RE sells life and health reinsurance products.

The investment group provides investment management and related services for CI as well as outside clients. Consolidated assets under management at year-end 1988 totaled $47.6 billion. In 1988 CI sold its Individual Insurance Products division. The Horace Mann Companies were sold in August, 1989.

Dividend Data

Dividends were paid by Connecticut General since 1867 and by INA since 1874. A dividend reinvestment plan is available.

Cincinnati Bell

NYSE Symbol CSN

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Oct. 11'89	1989					
30¾	35-20	22	0.68	2.2%	A	0.62

Summary

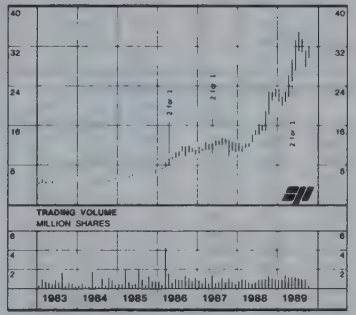
Cincinnati Bell provides telephone service in southwestern Ohio and parts of northern Kentucky and Indiana. The company also engages in unregulated telecommunications related businesses through nontelephone subsidiaries. CSN's prospects for earnings growth have been considerably enhanced by investments in businesses possessing proprietary software systems. The shares were split 2-for-1 in May, 1989.

Current Outlook

Earnings for 1989 are projected at $1.55 a share, versus the $1.32 reported for 1988, as adjusted for the 2-for-1 stock split in May, 1989. Earnings for 1990 are tentatively projected at $1.80 a share.

The quarterly dividend was raised 21%, to $0.17 from $0.14 (both adjusted), with the May, 1989 payment.

Revenues from telephone operations should increase moderately in 1989, reflecting growth in access lines and increased network usage, offset partly by rate cuts. Margins are expected to narrow, as the benefits of increased efficiencies and cost cutting efforts are more than offset by higher payroll and other operational expenses. Contributions from unregulated operations should rise significantly, aided by recent acquisitions and a major CBIS contract with NTT. Interest costs could be higher. Share earnings should reflect fewer average shares outstanding.



Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	222.5	172.4	143.8	124.1
Jun.	227.4	179.4	152.7	107.0
Sep.	---	191.4	162.1	129.7
Dec.	---	195.2	175.3	131.8
	---	738.4	633.8	492.6

Revenues for the six months ended June 30, 1989 increased 28%, year to year. Margins narrowed and operating income advanced 10%. After other income (net) of $805,000 versus other expense (net) of $821,000, and a 15% increase in interest expense, pretax income increased 12%. Following taxes at 29.2% versus 29.1%, net income advanced 12%. After $2.2 million of preferred dividends in the 1989 interim only, share earnings were $0.77 on 4.4% fewer shares, versus $0.69 (adjusted.

Dec.	E0.39	0.26	0.28	0.22
	E1.55	1.32	1.01	0.89

Important Developments

Jul. '89— CSN said 1989 second quarter revenue growth mostly reflected increased sales of its CBIS subsidiary, which benefited from a contract to supply Nippon Telegraph & Telephone Corp (NTT) of Japan with systems to automate telephone services. CBIS expected to recognize $88 million in revenue from its initial NTT contracts, most of which would be recognized in 1989 and 1990. A smaller portion of growth reflected the July, 1988 acquisition of Vanguard Technologies International.

Next earnings report expected in late October.

Business Summary

Cincinnati Bell provides telephone service in southwestern Ohio and parts of northern Kentucky and Indiana. At year-end 1988 there were 763,000 total network access lines in service, up 2.0% from a year earlier. The company has also entered a number of nonregulated communications related businesses. Revenues in the past three years were derived as follows:

	1988	1987	1986
Telephone operations ..	75%	85%	92%
Information systems telecom services.....	25%	15%	8%

Following its reorganization as a holding company in July, 1983 CSN established two new subsidiaries, Cincinnati Bell Information Systems (CBIS) and Cincinnati Bell Enterprises, to engage in unregulated businesses. Information Systems designs and markets software systems for billing, accounting and other operations for telephone companies and for other telecommunications applications. Enterprises consists of a number of units which engage in equipment supply, material recycling, business-to-consumer telemarketing, consulting, discounted long distance service, and cellular telephone service.

Dividend Data

Dividends have been paid since 1879. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

Summary

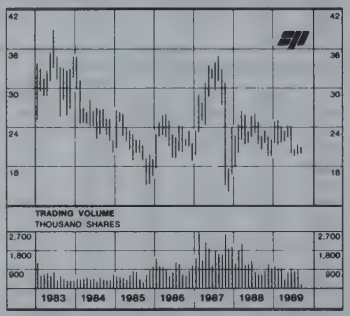
This company is one of the largest domestic manufacturers of machine tools and also produces plastics processing machinery, industrial robots, and semiconductor materials. Benefiting from higher sales, wider margins and the absence of reorganization charges, CMZ returned to profitability in 1988. Sales and earnings for the first half of 1989 were adversely affected by production delays and other difficulties connected to the implementation of CMZ's reorganization plan.

Current Outlook

Earnings for 1989 are projected at $0.90 a share, versus 1988's $1.02. Earnings for 1990 are projected at $1.20.

Dividends are likely to remain at $0.18 quarterly.

Sales for 1989 are expected to decline slightly as delays in shipments necessitated by the implementation of CMZ's reorganization offset the favorable impact of higher orders and backlog for the machine tool and plastics machinery units. Penalized further by related margin contraction and a higher tax rate, earnings will probably decline slightly from the 1988 level.



Net Sales (Million $)

Period:	1989	1988	1987	1986
12 Wks: Mar. ...	189.1	187.4	189.4	181.6
12 Wks: Jun.	193.5	198.4	192.4	208.1
16 Wks: Sep. ...	---	244.1	214.3	229.5
12 Wks: Dec. ...	---	227.9	231.9	230.9
	---	857.8	828.0	850.0

Sales for the six months ended June 17, 1989 fell 0.8%, year to year. Production delays caused gross margins to narrow, but higher other income and lower selling, general and administrative expenses led to a 6.2% increase in pretax income. After taxes at 51.6%, versus 42.4%, net income declined 11%. Share earnings were $0.39, versus $0.44. Results exclude extraordinary credits of $0.23 and $0.16 a share, respectively.

Important Developments

Jul. '89— CMZ reported share earnings of $0.16 on a 2.5% decline in sales for 1989's second quarter, versus earnings of $0.24 a year earlier. CMZ attributed the decrease in sales and related margin contraction to production delays and other difficulties caused by the implementation of its reorganization plan. CMZ said that the plan to improve manufacturing processes during a period of strong demand caused a delay in certain shipments from machine tool focus factories which in turn depressed margins and restricted profitability. CMZ also noted that profits were hurt by currency translation losses. Orders at the end of 1989's second quarter stood at $402 million, down from $427 million a year earlier; backlog totaled $385 million, versus $356 million in the year-earlier period.

Next earnings report expected in late October.

Business Summary

Cincinnati Milacron is the largest machine tool manufacturer in the U.S. and a producer of plastics processing machinery. Business segment contributions in 1988:

	Sales	Profits
Machine tools	42%	28%
Plastics machinery	31%	45%
Industrial products	27%	27%

Foreign operations accounted for 19% of sales in 1988 and $1.6 million of operating income.

Machine tool products include machining centers and a variety of machines for milling, grinding and turning. CMZ is a leading manufacturer of numerically controlled machine tools, cells and systems, and produces its own conventional or computerized controls and software for the machines. Major customers include the automotive, aircraft and bearings industries.

Equipment for the plastics processing industry includes injection molding, blow molding, thermoforming and extrusion machines for the packaging, automotive, medical, construction and other markets.

Industrial products include robots, grinding wheels and metalworking fluids. It also includes coordinate measuring machines used for manufacturing quality control and industrial laser systems.

Dividend Data

Summary

This Canadian entertainment company is the second largest theatre operator in North America. It also distributes films, operates a motion picture studio, and creates, produces and distributes television programs. In December, 1989, after abandoning efforts to be acquired, the company sold its live theater division to its former chairman and vice chairman for about C$87 million.

Business Summary

Cineplex Odeon is a rapidly growing entertainment company primarily engaged in operating motion picture theatres in 20 states, the District of Columbia, six Canadian provinces, and the United Kingdom. As of August, 1989 CPX was operating 1,870 screens in 500 theaters (including theatres under management). CPX also distributes films in the U.S. and Canada; operates a motion picture studio in Canada; and creates, produces and distributes television programs and live theatrical productions. Contributions to revenue:

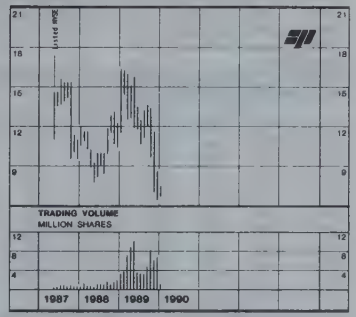
	1988	1987	1986
Admissions	51%	62%	64%
Concessions	17%	19%	20%
Distribution & other	22%	12%	9%
Property sales	10%	7%	7%

Canada accounted for 40% of revenues and 67% of income on 1988 and the U.S 60% and 33%.

CPX provides its movie-going audience with a high quality sound and projection display of first run movies in a comfortable theatre environment complete with concession stands. Most of CPX's theatres are multi-screen units. During 1988 CPX expended $114 million and opened 229 screens and refurbished 85 others as part of its ongoing theatre construction and renovation program. A total of 159 non-strategic screens were sold during 1988.

Cineplex Odeon Films distributes films in the U.S. and Canada and licenses films for broadcast on network, syndicated and pay television and for home viewing on VCRs. CPX licenses its motion picture studio, Toronto International Studios, to movie makers and others for film and television production. Other divisions create, produce and distribute television programs and live theatrical productions, and sell in foreign territories film rights acquired by the company.

In April, 1989 CPX sold its 50% interest in Universal Studios Florida to a unit of The Rank Organisation PLC of London for U.S.$150 million. CPX was developing the Orlando-based motion picture studio complex under a joint venture with MCA Inc.



Important Developments

Jan. '89— CPX announced that the repurchase of 56 theaters with 153 screens from affiliates and clients of Carena Developments Ltd. for C$55.3 million had been deferred until January 31, 1990, primarily to allow new CPX management time to arrange satisfactory financing. CPX originally agreed to buy back the theaters in August, 1989.

Dec. '89— CPX sold its live theater division, including the Pantages Theatre in Toronto, to Garth H. Drabinsky and Myron I. Gottlieb for C$65 million in cash and the assumption of C$22 million in liabilities. The sale followed the abandonment of attempts to sell the company to a third party, including Messrs. Drabinsky and Gottlieb, who in November, advised the company that they were unable to finance an all cash takeover bid for the entire company at a price of C$16.40 per share. CPX did not disclose plans for use of the proceeds from the sale.

Next earnings report expected in early March.

Revenues[1] (Million U.S. $)

Quarter:	1989	1988	1987	[2]1986
Mar.	135.0	133.3	110.8	74.8
Jun.	147.6	145.6	115.1	72.0
Sep.	186.2	171.4	140.4	94.3
Dec.		176.4	118.9	96.9
		626.6	485.2	338.0

Revenues for the nine months to September 30, 1989 increased 4.1%, year to year, reflecting higher ticket prices at theaters. Costs generally rose as a result of an ongoing theater building and renovation program. After sharply lower net proceeds from the sale of certain theater properties, a $10.7 million net loss on investments, a $47.5 million gain on the sale of the Universal Studios Florida joint venture, expenses of $12.7 million related to various other activities, higher interest expense and minority interest, there was a net loss of $35.2 million ($0.74 a share), versus net income of $29.8 million ($0.63).

Dividend Data

CPX has not paid any dividends on its common or subordinated restricted voting shares. Because of its emphasis on growth and development, CPX does not intend to pay dividends on these shares in the near future. Also, terms of current financing arrangements restrict the payment of dividends.

Finances

In 1988 CPX repurchased over 1.4 million of its shares at a cost of $15.5 million, completing a 2 million share repurchase plan.

In December, 1988 CPX sold the operating assets and business of wholly owned The Film House Group Inc. to a partnership 49% owned by The Rank Organisation PLC (TRO) and 51% owned by CPX. Cash proceeds from the sale of $73.7 million resulted in a gain of $47.7 million (both subject to adjustment). CPX also granted TRO an option to purchase its 51% interest for $76.5 million. CPX will continue to manage Film House's film processing and post production facilities.

In its May, 1987 initial public offering in the U.S., CPX sold 1,750,000 common shares at $14.81 a share. Concurrently, MCA Inc. purchased 1 million CPX subordinated restricted voting shares to maintain its equity position in CPX.

Summary

Cipher Data designs and manufactures a broad line of removable data storage hardware and subsystems for sale primarily to original equipment manufacturers. In April 1989, it acquired Irwin Magnetic Systems, a producer of minicartridge tape drives. Depressed conditions in the mid-range computer systems market severely penalized results for the first quarter of fiscal 1990, and the company announced a restructuring of operations.

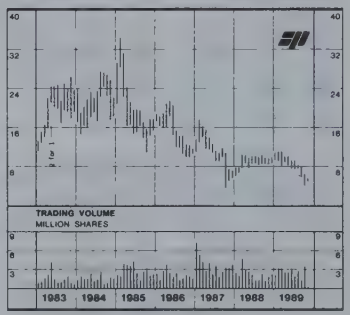
Business Summary

Cipher Data Products, Inc. designs and manufactures computer memory peripheral products. The company markets its broad range of magnetic tape and optical disk drive products worldwide, primarily through original equipment manufacturers, which incorporate them into mainframe, minicomputer, microcomputer, workstation and personal computer systems. The company also markets through value-added resellers and through more than 3,000 retail outlets throughout the world.

Cipher is the leading maker of ½-inch streaming tape drives. These drives offer a low-cost means for users to transfer large blocks of data rapidly between Winchester disks and magnetic tape. Major products include the Microstreamer, which is used as a backup for eight-inch and 14-inch Winchester drives. For higher-performance markets, Cipher offers CacheTape and GCR Cachetape, which are aimed at moving the company into the superminicomputer and mainframe computer markets.

Cipher also makes ¼-inch streaming tape drives that serve as backups for lower-capacity 5¼-inch and eight-inch Winchester disk drives. The company's 5¼-inch drives supply the markets for departmental business systems/office networks, engineering workstations and high-end PC systems. Other products include conventional start-stop tape drives, plus a line of controllers that came with the 1984 acquisition of Spectra Logic Corp. The Optimem subsidiary is a leading supplier of write-once optical disk drives.

In April 1989, Cipher acquired Irwin Magnetic Systems (see Finances). Irwin produces a 3½-inch form factor ½-inch tape series of drives, which accounts for a large share of the rapidly-growing minicartridge markets.



In fiscal 1989, Cipher spent $19.6 million (9.0% of revenues) on engineering, research and development, compared with $17.4 million (9.4%) the year before. Foreign subsidiaries contributed 38% of revenues and 83% of pretax income in fiscal 1989.

Important Developments

Oct. '89— The company said that it was restructuring and downsizing its operations because of adverse business conditions in the mid-range computer systems market that severely penalized Cipher Data's earnings for the fiscal 1990 first quarter. The restructuring involves a series of internal financial and operational strategies, as well as a 24% reduction in the workforce, affecting about 525 jobs and eliminating the position of president and chief operating officer.

Next earnings report expected in mid-January.

Jun.		60.72	55.89	42.24
		217.78	185.37	178.19

Revenues for the three months ended September 30, 1989, declined 20%, year to year, reflected adverse business conditions in the mid-range computer systems market. Margins narrowed on the reduced sales, and results were further penalized by a $3,803,000 charge for a restructuring of operations (see Important Developments) and the absence of a year-earlier $2,000,000 gain from settlement of litigation. A pretax loss of $13,875,000 contrasted with income of $5,135,000. After taxes of $298,000, versus $1,292,000, the net loss was $14,173,000 ($0.97 a share), against net income of $3,843,000 ($0.27).

Dividend Data

No cash has been paid.

Finances

In April 1989, the company announced that it had completed the acquisition of Irwin Magnetic Systems through a $13-a-share cash tender offer, at a cost of about $67.3 million. The tender offer was financed by drawing $38 million against a bank line of credit and the remaining $29.3 million from available operating cash. Financial results of Irwin (which earned $1.47 million on sales of $49.2 million in fiscal 1988) were integrated with Cipher's in the fourth quarter of fiscal 1989.

In fiscal 1988's fourth quarter, Cipher recorded royalty income of $3,397,000, representing past royalties due in connection with a settlement agreement with a division of Rexon Inc., which resulted from a successful patent infringement lawsuit brought by Cipher. The agreement also provided for certain future payments.

In August 1988, Cipher introduced its family of 3000i ½-inch cartridge tape drives, which offer a new-generation technology for high-capacity backup and data interchange.

Circle K

536M

NYSE Symbol CKP Options on Pacific (Jan-Apr-Jul-Oct)

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Jan 9'90	1989-90					
3⅝	16⅝-3¼	NM	[1]---	[1]---	B+	0.97

Summary

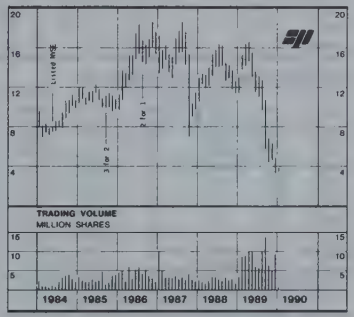
Circle K is the second largest operator of convenience stores in the U.S. On December 26, 1989 the company entered into a $60 million secured 100-day credit facility with its lenders. During this 100-day period, Circle K expected to complete a plan for financial restructuring. The dramatic expansion of the company's store base in recent years and the resulting debt, depreciation and amortization expenses as well as heightened competition have hurt earnings severely .

Current Outlook

Earnings for the fiscal year ending April 30, 1990 are projected at $0.10 a share, versus 1988-9's $0.21.

The $0.07 quarterly dividend was eliminated in September, 1989.

Revenues for fiscal 1989-90 should grow moderately, reflecting new stores and some growth in comparable store sales. Gasoline margins should improve modestly and merchandise margins widen, due to increased purchasing power and higher pricing. Interest expense and depreciation and amortization charges will be much higher.



Net Sales (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Jul.	1,007	803	679	585
Oct.	923	838	675	560
Jan.		881	602	547
Apr.		920	657	597
		3,441	2,614	2,289

Sales for the six months ended October 31, 1989 rose 18%, year to year. With much higher depreciation and amortization and interest charges and in the absence of a $10.5 million gain from the sale of assets, pretax income fell 84%. After taxes at 61.3%, versus 39.2%, net income declined 90%. Following preferred dividends, a per-share loss of $0.03 on 4.8% fewer shares, contrasted with earnings of $0.51.

		0.21	1.04	0.93

Important Developments

Dec. 26'89— CKP entered into a new $60 million secured short-term credit facility with existing lenders and American Financial Corp., the company's largest shareholder; borrowings under the new facility will mature in 100 days. During this time, CKP expects to complete a plan for financial restructuring. The new facility is expected to provide adequate liquidity during the 100-day period. If additional cash is needed during that period, then, based upon discussions with its lending banks, CKP believes that additional bank borrowings would be available. Separately, the company agreed to sell 350 Circle K stores in the Pacific Northwest to PC Ventures Ltd. and 25 of its Hawaiian stores and related properties to an investor group for about $29.5 million.

Next earnings report expected mid-March.

Business Summary

Circle K is the second largest operator of convenience stores in the U.S., with 4,685 units in operation in 32 states, predominantly in the Sunbelt region, at year-end fiscal 1988-9. In addition, as of year-end 1988-9 CKP was operating 245 stores in the U.K. in a joint venture. A licensee operates 647 stores in Japan.; other licensing agreements include seven stores in Indonesia, 15 stores in Taiwan and agreements for store operations in Aruba and South Korea. Operations have expanded significantly in recent years through acquisitions, as well as internal growth.

The stores sell fast food and beverages, tobacco products, groceries, magazines, and health and beauty aids, and provide movie rentals and money order sales. Over 70% of the outlets sell gasoline through self service equipment.

The sales breakdown in recent fiscal years:

	1988-9	1987-8	1986-7	1985-6
Food	38%	43%	47%	46%
Non-food	20%	20%	21%	19%
Gasoline	42%	37%	32%	35%

Items carried are primarily nationally advertised brands. Beer, wine, and liquor are sold where permitted by law. CKP also produces certain beverages, ice, and fast food products, which it sells in its own stores and to a lesser extent to third parties for resale. Despite charging higher prices for certain items than supermarkets, CKP believes it is competitive because its stores are open longer hours, are conveniently located, and provide relatively faster customer service.

Dividend Data

Prior to elimination in September 1989, dividends had been paid since 1963.

Summary

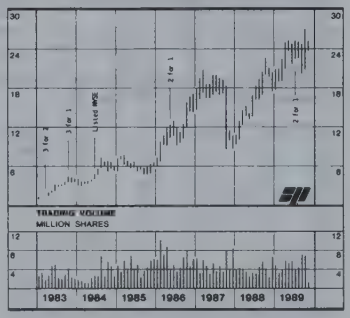
This company is a leading retailer of brand name consumer electronics with operations in over 100 locations in California, Nevada and 11 other states from Maryland to Florida. Sales and earnings are expected to continue in their uptrend through fiscal 1990-91, aided by expanded Superstore operations.

Current Outlook

Earnings for the fiscal year ending February 28, 1991 are projected at $1.95 a share, versus the $1.65 estimated for fiscal 1989-90.

The dividend should remain at $0.02 quarterly.

Revenues through fiscal 1990-91 should continue to show strong growth, reflecting ongoing expansion of Superstore operations as well as modest gains in comparable store sales. While margins in the second half of fiscal 1989-90 should continue to be restrained by expansion-related costs, profitability in fiscal 1990-91 is expected to be bolstered by volume efficiencies.



Sales (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
May	408	328	246	170
Aug.	472	396	289	217
Nov.	---	434	354	267
Feb.	---	563	461	357
	---	1,721	1,350	1,011

Sales for the six months ended August 31, 1989 rose 22%, year to year, reflecting more stores in operation and a 3% gain in comparable store sales. Wider gross margins, owing to a more favorable product mix, were outweighed by higher SG&A expenses related to the store expansion program and improved staffing levels, and pretax income was up 7.8%. After taxes at 39.3% in each period, net income also rose 7.8%, to $0.60 a share from $0.56 (adjusted).

	E1.65	1.53	1.13	0.80

Important Developments

Nov. '89— CC reported that sales for the month of October rose 21%, year to year, with same store sales up 2%. In September the company said that growth in the consumer electronics and major appliance retail segment had slowed and that CC's comparable store sales could be lower than the 5% growth originally anticipated.

Sep. '89— The company said that during the first half of fiscal 1989-90 it opened five new Superstores in Miami, four in Tampa and two in San Diego, bringing the total number of units open at August 31 to 107 Superstores and 23 conventional stores. Circuit City planned to open about 20 more Superstores in the second half of fiscal 1989-90 including entrances into the Philadelphia and Phoenix markets.

Next earnings report expected in mid-December.

Business Summary

Circuit City Stores (formerly Wards Co.) is the nation's largest specialty retailer of brand name consumer electronics. As of fiscal 1988-9 year-end the company was operating 122 stores, including 23 conventional stores, 96 Superstores and 3 Impulse units. Products include audio and video equipment, other consumer electronics products, microwave ovens and major appliances. Revenue sources in recent years:

	1988-9	1987-8	1986-7
Television	24%	25%	25%
VCR	23%	25%	27%
Audio	22%	22%	21%
Other electronics	11%	10%	9%
Appliances	20%	18%	18%

Conventional stores, which generally range in size from 4,000 to 9,000 sq. ft., offer a full line of consumer electronic merchandise. Superstores, ranging in size from 15,000 to 47,000 sq. ft., offer a wider selection of substantially the same consumer electronic products, as well as major appliances such as washers, dryers, refrigerators and ranges. Impulse units, a store format CC is testing, range from 2,000 to 3,000 sq. ft., are located in shopping malls and carry smaller consumer electronics products.

CC's stores and Superstores operate exclusively under the Circuit City, Circuit City Superstore and Impulse names in California, Nevada and in 11 Mid-Atlantic and Southeastern states from Maryland to Florida. Future expansion is planned around present markets. The company completed a significant restructuring in early 1986 and closed its marginally profitable businesses on the West Coast and in New York City.

Dividend Data

Dividends were initiated in 1979. A "poison pill" stock purchase right was adopted in 1988.

Oct. 16'89	1989					
32½	35½–24⅝	6	1.62	5.0%	A–	1.21

Summary

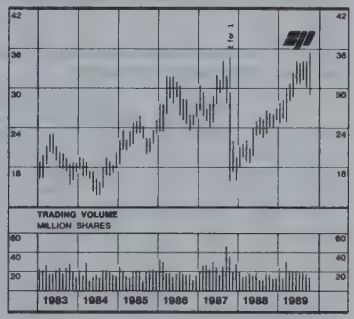
The parent of Citibank, which is the largest bank in the nation, this company has a substantial worldwide corporate and retail banking presence, along with growing investment banking services. CCI reported a huge loss for 1987 after increasing reserves against LDC loans, but since then has returned to profitability due to improving domestic loan quality, and cost cutting efforts in the investment bank. Future profits could benefit from expansion of retail banking businesses.

Current Outlook

Earnings for 1990 could approximate $5.15 a share, versus the $4.65 estimated for 1989.

Dividends should continue at $0.40½ quarterly.

Loan growth will likely be restrained through 1990 as the company sells loans to limit balance sheet growth in an effort to build equity capital ratios. Net interest income and the incremental earnings could vary substantially, reflecting the timing of interest payments by LDC countries. CCI has $8.9 billion of medium and long-term LDC loans, reserved at approximately 29%. While CCI stated in September 1989 that it was comfortable with the current reserve level, if reserves were boosted to 40%-45% (the level to which many of CCI's money center banks have moved), pretax earnings could be charged between $850 million and $1.25 billion (excluded from our estimate). CCI's intension to grow in Europe should aid longer-term profitability. Solid gains are expected from the expanding consumer business, reflecting growth in the high-margined domestic credit card business.



Review of Operations

Net interest income for the nine months ended September 30, 1989 advanced 7.0%, year to year, reflecting growth of earning assets, $154 million of Brazilian interest payments (none in this year's third quarter and virtually none in the 1988 period), and a widening of the net interest spread to 3.93% from 3.81%. The provision for loan losses was 20% higher, at $1.09 billion. Despite lower trading and foreign exchange income, higher fees amd commissions and gains from the sales of loan and assets led to a 16% rise in noninterest income. With noninterest expense up 7.1%, pretax earnings rose 19%. After taxes at 40.8%, versus 38.9%, net income was up 15%. Following preferred dividends, share earnings were $3.62, compared with $3.17.

Dec.	E1.03	1.70	1.89	1.02
	E4.65	4.87	d4.26	3.57

Important Developments

Oct. '89— CCI said that earnings for the first nine months reflected strength in the global consumer business and local currency business in emerging economies, and relatively flat corporate finance and trading results in a very competitive OECD (major world economies) market. CCI said that expansion of its relatively underdeveloped European position was a high priority.

Next earnings report expected in mid-January.

Business Summary

Citicorp is the parent of Citibank, the nation's largest bank. It provides a broad range of financial services for individual and institutional clients through offices in 40 states and 89 foreign countries. Individual banking services are provided to consumers through about 600 domestic commercial and savings and loan branches in New York (275), Florida, California, Illinois, Arizona and Washington D.C. as well as about 200 mortage banking ($32 billion of loans serviced) and consumer finance offices. CCI also has 1,100 foreign branches. Credit card operations (23 million cardholders) are also important. Citicorp also provides institutions with corporate finance services (including full-scale investment banking abroad), transaction processing, foreign exchange and securities trading, brokerage and trust services. Information services include Quotron. Foreign operations accounted for 42% of assets in 1988. Contributions by segment in 1988 were:

Banking	Revs. (Mil. $)	Net Inc. (Mil. $)	Assets (Bil. $)
Individual	$6,899	$626	$97
Institutional & Investment	5,514	1,329	112
Information	305	-105	Nil

At year-end 1988 nonperforming assets were $6.6 billion (4.4% of loans), up from $6.4 billion (4.6%) a year earlier, including increases in LDC loans. The reserve for loan losses was 2.82% of loans, versus 3.35%. Net chargeoffs during 1988 were 1.23% of average loans, versus 1.13% in 1987.

Dividend Data

Dividends have been paid since 1813. A dividend reinvestment plan is available.

Summary

This Southeastern superregional bank holding company, headquartered in Georgia and owning the largest bank in that state, has acquired banks in South Carolina and Florida in the wake of enabling interstate banking legislation in 1985. Good loan quality and increased focus on improving profitability in Florida could help lift future profits. In April, 1989 CTZ fended off an unsolicited bid by NCNB Corp., the largest bank holding company in the southeast, to acquire CTZ.

Current Outlook

Earnings for 1989 could approximate $3.70 a share, up from the $3.25 a share reported for 1988. A further rise to $4.15 a share is projected for 1990.

The quarterly dividend was boosted 13%, to $0.35 from $0.31, with the September, 1989 payment.

Loan growth could reach 10% in 1989 and again in 1990, reflecting continued economic growth in the southeast and strong consumer spending. The net interest margin could narrow slightly due to higher funding costs of customer deposits. However, these relatively stable funds will enable CTZ to expand its loan portfolio. Loan quality should remain good as the company's exposure to commercial real estate development is small and diversified. With reserves exceeding problem loans, with a coverage ratio of 2.24X at June 30, the provision for loan losses could remain low. The integration of recent acquisitions is now fairly complete, resulting in some cost savings. Focus on cost controls is expected to continue, aiding results. CTZ's goal of increasing fee income growth will also enhance profitability.

Review of Operations

Net interest income for the six months ended June 30, 1989 advanced 10%, year to year, reflecting a 7.1% increase in average earning assets, the effect of rising interest rates, and a slightly wider net interest margin (4.76% versus 4.70%). The provision for loan losses was 0.3% lower, at $41 million. Increased fee income aided noninterest income to advance 7.7%. With noninterest expenses up 7.2%, pretax income rose 17%. After taxes at 20.5%, versus 21.3%, net income increased 18%. Share earnings amounted to $1.81, compared with $1.56.

Important Developments

Jul. '89— CTZ established an Employee Stock Ownership Plan (ESOP) that purchased for $125.3 million 2.95 million shares of newly-issued $3.30 convertible preferred stock, which if converted into CTZ common would represent about 5% of CTZ common shares outstanding. In this regard, the board approved the repurchase of $125 million in CTZ common stock.

Next earnings report expected in mid-October.

Business Summary

Citizens & Southern is the fifth largest banking organization in the Southeast, with 196 branches in Georgia, 132 branches in South Carolina and 149 branches in Florida. The company's traditional emphasis has been on retail and small business banking services, from which it derived 56% of earnings in 1988. Corporate banking services, including cash management, contributed 14%. Asset-based finance, led by factoring operations which are the third largest in the nation, contributed 9%, and other businesses, including trust, mortgage lending, insurance and discount brokerage, contributed 21%.

Average earning assets during 1988 of $17.4 billion were divided: commercial loans 24%, real estate loans 26%, consumer loans 25%, investment securities 23% and temporary investments 2%. Average sources of funds were: noninterest-bearing deposits 19%, savings and money-market deposits 26%, time deposits 28% (total deposits averaged $15.0 billion), short-term borrowings 14%, long-term debt 2%, equity 6% and other 5%.

At year-end 1988, nonperforming assets were $121 million (0.85% of loans), versus $112 million (0.86%) a year earlier. The reserve for loan losses was 1.48% of loans, against 1.35%. Net charge-offs in 1988 were 0.51% of average loans, versus 0.62% in 1987.

Dividend Data

Dividends have been paid since 1905 except for seven quarterly omissions in 1978-79. A dividend reinvestment plan is available.

Summary

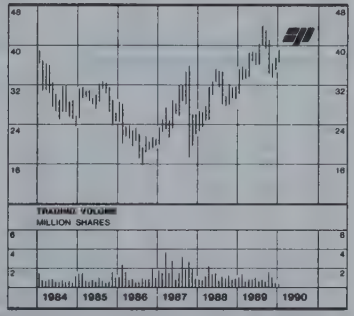
This major producer of materials handling equipment also makes axles and transmissions for use in its lift trucks and for sale to others. After incurring losses for three consecutive years as a result of extremely competitive markets and restructuring charges, CKL returned to profitability in 1988. Earnings during 1989 benefited from rising sales, improved margins, a sharply higher contribution from the VME joint venture and a lower tax rate. Further earnings growth is projected for 1990.

Current Outlook

Earnings for 1990 are projected at $4.10 a share, versus the $3.60 estimated for 1989.

Early resumption of dividends is unlikely.

Sales for 1990 are expected to rise less rapidly than in 1989, reflecting slower growth in the material handling unit and flat sales in axles and transmissions. Margins should improve as a result of continued cost cutting, lower material costs and the benefits of increased capital investment. Aided further by solid contribution from the VME joint venture and lower taxes, earnings should rise.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	314	282	240	234
Jun.	356	325	281	253
Sep.	345	325	241	231
Dec.	---	346	286	236
	---	1,278	1,048	954

Sales for the nine months ended September 30, 1989 rose 8.8%, year to year, primarily reflecting gains in the material handling equipment and vehicles segment. Margins widened, and operating income increased 32%. A large drop in other income and higher interest expense offset equity in sharply higher net income of affiliates, and the gain in pretax income was pared to 23%. After taxes at 45.1%, versus 57.4%, income from continuing operations increased 58%. Share earnings were $2.74, versus $1.74.

Dec.	E0.86	0.84	d0.22	d1.12
	E3.60	2.58	d1.08	d3.72

Important Developments

Oct. '89— CKL reported share earnings from continuing operations of $0.98 for 1989's third quarter on a 6.1% rise in sales , versus $0.69 in the year-earlier quarter. CKL said that three out of four of its businesses reported sales gains while its Automotive Products sales declined slightly due to the slowdown in the medium-duty truck market. Third quarter gross margins decreased slightly, due to changes in sales and product mix while gross margins for the first nine months of 1989 exceeded comparable 1988 margins, due to cost reduction efforts, improved operating efficiencies and business conditions. At September 30 backlog stood at $400.2 million, versus $420.7 million and $379.4 million at June 30, 1989 and December 31, 1988, respectively.

Next earnings report expected in late January.

Business Summary

Clark Equipment is an integrated producer of material handling equipment and axles and transmissions. Sales and operating profits in 1988:

	Sales	Profits
Material handling equip.	69%	60%
Axles/transmissions	31%	40%

Sales outside North America were about 35% of the total in 1988.

Materials handling equipment includes industrial forklift trucks, skid steer loaders, towing tractors, attachments and related accessories, and automatic storage and retrieval systems. These products are manufactured for sale, principally under the Clark, Clarklift, Melroe, Bobcat, Clarktor and Powrworker, to a wide variety of users requiring material handling equipment and vehicles.

The products of the axles and transmissions segment are manufactured by Clark for sale to the motor truck, motor bus, agricultural and industrial equipment, road building and construction machinery industries, and for Clark's forklift operations.

CKL's products are manufactured by Clark and its subsidiaries in the U. S., Belgium, Brazil and West Germany. CKL's products are also manufactured by licensees in Australia, Brazil, South Korea, Japan and Venezuela.

In April, 1985 CKL and AB Volvo of Sweden formed a 50-50 joint venture, VME Group N.V., to combine their construction machinery operations.

Clark Equipment Overseas Finance Corp. (CLEO), CKL's domestic based holding company for overseas finance operations, has subsidiaries in France and the Netherlands which assist in the financing of the sales of manufacturing subsidiaries in those countries.

Clark Equipment Credit Corp. was sold in early 1987.

Dividend Data

Dividends were omitted in early 1986 after having been paid since 1933. The most recent distribution was $0.27½ on December 11, 1985. A "poison pill" stock purchase right was adopted in 1987.

Capitalization

Summary

Cleveland-Cliffs is the largest independent manager, processor, and lessor of iron ore reserves in North America. Through a self-tender offer that expired in April, 1988, CLF repurchased 5,125,000 of its common shares and 2,335,987 (93%) of its preferred shares; at 1988 year-end CLF redeemed the remaining 139,239 preferred shares. Earnings for the first nine months of 1989 benefited from higher revenues and a $7.8 million gain on sale of assets. A forecasted drop in sales and the likely absence of a gain on asset sales will result in lower earnings in 1990.

Current Outlook

Earnings for 1990 are projected at $3.80 a share, versus earnings of $5.05 estimated for 1989.

Dividends, omitted in late 1986, were reinstated at $0.20 quarterly in July, 1989.

Revenues for 1990 are expected to decline as reduced steel industry demand results in a decline in volume. The projected decrease in volume is expected to lead to a drop in operating rates and will pressure margins. Assuming that CLF does not recover its bankruptcy claims against LTV or Wheeling-Pittsburgh and assuming absence of a gain on sale of assets, earnings will decline in 1990.

Total Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	---	77.1	69.6	73.2
Jun.	[4]177.2	113.1	112.4	70.6
Sep.	95.0	105.8	106.9	71.8
Dec.	---	117.9	146.1	80.8
	---	413.9	435.0	296.4

Revenues from continuing operations for the nine months ended September 30, 1989 rose 19%, year to year (1988 restated), reflecting increased iron ore sales volume and prices and higher royalty income. Margins widened, and aided by a $7.8 million after-tax gain on sale of assets, net income from continuing operations advanced 44%. Share earnings were $4.16 on 15% fewer shares, versus $2.34.

	E5.05	[3]3.28	1.91	d3.76

Important Developments

Nov. '89— CLF announced that it had completed the sale of its metallurgical sales segment and that it expected to realize $23.0 million of cash when associated assets were sold. CLF stated that there was no material gain or loss on the sale and added that approximately $5 million of net proceeds would be used to repay long-term debt. Metallurgical sales revenues were $60.0 million and $68.0 million for the first nine months of 1989 and 1988, respectively.

Jan. '89— A bankruptcy court approved an agreement between CLF and Wheeling-Pittsburgh Steel (WHX) which, among other things, allowed CLF a claim of $100 million for damages resulting from WHX's rejection of certain ore purchase contracts and its interest in the Tilden Mine.

Next earnings report expected in late January.

Business Summary

Cleveland-Cliffs is the largest independent manager and lessor of iron ore reserves in North America. The energy and forest products segments were discontinued in late 1987. Sales and operating profits in 1988 were:

	Sales	Profits
Iron ore	71%	95%
Metallurgical	22%	3%
Other	7%	2%

CLF manages seven active iron ore mines in North America and one in Australia with a total annual capacity of 43.7 million tons and owns equity interests in six of the mines with annual capacity of 6.5 million tons. Iron ore production from properties managed by CLF in 1988 totaled 39 million tons (36.3 million tons in 1987). Mines produced at an average of 95% of capacity (83% in 1987).

The metallurgical segment includes the sale of pig iron, coke, ferroalloys and silicon metal.

Through Pickens Mather, CLF manages metallurgical and steam coal mines. During 1988, CLF managed two active mines and four inactive mines. Following the sale of two inactive mines, the closure of another and the termination of a management agreement with the other inactive mine, CLF owns one active mine and manages another.

In July, 1988 CLF spun off its oil and gas unit to shareholders. In April, 1988 CLF sold most of its forest products unit and retained over 300,000 acres of timberland for possible future sale.

Dividend Data

Common dividends, omitted in November, 1986, were resumed in July, 1989. A revised "poison pill" stock purchase right was adopted in 1987.

Dec. 26'89	1989					
40⅞	44½-30⅛	15	1.24	3.0%	A+	1.09

Summary

This company, widely known for its Clorox bleach, is a diversified producer of household grocery products, specialty products for the food service industry, and restaurant equipment. Longer-term growth is expected to come primarily from new product activity, including line extensions, and acquisitions. Unit volume gains, sale of underperforming paint and stains units, and a 5-million-share repurchase program should accelerate share earnings growth in fiscal 1990.

Current Outlook

Earnings for the fiscal year ending June 30, 1990 may improve to $2.85 a share from fiscal 1988's $2.63 from continuing operations.

The dividend, which was raised 19% in May, 1989, should remain at $0.31 quarterly.

Sales for fiscal 1990 are expected to continue in a good uptrend on growing market penetration in established household products and expansion of markets for salad dressings and foodservice products. Unit volume comparisons should remain strong, with increased efficiencies likely to widen margins. Continued rollout of Clorox Detergent across the country and addition of other new products should accelerate profit growth. Share buybacks would enhance per share gains.

Net Sales (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Sep.	367	330	302	274
Dec.	---	272	243	215
Mar.	---	340	326	296
Jun.	---	414	388	342
	---	1,356	1,260	1,126

Sales for the three months ended September 30, 1989 rose 11%, year to year, reflecting higher volume and prices. An 18% increase in advertising costs to support new products limited growth in pretax income to 4.1%. After taxes at 37.3% versus 38.3%, net income from continuing operations expanded 5.8%.

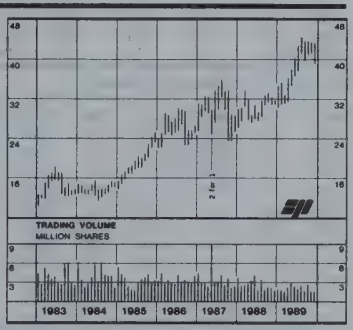
	E2.85	2.63	2.46	1.96



Important Developments

Nov. '89— The company announced plans to break ground for a new household products plant in the Northeast. It added that a new $30 million food plant was being built near Reno, Nev. Capital outlays for new plant and equipment were expected to average $110 million over fiscal 1989 and fiscal 1990.

Nov. '89— The company said that heavy spending to introduce Clorox detergent and Control cat litter, which had limited earnings progress in the first quarter, would restrain earnings gains for the fiscal 1990 first half.

Oct. '89— CL sold its Olympic and Lucite architectural coatings businesses for $130 million. Proceeds would be used to buy back up to 5 million CLX common shares, or 9% of the total outstanding, through periodic open-market and block transactions.

Next earnings report expected in late February.

Business Summary

Clorox Co. produces household grocery products, including products for the food service industry. The company sold its unprofitable Olympic and Lucite Homecase product subsidiaries to PPG Industries for $130 million in September, 1989.

Household grocery products consist of Clorox liquid bleach, Clorox 2, Clorox Pre-Wash, and a new product, Clorox Detergent. Brand names also include Formula 409, Soft Scrub, Tackle, Tilex, Liquid-plumr, Twice as Fresh, Litter Green and Fresh Step cat litter, and Kingsford and Match Light barbecue products. Specialty food products consist of Hidden Valley Ranch bottled and dry salad dressings and dip mixes, Kitchen Bouquet sauces, and Salad Crispins seasoned croutons. CLX also markets Deer Park Spring Water (acquired in 1987).

Food service products operations market specialty food and cleaning products to the food service industry, including restaurants, hotels, and schools. Prince Castel manufactures specialty equipment for fast food restaurants.

An R&D and marketing agreement with Henkel of West Germany was modified in 1981 to intensify their joint research efforts and the exchange of R&D knowledge. Henkel was permitted to expand its interest in CLX to 30% in early 1987, and in August, 1988 it converted its $9 million subordinated note into 1.2 million CLX common shares at a conversion rate of $7.50 a share. The conversion increased Henkel's ownership of CLX to 26.5%.

Dividend Data

Dividends have been paid since 1968. A dividend reinvestment plan is available.

Summary

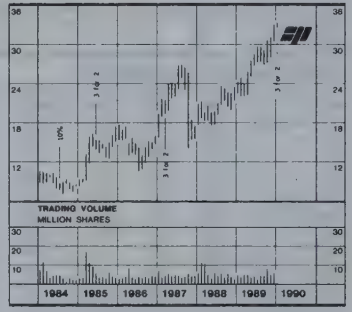
This company operates one of the nation's largest natural gas pipeline systems, covering the central half of the U.S. and with access to nearly all major U.S. gas producing areas. Other activities include gas and oil exploration and production, oil refining, coal, and chemicals. In the 1989 fourth quarter CGP entered into an agreement to sell its trucking operations, split its stock 3-for-2, and sold publicly 13.8 million shares at $28.583 each (adjusted) and $200 million in long-term debt.

Current Outlook

Share earnings for 1990 are projected at $2.20, up from an estimated $2.05 for 1989.

The former $0.10 quarterly dividend was maintained following a 3-for-2 stock split in December, 1989, in effect raising the payment 50%.

Gas pipeline profits for 1990 should increase slightly on a small increase in throughput, reflecting expansion of service. Refining and marketing profits are expected to continue to grow on improved margins and higher sales volumes. Exploration and production earnings should rise on higher average energy prices. Share earnings growth will be restricted by more shares outstanding.



Oper. Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	2,373	2,360	1,933	1,917
Jun.	2,099	1,862	1,683	1,473
Sep.	1,991	1,903	1,756	1,424
Dec.	---	2,062	2,057	1,855
	---	8,187	7,429	6,668

Revenues for the nine months ended September 30, 1989 rose 5.5%, year to year. Benefiting from sharply higher profits from refining and marketing operations, and higher nonoperating income, net income advanced 14%. After preferred dividends, share earnings (adjusted) were $1.09 on 13% more shares, versus $0.96.

Important Developments

Dec. '89— CGP entered into a letter of intent under which Transcon Inc. would acquire CGP's ANR Freight Systems and Transport USA Inc. units. In November, directors declared a 3-for-2 stock split and maintained the former $0.10 quarterly dividend on the split shares, effectively raising the dividend 50%.

Oct. '89— CGP publicly sold 13.8 million common shares at $28.583 each (adjusted for December, 1989 3-for-2 stock split) and $200 million of long-term debt; proceeds were used to retire debt with an average cost of 11%. Separately, CGP filed with FERC for approval of three alternative routes that are in addition to the one already authorized by FERC for CGP's natural gas pipeline from Wyoming to California.

Next earnings report expected early February.

Business Summary

Coastal Corp. is a broadly based energy supply company.

Oper. Profits	1988	1987	1986
Natural gas systems	64%	78%	88%
Refining & mktg.	23%	6%	NM
Expl. & prod.	5%	7%	5%
Coal	9%	10%	7%
Trucking	-1%	-1%	NM

CGP owns and operates major natural gas pipeline systems with about 19,000 miles of pipeline (including ANR Pipeline Co., acquired in 1985 for $2.5 billion, Great Lakes Gas Transmission, and Colorado Interstate Gas) that service markets from the Rocky Mountains to the Midwest and Upper Great Lakes areas. Total gas throughput for all systems aggregated 4,248 MMcf of gas per day in 1988.

CGP operates six domestic refineries that produce a full range of petroleum products. Refinery throughput averaged 266,000 barrels per day in 1988. CGP also markets crude and petroleum products worldwide.

CGP conducts gas and oil exploration and production operations in most of the productive areas of the contiguous U.S. At year-end 1988 proved reserves were estimated at 25.5 million barrels of oil and 1.0 trillion cubic feet of gas. Other CGP units conduct coal, chemicals and trucking.

Coca-Cola

NYSE Symbol KO Options on CBOE (Feb-May-Aug-Nov) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Oct. 19'89	1989					
70 3/8	71 1/4-43 3/8	21	1.36	1.9%	A+	0.82

Summary

Coca-Cola is the world's largest soft drink company and has a sizable fruit juice business. Its bottling interests include close to a 49% interest in publicly owned Coca-Cola Enterprises. Also, KO is expected to have net proceeds of about $1.1 billion from the pending sale of its interest in Columbia Pictures Entertainment, and directors recently authorized the repurchase of up to 20 million KO common shares.

Current Outlook

Earnings for 1990 are estimated at $3.90, up from the $3.45 expected for 1989.

The quarterly dividend of $0.34 is likely to be raised.

In 1990, international volume growth for soft drinks is expected to continue exceeding advances in the U.S. Increased investments by KO in overseas soft drink bottling operations could be somewhat dilutive to near-term earnings, but KO's greater involvement is likely to help boost long-term results. KO's overall profitability is expected to remain strong, and stock buybacks are expected to help share earnings.

Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	1,985	1,869	1,548	1,735
Jun.	2,429	2,314	2,104	2,245

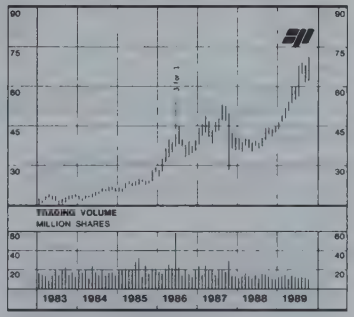
Dec.	E0.72	0.65	0.52	0.82
	E3.45	2.85	2.43	2.42



Important Developments

Oct. '89— KO was expecting to have a gain of $530 million, or $1.53 a share, from the sale of its ownership interest in filmed entertainment company Columbia Pictures Entertainment to Sony Corp. KO's net proceeds were expected to be about $1.1 billion. Also, KO's board of directors authorized the repurchase of up to 20 million KO shares, or about 6% of the number outstanding. KO has been a substantial repurchaser of shares in recent years; a 40-million-share repurchase program started in 1987 has been substantially completed. Meanwhile, in 1989's third quarter, KO's international volume of soft drink syrups and concentrates rose 14%, year to year, but U.S. volume was down 2%. Also, the quarter included a $0.10 a share gain from the sale of KO's bottled water business.

Next earnings report expected in mid-February.

Business Summary

Coca-Cola is the world's largest soft drink company and is a major producer of orange juice. Also, KO has more than a 40% interest in both Coca-Cola Enterprises, its largest bottler, and in Columbia Pictures Entertainment (see Important Developments). Segment operating results for 1988 (excluding Coca-Cola Enterprises and Columbia Pictures):

	Revs.	Profits
Soft drinks	82%	95%
Foods	18%	5%

In 1988, 56% of net operating revenues and 76% of operating profit came from foreign operations.

The company makes soft drink syrups and concentrates, which are sold to independent (and company owned) bottlers and fountain wholesalers. Brand Coca-Cola (best-selling soft drink in the world, including Coca-Cola classic) and diet Coke currently rank number-one and -three, respectively, in domestic unit volume. Other brands include Tab, Sprite, Diet Sprite, Fanta, Fresca, Cherry Coke, and Minute Maid soda. KO owns close to 49% of Coca-Cola Enterprises, its largest bottler.

The food segment includes fruit juices, beverages, mixers and snacks that are sold under the Minute Maid, Hi-C and Bacardi labels.

In December, 1987 various KO entertainment businesses were combined with those of Tri-Star Pictures; the combined entity is now known as Columbia Pictures Entertainment. KO received about 74 million Columbia common shares, and distributed about 34 million Columbia shares to KO shareholders as a special dividend.

Dividend Data

Dividends have been paid since 1893. A dividend reinvestment plan is available.

Oct. 30'89	1989					
16	18 3/4 - 14 3/4	20	0.05	0.3%	NR	NA

Summary

This company, which is the world's largest bottler of Coca-Cola soft drinks, was spun off from The Coca-Cola Co. in 1986. CCE's prices recently increased about 3% after several years of flat-to-lower levels; however, lower volume growth and higher marketing expenses appear to be contributing to an earnings decline in 1989. Also, the company is in the midst of repurchasing up to 25 million (18%) of its common shares. Coca-Cola owns about 48% of CCE's common stock.

Current Outlook

Earnings for 1990 are estimated at $0.65 a share, versus the $0.40 expected for 1989.

Dividends at $0.01¼ quarterly are the minimum expected.

In 1990, CCE's volume and prices are each expected to increase 2% to 3%. CCE's operating margins are expected to widen, but not to 1988 levels, due to a higher level of marketing costs. Earnings will also likely be boosted by a lower tax rate in 1990. CCE will continue to have sizable non-cash depreciation and amortization expense; in 1989 this is expected to total about $225 million.

Net Oper. Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	860	856	745	329
Jun.	1,088	1,099	929	436

Important Developments

Oct. '89— In 1989's third quarter CCE's volume declined about 3%, year to year, reflecting the sale of a bottling business in the fourth quarter of 1988. Excluding this business, volume would have been up about 1% in the third quarter and 4% in 1989's first nine months. Also, in the quarter CCE's prices were up about 3% from the year-earlier period, after being down somewhat in the first half of 1989. Although higher prices appeared to more than offset higher material costs, CCE's operating profit in the quarter fell 32%. With prices higher, disproportionately greater marketing expenditures may have been needed to generate volume. Meanwhile, CCE repurchased about 1.2 million of its common shares in the third quarter. This brought the total shares purchased under a 25-million-share buyback program to 9.7 million.

Next earnings report expected in early February.

Business Summary

Coca Cola Enterprises is the world's largest bottler of Coca-Cola soft drinks. Approximately 48% of CCE's common stock is owned by The Coca-Cola Co.

CCE's bottling territories as of early 1989 included portions of 28 states, the District of Columbia, and the U.S. Virgin Islands. These territories included about 98 million people, or about 40% of the U.S. population. In 1988 about 75% of CCE's equivalent case sales represented products bearing the "Coca-Cola" or "Coke" trademarks, approximately 15% were of other soft drinks of The Coca-Cola Co., and about 10% represented products of other soft drink firms.

The company conducts its business primarily under bottle contracts with The Coca-Cola Co., whereby CCE receives the exclusive right to produce and market Coca-Cola soft drinks in authorized containers in specified territories. As of early 1989 CCE was operating 43 soft drink production facilities, 30 of which were combined production/distribution facilities. In addition, CCE had 201 other distribution facilities.

CCE estimates that excluding several businesses sold recently, its net dollar sales in 1988 would have been about $3.7 billion, or approximately 14% of the total 1988 dollar sales of soft drink products by all bottlers and fountain wholesalers in the U.S.

The company has been involved in a number of acquisitions and sales of soft drink businesses. On September 23, 1986 CCE acquired the soft drink bottlers previously owned by BCI Holdings Corp. (the Beatrice Bottlers) for about $1 billion. On September 29, 1986 CCE acquired the soft drink bottlers previously owned by John T. Lupton, members of his family, and other investors (the JTL bottlers) for about $1.2 billion, plus the assumption of about $200 million in indebtedness. In addition, during 1987 and 1988 CCE made additional acquisitions costing (including debt, if applicable) more than $800 million.

In December, 1988 CCE sold its Coca-Cola Bottling Co. of Mid-America unit for about $280 million. Several other businesses were sold in 1988 and 1989 for a total of about $35 million.

Dividend Data

Dividends were initiated in 1987.

Amt. of Divd. $	Date Decl.	Ex-divd. Date	Stock of Record	Payment Date

Finances

In CCE's November 1986 initial public stock offering, 71,400,000 common shares were sold at $16.50 each. Lead underwriters were Allen & Co., The First Boston Corp., Salomon Brothers, and Shearson Lehman Brothers. The offering provided CCE with net proceeds of some $1.12 billion, which was targeted for debt reduction. Following the offering, The Coca-Cola Co. (KO) had a 49% interest in CCE. In September, 1986 CCE entered into new bottle contracts with KO, which, among other things, enable KO to set prices for concentrates and syrups and determine marketing support levels at its discretion.

Capitalization

Summary

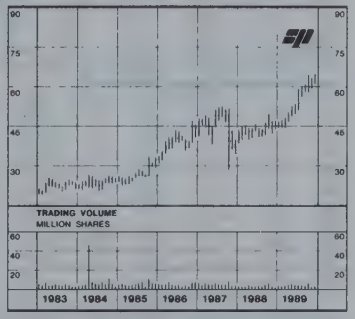
This company, a global producer and marketer of household and personal care products, is more than halfway through an 8-year program to improve operations by which it has expanded abroad, added new products, and cut production costs. The sale of Kendall health care ($1 billion in 1987 sales) for some $900 million in cash has provided funds to reduce debt and to spur growth through acquisitions.

Current Outlook

Earnings from continuing operations for 1990 should increase nicely to $4.50 a share from the $4.00 estimated for 1989.

The quarterly dividend was increased 21.6%, to $0.45 from $0.37, with the November, 1989 payment.

Profits for 1990 are expected to increase 15% on continued growth in oral care products and in markets abroad. Margins should continue to widen on price increases, volume-based gains in manufacturing efficiencies and aggressive marketing programs. Expansion abroad should also boost earnings growth, given favorable currency exchange rates. Share repurchases should also aid earnings per share growth. Acquisition of Vipont Pharmaceutical (anti-plaque toothpaste) should enhance the future.



Net Sales (Million $)

Quarter:	1990	1989	1988	1987
Mar.	---	1,204	1,142	1,313
Jun.	---	1,290	1,187	1,437
Sep.	---	1,260	1,194	1,432
Dec.	---	---	1,212	1,465
	---	---	4,734	5,647

Sales for the nine months ended September 30, 1989 advanced 6.6%, year to year, reflecting higher unit volume in offshore markets and higher prices. Margins widened on cost savings from the 1987 restructuring as well. After 50% lower interest expense, and taxes at 35.9%, versus 38.4%, income from continuing operations rose 44%. After preferred dividends, share earnings rose to $3.09 from $2.20, which was before income from discontinued operations of $0.59.

Important Developments

Dec. '89— CL extended its early November tender offer for each common share of Vipont Pharmaceutical at $14 a share. For its fiscal year ended September 30, 1988, Vipont earned $4.5 million on $33.5 million of revenues from anti-plaque dental products.

Nov. '89— In 1989, through September 30, CL had repurchased 2,608,337 million shares for $149 million, under authorization to purchase up to $410 million of stock to fund its leveraged Employee's Stock Ownership Plan.

Jun. '89— CL acquired the Veterinary Services division of McKesson Corp. The division is one of the largest distributors of Hill's Pet Products, and expands Hill's distribution in the eastern U.S. Pet products volume grew 23% in the 1989 second quarter.

Next earnings report expected in late January.

Business Summary

Colgate-Palmolive is an international manufacturer and distributor of consumer and industrial products. The health care segment was sold in October, 1988. Contributions in 1988:

	Sales	Profits
United States	36%	20%
Europe	32%	30%
Western Hemisphere	19%	34%
Far East and Africa	13%	16%

Household and personal care products consist of laundry and dishwashing detergents, fabric softeners, cleaners and cleansers, toothpastes, toothbrushes, bar soaps, hair care and shave products, consumer first aid products and other items. Laundry and dishwashing detergents accounted for 38% of sales in 1988 (40% in 1987) Oral care products comprised 21% of sales in 1988 (21%).

Specialty marketing consists of Hill's pet food and care products, Princess House fine crystal and decorative accessories, and CPL Industries, a supplier of cleaning products, Sterno and other cooking fuel and related equipment to institutions. The health care unit, The Kendall Co., which made supplies for physicians, health care facilities and households, was sold in late 1988 for $900 million.

Dividend Data

Dividends have been paid since 1895. A dividend reinvestment plan is available. A "poison pill" stock purchase right adopted in 1984 was amended in 1988.

Collins Foods International

NYSE Symbol CF

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 27'89	1989					
20½	22¾-16¼	16	0.20	1.0%	A-	1.39

Summary

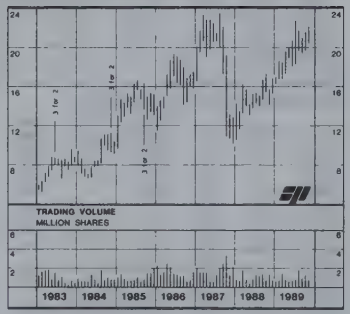
This company owns about 65% of Sizzler Restaurants International, a publicly owned business, and is also a major franchisee of Kentucky Fried Chicken units. In total, CF operates close to 400 restaurants, and its Sizzler business has more than 400 franchised units. CF's share earnings have risen in seven of the past eight fiscal years. Chairman James A. Collins owns about 20% of the common stock.

Current Outlook

Earnings for the fiscal year ending April 30, 1991 are estimated at $1.55 a share, up from the $1.39 projected for fiscal 1989-90.

The dividend has been raised 25%, to $0.05 quarterly from $0.04, with the January, 1990 payment.

More favorable comparisons from CF's Kentucky Fried Chicken (KFC) business, plus further growth from the Sizzler chain, are expected to help earnings in fiscal 1990-91. CF's development of new restaurants is likely to largely focus on the Sizzler business, with rapid expansion expected particularly in Australia. Also, with CF's cash position currently exceeding total debt by about $20 million, CF could make an acquisition or attract takeover interest itself.



Revenues[1] (Million $)

Period:	1989-90	1988-9	1987-8	1986-7
12 Wks. Jul.	130.9	129.2	138.9	129.7
12 Wks. Oct.	130.2	127.3	142.0	127.4

	E1.39	1.27	1.10	1.00

Important Developments

Nov. '89— Excluding businesses that have been sold, CF's revenue in fiscal 1989-90's second quarter was up 6.8%, year to year. A pretax gain of about about $900,000 from the sale of CF's 60% interest in restaurant company Ed Debevic's, Inc. was largely offset by the absence of profits from businesses that have been sold. In June CF had sold its Gino's East of Chicago restaurant. CF's 65%-owned Sizzler business accounted for 60% of CF's second quarter revenues. Sizzler's revenues and net income were up 8.3% and 12%, respectively, from the year-earlier period. Profit from CF's domestic Kentucky Fried Chicken business was lower, but the decline was less than it had been in CF's first quarter. Results in the second half of fiscal 1989-90 may benefit from lower chicken prices and new menu items.

Next earnings report expected in mid-February.

Business Summary

Collins Foods International is a major operator of restaurants, including 65%-owned Sizzler Restaurants International and more than 200 Kentucky Fried Chicken franchises. In the fourth quarter of fiscal 1987-8 CF sold its Naugles Mexican-American fast-food chain, and in April, 1987 it sold its wholesale foodservice business.

The Sizzler Restaurants chain serves moderately-priced meals which feature steak, seafood, salad, and related food items. At April 30, 1989 Sizzler had 192 company-operated and 436 franchised units in 35 states, two U.S. territories, Australia, Canada and Saudi Arabia. In fiscal 1988-9 Sizzler had revenues of $311 million and net income of $21.2 million, up 7.1% and 14%, respectively, from a year-earlier. In fiscal 1988-9 10 company-operated 31 franchise units were opened. Sizzler's results, which are consolidated with those of CF, accounted for 58% of CF's total revenues in fiscal 1988-9. Sizzler's stock is traded over-the-counter (symbol SIZZ).

CF also operated 209 Kentucky Fried Chicken (KFC) franchises in the U.S. (principally in California) and 60 KFC units in Australia. The parent company of the KFC chain is PepsiCo, Inc.

Finances

As a Kentucky Fried Chicken franchisee, CF pays royalties which range from 2 1/2% to 4% of restaurants' gross sales. Conversely, CF is a recipient of royalties (4 1/2% of gross sales in standard single-unit franchise agreements) through its 65% ownership of the Sizzler chain.

Dividend Data

Dividends were initiated in 1976. A "poison pill" stock purchase right was adopted in 1988.

Summary

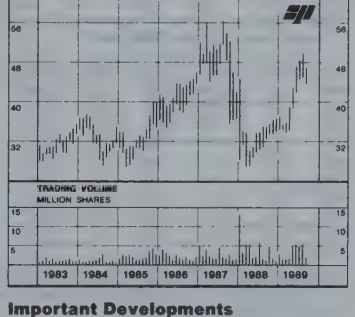
This natural gas wholesaler and retailer serves a number of mid-Atlantic and Midwestern states. Other operations involve oil and gas exploration and production, propane, coal leasing, and gas storage. Earnings for the 1989 first half fell, reflecting a higher tax rate. In June, 1989 CG filed with FERC a comprehensive agreement reached with its customers which would settle numerous regulatory proceedings and court appeals and enhance the competitiveness of CG's transmission unit.

Current Outlook

Share earnings for 1989 are estimated at $2.50, up from 1988's $2.46. An increase in share earnings to $2.75 is projected for 1990.

Dividends should continue at $0.50 quarterly.

Profits in 1989 from gas transmission operations should rise on higher rates and a slight increase in throughput. Gas distribution profits are expected to decline as warm weather in the 1989 first quarter is likely to more than offset benefits from customer growth. Oil and gas exploration and production profits are likely to be higher on increased average oil and gas prices and absence of a writedown. Share earnings growth will be aided by the absence of preferred dividend requirements. Earnings for 1990 should benefit from higher gas prices and gas sales and transmission volumes.



Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	1,121	1,321	1,087	1,486
Jun.	398	464	446	523
Sep.	---	454	353	454
Dec.	---	891	912	907
	---	3,130	2,798	3,370

Revenues for the six months ended June 30, 1989 declined 15%, year to year, reflecting warmer weather conditions. Benefiting from higher oil and gas production profits, pretax income rose 3.1%. After taxes at 36.3%, versus 31.0%, net income was down 4.9%. After preferred dividends in the 1988 period only, share earnings were $1.77, against $1.76.

	E2.50	2.46	2.30	2.12

Important Developments

Aug. '89— CG said it was beginning to form an Employee Stock Option Plan which would purchase CG common shares in the open market.

Jun. '89— Columbia filed with FERC an agreement that had been reached with its customers which would settle more than 30 outstanding regulatory proceedings and 23 related court appeals; the company expected the settlement to enhance the competitiveness of its transmission unit. CG said that assuming FERC approval of the settlement as of November 1, 1989, earnings through September 30, 1989 were expected to be improved by no more than $15 million, compared to a non-settlement outcome.

Mar. '89— CG called for redemption on June 1 the remaining $24.8 million principal amount of its 15.375% debentures due 1997.

Next earnings report expected in early November.

Business Summary

Columbia Gas System is a holding company for subsidiaries principally engaged in the production, transmission, and distribution of natural gas at wholesale and retail. Other operations are related to the sale of propane and coal. Industry segment contributions in 1988:

	Revs.	Profits
Gas transmission	50%	45%
Gas distribution	43%	43%
Oil & gas production	4%	11%
Other	3%	1%

The company's four transmission subsidiaries operate over 18,800 miles of pipeline serving 11 mid-Atlantic and Midwestern states, and Washington, D.C. Gas storage facilities have a capacity of 698 Bcf.

CG's seven gas distribution units serve more than 1.8 million residential, commercial, and industrial customers in Ohio, Pennsylvania, Maryland, Virginia, Kentucky and New York.

Total gas sales volume for the system in 1988 amounted to 551 Bcf, versus 511 Bcf in 1987. Gas transported for others totaled 779 Bcf, up from 746 Bcf transported the year before.

At year-end 1988 proved reserves were estimated at 897.8 Bcf of gas and 14.9 million barrels of oil and other liquids.

Auditors noted in their report on the company's 1988 financial statements that there were uncertainties related to CG's ability to recover certain purchased gas costs from customers.

Dividend Data

Dividends have been paid since 1943. A dividend reinvestment plan is available.

Summary

In November, 1989 directors of this supplier of equipment and services to the power, process and other industries and to municipalities and government agencies approved a definitive agreement for the company to be acquired for $40 a share in cash by ABB Asea Brown Boveri Ltd. Accordingly, ABB Asea began a $40 a share tender offer for all the outstanding CSP shares. The offer was scheduled to expire December 14, 1989 unless extended and was conditioned upon, among other things, at least 80% of the outstanding CSP common shares on a fully diluted basis being tendered.

Current Outlook

In view of the pending acquisition of CSP, there is no earnings estimate for 1990. Earnings for 1989 (for the company as a separate entity) are estimated at $1.70 a share.

Dividends should remain at $0.25 quarterly.

Sales for 1989 are expected to rise, reflecting forecasted gains in the process industries and power generation units. The process industry segment should provide the bulk of the increase in operating income. Interest expense may rise modestly, but the absence of nonrecurring charges should permit CSP to return to profitability.

Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	866	756	639	536
Jun.	1,009	908	717	669
Sep.	884	897	791	608
Dec.	---	923	895	738
	---	3,484	3,042	2,551

Sales for the nine months ended September 30, 1989 rose 7.8%, year to year, reflecting gains in the power generation and process industries units. In the absence of $165 million in charges, and aided by increased equity earnings and higher gains on asset sales, there was pretax income of $88.1 million, versus a pretax loss of $78.9 million. After taxes at 44.0%, against tax credits of $16 million, net income totaled $49.3 million, versus a net loss of $62.9 million. Share earnings were $1.25, versus a share loss of 1.65, before a special credit of $0.43 in the 1989 period.

Acquisition Agreement

Nov. '89— The company's directors approved a definitive agreement for CSP to be acquired by ABB Asea Brown Boveri Ltd. at $40 a share or about $1.6 billion on fully diluted basis. Accordingly, ABB Asea commenced a tender offer to purchase all of the outstanding CSP common shares at $40 a share in cash. The offer and withdrawal rights would expire at midnight Eastern Standard Time on December 14, 1989, unless extended. Upon completion of the offer, each CSP common still outstanding would be converted into the right to receive $40 a share in cash. The offer was conditioned upon, among other things, there being validly tendered and not withdrawn, an amount of CSP common shares representing at least 80% of the outstanding CSP common shares on a fully diluted basis.

Business Summary

Combustion Engineering's sales and operating profits by business segment in 1988 (profits in million $):

	Sales	Profits
Power generation	48%	-$89.9
Process industries	44%	55.1
Public sector, environmental	8%	-113.6

Foreign operations contributed 23% of total sales in 1988, and a $20.5 million profit.

Power generation supplies central electric generating stations to electric utilities and independent power projects and supplies application software and engineering and management services principally to the power industry. The unit also offers construction and project management services and supplies cogeneration equipment, fluid bed combustors, hydropower equipment and instrumentation and control systems to independent power projects.

Process industries supplies instrumentation and control systems, industrial minerals and equipment to the pulp and paper markets, chemical and refining markets.

Public sector serves resource recovery and environmental services markets and offers management services to municipalities, government agencies, and the process and power industries.

Dividend Data

Dividends have been paid since 1911. A dividend reinvestment plan is available. A new "poison pill" stock purchase right was adopted in 1988.

Summary

This company has grown rapidly through acquisitions in recent years to become the third largest cable television system operator in the U.S. Comcast also provides sound communications services (Muzak) and, with the 1988 purchase of American Cellular Network Corp. (AMCELL), provides cellular telephone services. A number of recent acquisitions will substantially boost noncash charges and debt levels in the periods ahead, but cash flow should continue to advance.

Current Outlook

The loss for 1989 is expected to widen to about $2.00 a share from the $0.71 loss of 1988.

The quarterly dividend was recently raised to $0.04, from $0.03.

Revenues should advance in 1989, mainly reflecting acquisitions, but also because of subscriber growth and higher monthly charges. The greater revenue, combined with a sharp increase in book charges, will significantly boost operating cash flow. The book charges and a surge in interest expense, however, will lead to much larger reported losses. Substantial losses will continue in 1990.

Service Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	128.72	98.24	70.87	30.94
Jun.	134.96	113.19	74.19	32.57
Sep.		116.11	80.00	33.38
Dec.		122.37	84.20	33.97
		449.91	309.25	130.85

Service income for the 1989 first half advanced 25%, year to year, boosted by acquisitions. Cash flow advanced 27%. After other items, including a 156% increase in interest costs (net) and sharply higher noncash charges, and taxes, the net loss widened to $71.7 million ($1.05 a share), from $9.6 million ($0.14).

Important Developments

Mar. '89— The company sold publicly $150 million of 11⅞% debentures due 2004.

Jan. '89— Comcast agreed to acquire a 40% interest in NYT Cable TV, a 168,000-subscriber cable system, for $168 million as part of a joint-venture purchasing group.

Dec. '88— The company acquired a 19.9% interest in Heritage Communications (HCI) from Tele-Communications Inc. for $80 million. HCI operates cable systems serving one million subscribers.

Nov. '88— In a 50/50 joint venture, Comcast and Tele-Communications acquired the cable assets of SCI Holdings Inc., the nation's fourth largest cable system operator, for about $1.55 billion and the assumption of $1.4 billion (net) of debt.

Next earnings report expected in mid-November.

Business Summary

Comcast Corporation engages principally in the development and operation of cable communications systems. It also owns the largest independent network of background music systems, operating under the Muzak name, and installs commercial sound systems. Through the acquisition in March 1988 of American Cellular Network Corp. (AMCELL), the company also provides cellular telephone communications. Contributions by business segment in 1988 were:

	Service Income	Oper. Profits
Cable communications	90%	113%
Cellular, sound & other	10%	-13%

As of June 30, 1989, Comcast owned or managed cable systems serving some 2.26 million subscribers, making it the third largest system operator in the U.S. Through acquisitions, more than 1.08 million subscribers were added during 1988, 89,000 in 1987 and about 637,000 in 1986.

Comcast Sound Communications, Inc. is the largest independent Muzak franchise in the world. The division also provides commercial sound and video systems and telecommunications systems. Operations are conducted in 12 major markets.

Dividend Data

Cash has been paid each year since 1977.

Dec. 11'89	1989					
23 3/8	34-20 7/8	9	0.24	1.0%	A-	2.05

Summary

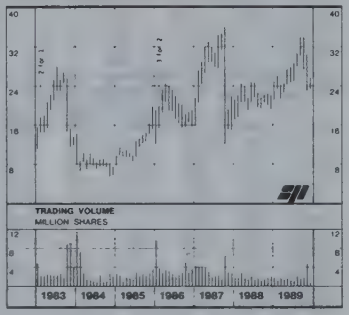
Comdisco is primarily engaged in buying, selling and leasing used and new IBM computer equipment. It also arranges leases for other computer and capital equipment, and provides disaster recovery backup for computer users. Share earnings in fiscal 1990 should benefit from strong leasing and remarketing operations, a growing disaster recovery business, and a stock repurchase program.

Current Outlook

Earnings for the fiscal year ending September 30, 1990 are projected at $2.90 a share, versus the $2.57 recorded in fiscal 1989.

An increase in the $0.06 quarterly dividend is likely.

Revenue growth should continue in fiscal 1990, reflecting strength in leasing and remarketing operations in the computer and other high technology markets and a growing disaster recovery business. Share earnings are expected to benefit from the higher volume, more controlled expansion and the resumption of a stock repurchase program.



Total Revenues (Million $)

Quarter:	1988-9	1987-8	1986-7	1985-6
Dec.	374	327	268	225
Mar.	437	310	306	227
Jun.	420	321	274	225
Sep.	447	351	327	225
	1,678	1,309	1,175	902

Revenues for the fiscal year ended September 30, 1989 (preliminary) rose 28%, from those of the prior year, reflecting strength in the company's core businesses. Margins narrowed on pricing pressures, and the gain in pretax income was limited to 11%. After taxes at 36.5%, versus 39.9%, income from continuing operations rose 17%, to $2.57 a share from $2.20, which excludes a loss from discontinued operations of $1.79.

Sep.	0.74	0.64	0.61	0.46
	2.57	2.20	1.85	1.91

Important Developments

Nov. '89— The company said that it had reactivated its stock repurchase program and was authorized to spend up to $19 million to purchase CDO common. In fiscal 1988 the company repurchased 1,441,607 shares of its common at an aggregate cost of $28.6 million.

Jul. '89— The company said that it had formed a new subsidiary, Comdisco Portfolio Asset Management, which will manage and remarket high technology assets of third parties.

May '89— CDO said that as part of its European leasing business expansion plan, it expected equipment purchases in Europe to exceed $300 million in 1989.

Next earnings report expected in late January.

Business Summary

Comdisco is primarily involved in buying, selling and leasing used and new IBM computer equipment. It also arranges and participates in leases for other capital equipment, and provides disaster recovery backup for computer users. Revenue sources in fiscal 1988 were as follows:

	Revenues
Leasing	72%
Sales	22%
Disaster recovery	4%
Other	2%

CDO buys or leases, and in turn sells, leases or subleases IBM computer equipment as well as computer equipment manufactured by others. Sales and lease transactions include the mainframe central processing units and/or various peripherals, such as printers, tape and disk drives and other equipment used with a mainframe. CDO emphasizes the larger and more advanced mainframe models, including the IBM 3090 series, 3084 processors, the 4300 series, and a full range of IBM peripheral equipment. CDO also leases other high technology equipment, primarily telecommunications and other office and communications products.

Through subsidiaries, Comdisco also provides computer services in the event of fire, flood, power outage or other disaster affecting a customer's data center, and invests in oil and gas properties. CDO discontinued its risk arbitrage operations in November, 1987.

Dividend Data

Cash dividends were initiated in 1977. A "poison pill" stock purchase right was adopted in 1987.

Summary

Formerly Commercial Shearing, this company is a leading multinational manufacturer of hydraulic components, metal products and filtration and separator products. In July 1989, the company completed the redemption of $25 million of convertible subordinated debentures into about 1.47 million common shares. In September 1989, the company rejected a $27.50-a-share takeover offer from Haas & Partners Inc.

Business Summary

Commercial Intertech Corp. (formerly Commercial Shearing, Inc.), designs, manufactures and markets hydraulic components, fabricated metal products and filtration and separation products. In early 1986, the company acquired the AMF Specialty Materials, Inc. (AM Cuno) unit of Minstar Inc., a manufacturer of filtration and separation products. Prior to the acquisition, hydraulic components and metal products accounted for all of the company's business.

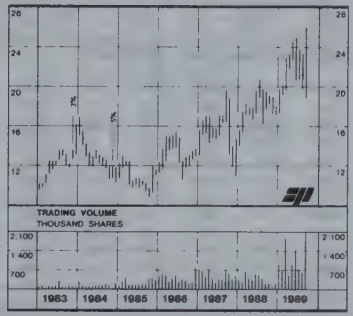
Contributions to net sales and operating income in fiscal 1988 were:

	Sales	Oper. Income
Hydraulic components	40%	49%
Fabricated metal products	30%	34%
Fluid purification products	30%	17%

In fiscal 1988, foreign operations accounted for 46% of total sales (32% to Europe).

Hydraulic components include primarily gear pumps and motors, control valves and telescopic cylinders for use on heavy-duty mobile equipment, such as dump trucks, cranes, and bulldozers. The company also manufactures hydraulic test equipment for military and industrial applications, mobile electrical power generators, and hydraulic tilt and trim mechanisms for recreational boating. In conjunction with joint venture partner, United Technologies, the company is planning high volume production of its mini-pump for anti-lock brake systems and other automotive applications beginning in 1990.

The metal products operations encompass three units: metal stampings, tunnel products and pre-engineered metal buildings. The company's metal stamping products include wheels for tracked vehicles, while, underground support products are used in the construction of tunnels for highways, railways and subway systems. The pre-engineered business manufactures buildings under the trade name Astron through more than 250 builder/dealer distributorships throughout Europe.



Through Cuno, Commercial Intertech produces industrial process filtration and home water purification systems, serving markets worldwide. Industrial filters are used primarily in the chemical and petrochemical industries, particularly for paints and coatings. Consumer products are designed to meet the growing demand to filter impurities in the home water supply.

Important Developments

Sep. '89— In rejecting a $27.50-a-share takeover proposal from Haas & Partners Inc., Commercial Intertech said its board of directors determined that it had no interest in pursuing the conditional proposal and that the company was not for sale.

Oct.		109.1	87.0	77.4
		398.7	321.3	274.5

For the nine months ended July 31, 1989, net sales increased 10%, year to year, aided by strong sales from the European-based pre-engineered buildings unit, partially offset by a stronger dollar. Profitability benefited from the higher volume and, after lower interest charges, net income was up 36% to $14,645,000 ($1.27 a share), from $10,766,000 ($0.97).

Finances

In July 1989, the company completed the conversion of $25 million of its 6% convertible subordinated debentures into common stock at $17 a share.

In October 1988, the company acquired, for $5,000,000, Water Factory Systems, a manufacturer and marketer of reverse osmosis water treatment systems located in Costa Mesa, Calif. The purchase agreement also provided for additional consideration of up to $17,544,000 in the form of a variable earnout based upon sales and earnings achieved over the next six years.

8¼	19¾-7⅛	8	None	None	B-	0.83

Summary

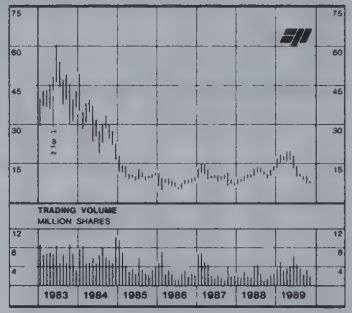
Commodore makes microcomputers and offers peripherals and software for the home, education, and business markets. CBU's line includes the Amiga computers which feature advanced graphics, the 64C/128 home computers, and MS-DOS compatible computers. Some 76% of sales come from overseas. Recent results have been penalized by the strong U.S. dollar and weak consumer product sales. However, earnings could rebound if CBU is successful in igniting domestic sales of the Amiga product line.

Current Outlook

Earnings for the fiscal year ending June 30, 1990 are estimated at $1.10 a share, compared with the $1.55 reported for fiscal 1989.

Initiation of cash dividends is not expected.

Demand for the Amiga computers in fiscal 1990 should continue to be very strong with the availability of new products and a greater number of software packages, coupled with an aggressive marketing campaign. Sales of the MS-DOS compatible products should also be good, but 64C/128 sales are likely to decline as customers demand more functionality and competition remains strong. Gross margins could improve, depending on the pricing environment and component costs. Operating expenses should remain well controlled, although continued investment in marketing is likely. Foreign currency fluctuations will continue to affect profitability as well as revenues.



Net Sales (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Sep.	165	200	174	176
Dec.		349	282	271
Mar.		210	200	170
Jun.		180	215	190
		940	871	807

Revenues for the three months ended September 30, 1989 declined 17%, year to year, as lower C64 sales, weakness in consumer product demand, and delayed promotions in certain major markets outweighed increased sales of the Amiga line. Gross margins narrowed, reflecting lower sales and foreign exchange losses. Operating expenses were up 6.5% due to increased marketing expenditures, and there was a pretax loss of $6.5 million, compared with income of $13.2 million. After no taxes, versus taxes at 27.3%, the net loss was $6.5 million ($0.20 a share), in contrast to net income of $9.6 million ($0.30).

		1.55	1.51	0.71

Important Developments

Oct. '89— Commodore unveiled a $15 million national television and print advertising campaign, which will run through the Christmas season, featuring the Amiga computer. Separately, in September Commodore announced a major retail agreement with Connecting Point of America, Inc. Under the agreement, Connecting Point will warehouse, redistribute and sell all Commodore Amiga and PC line hardware products. Connecting Point operates more than 325 outlets nationwide.

Next earnings report expected in early February.

Business Summary

Commodore manufactures personal computers for the home, education, business, and professional users. Operations outside North America contributed 76% of revenues and $106.8 million of operating profits in fiscal 1989, compared with 74% and $118.8 million the year before.

The Amiga 500 and Amiga 2000 personal computers (45% of sales in fiscal 1989), introduced in fiscal 1987, feature multitasking, advanced graphics, video, four-channel sound, and built-in speech synthesis capabilities. The Amiga 500 is targeted at home and education users, while the Amiga 2000 is aimed at the business and professional environments. An optional plug-in board adds MS-DOS compatibility. The Amiga 2000 line was recently expanded to include the Amiga 2000HD, the Amiga 2500, and the Unix-compatible Amiga 2500 UX (introduced in special test units). At year-end fiscal 1989 the installed base exceeded one million units and over 2,000 software titles were written for the family.

The Commodore 64C/128D family (31%) is sold mainly through mass market channels to the consumer and education markets. The 64C model features 64K of memory and GEOS, an icon-based operating system. The 128D has 128K of memory. Over 10,000 software packages are available.

Commodore's MS-DOS compatible personal computers (24%) are sold primarily in Europe. The line ranges from XT compatibles to 80386sx machines. The company plans to introduce several 80386-based computers in fiscal 1990.

Dividend Data

No cash dividends have ever been paid.

Finances

In January, 1989 CBU reported that its U.S. subsidiaries had received statuatory notices of deficiency from the Internal Revenue Service for taxes of $74 million for 1981-3. IRS audits were continuing for periods through fiscal 1986. Also, tax authorities in Japan and Italy have issued deficiency assessments. CBU said its tax reserves, in light of available tax loss carrybacks, are adequate to cover a realistic resolution of the situation and that such a resolution would not have a material impact on earnings, cash flow or financial position. As of June 30, 1989 CBU's U.S. subsidiaries had operating loss carryforwards of about $120 million and research tax credit carryforwards of $14 million. Certain non-U.S. subsidiaries had carryforwards of about $67 million.

Summary

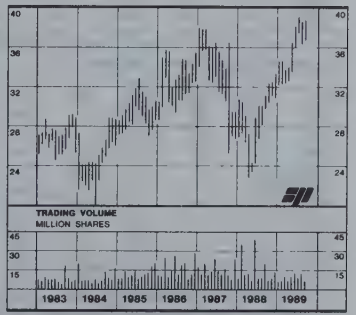
This Chicago-based utility owns and operates the nation's largest network of nuclear facilities. In December, 1988 CWE and the Illinois Commerce Commission agreed to a rate settlement, finalizing the company's base rates for the foreseeable future. In their review of CWE's 1988 financial statements auditors noted that there was uncertainty as to the outcome of appeals of the aforementioned rate settlement and certain prudency issues.

Current Outlook

Share earnings for 1989 are estimated at $3.10 (before special charges), up from 1988's $3.01. Share earnings for 1990 could reach $3.75.

An early increase in the $0.75 quarterly dividend is not probable.

Share earnings for 1989 will benefit from higher rates and increased sales, despite a cooler-than-normal summer season. Longer-term prospects are enhanced by the completed construction program and strong cash flow.



Electric Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	1,363	1,199	1,253	1,322
Jun.	1,310	1,197	1,334	1,203
Sep.	---	1,868	1,856	1,682
Dec.	---	1,349	1,230	1,271
	---	5,613	5,674	5,479

Revenues for the six months ended June 30, 1989 rose 12%, year to year, owing to higher rates and increased sales. After lower fuel costs and off-system sales in 1989, operating income was up 34%. However, following sharply lower AFUDC and an 88% decline in current income tax credits applicable to nonoperating activities, the gain in net income narrowed to 22%. Share earnings were $1.15, versus $0.88.

Important Developments

Sep. '89— CWE applied to the Illinois Commerce Commission for a rehearing of its August 23 order which found an additional $191 million in plant disallowances on CWE's Byron 1 nuclear plant. The ICC ordered CWE to refund revenues associated with the disallowed costs. The company reported that the write-off of the disallowance and refund would be about $1.43 a share. CWE appealed the refund order to the Circuit Court, and expected a decision on October 23. Separately, the company said the Illinois Supreme Court may decide an appeal of the 1988 rate settlement between CWE and the ICC in October, 1989. The December, 1988 settlment called for a two year phase-in of an approximately $480 million rate increase. Under the settlement CWE has collected $185.2 million from January 1 to August 31, 1989, which is subject to refund.

Next earnings report expected in mid-October.

Business Summary

Commonwealth Edison serves some 8 million people in Chicago and northern Illinois. Contributions to electric revenues by customer class:

Revenues	1988	1987	1986
Residential	39%	38%	35%
Small comm'l & ind'l	29%	30%	31%
Large comm'l & ind'l	22%	24%	24%
Other	10%	8%	10%

The generation mix in 1988 was 77% nuclear, 22% coal, and 1% oil. Peak demand in 1988 was 17,459 mw and system capability totaled 21,972 mw, for a capacity margin of 21%.

The company owns and operates the nation's largest network of nuclear plants. The company's nuclear construction program completes CWE's building cycle for the foreseeable future.

In January, 1988 CWE wrote off $101.5 million ($94.0 million, net) of Byron 1 costs retroactive to 1985. The company is appealing the August, 1989 ruling by the ICC that CWE must write off an additional $191 million in Byron 1 costs and refund revenues associated with the disallowed costs. In the company's 1988 financial statements auditors noted that the final outcomes of the Byron 1 rate case and regulatory issues with the entire nuclear construction program were uncertain.

Summary

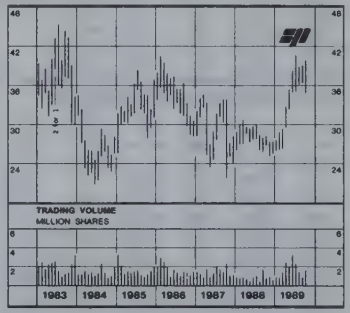
Comsat provides international, domestic and maritime communications and information services. Through minority ownership in two international satellite organizations, CQ links the U.S. by satellite with more than 160 other nations and over 6,500 ships at sea and offshore facilities. In recent quarters, revenues and operating earnings growth has been driven by gains in international calling volumes.

Current Outlook

Earnings for 1990 are projected at $3.75 a share, compared with the $3.55 estimated for 1989.

The $0.33 quarterly dividend is the minimum expectation.

In 1990, earnings from Space communications are expected to increase, as higher volume at INTELSAT is only partly offset by the effect of promotional tariffs to long-distance carriers. Earnings from CQ's Systems operations are anticipated to increase sharply. Losses from the Video unit should decrease; overall operating income is anticipated to rise about 15%. Net interest expense is likely to rise. The effective tax rate is anticipated to increase.



Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	97.4	84.1	80.7	114.9
Jun.	102.8	88.9	88.2	118.8

Dec.	E0.59	0.66	d0.62	0.78
	E3.55	3.35	0.97	2.95

Important Developments

Oct. '89— CQ's Comsat Video Enterprises unit along with Bertram M. Lee and Peter C. B. Bynoe agreed to acquire the National Basketball Association's Denver Nuggets for $54 million. Lee and Bynoe and their investors would invest $8 million and would own a 37.5% share, and Comsat Video would invest $17 million for a 62.5% share of the team. The balance would be financed by the partnership. Lee and Bynoe would be the managing general partners.

Jun. '89— CQ was awarded a U.S. patent for its satellite management technique known as the "Comsat Maneuver." The technique involves a precise change in the angle of orbiting satellites which results in a dramatically reduced level of fuel consumption, thereby significantly lengthening the lives of the satellites. CQ expected to license the use of the Comsat Maneuver to other satellite builders, owners and operators for a fee.

Next earnings report expected in late February.

Business Summary

Comsat provides regulated and unregulated satellite communications services and provides information services. Contributions (operating profits in million $) by business segment in 1988:

	Revs.	Profits
International	69%	$96.0
Systems	17%	4.0
Video Entertainment	12%	-8.7
Other	2%	-10.5

Beginning in 1988, CQ reported its financial results in three segments: International (INTELSAT and INMARSAT); Systems (Comsat General and other government and commercial systems activities); and Video Entertainment.

Regulated satellite communications consists of international services to U.S. carriers and other customers, using the Intelsat (25%-owned) satellite system, and maritime services, using Inmarsat (28%). A technical and consulting services business and Comsat's R&D center are part of the division.

Other operations consist of communications satellite systems activities (whether or not subject to FCC regulation), including the Comstar and Marisat satellite systems, and the marketing of information and consulting services to industry and government. Operations also include the distribution of entertainment and videoconferencing services to hotels throughout the U.S.

During 1987 CQ discontinued its earth station operations, end-to-end international communications services, direct broadcast satellite (DBS) business, and its Technology Products segment, which involved the manufacture of telecommunications products.

Dividend Data

Dividends were initiated in 1970. A dividend reinvestment plan is available.

Nov. 24'89	1989					
31⅛	35-22¼	20	0.36	1.2%	A	0.96

Summary

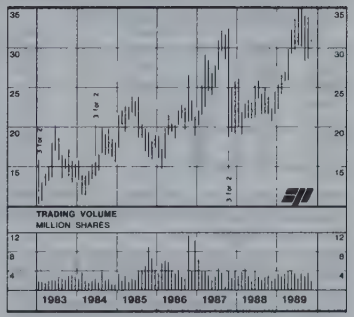
The company is the largest publicly-owned operator of acute care psychiatric hospitals. In August, 1989 CMY transferred its dialysis and home health care businesses to a new company called Vivra whose shares were spun off to CMY shareholders. Longer-range prospects are enhanced by good growth projected for the psychiatric hospital industry and a new facilities expansion program.

Current Outlook

Earnings from continuing operations for the fiscal year ending November 30, 1990 are projected at about $1.85 a share, up from the $1.55 estimated for fiscal 1989.

An increase in the $0.09 quarterly dividend is likely during fiscal 1990.

Revenues for fiscal 1990 are expected to show good growth, aided by contributions from new psychiatric centers, higher rates and improved utilization in established facilities. Profitability should benefit from the better volume and cost efficiencies.



Net Oper. Revenues (Million $)

Quarter:	1988-9	1987-8	1986-7	1985-6
Feb.	76.2	78.8	64.6	54.5

	E1.55	1.54	1.32	1.14

Important Developments

Oct. '89— The company opened a new acute care psychiatric hospital in Greenfield, Wis., after opening one in Oklahoma City, Okla. in September. Two additional units in California were scheduled to be opened during the first quarter of fiscal 1990.

Aug. '89— The company spun off its dialysis and home health care businesses to a new publicly-owned firm named Vivra Inc. through a the tax-free distribution of one share of Vivra for each 10 shares of CMY held. CMY has retained its psychiatric hospital operations. Dialysis and home health care operations combined had pro forma operating revenues of about $82 million and net earnings of $10.9 million in fiscal 1988. Vivra shares presently trade on the NYSE under the symbol V.

Next earnings report expected in mid-December.

Business Summary

Community Psychiatric Centers is the largest publicly-owned operator of acute psychiatric hospitals. The company spun off to shareholders its chain of kidney dialysis centers and home health care operations in August, 1989. Business segment contributions in fiscal 1988 were:

	Revs.	Profits
Psychiatric hospitals	76%	81%
Dialysis centers	19%	18%
Home health care	5%	1%

As of May 31, 1989 CMY operated 43 psychiatric centers with some 4,072 licensed beds, located in California (13 centers), 15 other states (23 units), Puerto Rico (one) and the U.K. (six). Patient days of service totaled 653,707 in fiscal 1988, up from 566,679 in fiscal 1987. Average occupancy in fiscal 1988 was 47%, unchanged from the year before. The units offer drug therapy, alcoholic rehabilitation, and occupational and recreational therapy, generally under the supervision of the patient's doctor.

Approximately 73% of acute psychiatric revenues in fiscal 1988 was derived from private insurance and direct patient payments; 13% from rates negotiated with HMOs, PPOs, and insurance companies; 8% from Medicare, 3% from Medicaid and similar programs; and 3% from other sources.

COMPAQ Computer

NYSE Symbol CPQ Options on Pacific (Jan-Apr-Jul-Oct) In S&P 500

Price	Range	P–E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 29'89	1989					
89½	112½–59¼	11	None	None	NR	1.31

Summary

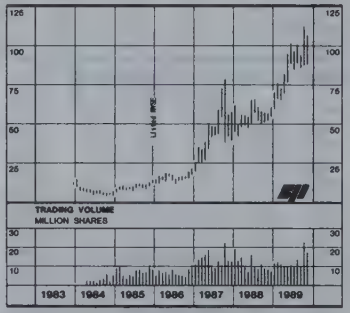
COMPAQ Computer is a leading manufacturer of high-performance, industry-standard IBM PC-compatible portable and desktop computers. In the 1989 fourth quarter, CPQ announced several significant new products, including notebook-sized laptop computers, an EISA-based computer designed for multiuser environments, and an i486-based desktop computer. Although slowing industry growth and product transition issues are expected to impair near-term results, stronger revenue and earnings growth should resume in the second half of 1990.

Current Outlook

Earnings for 1990 are projected at $9.15 a share, versus the $7.70 (including a $0.31 nonrecurring gain) estimated for 1989.

Initiation of cash dividends is not anticipated.

Revenue growth is expected to be under 20% in the 1989 fourth quarter, reflecting slowing industry growth and product transition issues; however, a resumption of stronger growth is expected in the second half of 1990 as new products will be widely available and customers will have had time to evaluate the new offerings. Growth of the personal computer industry in general is expected to be about 15%-20%, and COMPAQ should continue to increase its share with its dominant position in the dealer network and strong product offering. Furthermore, a vast majority of COMPAQ's sales are in market segments that are growing faster than the industry as a whole. Competition could intensify with increased availability of new products from Apple and IBM. Gross margins are expected to remain at the 40% level, with pretax margins at 16%-17% and net margins at about 10%.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	683	439	211	144
Jun.	722	457	268	147
Sep.	683	502	313	147
Dec.	---	668	432	187
	---	2,066	1,224	625

Sales for nine months ended September 30, 1989 advanced 49%, year to year. Gross margins widened slightly. Although R&D spending increased 71%, other expenses were well controlled. After unrealized gains of $13.7 million versus $9.7 million, pretax income was up 57%. After taxes at 35.0% in each period, and equity income, net income advanced 56%. Fully diluted share earnings were $5.91, versus $4.06.

Dec.	E1.78	2.18	1.25	0.57
	E7.70	6.27	3.59	1.52

Important Developments

Nov. '89— CPQ introduced new products, including two notebook-sized laptop computers, the LTE and LTE/286; the SYSTEMPRO, an EISA-based computer designed for networking and multiuser environments; and the DESKPRO 486/25 based on the i486 processor. The notebook-sized computers will be shipping in volume by the end of the fourth quarter. CPQ will ship the DESKPRO 486/25 when it receives supplies of the i486 chip, currently scheduled for the 1990 first quarter.

Next earnings report expected in late January.

Business Summary

COMPAQ manufactures high performance laptop, portable and desktop personal computers for business and professional use which run the MS-DOS and OS/2 operating systems. CPQ sells it computers to over 3,000 independent computer specialty dealers, with 1,500 located outside the U.S. In 1988 ComputerLand Corp. accounted for 13% of sales. In April, 1989 CPQ terminated its relationship with Businessland, which represented 7%, in the U.S. and Canada but not in the United Kingdom. Foreign operations contributed 39% of revenues in 1988, up from 26% in 1987.

CPQ designs its computers to be compatible with the industry standard architecture established by IBM in 1981 with the introduction of its PC. In 1987 IBM moved away from this standard with its new Personal System/2 (PS/2) personal computers which had a new patented internal architecture called MicroChannel architecture (MCA). In September, 1988 CPQ and eight other personal computer vendors announced they would develop an extension to the existing PC standard architecture, Extended Industry Standard Architecture (EISA). EISA products are expected in 1989. Neither MCA or EISA affect the operation of current industry standard software. CPQ has not announced a MCA compatible computer.

CPQ emphasizes quality, reliability, additional features and full functionality of its products and with each new generation of microprocessor has emphasized the higher performance end of the marketplace. In recent years CPQ has emphasized its products based on Intel's 16-bit 80286 and 32-bit 80386 microprocessors. CPQ believes performance is a more important factor than price in the purchase decision for its products.

CPQ's portable computer line includes a variety of models ranging from the 80286-based PORTABLE II to the newest PORTABLE 386 with weights of 18 to 27 lbs. and offering a variety of options including fixed and floppy disk drives and up to 32 MB of random access memory. CPQ's DESKPRO desktop personal computers incorporate Intel's 8086, 80286 and 80386 microprocessors and are also available in a variety of configurations. In October, 1988 CPQ announced its first battery-powered laptop computer, the SLT/286.

CPQ owns about 40% of Conner Peripherals, Inc., a producer of 3½ inch disk drives. In 1988 CPQ purchased $122 million of product from Conner.

Dividend Data

No cash dividends have been paid on the common stock. COMPAQ's current intention is to retain its future earnings for use in operations. A "poison pill" stock purchase right was adopted in 1989.

Finances

In the 1989 third quarter, CPQ realized a gain of about $7.6 million ($0.11 a share) from the sale of one million Conner Peripherals shares.

In October, 1988 the company issued a 9.77% $75 million 10-year mortgage note under an agreement with its lender for the issuance of up to $150 million in notes.

Capitalization

Long Term Debt: $274,930,000, incl. $200 million of 6½% conv. debs. due 2013, conv. into com. at $65 a sh.

Jan. 10'90	1989-90					
12	22⅛-10½	14	None	None	B+	1.48

Summary

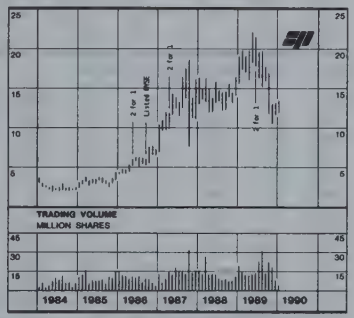
This company develops, markets and supports standardized software products, including systems software, database management systems, applications software and microcomputer programs. CA has grown rapidly in recent years through new product development and acquisitions. While earnings in the first half of fiscal 1989-90 were penalized by restrained revenues and higher costs related to the September 1989 acquisition of Cullinet, significantly higher sales and merger related synergies should lead to an earnings rebound in 1990-1.

Current Outlook

Earnings for the fiscal year ending March 31, 1991 are projected at $1.20 a share, up from the $0.90 estimated for fiscal 1989-90.

Payment of cash dividends is not anticipated.

Sales growth is expected to remain strong through fiscal 1990-1, aided by a healthy systems software market and the related heavy demand for CA's expanded product line. Margins are expected to widen, especially in fiscal 1990-1, reflecting merger related synergies associated with the Cullinet acquisition. The tax rate is expected to be little changed. By offering products that improve the productivity of customers' existing data processing resources at a relatively low price, CA is partially insulated from the vagaries of the economic cycle.



Revenues (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Jun.	303	186	139	50
Sep.	282	224	168	64
Dec.	---	309	195	94
Mar.	---	311	206	102
	---	1,030	709	309

Revenues for the six months ended September 30, 1989 rose 14%, year to year (1988-9 restated). Lower than expected product sales in the second quarter owing to the prolonged Cullinet acquisition process, combined with higher expense levels narrowed margins. Profits were further hampered by one-time acquisition and restructuring charges approximating $30 million, and pretax income fell 40%. After taxes at 35.0% versus 47.1%, net income declined 26%, to $0.11 a share (based on 5.6% more shares), versus $0.16 (adjusted).

Mar.	E0.37	0.34	0.22	0.12
	E0.90	1.02	0.65	0.37

Important Developments

Nov. '89— CA attributed weak second quarter results to lower product revenue stemming from the prolonged Cullinet acquisition process and the decision by some customers to defer purchases until acquisition uncertainties were resolved. While the acquisition was completed on September 12, CA said insufficient time remained before the end of the quarter to complete the sales cycle for those who had delayed their purchase decisions.

Next earnings report expected in late January.

Business Summary

Computer Associates International designs, develops, markets and supports standardized computer software products for use primarily with IBM and IBM-compatible mainframe computers, as well as for minicomputers and microcomputers.

Until mid-1982, the company was primarily a supplier of systems software for IBM mainframe computers using the VSE operating system. Since then, it has broadened its software product line through new product development and a series of acquisitions, and currently offers a portfolio of over 200 products.

Systems software products enable a customer to more efficiently utilize its data processing hardware, software and personnel resources, by providing tools which measure and improve computer hardware and software performance and programmer productivity. Major systems software products include CA-DYNAM, which offers security and efficiency features for the management of disk files; CA-TOP SECRET, which protects access to VSE, VM and MVS operating systems; and CA-UNICENTER, a data center management system.

Applications, which run on a wide variety of hardware platforms, addresses such areas as financial management, visual information, banking, database management, project management, decision support, applications development and job costing.

Microcomputer software includes spreadsheet, data base, word processing, report generator and accounting programs.

Business outside of North America accounted for about 59% of revenues in fiscal 1988-9, versus 61% the preceding year.

Dividend Data

No cash dividends have been paid. A 2-for-1 stock split was paid June 16, 1989, to holders of record May 30. The shares were also split 2-for-1 in May, 1987, 1986 and 1983.

Finances

In September, 1989 CA acquired Cullinet Software, Inc., a vendor of database management and applications software with annual revenues of over $200 million, for stock valued at approximately $300 million. In October, 1988 CA acquired Applied Data Research Inc., a developer of database management and applications development software, for about $170 million. In August, 1987 CA acquired UCCEL Corp., a developer of mainframe systems and other software, for stock valued at about $830 million.

Capitalization

Long Term Debt: $65,105,000.

Summary

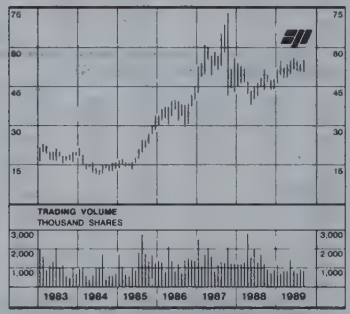
This leading participant in the computer services industry derives some 70% of its revenues from the U.S. Government. CSC's activities include systems consulting and development, facilities management, information network services, credit reporting and tax processing. Although near-term earnings growth will be impaired by lower-margin Government business, CSC's recent emphasis on expanding its commercial business bodes well for longer-term earnings growth.

Current Outlook

Earnings for the fiscal year ending March 31, 1990 are projected at $3.70 a share, up from the $3.28 of 1988-9.

Payment of cash dividends is not anticipated.

Revenues for fiscal 1989-90 are expected to advance about 14%, aided by heavy demand for CSC's systems integration services. However, a larger portion of CSC's revenues will be derived from lower margin technical services contracts in the Federal market, and, as a result, the gain in operating income is projected to be held to 8%. Although uncertainties exist regarding the timing and possible reductions of Federal Government contracts, CSC's recent emphasis on expanding its range of consulting and professional services to commercial and other non-Federal clients (which tends to be more profitable than Federal Government business) bodes well for longer-term earnings growth.



Service Revenues (Million $)

13 Weeks:	1989-90	1988-9	1987-8	1986-7
Jun.	342	299	275	234
Sep.	---	299	281	249
Dec.	---	345	287	257
Mar.	---	360	309	291
	---	1,304	1,152	1,031

Revenues for the three months ended June 30, 1989 rose 14%, year to year, reflecting growth in the Federal systems and services and commercial professional services segments. Margin pressures in CSC's Federal market held the gain in operating income to 5.3%. Following lower interest and other expense (net), pretax income increased 10%. After taxes at 36.9% versus 38.0%, net income was up 12%, to $0.82 a share from $0.73.

Mar.	E1.15	1.05	0.87	0.68
	E3.70	3.28	2.73	2.08

Important Developments

Jun. '89— CSC acquired CIG-Intersys Group, the largest computer services organization in Belgium. CIG's consulting, systems integration, software and facilities management operations generated revenues of about $85 million in calendar 1988.

Apr. '89— The company said that it had won about $2.6 billion worth of contract orders during fiscal 1988-9.

Next earnings report expected in mid-October.

Business Summary

Computer Sciences is one of the largest computer services companies in the U.S. Revenues in recent years were derived as follows:

	1988-9	1987-8
Federal systems & services	68%	63%
Consulting services	11%	10%
Credit services	8%	9%
Health & insurance systems	6%	9%
Network services	5%	7%
Complementary services	2%	2%

Primarily serving the U.S. Government, the Federal systems & services segment designs, engineers and integrates computer-based systems and communications systems, providing all the hardware, software, training and related elements necessary to operate a system. It also provides multidisciplinary technical services.

Consulting services include consulting and technical services in the development of computer and communication systems to nonfederal organizations in the U.S. and Europe.

Credit services include consumer credit reports, accounts receivable collection, and management and promotional services. During 1988-9, CSC signed a contract with Equifax Inc. whereby Equifax will, for a fee, provide credit reports to CSC from the merged credit files of both companies

The Health and insurance unit provides large-scale claims processing for government agencies. Its CSC Comtec and recently acquired Seako subsidiaries provide turnkey information systems, software and professional services to health care companies.

Network services are provided through its INFONET network (40% owned), which offers communications, electronic messaging and remote computing services.

Complementary services consist of other support for specific markets, including a tax preparation service.

Dividend Data

No cash dividends have been paid since 1969. A "poison pill" stock purchase right was adopted in 1989

Finances

The Federal Government accounted for 71% of fiscal 1988-9 revenues (67% in 1987-8), state and local governments 3% (5%), commercial business 20% (20%), and international 6% (8%).

Capitalization

Jan. 8'90	1989-90					
27½	30¼-19⅜	16	0.60	2.2%	A+	1.12

Summary

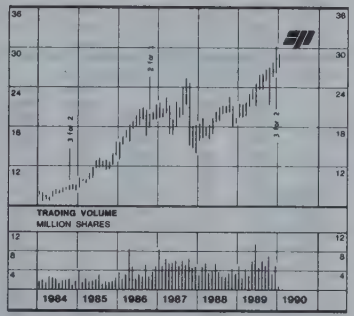
This diversified company is a leader in branded frozen foods, processed meats, poultry, red meats and seafood markets, and is also a major flour miller, grain merchandiser and distributor of fertilizers, pesticides and animal feeds. Acquisitions have been an important driver of growth. Earnings for fiscal 1989-90 should advance, reflecting the acquisition of the SIPCO meat business ($3 billion annual sales) and internal growth. The shares were split 3-for-2 in December, 1989 and the dividend was increased 17%.

Current Outlook

Earnings for the fiscal year ending May 31, 1990 should rise to $1.85 a share from fiscal 1988-9's $1.63 (as adjusted for the December, 1989 3-for-2 stock split).

The quarterly dividend (raised 17% with the December, 1989 payment) should remain at $0.15.

Earnings for fiscal 1989-90 should continue to trend higher. Although frozen foods markets are likely to remain highly competitive, cost cutting efforts should improve profitability, while further growth at Armour and higher volume should help lift contributions from prepared foods. A pickup in grain exports would benefit trading operations, while expanded flour and oat milling capacity should allow hefty gains for grain processing. Increased farm plantings should also be a positive factor. Acquisitions, including purchase of the remaining 50% interest in Swift Independent Packing Co., add to future prospects.



Net Sales (Billion $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Aug.	4.01	2.81	2.42	2.28
Nov.	3.86	2.84	2.30	2.20
Feb.	---	2.72	2.19	2.01
May	---	2.97	2.57	2.51
	---	11.34	9.47	9.00

Sales for the six months ended November 26, 1989 rose 39%, year to year, due largely to inclusion of SIPCO. Margins narrowed on the consolidation, despite improvement in all operating segments. Pretax income increased 21%. After taxes at 36.4%, versus 35.7%, net income was up 20%. After higher preferred dividend requirements, earnings per share rose to $0.92 from $0.79, both adjusted for the December 1989 3-for-2 stock split.

May	E0.58	0.53	0.39	0.33
	E1.85	1.63	1.29	1.23

Important Developments

Dec. '89— Fiscal 1989-90 first half earnings included a $26.9 million net gain from settlement of litigation related to the proposed Holly Farms Corp. acquisition, and a $24.8 million net charge to consolidate and write down processed meats facilities. In July CAG acquired the remaining 50% of SIPCO via assumption of $159.9 million of long-term debt and preferred stock.

Next earnings report expected in late March.

Business Summary

ConAgra is involved in the production of agricultural and basic food products. Sales and operating profit contributions by business segment in fiscal 1988-9:

	Sales	Profits
Prepared foods	62%	62%
Agri-products	20%	18%
Trading and processing	17%	18%
Finance	1%	2%

The prepared foods segment consists of the No. 2 poultry producer in the U.S.; a major producer of further processed chicken and turkey products (Country Pride and other brands); the nation's largest producer and marketer of frozen prepared foods (Banquet); a leader in branded red meats (Armour, Monfort of Colorado, SIPCO) for retail and foodservice markets; seafood and other food items; and pet accessories.

The agriculture segment includes a leading distributor of pesticides and fertilizers; a specialty retailer of country living merchandise, fabrics and crafts; and a producer of formula feed and feed additives.

CAG is the largest publicly-held merchandiser and exporter of grain, a leading flour miller, a world-wide trader of various agricultural and other commodities, and a leading commodity futures brokerage. The company is also involved in formula feed and other basic food industries in Spain, Portugal and Puerto Rico.

Dividend Data

Dividends were resumed in 1976. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

Sep. 28'89	1989					
17 3/4	19-15 1/8	14	1.36	7.7%	A-	0.41

Summary

This natural gas utility provides service to some 137,000 customers in 22 Connecticut communities, principally in the Hartford-New Britain area and Greenwich. The gas supply outlook is favorable. Through its nonregulated operations, the company is engaged in propane distribution, and steam and chilled water climate control services. In August, 1989 CTG received approval for a $13.5 million rate increase. In September, the company sold 400,000 common shares at $17.625 each.

Business Summary

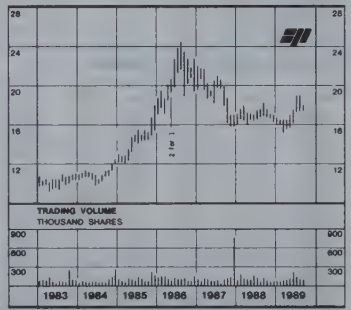
Connecticut Natural Gas distributes natural gas in Hartford, New Britain, Greenwich and 19 other communities in central Connecticut. Nonutility operations include propane distribution services in lower Fairfield County, Hartford and southeastern New York, district heating and cooling to buildings in downtown Hartford, and the sale of small to medium size cogeneration power plants. Revenue contributions in recent years:

	1988	1987
Gas sales	90%	90%
Nonutility operations	10%	10%

CTG supplies gas to some 137,000 customers. Sales volume in 1988 totaled 28.6 Bcf, up from 27.1 Bcf in 1987 and 25.9 Bcf in 1986. The daily maximum sendout was 207.6 MMcf in 1988, against 189.7 MMcf in 1987. Degree days in 1988 totaled 6,466, compared with the 30-year average of 6,174 and 1987's 6,129. In 1988 approximately 61% of gas operating revenues were derived from residential customers, 23% from commercial firm customers, 11% from interruptible customers, 4% from industrial firm customers, and 1% from sales to other utilities.

The company obtains most of its gas supply under long-term contract with major pipeline suppliers—Algonquin Gas Transmission Co. and Tennessee Gas Pipeline Co. On January 15, 1988 CTG began receiving 735 million cubic feet of competitively priced gas per year from Canada. Liquefied natural gas and propane mixed with air is used in the winter months for peak shaving purposes. Rates are regulated by the Connecticut Department of Public Utility Control (DPUC).

The Energy Networks, Inc. subsidiary serves over 19,000 customers with its various services. These services include district heating and cooling provided to almost all of the major new buildings in downtown Hartford; retail and wholesale marketing of propane to over 5,600 customers; and the sale of small to medium size cogeneration power plants.



CTG owns a 2.5% interest in the Iroquois Gas Transmission Partnership, which was formed to construct a natural gas pipeline to bring Canadian natural gas into New York and New England. It is expected that all necessary U.S. and Canadian approvals for pipeline construction will be received in time to begin deliveries to the Northeast by November, 1991.

Important Developments

Aug. '89— Connecticut's Department of Public Utility Control approved a 7.26% or $13.5 million increase in CTG's rates. The company had requested a 12.2% or $22.1 million increase.

Next earnings report expected in late October.

Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	80.5	78.0	75.4	88.7
Jun.	38.6	34.9	33.5	37.8
Sep.		23.3	26.2	22.9
Dec.		61.7	56.2	46.0
		197.9	191.3	195.4

Operating revenues for the six months ended June 30, 1989 rose 5.4%, year to year, reflecting customer growth and increased sales to interruptible gas customers. Following increases in the cost of gas purchased and produced, other operating and maintenance expenses, depreciation charges, taxes and interest expense, net income declined 17%. Share earnings were $1.03, versus $1.27. Results for the 1988 interim exclude a special credit of $0.17 a share from an accounting change.

Next dividend meeting: late Nov. '89.

Finances

In September, 1989 CTG publicly offered 400,000 common shares at $17.625 a share through underwriters led by PaineWebber Inc. Net proceeds of $6.6 million and the proceeds of a contemporaneous private placement of $18 million of first mortgage bonds were earmarked mainly for the reduction of short-term borrowings incurred to fund construction expenditures of regulated operations.

NYSE Symbol ED Options on ASE (Feb-May-Aug-Nov) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Dec. 22'89	1989					
29 3/8	29 5/8-22 1/8	12	1.72	5.9%	A+	0.32

Summary

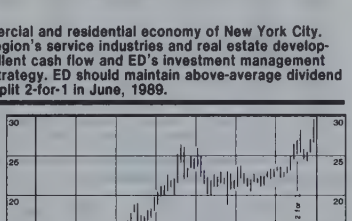
This leading electric and gas utility serves the commercial and residential economy of New York City. Profitability in recent years has been fueled by the region's service industries and real estate development. The longer-term outlook will benefit from excellent cash flow and ED's investment management unit in addition to the company's purchased power strategy. ED should maintain above-average dividend growth for the foreseeable future. The shares were split 2-for-1 in June, 1989.

Current Outlook

Share earnings for 1990 are projected at $2.55, up from the $2.45 estimated for 1989.

The $0.43 quarterly dividend may be raised some 7.0% in early 1990. Although future dividend increases should exceed the industry average, the rate of dividend growth is not expected to match ED's historical increases.

Share earnings for 1990 should benefit from higher kwh sales, and lower production costs on improved operating performance at the Indian Point 2 nuclear plant. Long-term prospects will benefit from strong cash flow.



Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	1,387	1,327	1,284	1,414
Jun.	1,218	1,102	1,125	1,187
Sep.	1,575	1,469	1,494	1,412
Dec.	---	1,211	1,191	1,185
	---	5,109	5,094	5,198

Revenues for the nine months ended September 30, 1989 rose 7.3%, year to year, owing to increased kwh sales and pass-through items. After higher production costs associated with the outage at Indian Point 2, operating income was down nearly 1%. A substantial increase in investment income was mostly offset by 9.0% higher net interest charges. Net income decreased fractionally (0.8%). Share earnings were $2.07, versus $2.09 (adjusted).

Dec.	E0.38	0.38	0.24	0.44
	E2.45	2.47	2.21	2.13

Important Developments

Nov. '89— Share earnings for 1989's first nine months were restricted by an extended outage at ED's Indian Point 2 nuclear plant. The plant was taken out of service for its scheduled maintenance and refueling outage in mid-March and was returned to operation in early July. Partially offsetting increased maintenance charges associated with the Indian Point 2 plant were a lower provision for electric rate refund, and higher kwh sales. Total electric sales were up 2.3% in the first nine months of 1989.

Oct. '89— ED reported that the PSC approved a settlement agreement granting the company a 3.1%, or $20.4 million, increase in its firm gas rates, effective October 16.

Next earnings report expected in late January.

Business Summary

Consolidated Edison supplies electricity in all of New York City (except part of Queens) and most of Westchester County. Gas and steam are provided in certain parts of the service area. In 1988 electric sales accounted for 83% of revenues, gas 12%, and steam 5%. Electric revenues in recent years by customer class:

Revenues	1988	1987	1986	1985
Residential	30%	29%	29%	30%
Commercial-Industrial	62%	61%	62%	62%
Other	8%	10%	9%	8%

Power requirements in 1988 were derived from nuclear 32%, oil 32%, gas 19%, and purchases and other sources 17%. ED's nuclear capacity is derived from its Indian Point 2 plant in Westchester County. Indian Point 1 is in cold st orage and Indian Point 3 is owned by the New York Power Authority. Peak demand in 1988 was 10,182 mw and capability totaled 11,918 mw for a capacity margin of 15%. Gas sales in 1988 totaled 96,376 MMcf, down from 1987's 96,815 MMcf.

The company's near-term generating strategy is to develop conservation programs and to implement plant life extension projects in addition to purchasing power from Canada's Hydro-Quebec, the New York State Power Pool and cogenerators. Over the longer-term ED will be increasing its purchases from Hydro-Quebec. ED is not in a position to purchase power from the West due to transmission limitations.

Summary

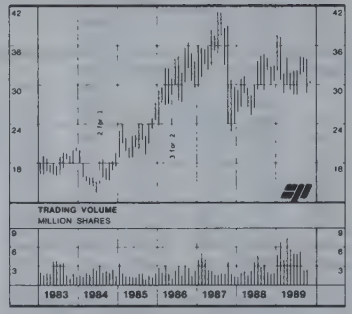
This company operates the nation's second largest general freight motor carrier, four rapidly growing regional truckers, and with the April, 1989 acquisition of Emery Air Freight for $242 million plus $375 million of debt assumption, the nation's leading air carrier of heavy cargo. In 1989 CNF repurchased 4.86 million (12.2%) of its common shares for $150 million. Profits could post a limited rebound in 1990 after being hurt in 1989 by losses related to the acquisition of Emery Air Freight.

Current Outlook

Profits for 1990 are estimated at $2.25 a share, versus the $1.40 anticipated for 1989.

Dividends, presently at $0.26½ quarterly, are unlikely to be increased before late 1990.

Profits for 1990 should post a limited recovery after being depressed in 1989 by the inclusion of Emery Air Freight. While costs associated with the integration of Emery and CF Air will be reduced sharply, profitability may remain subpar as competitive advances cut into volume growth. Profits for CF Motor should rebound somewhat as volume growth offsets continued rate softness. Revenue growth for CNF's family of regional carriers should remain brisk, though profit comparisons could be checked by start-up costs for CNF's new southwestern carrier. Limiting overall comparison will be heavier fixed charges.



Total Revenues ($ Million)

Quarter:	1989	1988	1987	1986
Mar	726	617	530	493
Jun	1,037	650	559	534
Sep	1,006	704	589	549
Dec.	---	717	618	549
	---	2,689	2,297	2,124

Revenues for 1989's first nine months rose 40%, year to year, reflecting the inclusion of Emery. Net income fell 46%. After preferred dividends, per-share earnings were $0.97, versus $1.93.

Important Developments

Oct '89— CNF said that it had repurchased 4,859,029 (12.2%) of its common shares for $150 million. CNF funded the buyback program through the issuance in May of 986,259 shares of preferred stock (convertible into 3,945,036 common shares) to a newly formed company ESOP.

Jun. '89— CNF charged $12.2 million against pretax income in 1989's second quarter to reflect costs for closing redundant air freight terminals and staff reductions. The restructuring was necessitated by CNF's acquisition in April of Emery Air Freight Corp. for $242 million plus $375 million of debt assumption. EAF, which lost $51 million in 1988 on revenues of $1.3 billion, operates a network of more than 300 terminals with a fleet of 55 aircraft. The combination of CF Air and Emery creates the nation's largest air carrier of heavy freight.

Next earnings report expected in late January.

Business Summary

Consolidated Freightways provides a broad range of transportation and related services. Contributions to operating profits (in million $) by business segment in recent years:

	1988	1987	1986
Land transportation	$152.5	$98.9	$140.3
International & air	10.2	2.4	-5.2

CF Motor Freight is the nation's second largest general freight carriers, serving all 50 states, Puerto Rico and Mexico through a network of 651 terminals and consolidation centers. Service to Canada is provided through Canadian Freightways Ltd. In 1988 CNF transported 7.2 million tons of freight over an average haul of 1,391 miles. Less-than-truckload freight generates 89% of revenues.

CNF also operates four regional motor carriers specializing in overnight delivery of LTL freight moving within a 300-500-mile service area. At 1988 year-end, CNF's regional carriers operated a total of 211 terminals. CF Truckload Services operates as a transportation intermediary, arranging the movement of truckload shipments of general freight employing both rail and highway modes. CF Ocean Service operates as a non-vessel operating common carrier specializing in arranging door-to-door ocean freight transportation for less-than-container cargo. Other activities include the manufacture of trailers and distribution of truck parts.

The April, 1989 acquisition of Emery Air Freight Corp. for $242 million plus assumption of $375 million of debt makes CNF the nation's largest carrier specializing in heavy cargo. The combined entity, known as Emery Worldwide, operates more than 450 terminals in 88 nations with a fleet of 80 aircraft. Express package delivery services are provided though the Purolator Courier unit.

Consolidated Natural Gas

626

NYSE Symbol CNG Options on ASE (Jan-Apr-Jul-Oct) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Oct. 9'89	1989					
48	50⅝-37⅛	24	1.76	3.7%	A+	0.67

Summary

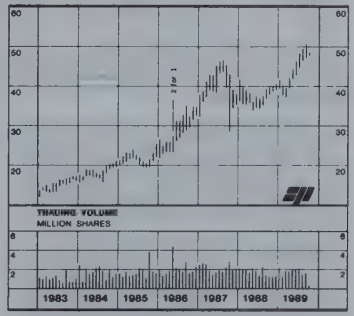
This major integrated natural gas system serves retail customers in Ohio, Pennsylvania and West Virginia, and wholesale customers in New York and the Northeast. CNG has a favorable gas supply outlook. Earnings for the 1989 first half declined, reflecting warmer weather and absence of a onetime gain on the abandonment of a gas project. In June, 1989 CNG received FERC approval to begin wintertime service to six utilities in the New York metropolitan area and to expand service to two utilities in the Baltimore and Washington D.C. metropolitan areas.

Current Outlook

Share earnings for 1990 are projected at $2.85, up from an estimated $2.45 for 1989.

The $0.44 quarterly dividend is expected to be raised in December, 1989.

Gas transmission profits are expected to rise in 1990, reflecting higher throughput, partly due to an expansion in utilities served. Profits from distribution operations should be slightly higher, assuming normal weather conditions and some customer additions. Profits from exploration and production are expected to advance on increased activity and higher gas prices.



Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	1,037	1,018	1,005	1,204
Jun.	464	380	375	468
Sep.	---	280	262	276
Dec.	---	790	680	674
	---	2,468	2,322	2,623

Operating revenues for the six months ended June 30, 1989 rose 7.4%, year to year. Penalized by warmer weather conditions, the absence of a onetime gain related to the abandonment of a liquefied natural gas project, and higher interest expenses, net income declined 19%, to $1.36 a share from $1.67.

Dec.	E0.96	0.77	0.83	0.66
	E2.45	2.34	2.24	2.11

Important Developments

Jun. '89— CNG agreed to buy Dominion Resources Inc.'s Virginia Natural Gas (VNG) subsidiary in a transaction whereby CNG would purchase the stock of VNG and assume or repay all of VNG's debt at a total cost of about $160 million. The company sold $100 million of long-term debt; proceeds were to be used to finance capital expenditures. Separately, CNG received FERC approval to begin wintertime natural gas sales and firm storage service of up to 315 million cubic feet a day to six utilities in the New York metropolitan area, increase gas sales and transportation service to two utilities in the Baltimore and Washington D.C. metropolitan areas by up to 200 million cubic feet a day, and jointly own with Texas Eastern Transmission Corp. a 107-mile pipeline in Pennsylvania.

Next earnings report expected in early November.

Business Summary

Consolidated Natural Gas is engaged in all aspects of the natural gas business, including exploration, production, purchasing, gathering, transmission, storage and distribution. The company also owns substantial coal reserves. Revenue contributions in recent years:

	1988	1987	1986	1985
Gas sales:				
Res./comm.	56%	59%	55%	45%
Industrial	3%	3%	8%	11%
Wholesale	28%	24%	27%	35%
Other	13%	14%	10%	9%

The company supplies gas to more than 1.5 million retail customers in Ohio, Pennsylvania and West Virginia, and sells gas at wholesale to non-affiliated utilities in the Midwest, the Mid-Atlantic states and the Northeast. Gas sales volume in 1988 totaled 511.4 Bcf, versus 452.6 Bcf in 1987.

Exploration and production activities are conducted by CNG Producing and CNG Development in the Gulf of Mexico, Canada, and throughout the U.S. Proved reserves at 1988 year-end totaled 1,188 Bcf of gas, down from 1,208 Bcf a year earlier, and 40.2 million barrels of oil and condensate, up from 30.9 million barrels.

Other operations include: CNG Trading Co., which assists customers in purchasing and transporting gas from a wide range of sources; Consolidated System LNG Co., which imports and re-gasifies liquefied natural gas; CNG Coal Co., which holds coal reserves; and CNG Energy Co., which develops opportunities in energy related markets.

Dividend Data

Dividends have been paid since 1944. A dividend reinvestment plan is available.

Consolidated Rail

NYSE Symbol CRR Options on Phila (Jan-Apr-Jul-Oct) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Oct. 19'89	1989					
43¼	46-32	10	1.40	3.2%	NR	NA

Summary

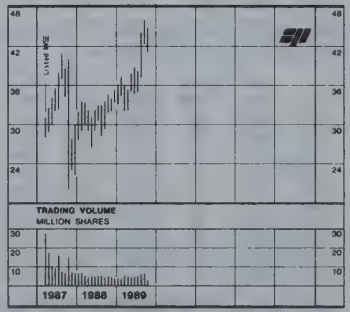
This leading Northeastern and Midwestern railroad has turned in an impressive profit record after substantially rebuilding its track and fleet with the aid of $3.3 billion of funds from the U.S. Government. In March, 1987 CRR returned to the private sector with the public offering of the U.S. Government's 85% stake for $1.65 billion. In June, 1989 CRR announced plans to form an ESOP which would buy up to $600 million of CRR common stock. Profits should post a moderate gain in 1990, despite sluggish traffic, primarily reflecting reduced labor, casualty and insurance costs.

Current Outlook

Profits for 1990 are estimated at $4.75 a share, versus the $4.60 anticipated for 1989.

Dividends were lifted 16.7%, to $0.35, quarterly from $0.30, with the September, 1989 payment.

Profits for 1990 should advance moderately, primarily reflecting continued cost reduction efforts. Traffic volumes will be flat as small gains for intermodal, coal and lumber are offset by declines for auto shipments, steel and other cyclical industries. The rate environment will continue to be difficult. Aiding operating margins will be reduced spending for equipment and track maintenance, lower labor costs, and a reduction in casualty and insurance costs as a new safety program helps cut claims. Aiding earnings comparisons will be the absence of 1989's charge to settle litigation, rising rental income, and greater contributions from CRR's stake in Trailer Train.



Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	872	831	788	775

Dec.	E1.26	1.13	1.15	0.85
	E4.60	4.44	3.88	3.01

Important Developments

Jul. '89— CRR announced plans to establish a new Employee Stock Ownership Plan (ESOP). The ESOP, which would initially hold 10% of CRR's common shares, could eventually acquire up to $600 million of the firm's common stock. Share purchases would be executed through one or more tender offers. Implementation of the ESOP is subject to regulatory clearance, labor approval, and resolution of certain tax uncertainties.

Jun. '89— CRR was reported to have terminated talks to acquire the Providence & Wooster Railroad (P&W). In 1988 the 375-mile P&W generated revenues of $15.2 million.

Apr. '89— CRR formed a joint venture with OHM Corp., an environmental services concern, to site, design, develop and operate treatment and disposal facilities for solid and hazardous wastes.

Next earnings report expected in late January.

Business Summary

Consolidated Rail Corp. (Conrail) was organized in 1976 pursuant to the Regional Rail Reorganization Act of 1973. The new railroad combined the operations of the Penn Central, Erie Lackawanna, Lehigh and Hudson River, Reading, Central of New Jersey, and Lehigh Valley railroads, all of which had entered bankruptcy during the late 1960s and early 1970s.

Aided by $3.28 billion in direct Government investment between 1976 and 1981, Conrail has substantially rebuilt and modernized its track system, which presently extends over 13,110 route miles (including 2,030 miles of trackage rights) in 14 Midwestern and Northeastern states, the District of Columbia and the Province of Quebec.

Pertinent operating data for recent years:

	1988	1987	1986
Ton-miles (bil.)	78.8	74.3	68.7
Operating ratio	86.2%	87.2%	87.2%
Labor ratio	42.0%	43.3%	44.4%

Conrail's rail activities consist entirely of freight transportation, having transferred its commuter and intercity passenger service to local authorities at 1982 year-end. Contributions to freight revenues by major traffic groups:

	1988	1987	1986
Chemicals	17.4%	17.2%	17.9%
Intermodal	16.2%	16.6%	16.4%
Automotive	16.0%	16.1%	17.0%
Coal	15.1%	15.0%	15.0%
Metals	13.2%	11.8%	10.7%
All other	22.1%	23.3%	23.0%

Conrail's equipment fleet at 1988 year-end consisted of 2,343 locomotives (with an average age of 16.5 years) and 75,504 freight cars (average age of 20.7 years). The percentage of locomotives out of service (bad order ratio) at 1988 year-end was 7.2%. The bad order ratio for freight cars was 2.2% at 1988 year-end. The number of miles of track under slow order at 1988 year-end was 237 miles.

CRR also holds a 21.8% stake in Trailer Train Co. (increased from 6.2% in April, 1989 through an additional $43 million investment), a privately-held lessor of rail equipment.

Dividend Data

Conrail initiated quarterly dividend payments in September, 1987. The Conrail Privatization Act limits dividends and other distributions to 45% of income until October, 1991. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1989.

Amt. of Divd. $	Date Decl.	Ex-divd. Date	Stock of Record	Payment Date
0.30	Nov. 16	Nov. 25	Dec. 1	Dec. 15'88
0.30	Feb. 15	Feb. 23	Mar. 1	Mar. 15'89
0.30	May 17	May 25	Jun. 1	Jun. 15'89
0.35	Jul. 19	Aug. 28	Sep. 1	Sep. 15'89

Finances

On March 26, 1987 the U.S. Government sold 58,750,000 common shares of Conrail (its 85% interest) at $28 each in CRR's initial public offering. Upon completion of the sale the Government cancelled $851 million of 7.5% debentures, $2.33 billion of Series A preferred stock, and $31.7 million of Series B preferred stock. As an offset, the Conrail Privatization Act extinguished the railroad's substantial net operating loss credits and investment tax credit carryforwards.

The Conrail Privatization Act restricts equity ownership by nonrail entities to 10% until March, 1990.

Oct. 11'89	1989					
35	36¾-19⅞	21	1.10	3.1%	A-	0.90

Summary

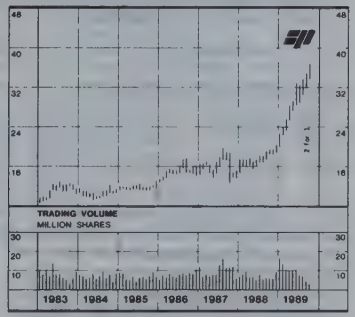
Contel is the 10th largest telephone holding company in the U.S., offering a broad range of telecommunications and information processing products and services. CTC has been restructuring or divesting various units as part of an ongoing strategy of concentrating its efforts on core telecommunications businesses. The shares were split 2-for-1 in September, 1989.

Current Outlook

Earnings for 1989 are estimated at $1.73 a share, versus 1988's $1.98 (adjusted), which included a $0.28 onetime gain. Share earnings for 1990 are tentatively projected at $1.85.

The $0.27½ quarterly dividend (adjusted) is the minimum expectation.

Revenues should rise moderately in 1989, reflecting growth in telephone access lines and long distance revenues, as well as rapid growth from cellular operations. Earnings from telephone operations should increase. Income from the Federal Systems sector should benefit from recent acquisitions. Losses from Information Systems should decline.



Total Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	748	673	676	697
Jun.	755	710	694	776
Sep.	---	732	728	790
Dec.	---	849	807	812
	---	2,964	2,905	3,074

Revenues from continuing operations for the six months ended June 30, 1989 rose 10%, year to year. Margins narrowed, and in the absence of a $66 million nonrecurring gain, pretax income fell 26%. After taxes at 34.2%, versus 35.3%, net income decreased 25%, to $0.82 a share from $1.10 (both adjusted), excluding a $0.07 loss from discontinued operations in the 1988 period.

Dec.	E0.48	0.46	d0.43	0.44
	E1.73	1.98	0.50	1.52

Important Developments

Oct. '89— CTC, through its Contel Cellular subsidiary, definitively agreed to acquire cellular properties in 13 markets in Alabama, Kentucky and Tennessee from McCaw Cellular Communications Inc. for $1.3 billion in cash, subject to closing price adjustments. The cellular properties being acquired had 6.1 million "pops" (population adjusted for percent ownership), making the transaction valued at about $205 a pop. The transaction, which was expected to be completed in early 1990 following regulatory approvals, would make Contel the nation's seventh largest cellular communications company. Earlier, CTC announced that discussions regarding the proposed acquisition of the Denver and Ephrata Telephone and Telegraph Co. of Pennsylvania had been terminated; in June CTC had signed a letter of intent proposing the acquisition.

Next earnings report expected in late October.

Business Summary

Contel Corp. (formerly Continental Telecom and before that Continental Telephone) is the 10th largest U.S. telephone company, providing regulated local telephone service to 2.4 million customers in 30 states and the Caribbean. Mobil communications services are provided through Contel Cellular. CTC also provides communications and information processing products and services. Contributions to revenues and net income by business segment (in million $) in 1988:

	Revs.	Profits
Telephone operations	73%	$321.5
Federal systems	10%	19.7
Information systems	24%	-31.0

Federal systems designs, installs and maintains large data and telecommunications systems for U.S. and foreign governments.

Information systems serves the telecommunications and data needs of Fortune 1000 companies, large institutions and government entities that use commercial procurement practices and also provides satellite transmission services.

Finances

In December, 1988 the International Division of Contel ASC (acquired in November, 1987 from Communications Satellite) was reclassified as discontinued. That unit was expected to be disposed of in 1989 at a loss of $9 million. In December, 1988 Contel Business Systems was sold for $33 million, a loss of $13 million. In February, 1988 the Executone unit was sold for $61 million, a loss of $20 million.

Dividend Data

Dividends have been paid since 1964. A dividend reinvestment plan is available.

Summary

This company owns Continental Bank, the nation's 12th largest bank. Since the 1984 FDIC-aided restructuring, CBK has resumed profitability. New management has refocused CBK on its wholesale banking strengths, complemented by investment banking-like businesses. In August, 1989 CBK sold $300 million of preferred stock, and used the proceeds to buy back preferred shares held by the FDIC. In an effort to reduce its holdings, the FDIC sold 9 million CBK common shares in August, but in October it exercised an option to acquire 10 million CBK common shares held by the holding company formed during the restructuring. The option was granted to the FDIC to compensate for losses incurred in the restructuring.

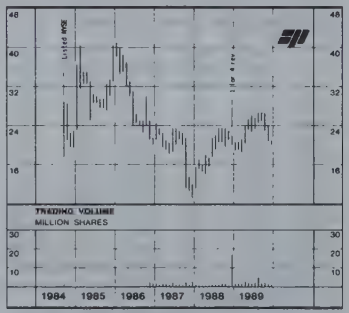
Business Summary

This company (formerly Continental Illinois Corp.) is the parent of Continental Bank, the 12th largest in the U.S. New management has divested most retail banking businesses in order to refocus CBK on its traditional strengths in wholesale banking, targeted especially at mid-sized corporate clients, and complemented by investment banking-like businesses, including corporate finance, risk management, market-making and transaction support. Management hopes this narrower focus, coupled with expense control, will improve profitability in 1989 and beyond.

During 1988 total product revenues of $1,056 million were derived: lending activities 43%, other credit products (including distribution) 10%, market making/risk management products 8%, securities and clearing services 19%, cash management 10%, investment and other services 10%.

Nonperforming loans at year-end 1988 were $866 million (5.2% of loans; 80% were loans to LDC countries), up from $748 million (3.7%) a year earlier. The reserve for loan losses was 5.98% (including a 40% reserve against LDC loans of $1.9 billion), against 5.57%. Net chargeoffs during 1988 were 0.77% of average loans, versus 0.23% in 1987.

In May, 1984 the company suffered a run on deposits after a sharp increase in nonperforming loans. Under a restructuring plan adopted in September, 1984, the Federal Deposit Insurance Corp. (FDIC) assumed $3.5 billion of problem loans and infused $1 billion of new capital into the bank in exchange for preferred and convertible preference stock, amounting to an 80% interest in the company (since reduced to 25%). Holders of CBK common stock exchanged their shares for Continental Illinois Holding Co. (CIH) stock, and rights to purchase new CBK shares.



Important Developments

Aug. '89— The company reported that it sold publicly $300 million of adjustable rate cumulative preferred stock. Proceeds from the sale were earmarked for the repurchase of its adjustable rate preferred stock, series A, which was held by the FDIC. Also, in August the FDIC sold publicly about 9 million CBK common shares (representing the conversion of 7.2 million junior convertible preferred shares) as part of a plan to reduce its holdings in the company.

Next earnings report expected in late January.

Review of Operations (Can. $)

Net interest income for the nine months ended September 30, 1989 declined 4.2%, year to year. The provision for loan losses increased 80%, to $42.1 million from $23.4 million. Aided by sharply higher trading profits and substantial gains from the sale of real estate, noninterest income rose 14%. With noninterest expense up 1.7%, pretax earnings rose 3.3%. After taxes at 4.8%, versus 2.9%, net income was up 1.3%, to $3.28 a share from $3.25.

Finances

In October, 1989 the FDIC exercised an option granted to it under the 1984 restructuring of CBK to acquire the 10.1 million (adjusted) shares of CBK common stock held by Continental Illinois Holding Co. (CIH). CIH is a publicly traded company formed to facilitate the 1984 exchange offer under which former CBK shareholders exchanged their stock for shares of CIH and rights to buy new CBK shares. CIH's other assets are negligible and, as a result of the FDIC option being exercised, the NYSE suspended trading in CIH shares. A December 19, 1989 shareholders meeting is set to vote on dissolving CIH. The option granted to the FDIC was meant to compensate for losses incurred in the loan portfolio it assumed. As such, it could purchase one share for $0.00004 for each $80 of loss. Thus, a loss of about $800 million would result in the FDIC acquiring all the shares.

Summary

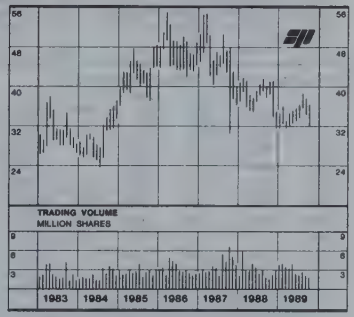
Continental Corp., a holding company with $13 billion in assets, is one of the largest property-casualty underwriters in the U.S. CIC announced in 1987 that it intended to sell its life insurance operations. In March, 1989 CIC took the final step in this restructuring effort when it agreed to sell the William Penn Companies for about $80 million. In May CIC agreed to sell its West German reinsurance unit.

Current Outlook

Net operating earnings for 1989 (excluding realized capital gains) are projected at $2.00 a share, versus the $2.09 of 1988. Earnings for 1990 are estimated at $2.20 a share.

The $0.65 quarterly dividend is not expected to be raised in the near term.

Earnings are expected to be flat in 1989, reflecting continued pricing pressures and increased catastrophe losses. The downturn in the p-c cycle is expected to persist into 1990, resulting in marginal premium growth, at best. An increasing emphasis on specialty lines, where pricing is firmer, particularly in worker's comp, should help. Additional levels of management approval on larger accounts may stem inadequately written business. Underwriting performance will likely deteriorate, even if there is no further prior year reserve strengthening. The proceeds from 1988's sale of the life companies should give a boost to investment income.



Review of Operations

Total revenues for the six months ended June 30, 1989advanced 5.6%, year to year (1988 restated), on a 19% rise in investment income, sharply higher realized investment gains, and premium growth of 2.6%. Benefits and expenses rose more rapidly, and pretax income fell 17%. After taxes at 12.3% versus 2.5%, and minority interests, income from continuing operations declined 27%. Share earnings were $1.98 (including about $0.52 in realized capital gains) on 8.0% fewer shares, compared with $2.50 ($0.02).

		2.09	5.26	3.62

Important Developments

Aug '89— Commenting on earnings for the first half of 1989, CIC noted that underwriting results were impaired by the continuing soft market in commercial lines and rising losses from residual markets. Net premiums written for the period were $2.36 billion, versus $2.49 billion a year earlier. The combined ratio rose to 110.4% from 104.2%, reflecting the lower premium levels together with increased claims activity. In July, the company acquired two Canadian p-c insurance companies for approximately $48 million in cash. In the final step of its plan to divest its life and health operations and concentrate of the p-c side of the business, CIC in March announced that it had reached an agreement in principle to sell the William Penn Companies, its remaining life insurance operations, to Legal & General Group plc., for approximately $80 million in cash.

Next earnings report expected in early November.

Business Summary

Continental Corp. is the holding company for the Continental Insurance Companies, one of the largest U.S. property-casualty insurers. Operations are conducted in the U.S., Canada and over 100 foreign countries. Other businesses include reinsurance, premium finance, and insurance related and advisory services. Contributions to pretax profits in recent years (in million $) were:

	1988	1987
Underwriting	-$438.0	-$214.1
Net investment inc.	602.1	546.8
Premium financing	16.6	23.0
Corp. & other	-90.2	-49.6
Disposal of subs.	2.7	-56.5
Equity earnings	16.3	11.5

Written premiums amounted to $5.05 billion in 1988 ($5.15 billion in 1987). Commercial lines accounted for 72% of premiums, personal lines 18% and reinsurance 10%. By line, excluding reinsurance, multi-peril accounted for 24%, workers compensation 19%, personal auto 13%, general liability 12%, commercial auto 8%, inland/ocean marine 8%, homeowners 5%, fire and allied lines 4%, and other 7%.

Through subsidiaries CIC is engaged in writing and placing reinsurance in the U.S. and 100 foreign countries; in the surplus lines market, writing excess liability, directors and officers liability, and medical stop loss coverage; and premium financing and other services. CIC has an 8% stake in MBIA Inc., the largest municipal bond insurer in the U.S. In 1988, CIC sold its Commercial Life Insurance Co., Loyalty Life Insurance Co., and National Life Assurance Co. of Cananda.

Control Data

NYSE Symbol CDA Options on CBOE (Feb-May-Aug-Nov) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Dec. 20'89	1989					
16⅜	24-16⅜	NM	None	None	B-	0.97

Summary

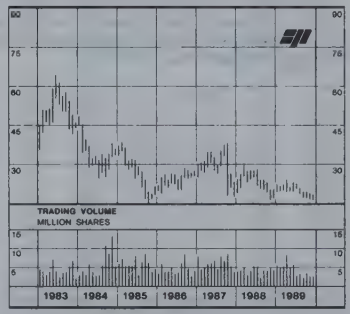
Control Data provides computer systems and services. CDA has sold or closed nearly 20 businesses and product lines in recent years in order to refocus the company and concentrate on data services and systems. Of recent significance, CDA closed its ETA Systems supercomputer operation, streamlined its mainframe business, sold its Imprimis disk drive business, and shed several other operations; as a result, CDA incurred restructuring charges of $448.6 million in the first nine months of 1989. With almost all unprofitable businesses now sold, earnings should rebound in 1990.

Current Outlook

Earnings for 1990 are projected at $1.30 a share, versus a loss of $11.20 (including some $11.25 in restructuring charges) estimated for 1989.

Resumption of common dividends is not likely.

Revenues in 1990 are projected at $2 billion. The computer products business should contribute about $700 million, information services $900 million, and government systems (including the VTC semiconductor unit) $400 million. The company has sold or closed nearly 20 businesses and product lines in recent years, and this restructuring is now essentially completed. All of CDA's remaining businesses, with the exception of the VTC semiconductor unit, are now profitable.



Revenues ($)

Quarter:	1989	1988	1987	1986
Mar.	844	902	822	796
Jun.	804	952	786	829
Sep.	763	841	831	819
Dec.	---	933	928	904
	---	3,628	3,367	3,347

Revenues for the nine months ended September 30, 1989 declined 11%, year to year. After pretax restructuring charges of $448.6 million, primarily related to the discontinuance of the supercomputer operations and the downsizing of the other computer operations, there was a net loss of $484.0 million ($11.51 a share), in contrast to net income of $14.5 million ($0.34).

Important Developments

Nov. '89— Control Data agreed to sell its Ticketron sports and entertainment ticketing business to the Carlyle Group. In October the company sold the North American Control Data Institutes and the Training and Education business. Also in October CDA agreed to sell its U.S. third-party computer maintenance business to Bell Atlantic Corp. In September CDA sold Imprimis Technology Inc. to Seagate Technology for about $450 million in cash and securities. CDA has about an 18% interest in the combined data storage companies. Proceeds were earmarked for repayment of debt and for additional working capital.

Apr. '89— In an effort to refocus the company and concentrate on data services and data systems, CDA closed its supercomputer operation (ETA Systems), streamlined its mainframe business, and shed several other operations.

Next earnings report expected in late January.

Business Summary

Control Data Corp. is a major supplier of computer systems, peripherals and services. Contributions in recent years:

Revenues	1988	1987
Computer systems and services	33%	39%
Data storage products	32%	29%
Government Systems	9%	11%
Business services	20%	15%
Ticketron	4%	4%
Training and other	3%	3%

Foreign operations contributed 29% of revenues and $16.7 million of operating profits in 1988.

CDA's Cyber 900 series of departmental to high-end mainframe computers are designed primarily for scientific and engineering applications. The Cyber 910 workstation is based on the Silicon Graphics workstation (CDA owns 5% of Silicon Graphics). CDA also provides maintenance for non-CDA computers.

Government Systems segment provides computers, peripherals, software and training to various U.S. and foreign government agencies.

Business services provide measurement of radio and television audiences; payroll, accounting and payroll tax filing services; and loan and deposit transaction processing services. Ticketron provides computer services to state lotteries and an on-line ticketing system.The training and other services unit offers education programs and industrial training courses.

Dividend Data

Common dividends were omitted in late 1985 after having been paid since 1977. A "poison pill" stock purchase right was adopted in 1986.

Finances

In October, 1989 CDA offered to purchase its 12¾% senior notes due June 15, 1991, at 100% of their principal amount plus accrued interest. The tender offer is required under the indenture as a result of the recent sale of Imprimis.

Summary

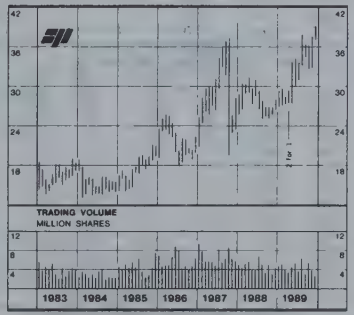
This diversified manufacturer's broad product lines for industrial, commercial and consumer markets include electrical power distribution equipment, tools and hardware, and compressors for the oil and gas, mining and construction industries. Earnings for the first nine months of 1989 benefited from acquisitions, continued strong industrial activity and better pricing. Profits should continue to rise in 1990. In November, 1989 CBE completed the acquisition of Cameron Iron Works (CIW) for preferred stock.

Current Outlook

Earnings for 1990 are projected at $2.70 a share, versus earnings of $2.45 estimated for 1989.

Dividends should continue at $0.25 quarterly.

Revenues are expected to rise at a less rapid rate in 1990 as less vibrant industrial activity offsets the impact of acquisitions. Slower economic growth is expected to reduce sales gains in the electrical and electronics and commercial and industrial products units. The acquisition of CIW and improvement in the energy market will lift the contribution from compression and drilling products. Overall margins should improve as acquisitions are integrated. Aided further by a probable drop in interest costs, earnings should rise in 1990.



Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	1,039	925	801	867

Important Developments

Nov. '89— CBE said that it sold 4.91 million shares of its common stock to a newly created ESOP in exchange for $175 million in cash in 1989's third quarter.

Nov. '89— CBE completed the acquisition of Cameron Iron Works, Inc. (CIW), effective November 29. According to the terms of the acquisition, CBE exchanged one new share of $8.00 convertible preferred stock for every five CIW common shares outstanding. Each new share of this preferred stock would be convertible into 2.75 CBE common shares. CIW, a manufacturer of a broad range of oil tools, ball valves, and forged products, reported net income of $20 million on sales of $611 million in fiscal 1989. Earlier, CBE acquired Champion Spark Plug Co.

Next earnings report expected in late January.

Business Summary

Cooper Industries is a diversified manufacturing company. It acquired McGraw Edison Co. in May, 1985. Industry segment contributions in 1988:

	Revs.	Profits
Electrical & electronics products	49%	57%
Comm'l & industrial products	30%	34%
Compression & drilling products	21%	9%

Foreign operations accounted for 15% of revenues in 1988 and 17% of operating income.

The electrical and electronic products group makes switchgear transformers, and other products for primary electrical power distribution by utilities and for secondary power distribution by construction, mining, industrial and commercial industries. It also makes wire and cable, lighting, fuses and switches for electronics, transportation and consumer markets.

Commercial and industrial products include hand tools for industrial, construction and consumer markets; industrial air powered tools; drapery hardware and window coverings for residential and commercial uses; and cleaning equipment for industrial and institutional markets.

Compression and drilling products include engines, pumps and compressors used in the oil and gas industry; portable rigs for seismic, geophysical and water well drilling; and drilling and other equipment for construction and mining; and portable air compressors.

Dividend Data

Dividends have been paid since 1947. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1987.

Cooper Tire & Rubber

661K

NYSE Symbol CTB

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 13'89	1989					
35	39-22½	13	0.36	1.0%	A	0.89

Summary

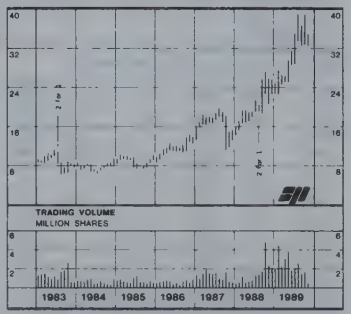
Cooper Tire & Rubber manufactures and markets automobile and truck replacement tires, inner tubes, reinforced hose, highly technical rubber-to-metal bonded parts, and complex molded and extruded rubber products. CTB concentrates on premium-priced conventional and high-preformance radial tires for the private brand segment of the replacement market. Rapid expansion of capacity in recent years has helped this low-cost producer meet growing demand for its tires.

Current Outlook

Earnings for 1990 may advance to $3.00 a share from the estimated $2.65 for 1989.

The $0.09 quarterly dividend should continue.

Year-to-year gains in sales are likely in 1990 as plant additions improve product availability. CTB has operated at full capacity in recent years even as it expanded production by some 20% a year. Earnings will be boosted by greater efficiency, a richer sales mix, price increases, and lower interest expense. Favorable trends include continued increases in miles driven and car registrations; the relative low cost and easy availability of gasoline; and the equipping of 30% of new cars with high-performance tires, which carry wider margins and are replaced more frequently.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	195.5	161.0	148.2	123.2
Jun.	229.4	183.8	164.3	143.7

Dec.	---	195.1	176.8	145.0
	---	748.0	665.8	577.5

Sales for the nine months ended September 30, 1989 rose 19%, year to year, reflecting growing demand for CTB's replacement tires and industrial rubber products, along with price increases. Pretax income rose 49%. After taxes at 37.3%, against 37.2%, net income was up 48%, to $1.96 a share from $1.33.

Dec.	E0.69	0.68	0.43	0.34
	E2.65	2.01	1.51	1.14

Important Developments

Oct. '89— Cooper attributed the strong rise in earnings for the first nine months of 1989 to strong market demand for tires and inner tubes, while industrial rubber products demand was satisfactory. CTB said that its performance reflected increases in manufacturing efficiency and cost control, and stable raw material prices. Tire demand was expected to remain strong for the rest of the year. Demand for industrial products was expected to slacken somewhat as original equipment manufacturers reduced automobile production plans for the fourth quarter. The company said that barring any unforseen national economic problems, it expected continuing strong demand in 1990 and solid performance and growth.

Next earnings report expected in late January.

Business Summary

Cooper Tire & Rubber Co. is the fifth largest tire manufacturer in the U.S. Its tires are sold exclusively to the replacement tire market. Other products include inner tubes, reinforced hose, body cushions, door and window seals, bumper strips, and other rubber parts. During 1988 Cooper converted about 263 million pounds of natural and synthetic rubbers into rubber products, primarily for the transportation industry. Its non-transportation products accounted for less than 1% of sales in 1988. Cooper's 10 largest customers accounted for 51% of sales in 1988. Cooper believes that its shipments of automobile and truck tires amount to about 6.5% of all those made in the U.S.

A complete line of replacement passenger and truck tires are manufactured in a wide range of sizes and types. Heavy-duty inner tubes for passenger cars and trucks also are manufactured. The industrial products division makes, in addition to all types of extruded, molded, rubber-to-metal, spliced, die-cut, and calendered items, a number of special products for diversification. Industrial products include industrial cleaner hose, tarpaulin straps, valve stem locks, bumper guards, window seals, reinforced hose, motor mounts, and compression bushings.

The company's tires are sold nationally in the replacement tire market, primarily through more than 2,000 independent dealers and distributors. This independent channel of marketing has accounted for about 68% of all replacement passenger tires sold in the U.S. since 1984. Net sales from international operations accounted for about 4% of the company's total sales in 1988. Industrial products are sold to all the domestically-owned automobile manufacturers in the U.S. and six of the foreign-owned or joint-venture operations in North America.

Dividend Data

Dividends have been paid since 1950. A "poison pill" stock purchase right was adopted in 1988.

Summary

The nation's fourth largest brewer, Coors has undertaken an aggressive program to widen its distribution base. However, a competitive industry environment and high expansion costs have inhibited earnings growth in recent years. Increasingly competitive markets and higher material and marketing costs are expected to depress earnings in 1989 even further. In September 1989, Coors agreed in principle to acquire Stroh Brewing Company's major beer brands for $425 million of assumed debt and cash, which would make it the nation's third largest brewer.

Current Outlook

For 1989, earnings should decline to an estimated $0.85 a share, from 1988's depressed $1.28. Earnings for 1990 may not be appreciably higher.

The dividend, now paid quarterly, is expected to remain at $0.50 a share on an annual basis.

Sales for 1989 should be aided by volume gains from expanded distribution of newer beer brands (Extra Gold, Herman Joseph's and George Killian's Irish Red Ale) throughout the U.S. However, competitive markets may push overall unit volume lower. Material costs may accelerate faster than price increases and, with lower volume hampering productivity, penalize gross margins. A high level of advertising and marketing support may also depress growth over the short term, but should aid future results. Growing contributions from nonbrewing business in 1990 may be outweighed by dilution from the Stroh acquisition, but addition of the third largest brewer's popular-priced brands should prove beneficial over the longer term.

Net Sales (Million $)

Weeks:	1989	1988	1987	1986
12 Mar.	324	287	267	263
12 Jun.	426	383	358	361
16 Sep.	---	498	433	415
12 Dec.	---	353	293	276
	---	1,522	1,351	1,315

Despite a decline in beer volume, sales for the 24 weeks ended June 11, 1989, rose 12%, year to year, reflecting gains in packaging. An increase in manufacturing costs, significantly higher advertising and marketing outlays and a first-quarter deficit led to a 48% decline in net income, to $0.33 a share, from $0.63.

Important Developments

Sep. '89— The company agreed in principle to acquire most of Stroh Brewing Co.'s assets, including the Stroh's, Schaefer, Schlitz, Old Milwaukee, Goebel and Red Bull brands, the licensing rights to Piels beers and brewing and container facilities, for $425 million, to be paid partly through the assumption of debt and with cash. Completion of the transaction involving the nation's third largest brewer was not expected to take place before early 1990.

Next earnings report expected in late October.

Data as orig. reptd. 1. Refl. acctg. change

Business Summary

Adolph Coors Co. is the fourth largest brewer in the U.S. and operates other related businesses. Contributions (profits in millions) in 1988 were:

	Sales	Oper. Profits
Beer	83%	$70.5
Ceramics	10%	14.1
Other	7%	-15.1

Coors and Coors Light are the major beer brands. Other brands include Killian's Red Ale, Coors Extra Gold premium beer and Herman Joseph's. In 1988, Coors sold 16,534,000 barrels of beer, up 5.6% from 1987. Coors has concentrated its brewing activities at one brewery (in Golden, Colorado), which has allowed a uniform quality of beer but results in relatively high transportation costs. A 2,000,000-barrel packaging operation was opened in October 1987 at Shenandoah, Virginia. Operations are vertically integrated, with Coors suppling its own barley, malt and water. The company also makes its aluminum cans, produces most of its bottle needs and owns coal and natural gas interests to supply energy needs.

Ceramic and porcelain products are custom made for use in structural and electronic applications in the aerospace, defense and industrial markets.

Other interests consist of Coors Packaging Co. (high-performance flexible packaging and cartons for beverage, food, personal care, photographic paper and agricultural chemical companies); Coors Biotech, Inc. (high-fructose corn syrup, animal feed supplements, snacks foods and yeast products); Coors Energy Company (acquires, explores and develops oil and gas properties); and Coors Transportation Co. (common and contract carrier in the temperature-protected segment).

39⅝	43⅜-32	13	[1]0.80	[1]2.0%	A-	1.18

Summary

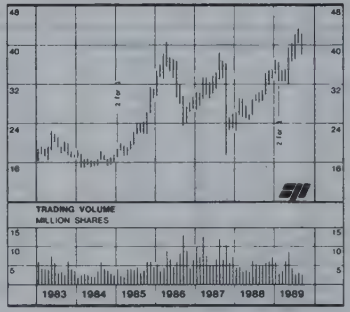
This company, which changed its name to Corning Inc. from Corning Glass Works in April 1989, primarily manufactures a wide variety of products from specialty glasses. Operations are concentrated in four major market sectors: specialty glass and ceramics, telecommunications, laboratory sciences, and consumer housewares. A significant portion of earnings is derived from equity investments, including Dow Corning. Higher earnings in 1988 included substantial nonrecurring gains, whose absence will likely cause 1989 earnings to decline. A resumption of earnings growth is anticipated in 1990.

Current Outlook

Earnings for 1990 should approximate $3.00 a share, up from the $2.70 estimated for 1989.

The regular $0.20 quarterly dividend is likely to be raised in late 1989. A year-end extra dividend at least equaling 1988's $0.20 (adjusted) is also likely.

Sales for 1990 are expected to rise 12%, assuming reasonable economic growth. The gain should be broadbased, although the stronger dollar and flat sales to the automotive industry will be somewhat restraining. Margins should be well maintained, due to well controlled costs. Long-term prospects appear bright, due to the company's strong technological base.



Net Sales (Million $)

Period:	1989	1988	1987	1986
12 Wks: Mar. ...	534	453	443	423
12 Wks: Jun.	580	500	491	448
16 Wks: Oct.	---	625	610	549
12 Wks: Dec. ...	---	543	540	437
	---	2,122	2,084	1,856

Sales for the 24 weeks ended June 18, 1989 increased 17%, year to year, led by video display bulb and optical fiber businesses. Margins narrowed somewhat, and income from operations (excluding nonrecurring gains) increased 15%. However, after a 87% decline in nonrecurring gains, pretax income was down 11%. Following taxes at 43.0% versus 40.6%, and a 6.3% increase in earnings of associated companies and minority interest, net income declined 6.2%, to $1.22 a share from $1.31. Results exclude a special credit of $0.01 a share in both periods and a special charge of $0.93 in the 1988 interim.

Business Summary

Corning Inc. (formerly Corning Glass) is a diversified manufacturer of products made from specialty glasses. It also holds equity interests in a variety of companies. Industry segment contributions in 1988.

	Sales	Profits
Specialty materials	19%	18%
Communications	17%	16%
Health & science	35%	42%
Consumer products	29%	24%

Specialty materials include Celcor ceramic substrates for auto pollution-control devices, headlamp glass, and technical ceramics.

Communications products primarily consist of the manufacture of optical fibers and glass for televisions and computer terminals.

Health and science includes laboratory equipment, lenses for eye glasses, Methpath testing services, and Hazelton's industrial laboratory services.

Consumer products include housewares and dinnerware sold under the Pyrex, Corning Ware, Corella, Visions, and Revere Ware names.

Companies in which Corning Inc. held an equity interest had revenues of $3.0 billion and net income of $274.3 million in 1988, of which Corning's share was $127.2 million. The largest of these was Dow Corning Corp., a 50%-owned manufacturer of silicons that had sales of $1.5 billion and net income of $150.5 million.

Summary

The company provides insurance brokerage and risk management services to its clients worldwide. CBL believes it is the world's fifth largest insurance services firm in terms of revenues. Growth in recent years has benefited from acquisitions. In 1988 CBL acquired seven insurance brokerage firms and an actuarial and benefits consulting firm; it also sold its 29.9% stake in Minet Holdings PLC in 1988 and recorded a net gain of $73.85 million. Excluding the Minet gain, earnings from operations in 1988 were impacted by softness in insurance pricing. This trend continued into 1989's first half.

Business Summary

Corroon & Black and its subsidiaries comprise one of the world's largest full-service insurance brokers, serving a broad range of corporate and institutional clients. When insurance businesses is placed with an insurance company, compensation is in the form of a commission based on the amount of the insurance premium involved. Services are generally compensated on a fee basis. Sources of commissions and fees in recent years:

Continuing Operations	1988	1987
Brokerage services	71%	72%
Benefits & specialty sales	25%	22%
Reinsurance	4%	6%

CBL maintains offices in 94 cities in the U.S. and provides services to its clients in 74 other countries through its affiliates and correspondents.

As an insurance broker and agent, CBL analyzes loss exposure, then designs, places, and manages insurance programs for clients of every size throughout the world—principally in the areas of property, liability, fidelity, surety, life, and group benefit coverages. CBL provides other services, including captive company management and self-insurance consulting and administration, as well as reinsurance placement.

CBL also provides a variety of human resource services, including actuarial and administrative services for pension, compensation, and benefit plans, employee benefit communications, and financial and estate planning.

In 1988, CBL sold its 29.9% interest in Minet Holdings PLC for $193.7 million, and it acquired seven insurance brokerages and one actuarial and benefits consulting firm. In 1987 four insurance brokerages were acquired and in 1986 three brokers and a consulting firm were purchased.

Important Developments

Jul. '89— Commenting on results for the first six months of 1989 the company noted that operating earnings were adversely affected by the highly competitive p-c underwriting marketplace, increased claims costs in the life insurance division, and by further deterioration in reinsurance operations. This situation was further exacerbated by the absence of a $120 million pretax gain from the sale of the company's 29.9% interest in Minet Holdings PLC. Management stressed that steps were being taken to address this situation, including stepped up cost cutting efforts. However, because of the cyclical nature of the p-c market, rates in those lines are not expected to firm until mid-1990 at the earliest.

Next earnings report expected in late October.

Total Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	119.7	106.1	102.4	81.7
Jun.	110.1	100.5	93.8	79.3
Sep.		111.7	105.3	92.2
Dec.		106.6	90.7	85.0
		424.9	392.2	338.3

Total revenues for the six months ended June 30, 1989 rose 11%, year to year, reflecting the new accounts and the acquisition of 10 companies since June 1988, partially offset by lower renewal premiums. Margins narrowed, and operating income declined 15%. In the absence of the prior-year $120 million pretax gain ($4.17 a share after taxes) from the sale of Minet Holdings PLC, pretax income fell 81%. After taxes at 38.6% in each period, net income also was down 81%, to $1.08 a share from $5.52.

Crane Co.

NYSE Symbol CR In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Sep. 13'89	1989					
33	34⅞-22½	13	1.13	3.5%	B	1.27

Summary

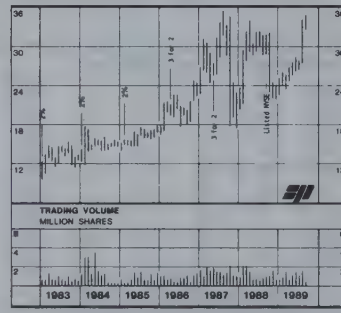
Crane is a diversified manufacturer of engineered products for aerospace, construction, defense and other industries. In line with its strategy of restructuring operations away from highly capital intensive, cyclical, commodity-oriented businesses, CR spun off its cement and aggregates subsidiary, Medusa Corp., to shareholders in October, 1988. Increased sales, continued moderate interest expense and the impact of share repurchases should permit higher earnings in 1989. In August, 1989 directors raised the dividend 12.5% and declared a 3-for-2 stock split.

Current Outlook

Earnings for 1989 are estimated at $2.60 a share, versus 1988's $2.19, before giving effect to the pending 3-for-2 split. Earnings for 1990 are estimated at $2.90 a share.

The dividend was raised 12.5%, to the equivalent of $0.28¾ quarterly from $0.25 (both unadjusted), with the September, 1989 payment.

Sales are expected to rise in 1989, reflecting growth in both industry segments. Operating income may advance at a less rapid rate due to margin deterioration in the wholesale distribution segment. However, benefiting from continued moderate interest expense and the favorable impact of share repurchases, share earnings should rise.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	348	275	280	259
Jun.	384	316	337	311
Sep.	---	378	344	323
Dec.	---	344	323	311
	---	1,313	1,284	1,204

Sales for the six months ended June 30, 1989 rose 24%, year to year, reflecting gains in engineered products and the Palmer G. Lewis acquisition. Hurt by margin contraction in the wholesale unit, the gain in pretax income was cut to 17%. After taxes at 39.4%, versus 39.9%, net income from continuing operations rose 18%, to $1.23 a share on fewer shares, versus $1.01 (both unadjusted), which was before income from discontinued operations of $0.29.

Dec.	E0.66	0.56	0.59	0.52
	E2.60	2.19	2.23	1.87

Important Developments

Jul. '89— CR reported share earnings of $1.23 on a a 24% rise in sales for 1989's first half, versus $1.01 a share in 1988's first half. CR attributed most of the earnings gain to strong performances at Hydro-Aire and National Vendors. CR said that it expected continued good performance for all of 1989. CR also stated that it had repurchased 859,495 shares of its common stock for $22.4 million during the first half of 1989 and had repayed $18 million in long-term debt.

Jul. '89— CR announced that it had called for payment on August 21, 1989 all of its $22,833,300 principal amount of its 10.5% debentures due February 1, 1994 at 100 plus accrued interest from August 1 to the redemption date.

Next earnings report expected in late October.

Business Summary

Crane is a diversified manufacturer of engineered products for aerospace, construction, defense and other industries. Contributions in 1988:

	Sales	Profits
Engineered industrial products	54%	74%
Wholesale distribution	46%	26%

Foreign operations accounted for 27% of sales and 25% of operating profits in 1988.

Engineered industrial products consists of operations that develop and manufacture products and systems for process, construction, defense and aerospace markets. Products include a wide variety of valves for the industrial, building and construction industry; pumps used in chemical processing, petrochemical, agricultural and varied applications; water conditioning and filtration equipment; fiberglass reinforced plastic panels; and vending machines. Under the Hydro-Aire name this segment makes anti-skid brake control systems, fuel and hydraulic pumps, and other aircraft and aero-space equipment for the commercial, military and general aircraft industries and the missile and space programs. Defense businesses develop and manufacture shipboard weapons systems and specialized elevators.

Wholesale distribution is comprised of Huttig, a leading wholesaler of millwork and related products, and Crane Supply of Canada.

CR spun off its cement and aggregates unit Medusa Corp. to shareholders in October, 1988.

Dividend Data

Dividends have been paid since 1939. A dividend reinvestment plan is available. A new "poison pill" stock purchase right was adopted in 1988.

Summary

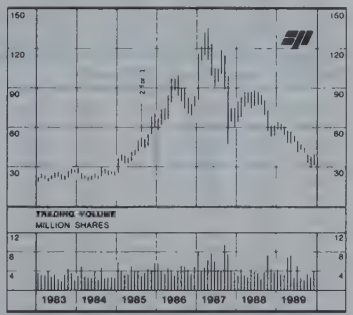
This company is the leading manufacturer of supercomputers—large-scale, high-speed computer systems for scientific and engineering applications. In November, 1989 CYR completed the spin-off of Cray Computer Corp., whereby 90% of the shares of Cray Computer was distributed to CYR shareholders. Earnings for 1989 are expected to decline for the first time in 10 years, but a rebound is expected in 1990, reflecting the completion of a product transition, lower R&D expenses, and other cost controls.

Current Outlook

Earnings for 1990 could reach $4.00 a share, versus the $3.00 estimated for 1989.

Cash dividends are not anticipated.

Revenues for 1990 are expected to be flat. However, gross margins should improve as the product transition to the Y-MP computers from the X-MP series is nearing completion; the Y-MP will be the only product marketed by CYR in 1990. In addition, CYR expects that fewer machines will be traded-in during 1990 which would aid profitability. Operating margins will likely improve, reflecting a 3%-4% decline in R&D expenses after the spin-off of Cray Computer and a program to hold general and administrative costs flat, year to year.



Total Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	116.1	145.9	214.1	142.0
Jun.	128.3	134.3	124.9	179.9

Dec.	---	330.9	163.6	138.2
	---	756.3	687.3	596.7

Revenues for the nine months ended September 30, 1989 increased 6.8%, year to year; 27 new and 15 used systems were installed, versus 32 and seven, respectively. Gross margins narrowed, and operating expenses rose. Net income fell 46%, to $1.24 a share from $2.19.

Important Developments

Nov. '89— CYR completed the spin-off of Cray Computer Corp., whereby 90% of the shares of Cray Computer was distributed to CYR shareholders and the remaining 10% was retained by CYR. For every two shares of CYR common stock held on November 15, shareholders received one share of Cray Computer. Cray Computer was formed by CYR to develop and manufacture the CRAY-3 and CRAY-4 computers based on gallium arsenide technology, and to market an 8-processor version of the CRAY-2. Seymour Cray, who is the founder of CYR and now serves as chairman of Cray Computer, resigned as a director of Cray Research. CYR has transferred to Cray Computer a facility and other assets related to the CRAY-3 project, with a book value of $56.3 million, as well as providing a promissory note amounting to $98.6 million. The two companies also entered into cross-licensing agreements.

Next earnings report expected in mid-January.

Business Summary

Cray Research, Inc. is the largest manufacturer of large-scale, high-speed computers, known as supercomputers, for scientific and engineering application.

	1988	1987
Installed systems base at year-end	240	189
New systems installed	56	46

Foreign operations contributed 35% of revenues in 1988 and 30% of operating profit. U.S. Government agencies provided 44% of revenues.

Cray computers are used primarily for physical simulation, or the analysis and prediction of the behavior of physical systems through computer modeling. Typical applications are weather forecasting, aircraft and automotive design, nuclear and geophysical research and seismic analysis.

The Cray X-MP series includes supercomputers available with one, two or four central processing units. Typical system prices range from $2.5 million to $14 million. The eight processor Y-MP was announced in February, 1988 and five were installed in 1988. In March, 1989 the full Y-MP series was announced, with one, two four and eight processor versions and prices ranging from $5 million to $23 million.

The Cray X-MP runs the proprietary COS operating system; the Y-MP runs UNICOS, a UNIX-based operating system which is also available for the X-MP. Over 500 applications software packages are available, including about 100 for UNICOS.

CYR also sells a Solid-State Storage Device (SSD), which sells for $500,000 to $5 million, designed to enhance the performance of the X-MP and Y-MP by providing fast access to large data sets and temporary storage for systems programs. Three high performance disk drives are designed to support the data capacity and transfer speed requirement of supercomputers; prices range up to $1 million.

Dividend Data

No cash dividends have ever been paid.

Finances

As a result of the November, 1989 spin-off of Cray Computer, CYR adjusted the conversion price of its 6½% convertible debentures due 2011 from $84 to $78.

Capitalization

8⅞	16¾-8½	NM	None	None	C	1.10

Summary

This manufacturer of factory automation systems, numerically controlled machine tools and materials-handling equipment has expanded through acquisitions in recent years. In September 1989, CTCO announced that it had received an extension of a September 8 default deadline which resulted when the company's net worth declined below levels specified in a covenant securing a $2,000,000 industrial revenue bond. In July 1989, CTCO reported that it had incurred some $21 million in charges in fiscal 1989's third quarter in connection with plans to restructure its operations.

Current Outlook

A loss of $0.70 a share is projected for the fiscal year ending September 30, 1990, versus fiscal 1989's estimated loss of $3.90.

Early resumption of quarterly dividends is not anticipated.

Revenues for fiscal 1990 are expected to rise from fiscal 1989's levels, reflecting the favorable impact of increased orders and backlog. Implementation of cost reduction and manufacturing improvement programs, the likely absence of restructuring charges and lower interest expense should result in a smaller loss in fiscal 1990.

Operating Revenues (Million $)

Quarter:	1988-9	1987-8	1986-7	1985-6
Dec.	111.19	107.32	103.33	105.38
Mar.	121.41	96.72	105.28	96.06
Jun.	118.51	113.75	116.69	106.83
Sep.		110.35	96.92	109.36
	428.14	422.22	417.63	

Operating revenues for the nine months ended June 30, 1989 rose 9.8%, year to year, reflecting gains in domestic markets. Margins narrowed, and penalized further by some $25 million in restructuring charges along with increased nonoperating expenses, the pretax loss widened to $44.7 million from $18.5 million. After taxes of $820,000 versus tax credits of $6.3 million, the net loss from continuing operations totaled $45.5 million, versus a loss of $12.1 million. Share losses were $3.67, versus a loss of $0.98 (before gains from discontinued operations of $0.07).

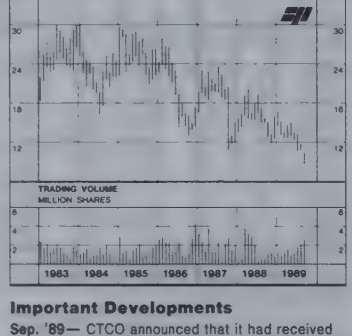
Sep.	Ed0.23	d0.84	d1.34	d0.02
	Ed3.90	d1.82	d1.62	0.02



Important Developments

Sep. '89— CTCO announced that it had received an extension of a September 8 default deadline on a $2,000,000 industrial revenue bond. CTCO said that the possibility of default on the bond arose because the company's net worth had fallen below levels specified in a covenant that guarantees the bond. However, the trustee bank for the bond granted the extension in view of CTCO's intention to restructure its operations and debt. CTCO's debt restructuring entailed the negotiation of a new long-term credit agreement for between $40 million and $50 million and a public offering of some $50 million of convertible exchangeable preferred stock. Earlier, CTCO reported that it incurred a $21.3 million charge in fiscal 1989's third quarter to implement a major restructuring program involving the sale of three operating units, a joint venture, the consolidation of two units and a write-down of certain other assets.

Next earnings report due in early November.

Business Summary

Cross & Trecker is a leading manufacturer of machine tools, flexible manufacturing systems, automated material-handling equipment and other products and systems for factory automation.

Foreign sales contributed approximately 23% of revenues in fiscal 1988, and 20% in fiscal 1987.

The Cross Co. designs and builds special machines and systems for mid-to high-volume manufacturers. Major markets include the auto, truck, construction and farm equipment industries.

Kearney & Trecker produces stand-alone machining centers and milling machines for aircraft, aerospace and construction equipment makers. It also produces flexible manufacturing systems, or groups of computer-controlled machining centers, special tools and software for low-to mid-volume manufacturers.

The Warner & Swasey Division makes turning machines for cylindrical parts, turret lathes, grinding machines, punch presses, automated measuring machines and various numerically controlled machine tools.

Roberts Corp., a non-machine tool subsidiary, designs and builds automated material-handling systems, including robotics for metalworking manufacturers, and machines and systems for the foundry and power-generating industries. In April 1987, Roberts formed a 50%-owned joint venture with Sintokogio, Ltd. of Japan, a leading producer of foundry products and systems.

Alliance Automation Systems (acquired in 1987) produces automated assembly systems for the electronics, automotive, business machine and consumer products marke[4]s.

Dividend Data

Prior to omission in November 1986, dividends had been paid each year since 1974.

Finances

In March 1987, CTCO sold privately $25 million of 9.0% senior notes due March 1, 1997.

Capitalization

Long Term Debt: $35,300,000 (6/89).

Common Stock: 12,393,149 shs. ($1 par).
Institutions hold about 85%.

Summary

This company produces metal containers, crowns and closures, and to a lesser extent makes packaging machinery. Earnings in recent years benefited from volume gains and cost-cutting programs, and an aggressive stock repurchase program bolstered per-share comparisons. A further increase in sales, plant modernization and efficiency programs, and fewer common shares outstanding will be important to share earnings momentum in 1990. Recently, CCK agreed to acquire Continental Can Canada from CCL Industries for US$330 million.

Current Outlook

Earnings for 1990 may rise to about $3.65 a share from the $3.55 estimated for 1989.

Dividends are not expected in the near future.

Sales for 1990 are expected to increase on moderate volume gains in most categories and acquisitions. Pricing should remain competitive, but material cost increases should slow down. Domestic contributions should benefit from substantial plant modernizations and new facilities which will be important to sustaining the earnings uptrend. Share earnings will be boosted by the ongoing stock buyback program.

Important Developments

Nov. '89— CCK agreed to acquire CCL Industries, Inc. of Toronto's Continental Can Canada subsidiary, a Canadian manufacturer of metal containers with 1988 sales of US$425 million. CCK will pay a total of about US$330 million, including $90 million in cash and $112 million by assumption of CCL's short-term debt. CCL will also receive 2,536,000 CCK common shares valued at $50.50 each or $128 million. Upon completion of the transaction at year-end 1989, CCL will hold 8.8% of CCK common stock.

Mar. '89— In 1988 U.S. operating profits declined 26% from 1987, due to aluminum price increases and competitive pricing pressures. The decline was partially offset by increased foreign earnings.

Next earnings report expected in late January.

Business Summary

Crown Cork & Seal's principal operation, representing more than 90% of its business, is the fabrication of steel and aluminum into metal cans, crowns and closures. CCK also makes filling and handling machinery for the beverage industry.

CCK makes a wide variety of cans for the food, citrus, brewing, soft drink, oil, paint, toiletries, drug, chemical, anti-freeze and pet food industries. Cans are made from tinplate and aluminum and range in size from two gallons to less than five ounces. A wide variety of caps and closures are made for food and nonfood items.

Machinery lines include bottle washers and rinsers, bottle and can warmers, bottle fillers-crowners for carbonated beverages, can fillers for carbonated beverages, and process equipment.

The company operates 26 plants in the U.S. and 62 abroad. Foreign operations, conducted in some 36 countries throughout the world, accounted for about 43% of sales and 59% of operating profits in 1988. Europe alone represented 24% of sales and 20% of operating profits. In 1988 CCK purchased the crown manufacturing division of H. C. Industries located in Indiana and the remaining 24% minority interest in Crown Cork Co. (Spain).

At year-end 1988 CCK had a $28,627,000 investment in Crown Financial Corp., a domestic subsidiary which was consolidated as of 1988. This unit contributed $2,838,000 to consolidated net income in 1988.

Dividend Data

No cash dividends have been paid since 1956.

Finances

Foreign exchange losses charged to income in 1988 amounted to $14.2 million, compared with $17.5 million in 1987. Foreign exchange loss charged to equity in 1988 totaled $24.3 million, against a credit of $43.1 million in 1987. During 1988 CCK repurchased 2,242,887 (adjusted) of its common shares at a cost of $77,398,000, for an average cost of $34.51 (adjusted) a share.

Capitalization

Long Term Debt: None.

Minority Interest: $928,000.

Common Stock: 26,212,757 shs. ($5 par). Institutions hold approximately 34%. Shareholders of record: 3,765.

Summary

This high-technology defense electronics concern is also the fifth largest elevator producer in the U.S. and the world's leading manufacturer of automated fare collection systems. Earnings rose sharply in fiscal 1989, aided by improving profitability in the defense segment.

Business Summary

Cubic Corp. designs, develops and manufactures high-technology electronic products used in a variety of industrial and defense applications. Contributions (operating profits in millions) in fiscal 1988:

	Revs.	Profits
Electronic defense systems	43%	$14.1
Electronic elevator operations	31%	8.5
Fare collection systems	11%	-1.8
Industrial operations	15%	3.3

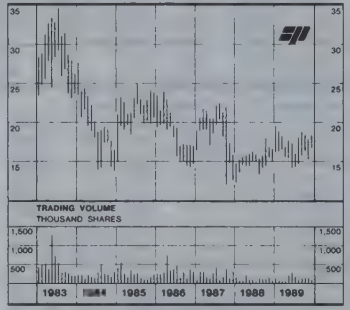
About 43% of fiscal 1988 revenues were from various agencies of the U.S. Government.

The Cubic Defense Systems subsidiary is a leading supplier of tactical training and simulation systems, including the Tactical Aircrew Combat Training System/Air Combat Maneuvering Instrumentation (TACTS/ACMI) system produced for the United States and allied armed services. Cubic Communications markets transmitters and receivers to various military and governmental units.

The U.S. Elevator subsidiary is one of the largest elevator manufacturers and suppliers of microprocessor control systems for elevators.

The Cubic Automatic Revenue Collection Group, formed in early 1988, includes Cubic Western Data, Automatic Toll Systems, and London-based Westinghouse Cubic Ltd. (50% owned). The group is the world leader in automated fare collection systems for mass transit and airlines.

Other operations include Consolidated Converting Co., a producer of packaging and shipping containers; Cubic Precision, a manufacturer of surveying and positioning systems used in offshore oil exploration, and hydrographic research and dredging; and Cubic Precision Electro-Optical, which manufactures optical tooling.



Important Developments

Nov. '89— The company's U.S. Elevator division said it plans to move its manufacturing operations to Mexicali, Mexico, affecting about 55 jobs. Approximately 100 people will continue to be employed at the division's Spring Valley, California, headquarters.

Sep. '89— Cubic's backlog at September 30, 1989, was $375 million, up 3.3% from the level a year earlier.

Aug. '89— One employee was acquitted and another faces a retrial on charges that they took part in the alleged falsification of records on a U.S. Army mine-detector contract. The two engineers were indicted by a federal grand jury in March 1988 after an investigation that began in 1984. Last year, Cubic paid the federal government about $7.3 million to settle claims that it fraudulently tested the hand-held mine detectors it refurbished for the Navy.

May '89— Cubic was notified by the government that its defense systems subsidiary is a target in the Pentagon's bribery-scandal investigation and has been under investigation since June 1988.

Next earnings report due in mid-February.

50⅜	72¼-48	NM	2.20	4.4%	C	1.31

Summary

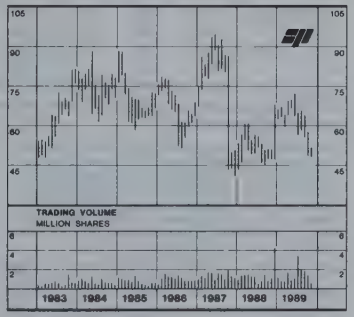
Cummins is the leading manufacturer of diesel engines for heavy-duty trucks. Third quarter 1989 earnings were adversely affected by a substantial ongoing decline in engine orders. In July, 1989 CUM repurchased some 15% of its stock from the Miller Family, including a 9.8% stake that the Miller's bought from Hanson p.l.c. Shortly thereafter, Industrial Equity Pacific Ltd. revealed that it holds some 9.9% of CUM's shares and may buy more.

Current Outlook

A deficit of $3.00 a share is possible in 1990, versus an expected loss of $5.00 for 1989.

The $0.55 quarterly dividend cannot be considered secure.

Industrywide assemblies of trucks will remain slow in the fourth quarter of 1989 and probably through the first half of 1990. Lower demand for heavy-duty truck engines will be partially offset by continued gains in sales of mid-range engines. Demand for components and power systems will remain low. Continued gains in productivity at the company's new manufacturing operations and lower warranty and product recall expenses could reduce the loss for 1990. The company is reducing costs to conserve cash.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	919	798	657	517
Jun.	928	834	687	604
Sep.	808	808	668	545
Dec.	---	869	754	639
	---	3,310	2,767	2,304

Sales for the nine months ended October 1, 1989 rose 8.8%, year to year, reflecting price increases and volume gains. Despite a substantial decline in third quarter orders for heavy-duty truck engines and marine and recreational vehicle generator sets and sharply higher warranty and product recall costs, net income was $3.6 million, versus a loss of $8.4 million. After preferred dividends, there was a net loss of $0.31 a share, versus $1.36.

	Ed5.00	d6.71	0.55	d10.45

Important Developments

Oct. '89— Due to sharply reduced heavy-duty truck engine orders, CUM implemented stringent restrictions on expenses and capital spending, cut salaried employees' and executives' pay, and laid off 300 production workers.

Jul. '89— On July 17 CUM bought 1,043,000 of its common shares from the Miller Family in exchange for $67 million of newly-issued five-year 10% notes convertible into preferred stock which is convertible into common stock at $83.85 a share. The Miller's acquired the shares from Hanson p.l.c. for $72 million. Hanson also signed a standstill agreement with CUM. CUM also bought 580,269 shares from the Miller's for $37 million of the same issue of preferred stock which will mature in 1994 and yield 10%, unless shareholders approve voting rights for them, in which case they will yield 9.75%. On July 26 Industrial Equity Pacific Ltd. revealed that it owned 9.9% of CUM's shares and may buy more.

Next earnings report expected in mid-February.

Business Summary

Cummins is the leading manufacturer of heavy-duty and mid-range diesel engines, engine components and power systems for use in truck, bus, marine, power generation, military vehicle, construction, mining, logging, agriculture and rail applications. Sales contributions in recent years:

	1988	1987
Engines	64%	64%
Components	22%	23%
Power systems	14%	13%

Every major U.S. truck manufacturer offers Cummins engines as standard or optional equipment. Total sales of engines and kits were 217,300 in 1988, up 35% from 1987, and were divided 53% NH/NT and L-10 heavy-duty engines, 35% B and C mid-range, 9% other engines and 3% engine kits. Cummins' share of the North American heavy-duty diesel truck engine market exceeded 50% for the past eight years. In 1988 it was 54%, versus 55% in 1987. Engines range in size from 40 to 2,000 horsepower.

The components group markets products to engine manufacturers and end-users, including crankshafts, gears, camshafts, remanufactured engines and replacement parts, turbochargers, air compressors, vibration dampers, couplings, flywheels and piston rings. The power systems group manufactures alternators, small gasoline engines, generator sets, heat exchangers and electronic and drivetrain components.

In 1988 the United States accounted for 62% of sales, Europe 16%, Asia 8%, Canada 8%, Latin America 4% and Africa/Middle East 2%. Navistar International accounted for 10.4% of sales in 1988.

Dividend Data

Dividends have been paid since 1948. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

Nov. 30'89	1989					
25⅞	33-21⅜	4	0.80	3.1%	NR	NA

Summary

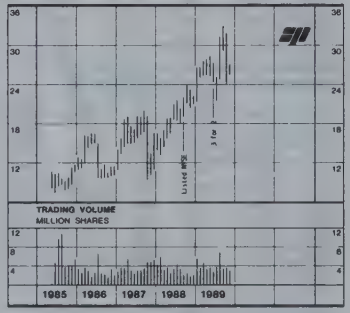
This company is the nation's second largest copper producer, a major coal producer, and has important interests in gold, molybdenum, lithium and industrial minerals. After benefiting in 1987-1989 from a series of acquisitions and from a strong recovery in the copper market, earnings for 1990 may decline significantly, reflecting expected sluggish economic growth.

Current Outlook

Earnings for 1990 are projected at $5.00 a share, versus the $6.60 estimated for 1989.

Dividends should continue at $0.20 quarterly.

Copper and molybdenum profits for 1990 will probably decline significantly as lower prices outweigh moderately heavier copper output. Industrial minerals earnings are likely to fall substantially in the absence of a gain on sale of clay operations. However, gold activities should return to a full year of profitability on a greater share of lower cost production, reduced administrative costs, and higher quotes. Coal income will probably recover sharply, reflecting diminution of output problems and absence of a contract writedown. Lithium profits are likely to be about the same. Iron ore operations should make little initial contribution.



Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	436	258	172	191
Jun.	453	329	179	220
Sep.	464	327	214	206
Dec.	---	413	230	194
	---	1,327	795	811

Revenues for the first nine months of 1989 advanced 48%, year to year, on further strength in the copper market. With operating costs increasing at a slower rate, and net interest income instead of expense, net income was up 102%. Share earnings equaled $5.12 (after a full nine months of initial preferred dividends), versus $2.59 (adjusted for the June 1989 3-for-2 split).

Dec.	E1.48	1.61	0.26	0.11
	E6.60	4.21	0.68	0.54

Important Developments

Sep. '89— CYM said that it had repurchased some 1.3 million shares under an authorization approved in May to buy up to 4 million (10%) of its common stock. In August, CYM acquired Reserve Mining Co., a shutdown iron ore producer, for $52 million. Separately, CYM and the bankrupt LTV Corp. reached a $505 million settlement of CYM's $1.07 billion in claims against LTV. Ultimate recovery would depend on the bankruptcy court, and the amount CYM would receive was expected to be substantially less.

May '89— CYM announced an expansion at its Bagdad, Ariz. copper mine that would raise annual output to 220 million pounds, from 180 million.

Mar. '89— CYM acquired Hawks Nest Coal Co. from Imperial Pacific Investment Inc. for $15 million plus the assumption of debt. Hawks produces 1.2 million tons of coal annually from properties containing 53 million tons of reserves.

Next earnings report expected in early February.

Business Summary

Cyprus Minerals is a diversified natural resources concern engaged in mining and related activities that include the exploration for and extraction, processing and marketing of mineral resources. Its primary products are coal, copper, molybdenum, lithium, gold and fine ground industrial minerals (talc). Contributions (in million $) to operating profits by business segment in recent years:

	1988	1987	1988
Copper	$202	$35.6	$20.2
Coal	8.2	30.2	40.7
Gold	3.2	0.1	-4.3
Specialty metals	13.1	-3.9	---
Industrial minerals	32.3	2.9	5.5

Following a series of acquisitions in 1988, Cyprus is now the nation's second largest copper producer. Copper, together with its by-product, molybdenum, is produced from nine mines located in Arizona, New Mexico, Idaho and Nevada. In 1988 CYM produced 466.5 million pounds of copper (compared with 336 million pounds in 1987) and 39.9 million pounds of molybdenum (28.6 million). CYM processes some 60% of its production at company-owned smelters and refineries. Proved reserves at 1988 year-end equaled 921 million tons of ore averaging 0.47% copper; 240 million tons of ore averaging 0.118% molybdenum; and 343 million tons of ore averaging 0.29% copper and 0.037% molybdenum.

Coal is produced from nine mines in Colorado, Kentucky, Pennsylvania, Utah, West Virginia and Wyoming. In 1988 Cyprus produced 13.2 million tons of coal, brokered 0.4 million tons for a total of 13.6 million tons at an average sales price of $26.74 a ton. In 1987 CYM sold 12.1 million tons of coal at an average $28.34 a ton. Reserves at December 31, 1988 were 796 million tons. In 1988 some 96% of CYM's coal sales were made to electric utilities (substantially all under long-term contract).

Cyprus, which commenced gold production in early 1987, has interests in five active mines located in Arizona and Australia. In 1988 CYM produced 108,400 ounces of gold (versus 10,800 in 1987) and had proved and probable ore reserves of 11.0 million tons averaging 0.112 oz. of gold per ton. In September, 1989 CYM announced a plan to restructure its South Pacific gold holdings. In the transaction, Arimco N.L. (Aus.) and CYM would exchange interests in various gold properties. Completion of this deal would lead to a slight decline in 1990 gold output from some 140,000 ozs. expected in 1989. Silver production in 1988 was 1,980,000 ounces, versus 1,260,000 ozs. in 1987.

CYM's specialty metals unit was formed in 1988 through the acquisition of the lithium operations of Foote Mineral Co., and a 50% interest in a beryllium deposit in Texas. Lithium is used in the manufacture of glass, ceramics, greases, batteries and the smelting of aluminum, while beryllium is used in electronics and aerospace applications.

Through several acquisitions in 1988, Cyprus Industrial Minerals is now the world's largest producer of talc. Talc is used by the paper, paint, ceramics, plastics and cosmetics industries. CYM also produces high quality barite, which is used in the production of paints, rubber and plastics.

Dividend Data

Quarterly cash dividend payments were initiated in 1988. A new "poison pill" stock purchase right was adopted in 1989.

Summary

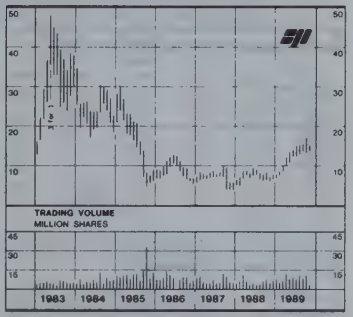
This company manufactures digital switching, transmission and private network system products for the telecommunications industry. DSC should extend its improvement in profitability in 1990, aided by recently introduced products, stringent cost controls and a consolidation of operations. Foreign operations have been generating increasing portions of consolidated revenue.

Current Outlook

Earnings for 1990 are projected to reach approximately $1.00 a share, compared with the $0.75 estimated for 1989.

Initiation of cash dividends is not expected.

Revenues should continue to increase at a strong pace in 1990, aided by increased sales of recently introduced switching products, notably those for the long distance and cellular communications businesses. International sales should also increase. Operating margins should widen on improved volume and changes in the product mix. Interest costs should stabilize.



Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	90.09	79.37	76.73	75.83
Jun.	104.00	77.63	77.25	82.81

Dec.	---	97.33	79.59	74.49
	---	339.67	312.38	303.95

Revenues for the nine months ended September 30, 1989, increased 24%, year to year. Margins widened and pretax income surged 77%. After taxes at 25.0%, versus 18.9%, net income was $21,760,000 ($0.52 a share), versus $13,251,000 ($0.32), which excludes losses of $801,000 ($0.02) from discontinued operations in the 1988 period.

Common Share Earnings ($)

Quarter:	1989	1988	1987	1986
Mar.	0.13	0.10	0.06	0.05
Jun.	0.19	0.11	0.07	0.09

Dec.	E0.23	0.16	0.13	0.06
	E0.75	0.48	0.35	0.27

Important Developments

Oct. '89— DSC attributed revenue growth for the first nine months of 1989 to high demand for switching systems, including those for cellular applications, increased deliveries of MegaHub products and initial volume shipments of digital cross-connect products. Gross margins narrowed in the September quarter due to a rise in the proportion of new products in the revenue mix; however, future improvements were anticipated as volumes increase and learning curve efficiencies are achieved.

Aug. '89— DSC publicly offered $75 million of 7 3/4% convertible subordinated debentures due August 1, 2014, through Donaldson, Lufkin & Jenrette Securities Corp. and other underwriters. The debentures were convertible at any time into DSC common stock at $18.60 a share. Proceeds would be used for general corporate purposes, including the repayment of indebtedness.

Next earnings report expected in early February.

Business Summary

DSC Communications (formerly Digital Switch Corp.) designs, manufactures and markets digital switching, transmission, test, and control systems used in public and private communications networks. In 1988, DSC consolidated two principal operating groups, the Public Network Group and the Business Network Systems Group, into a single group—Network Products.

Switching products include tandem switches, such as the DEX 600E, that generally are used to interconnect bundles of local or long-distance telephone lines; Signal Transfer Points systems, which are high-capacity message switches incorporating the key elements required for the implementation of an Integrated Services Digital Network; and the DEX 600C cellular switching system made for Motorola, which markets the switch to the cellular industry. Under its DEX MegaHub trademark, the company sold new switching products based on Signaling System No.7 (SS7), an international standard for interswitching system communications.

Other products include the CP2000, a smart T-1 digital multiplex gateway product that allows the user to combine and manage numerous lines of voice, data or video; transmission and traditional radio products; digital cross-connect systems; and network management products for integrarted, transparent communications for both Local Area Networks (LANs), and Wide Area Networks (WANs). In the 1988 fourth quarter, DSC discontinued its "North American Standard" transmultiplexer business, due to an industry-wide movement from analog to digital transmission facilities.

During 1988, revenue generated from foreign operations accounted for 16% of consolidated revenue; MCI Communications, Motorola Inc., and DDI Corp. accounted for 19%, 14% and 12% of revenues, respectively.

Dividend Data

No cash has been paid. A 200% stock dividend was distributed May 23, 1983. In May 1986, DSC distributed preferred-stock purchase rights, designed to protect shareholder interests in the event of an unfriendly takeover attempt.

Finances

Auditors issued an explanatory opinion on the company's 1988 financial statement, noting a purported class action lawsuit filed against the company, the outcome and any potential liability of which was unknown. The litigation involved a suit by certain shareholders alleging that DSC's financial statements for periods of 1984 and 1985 were false and misleading.

Summary

This manufacturer of computer-aided engineering and design systems acquired Cadnetix Corp. in early 1989, for cash and convertible debentures totaling more than $200 million, enhancing the company's depth in Electronic Design Automation technologies. Daisy arranged for interim bridge loan financing and sold a unit of Cadnetix to fund the acquisition. Results for the first nine months of 1988-9 were penalized by non-operating charges and writeoffs of some $123.5 million.

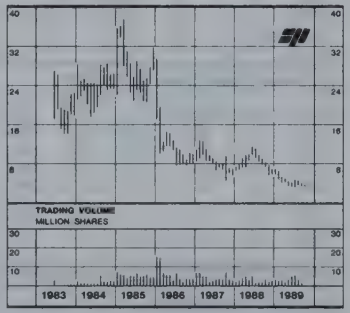
Business Summary

Daisy Systems Corporation designs, manufactures, sells and supports computer-aided engineering (CAE) systems to automate the electronic design engineering process. The company's product line is used for the design and layout of application-specific integrated circuits, printed circuit boards and integrated circuits that are used mainly by the military/aerospace, semiconductor, computer and telecommunications industries. Daisy currently has a worldwide installed base of more than 5,000 systems at more than 1,000 customer sites.

The line of engineering workstations manufactured and sold by Daisy offers a range of price and performance levels. When integrated with the company's applications software, these workstations can provide users with a turnkey solution for the design, analysis, debugging, verification and physical layout of electronic systems and integrated circuits. During 1988, Daisy undertook a significant effort to move away from proprietary systems and transform its product offering into a standard environment at both the hardware and software levels. The result is the Advansys Series, a line of turnkey workstations based on the 32-bit 80386 Intel microprocessor and incorporating the Sun386i workstation. The new products utilize the SunOS/UNIX operating system, X11 graphics windowing, the NFS file system and the Ethernet network with TCP/IP communications protocol, all of which are standard systems. The company sells two other workstation lines: LOGICIAN, a high-end workstation optimized for physical layout applications; and the Personal LOGICIAN, a desktop workstation providing a lower per-unit cost and incorporating the standard AT system architecture used in the IBM PC AT.

Other products offered by Daisy include unbundled software for personal computers, a networked server and application nodes and a variety of special-purpose hardware.

Net revenues from shipments to Western Europe accounted for 43% of revenues in fiscal 1988, and shipments to the Far East provided 15%.



Important Developments

Aug. '89— The company posted a net loss of $43.6 million in the third quarter of 1988-9, primarily reflecting a $32.3 million charge on the sale of HHB Systems, a unit of Cadnetix, reflecting a writeoff of goodwill.

May '89— The company completed the acquisition of Cadnetix Corp., a designer and manufacturer of application-specific workstations, in a two-step tansaction consisting of cash and convertible debentures totaling more than $200 million (see Finances). The company sold HHB Systems for $19 million in cash and drew down $28 million under a bridge financing with Heller Financial Corp. to help pay for the Cadnetix merger. Daisy also has available a $5 million revolving line of credit from Heller. The merged Daisy/Cadnetix unit will be referred to as Dazix.

Next earnings report expected in mid-November.

Sep.		30.90	27.59	25.00
		117.40	100.86	107.15

Net revenues for the nine months ended June 30, 1989, rose 43%, year to year, aided by inclusion of Cadnetix from January 1, 1989. Results were punished by charges of $21,288,000 for amortization of intangibles, $40,500,000 for in-process research and development, $32.3 million on the sale of HHB, and $26,327,000 for other items. A pretax loss of $119,221,000 contrasted with income of $4,875,000. After taxes of $900,000, against $800,000 (16.4%), the net loss was $120,121,000 ($6.87 a share), versus income of $4,075,000 ($0.23).

Dividend Data

Daisy has never paid cash dividends.

1. Incl. Cadnetix beginning Jan. 1. d-Deficit.

Finances

Under terms of a merger agreement, in December 1988 Daisy acquired 10,209,447 common shares (which together with Daisy's previous holdings made up a 50.1% interest) of Cadnetix Corp. for $9.50 a share. Pursuant to the accord, in May 1989 Daisy acquired the remaining Cadnetix shares for $3.78 a share in cash and $5.72 in convertible debentures. The agreement was reached after Daisy launched a hostile tender offer of $8 a share for a controlling interest in Cadnetix in October 1988. At that time, Cadnetix acquired HHB Systems (see Important Developments).

As of June 30, 1988, the company had repurchased 1,053,000 common shares under a program which authorized the buyback of 2,000,000 shares.

Daisy recorded nonrecurring pretax charges of $8.3 million in fiscal 1987, associated with the introduction of new products and organizational changes.

Research and development expenditures were $20,801,000 (18% of revenues) in fiscal 1988, compared with $24,032,000 (24%) the year before.

Nov. 16'89	1989					
34⅛	42⅞-33⅛	9	1.60	4.7%	B+	1.12

Summary

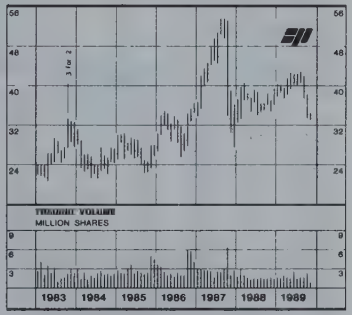
Dana is one of the stronger companies making parts for trucks and to a lesser extent for cars, with a good record in its competitive field. Longer-term potentials are enhanced by the introduction of new products, a growing foreign business, acquisitions, and rising sales to the more stable and profitable aftermarket. In 1989 Dana formed a joint venture to market gaskets to Japanese engine manufacturers in the U.S. Weakness in the U.S. motor vehicle market should result in lower earnings in 1989 and 1990.

Current Outlook

Share earnings for 1990 may decline to about $3.25 from the $3.35 estimated for 1989.

The quarterly dividend should continue at $0.40.

Shipments of vehicle components are likely to decline in 1990, as truck and car assemblies decrease somewhat. Operations will be aided by greater demand for replacement parts and continued expansion of international operations. Core businesses should benefit from an ongoing restructuring program and cost reductions, but the absence of 1989's $0.24 a share of net nonrecurring gains should result in lower earnings.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	1,303	1,234	1,003	962
Jun.	1,318	1,291	1,054	979

Dec.	---	1,237	1,076	866
	---	4,936	4,142	3,695

Sales for the nine months ended September 30, 1989 rose 1.2%, year to year. There was a net gain of $8.0 million ($0.20 a share) from a $15 million payment from Champion Spark Plug related to the termination of a merger agreement and a $5.6 million ($0.14) gain due to a debt restructuring at DCN's Mexican affiliate. Hurt by a declining U.S. motor vehicle market and a charge of $4.0 million ($0.10) to provide for anticipated environmental cleanup costs, net income decreased 6.0%, to $2.73 a share from $2.91.

Common Share Earnings ($)

Dec.	E0.62	1.08	0.54	0.04
	E3.35	3.99	3.21	1.68

Important Developments

Oct. '89— Earnings for the first nine months of 1989 include net gains of $8.0 million ($0.20 a share) from the effect of a $15 million payment received in connection with the termination of a merger agreement and $5.6 million ($0.14) due to a debt restructuring at Dana's Mexican affiliate. These were partially offset by a charge of $4.0 million ($0.10) to cover anticipated environmental costs. The company expected weakness in the North American motor vehicle market to continue in the fourth quarter of 1989 and into the first half of 1990.

Mar. '89— DCN received a 51% interest in a joint venture with Ishino Gasket Manufacturing Co. to manufacture and market engine gaskets to Japanese engine manufacturers in the U.S. There are currently three Japanese engine manufacturers in the U.S. and others may enter the market in the future.

Next earnings report expected in late January.

Business Summary

Dana is a large producer of automotive components and industrial products. Contributions to revenues in 1988 were:

	Revenues	Profits
Vehicular products	76%	84%
Industrial lines	19%	14%
Financial services	5%	2%

Dana's international operations consist of 43 affiliates and subsidiaries in 25 countries that accounted for 24% of revenues and 31% of operating income in 1988

Consolidated sales by market in 1988 were divided 29% light trucks and cars, 24% heavy trucks, 20% automotive distribution, 9% industrial equipment, 9% mobile off-highway, and 9% truck parts distribution.

Principal products include axles, clutches, transmissions, universal joints, driveshafts, power takeoffs, piston rings, pistons, camshafts, cylinder sleeves, valve seats, gaskets, sealing products, filters, speed controls, frames, side rails, chassis parts, suspensions, leaf springs, pumps, motors, control valves, cylinders, fittings, hose products, air controls, hydraulic components and cylinders, brakes, motor controls, joints, step motors, screws, switches, and actuators.

Diamond Financial Holdings (consolidated as of January 1, 1988) provides leasing and finance, savings and loan, and property development financial services through subsidiaries.

Dividend Data

Dividends have been paid since 1936. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

Summary

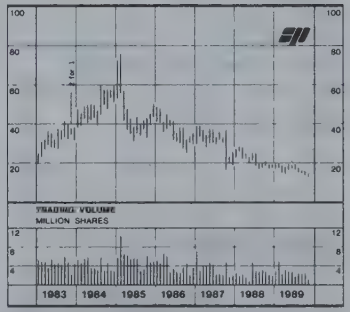
This company produces a line of general purpose computers, ranging from microprocessor-based products through 32-bit superminicomputers. A sizeable loss was posted in fiscal 1989, reflecting increased competition, weak demand for minicomputers, and a fourth quarter restructuring charge of $80 million. Although losses may continue into fiscal 1990, a return to profitability later in the year is possible, based on widening availability of the MV/40000 superminicomputer, strong initial interest in DGN's AViiON open systems product line, and $75 million in cost savings from the restructuring.

Current Outlook

Breakeven results are projected for the fiscal year ending September 30, 1990, versus fiscal 1989's loss of $4.10 per share.

Initiation of dividends is not anticipated.

Flat revenue growth is expected for fiscal 1990, reflecting soft demand for minicomputers. However, revenues could be aided by the widening availability of the new high end MV/40000 computers announced in October, 1988. Recently introduced RISC/UNIX-based products are beginning to pick up some momentum, but should contribute only about $100 million in revenues. Longer term, these open systems products should offset the declining growth in DGN's proprietary computer system line. Gross margins could stay under pressure with increased competition and slowing market growth, but earnings will benefit from estimated cost savings of $75 million from the recent restructuring.



Revenues (Million $)

Quarter:	1988-9	1987-8	1986-7	1985-6
Dec.	309	343	313	294
Mar.	343	350	315	319
Jun.	306	331	314	325
Sep.	357	342	332	330
	1,314	1,365	1,274	1,268

Revenues for the fiscal year ended September 30, 1989 (preliminary) declined 3.7% from those of the preceding year, reflecting a product cycle transition and soft U.S. demand. Gross margins narrowed sharply on the lower volume. Research and development spending rose 3.8% and selling, general and administrative expense increased 4.3%. There were restructuring charges in the fourth quarters of both years totaling $80.0 million and $48.7 million, respectively, and despite a $14.9 million gain on the sale of facilities, versus a gain of $5.9 million, the pretax loss expanded to $113.9 million from $6.7 million. After taxes, the net loss was $119.7 million, versus $15.5 million.

Important Developments

Oct. '89— DGN announced a consolidation in which it will transfer work from one plant to a larger facility and sell two other plants. The consolidation is expected to eliminate over $95 million in annualized costs; $75 million should be realized in fiscal 1990 and the full amount realized in following years. The restructuring will be completed within 12 months and eliminate about 2,200 positions.

Next earnings report expected in late January.

Business Summary

Data General sells general purpose computers, peripheral equipment, software, and communications systems. Equipment sales accounted for 67% of revenues in fiscal 1988 and service for 33%. Foreign operations contributed 46% of revenues and $1.5 million of operating profits.

The base of DGN's product line is the 32-bit ECLIPSE MV supermincomputer family. The systems range from the low-end MV/1400 to the high-end four-processor MV/40000 Model 4, announced in October, 1988. DGN also sells 16-bit ECLIPSE computer systems. The computers run DGN's proprietary operating system AOS/VS.

The DESKTOP GENERATION systems are packaged systems that include a microECLIPSE-based central processor. The DATA GENERAL/One is a full function laptop computer that runs the MS-DOS operating system and can act as a standalone system or a terminal connected to a host system. The DASHER family consists of intelligent desktop workstations compatible with the ECLIPSE MV family and MS-DOS. The DS/7000 systems are 32-bit workstations based on the ECLIPSE MV architecture sold to engineering, scientific and technical users.

DGN also continues to sell its older 16-bit NOVA and microNOVA computers.

In early 1989, Data General launched a line of workstations and minicomputers, named AViiON, that is based on Motorola's 88000 RISC microprocessor and DGN's version of the UNIX operating system.

Dividend Data

No cash dividends have ever been paid. A "poison pill" stock purchase right was adopted in 1986.

Finances

Restructuring charges in the fourth quarter of fiscal 1988 totaled $48.7 million. Included were estimated expenses of $30.8 million related to consolidation of manufacturing, field engineering and administrative facilities and costs associated with workforce reductions, and a $17.9 million write-down of assets.

Datapoint Corp.

NYSE Symbol DPT In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Dec. 27'89	1989					
3⅜	6¼-3¼	NM	None	None	C	1.15

Summary

Datapoint is a maker of network-based computer and communications products. DPT is evaluating alternatives to maximize shareholder value, including the possible sale of the company. Chairman Asher B. Edelman holds some 40% of DPT common shares. Despite ongoing restructuring activities, losses are expected to continue in fiscal 1990. The company recently omitted the dividend on its preferred stock.

Current Outlook

Losses are expected to continue in fiscal 1990, following fiscal 1989's deficit of $3.88 per share.

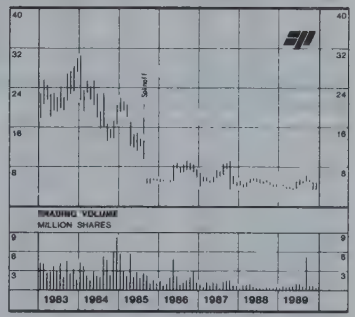
Initiation of common dividends is not anticipated.

Revenues should continue to be under pressure in fiscal 1990 as the industry environment remains fiercely competitive. The outlook for domestic demand for computers remains extremely cloudy in general, and for minicomputers in particular, due to uncertain economic conditions and confusion surrounding industry standards. Gross margins are likely to remain under severe pressure in a competitive pricing environment. Although ongoing restructuring activities should reduce costs, margins could continue to erode if DPT is unable to stabilize its revenue base.

Revenues (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Oct.	60.2	73.5	70.2	71.4
Jan.		84.6	84.2	74.3
Apr.		75.5	88.4	78.7
Jul.		79.0	88.1	87.6
		312.5	330.8	312.1

Revenues for the three months ended October 28, 1989 declined 18%, year to year, reflecting competitive pressures associated with the general slowdown in the computer industry and customer uncertainty surrounding the outcome of the shareholder consent solicitation. Results were further penalized by $2.2 million of charges associated with streamlining the U.S. sales organization and a $5.7 million loss in DPT's investment portfolio. There was a pretax loss of $16.8 million, in contrast to income of $3.5 million. After taxes of $693,000, versus $2.3 million, the net loss was $17.5 million, versus net income of $1.2 million. After preferred dividend requirements, the per-share loss was $1.97, versus a loss of $0.12, before special credits of $0.44, versus $0.16.



Common Share Earnings ($)

Quarter:	1989-90	1988-9	1987-8	1986-7
Oct.	d1.97	d0.12	d0.21	d0.27
Jan.		d0.44	d0.18	d5.04
Apr.		d2.18	d0.08	0.19
Jul.		d1.14	d0.08	0.50
		d3.88	d0.55	d5.03

Important Developments

Dec. '89— DPT retained Kidder, Peabody & Co. to evaluate alternatives to maximize shareholder value, including the possible sale of the company. Separately, in November Martin Ackerman terminated a consent solicitation to replace Asher Edelman and the DPT directors. Mr. Ackerman received consents representing about 31% of the outstanding DPT shares, short of a majority. In September Mr. Edelman had purchased 30% of the company's stock, thereby boosting his stake in DPT to 40%.

Next earnings report expected late February.

Business Summary

Datapoint Corp. is principally engaged in the development, manufacture, and marketing of computer and communication products (both hardware and software) for integrated network systems worldwide. Foreign operations accounted for 81% of revenues in fiscal 1989.

The company provides a full spectrum of network-based solutions that both support and incorporate industry standards: local and wide area networking, UNIX networking, video networking, image distribution, telephony, relational database management, distributed data processing, multi-vendor connectivity, and large-scale network data systems.

In fiscal 1988 Datapoint introduced high-performance multi-processors with high throughput as its network servers. During fiscal 1989, market trends indicated that traditional data processing and personal computer (PC) networking marketplaces were merging, in that data processing platforms were becoming servers for networks of PC workstations. To support this new market opportunity, Datapoint adopted MS-DOS-capable computers as its intelligent workstation offering and introduced a line of diskless workstations to meet customer requirements.

In September, 1989 the company announced ARCNETplus, the second generation of the Datapoint ARCNET (Attached Resource Computer) local area network. ARCNETplus is a multiple-bit-rate local area network technology, which means that it will operate simultaneously with ARCNET on existing networks.

Dividend Data

Dividends have never been paid on the common stock. On December 8, 1989 DPT omitted the dividend on its $4.94 exchangeable preferred stock.

Finances

In September, 1988 a $6 a share ($60 million) leveraged buyout proposal was withdrawn after being rejected by management as inadequate. The offer was submitted by a group led by DPT chairman Asher B. Edelman.

Capitalization

Long Term Debt: $81,213,000, incl. $78.7 million of 8¼% sub. debs. due 2006, conv. into com. at $18.11 a sh.

Summary

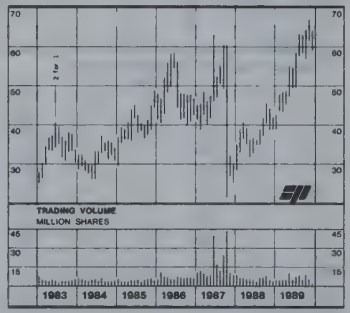
Dayton Hudson is a diversified retailer, deriving about three-quarters of operating income from its Mervyn's and Target discount chains. Strong improvement in the Mervyn's division coupled with a common stock buyback program boosted fiscal 1988-9 share earnings. More modest growth in consumer spending will slow the earnings advance in fiscal 1990-1.

Current Outlook

Share earnings for the fiscal year ending January 31, 1991 are projected at $5.80, up from the $5.05 estimated for fiscal 1989-90.

An increase in the $0.28 quarterly dividend is anticipated.

Revenues in fiscal 1990-1 should reflect modest improvement in same store sales and store expansion. Gross margins could improve modestly, aided by better merchandising and fewer markdowns, reflecting a lean inventory position. Expense ratios should remain level.



Revenues (Billion $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Apr.	2.83	2.54	2.15	1.89
Jul	3.10	2.69	2.31	2.04
Oct.	3.24	2.87	2.54	2.22
Jan.	---	4.10	3.68	3.12
	---	12.20	10.68	9.26

Revenues for the nine months ended October 28, 1989 advanced 13%, year to year, reflecting increased sales in the three major divisions. Improved gross margins offset higher expense ratios, and pretax income increased 51%. After taxes at 39.4%, versus 40.0%, net income rose 52%, to $2.06 a share (on 8.5% fewer shares) from $1.24.

Jan.	E2.99	2.31	1.54	1.24
	E5.05	3.45	2.41	2.62

Important Developments

Nov. '89— Operating profit for the first nine months of fiscal 1989-90 increased 31%. Results at Mervyn's reflected strong sales, improved gross margin and expense controls. Sales improved at Target, and Dayton Hudson Department Store Co. continued to show a solid profit increase. Capital expenditures for fiscal 1990-1 are projected at about $700 million, about level with 1989-90. During the third quarter, DH completed the sale of its Lechmere subsidiary. The company repurchased 7 million shares in anticipation of establishing an Employee Stock Ownership Program (ESOP). The repurchase of common shares will offset the earnings dilution that would occur when the company establishes an ESOP and issues convertible preferred shares.

Next earnings report expected in mid-February.

Business Summary

This diversified retailer operated 618 stores in 37 states at January 28, 1989. Segment contributions in fiscal 1988-9:

	Revs.	Profits
Target	52%	44%
Mervyn's	28%	33%
Department stores	14%	20%
Specialty merchandisers	6%	3%

Target operates 341 low-margin department stores in 27 states offering convenience-oriented hardlines and mid-range fashion softlines. Twenty-four stores were added in fiscal 1988-9, bringing total retail sq. ft. to 34.2 million.

Mervyn's, a softlines retail chain of 213 stores in 14 states, features popular-priced national and private label merchandise. Fourteen stores were added in 1988-9, bringing total retail sq. ft. to 16.8 million.

Department store operations were repositioned in 1984-5 with the consolidation of the Dayton and Hudson regional chains and the subsequent sale of the Diamond and John A. Brown divisions (18 stores). At fiscal 1988-9 year-end DH operated 37 department stores, occupying 7.7 million sq. ft.

In the third quarter of fiscal 1989-90 the company sold its 27 Lechmere hardlines outlets, mostly in New England. The company discontinued its Branden's specialty home furnishings stores in fiscal 1988-9.

Dividend Data

Dividends have been paid since 1965. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

Dean Foods

NYSE Symbol DF

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 13'89	1989					
32½	37⅞-29⅜	14	0.66	2.0%	A+	0.96

Summary

This company is a major producer of dairy goods, and also processes canned and frozen vegetables and other food items. Acquisitions have aided growth in recent years, and earnings for fiscal 1988-9 benefited from a $0.21 a share gain on the sale of Baskin-Robbins franchises. Volatile raw milk costs are likely to limit earnings gains in fiscal 1989-90.

Current Outlook

Earnings for the fiscal year ending May 31, 1990 are estimated at $2.30 a share, versus 1988-9's $2.28, which included a $0.21 gain on sale of assets.

Dividends were raised 10%, to $0.16½ quarterly from $0.15, with the September, 1989 payment.

Sales in fiscal 1989-90 may continue modestly higher, assuming unit volume for dairy products remains in an uptrend. Pricing may remain difficult and, with raw milk costs volatile, productivity improvement will be important to profit growth. Cost cutting will also be needed to offset higher costs in the frozen and canned vegetables segment. Sale of the Baskin-Robbins franchises bodes well for the future.

Net Sales (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Aug.	427	381	360	359
Nov.	---	434	395	334
Feb.	---	431	396	368
May	---	438	401	374
	---	1,684	1,552	1,435

Sales for the three months ended August 27, 1989 rose 12%, year to year, due largely to higher dairy unit volume and improved margins for specialty foods. Profits were limited by higher raw milk costs and competitive industry conditions, but with selling and administrative costs well contained, net income from continuing operations rose 6.5%.

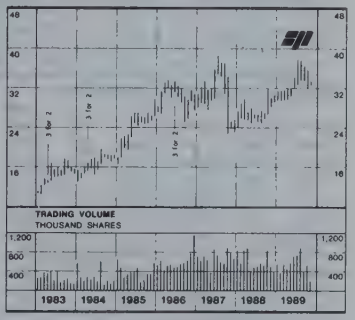
May	E0.72	0.84	0.31	0.51
	E2.30	2.28	1.60	1.54



Important Developments

Oct. '89— The company completed the acquisition of Cates & Sons, Inc., a closely held processor of pickles in North Carolina, for 865,000 DF common shares. DF also acquired the pickle operations of Western Foods Products, Inc. The two acquisitions would add $100 million to annual sales of the company's specialty foods segment, which was expected to have total sales of more than $600 million for fiscal 1989-90, compared with some $470 million in 1988-9.

Jun. '89— DF sold its 420-unit Baskin-Robbins franchises in 11 states back to Baskin-Robbins USA Co. A $0.21 a share nonrecurring gain on the sale was recorded in fiscal 1988-9. DF would continue to make ice cream products for Baskin-Robbins.

Next earnings report expected in late December.

Business Summary

Dean Foods produces and distributes dairy and specialty food products. Contributions to sales and profits (in million $) by business segment for the year ended May 29, 1989:

	Sales	Profits
Dairy products	67%	$68.5
Specialty foods	28%	52.6
Other corporate	5%	-19.7

Fluid milk products account for the major portion of sales in the Dairy group, and represent about 56% of total sales. Products include homogenized, lowfat and skimmed milk, cottage cheese, yogurt, half and half, buttermilk, chocolate milk, and sour cream. Ice cream products represent 8% of sales, and natural cheeses (mainly cheddar and muenster) account for 3%. The primary marketing area is the Midwest, Midsouth, Southwest, Florida and Virgin Islands. The Baskin Robbins franchise (420 ice cream stores in 12 Midwest and Rocky Mountain states) was sold in mid 1989, but the company will continue to supply product to the franchise.

Specialty foods include canned and frozen vegetables (15% of sales), pickles, relishes and salad dressings (6%), which are sold in the Midwest, South and Southwest. Other categories include salads, dips, and sauces (3%), and powdered products (4%), mainly non-dairy coffee creamers.

DF is also engaged in various transportation and transportation-related activities.

Dividend Data

Dividends have been paid since 1941. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1988.

Summary

This South African company is the foremost diamond enterprise in the world. In addition to its extensive mining operations in South Africa, Namibia and Botswana, the company controls the world's principal diamond marketing organization (the CSO) and holds important investment interests in gold mining, industrial and financial firms. A weakening of the U.S. dollar and strong diamond sales enabled the CSO to institute increases in wholesale diamond prices in March 1989, May 1988 and October 1987, following a two-step price increase in 1986. Sales declined for 1989, reflecting lower demand for large stones and a more normal pace of sales. NOTE—These securities carry an unusually high degree of risk because of the unstable political situation in South Africa.

Business Summary

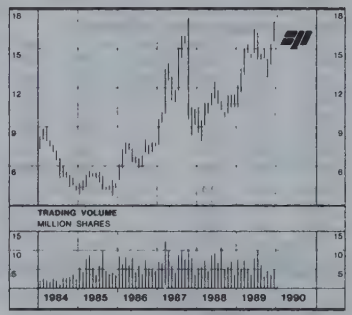
De Beers Consolidated Mines Limited is the world's leading diamond enterprise, controlling the market for over 80% of world diamond output through its Central Selling Organisation (CSO). The company's own diamond production is from wholly owned mines in South Africa and Namibia, a 75%-owned subsidiary in Lesotho, and a joint venture with the Government of Botswana. In addition to gem stones, the company mines industrial diamonds and manufactures synthetic diamonds. Its large investment portfolio includes holdings of a number of South African gold mining and gold mining finance companies, as well as other domestic and foreign mining, industrial and financial organizations.

The after tax profit of the De Beers Group, by country, was derived as follows in recent years:

	1988	1987
South Africa	18%	26%
Namibia	5%	5%
Elsewhere (incl. Botswana)	77%	69%

During 1988, the De Beers Group treated 55,486,000 metric tons of ore (51,554,000 in 1987), yielding 24,245,703 carats (1 carat = 200 mg), up 6.1% from 22,842,586 carats recovered a year earlier. Of the total recovered, some 63% was from the Debswana division (the joint venture between the company and the Government of Botswana), while the Finsch mine contributed 16%, Premier mine 9%, and the CDM, Kimberley and Namaqualand mines contributed 4% each.

At 1988 year-end, De Beers' investments and loans outside the diamond industry amounted to R10.44 billion, up from R8.55 billion a year earlier. Its principal investment was a 38% holding in Anglo American Corp., which is one of the world's largest mining groups, and which has a 34% voting interest in De Beers.



Important Developments

Jan. '90— The company reported that sales of rough diamonds fell 2% in 1989 to $4.09 million from $4.17 million in the prior year. The decline reflected more normal and stable conditions in the market compared with exceptional growth in the prior year, as well as less demand for larger stones. Additionally, second-half sales were down 24% from the first half of 1989 and 10% year to year. Separately, press reports stated that diamond producers in Angola, Botswana and Australia were considering taking steps that may make them less dependent on De Beers for diamond sales.

Review of Operations

Revenues for 1988 advanced 82%, compared to those of 1987, reflecting higher diamond sales, as demand for diamonds and diamond prices both increased; higher prices were partly the result of a weakening in the value of the U.S. dollar against the rand. Margins widened due to slower growth in expenses. After taxes of R573 million, versus R374 million, net income expanded 115% to R3,251 million (R7.80 a share), from R1,510 million (R4.10).

Dividend Data

Since 1941, dividends have been paid in every year. There are no restrictions. Payments are net of South African withholding tax.

Amt. of Divd. $	Date Decl.	Ex-divd. Date	Stock of Record	Payment Date
0.494	---	Mar. 27	Mar. 31	May 24'89
0.195	---	Sep. 25	Sep. 29	Nov. 24'89

Finances

In October 1989, striking miners at all five De Beers' diamond mines suspended their two-week-old walkout, pending the resumption of negotiations to resolve a wage dispute. The National Union of Mineworkers was asking for a 37.6% increase in the minimum wage to $282 a month.

Effective May 3, 1988, the CSO instituted a 13.5% average price hike on rough uncut diamonds. The CSO's ability to increase prices reflected strong world-wide diamond demand, despite the October 1987 stock market crash, and the weak U.S. dollar, which lowered the cost of the stones in markets other than the U.S. (as diamonds are priced in dollars). The rise followed a 10% average price increase in October 1987 and a two-step 14.5% average increase in 1986.

In July 1987, the company reached an agreement to acquire a stockpile of diamonds from the State of Botswana. In return, De Beers issued 20 million shares of its new S ordinary stock to De Beers Botswana Mining Corp. (Debswana), the joint venture between De Beers and the Government of Botswana, and granted Debswana representation on the company's board of directors. The S ordinary shares are equivalent to deferred shares except for the right to receive an additional R0.01 in the event the company is dissolved.

Summary

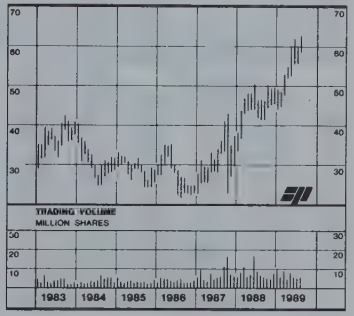
This company is the world's largest producer of farm equipment, and an important manufacturer of construction machinery and lawn and garden equipment. Depressed farm industry conditions and a lengthy strike led to losses in fiscal 1986 and 1987. Benefiting from increased sales, higher operating rates, and greater equity earnings of subsidiaries, DE returned to profitability in fiscal 1988. Earnings for the first nine months of fiscal 1989 benefited principally from gains in the farm unit. In June, 1989 the dividend was raised 17%.

Current Outlook

Earnings for the fiscal year ending October 31, 1990 are projected at $5.60 a share, versus the $5.20 estimated for fiscal 1989.

The dividend was raised 17%, to $0.35 quarterly from $0.30, with the August, 1989 payment.

Sales for fiscal 1990 are expected to rise at a less rapid rate than during fiscal 1989, primarily reflecting a forecasted decline in volume and prices in the construction unit. Profits in the farm unit should continue to rise on firm pricing and continued gains in volume. Profits will also be aided by some improvement in lawn and garden sales. Profits in the construction unit will decline. Assuming lower interest costs and a higher contribution from subsidiaries, earnings should post a small rise in fiscal 1990.



Net Sales (Million $)

Quarter:	1988-9	1987-8	1986-7	1985-6
Jan.	1,142	1,045	478	701
Apr.	1,670	1,450	1,143	1,024

Oct.	E1.51	1.09	0.48	d2.06
	E5.20	4.06	d1.46	d3.38

Important Developments

Aug.'89— DE reported earnings of $1.30 a share on a 21% rise in sales for fiscal 1989's third quarter, versus earnings of $1.14 in fiscal 1988's third quarter. DE attributed the third quarter and year-to-date improvement in earnings to higher worldwide sales, greater production volume, and improved price realization. DE noted that inflationary cost increases, higher production costs and new product start-up expenses had partially offset the benefits of higher volumes. DE said that the overall sales mix was less favorable than in fiscal 1988. Worldwide production tonnage for all products in fiscal 1989 was currently scheduled to be about 12% higher than fiscal 1988 output. Production in fiscal 1989's fourth quarter was expected to be up about 10%, year to year.

Next earnings report expected in early December.

Business Summary

Deere & Co. is the largest factor in the domestic farm equipment industry, and produces a broad range of earthmoving and forestry machinery. Industry segment contributions in fiscal 1988:

	Sales	Profits
Farm equipment	78%	75%
Industrial equipment	22%	25%

Sales outside the U.S. and Canada accounted for 24% of total sales and 15% of operating income in fiscal 1988.

The farm equipment unit produces a full range of agricultural equipment for the farming industry, including tractors; tillage, soil preparation, planting and harvesting machinery; and crop handling equipment. The farm unit also distributes lawn and garden equipment including smaller tractors for lawn, garden and utility purposes.

The industrial equipment unit produces a broad range of machines used in earthmoving and forestry, including wheel and crawler tractors and attachments; crawler dozers and loaders; four-wheel-drive loaders; elevating scrapers; motor graders; excavators; log skidders; and tree harvesting equipment.

John Deere Capital Corp. (nonconsolidated) finances a large portion of retail sales and, through its leasing subsidiary, a significant portion of the retail leases of John Deere agricultural and industrial equipment in the U. S. Insurance subsidiaries (nonconsolidated) provide insurance coverage for employees and participating dealers. The combined net income of the retail finance and leasing subsidiaries and insurance unit accounted for 37% of Deere's net income in fiscal 1988.

Dividend Data

NYSE Symbol DEW

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 30'89	1989					
20½	20½-17	12	1.50	7.3%	A-	0.36

Summary

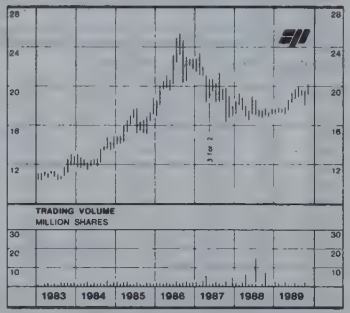
This medium-sized electric-gas utility serves the Delmarva Peninsula, with the major portion of revenues derived from Delaware and lesser amounts from Maryland and Virginia. Since capacity margins bottomed around 3% in mid-1988, DEW has pursued a three-pronged strategy to meet increasing demand for electricity in its service territory. It is building new capacity, buying power, and working to conserve energy use.

Current Outlook

Earnings for 1990 are projected at about $1.75 a share, up slightly from the $1.70 expected for 1989.

Dividends at $0.37½ quarterly are the minimum expectation.

Slightly higher earnings for 1990 are expected to result from growth in kwh sales associated with robust economic conditions in DEW's service territory and the absence of replacement power costs; Peach Bottom Units 2 and 3 began operating at full power late in 1989. A higher construction budget should lead to an increase in operating and maintenance and financing expenses. External financing will be necesssary to support DEW's construction program. A rate case filing should be made before mid-year.



Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	209.4	201.0	185.9	208.7
Jun.	177.9	173.0	160.9	171.3
Sep.	216.2	217.5	200.5	201.1
Dec.	---	176.8	165.1	133.7
	---	768.3	712.5	714.9

Operating revenues for the nine months ended September 30, 1989 rose 2.0%, year to year. Hurt by higher operating expenses, increased interest costs and lower subsidiary earnings, net income declined 0.7%. Earnings per share were $1.49 on 1.7% more shares, versus $1.52.

	E1.70	1.70	1.60	1.94

Important Developments

Nov. '89— The company said that assuming continued modest sales growth and cost control, it expected that the difference in earnings per share for the first nine months of 1989 over the comparable 1988 period would be made up in the fourth quarter.

Oct. '89— DEW said that the Nuclear Regulatory Commission (NRC) issued an order which allows Units 2 and 3 at the previously shut down Peach Bottom Atomic Power Station to operate at full power under normal NRC regulations and review. Delmarva has a 7.51% interest in Peach Bottom. The company also has a 7.41% interest in the Salem Nuclear Power Station, which has received low marks from the NRC for its operating performance.

Next earnings report expected in early February.

Business Summary

Delmarva Power & Light provides electric service to the Delmarva Peninsula, which includes all of Delaware and parts of Maryland and Virginia. Gas service is provided in northern Delaware. Some 87% of operating revenues in 1988 was derived from electric sales. Contributions to electric business by class of customer:

	1988	1987	1986	1985
Residential	37%	38%	36%	35%
Commercial	29%	29%	28%	28%
Industrial	19%	19%	21%	22%
Other	15%	14%	15%	15%

The fuel mix in 1988 was 63% coal, 28% oil and natural gas, and 9% nuclear. DEW has a 7.51% interest in the Peach Bottom Nuclear Station and a 7.41% interest in the Salem Nuclear Power Station. Peak load in 1988 was 2,204 mw and system capability was 2,277 mw, for a capacity margin of 3.2%. Electricity sales in 1988 were 10.2 mwh, up 6.9% from 1987.

Total gas sales in 1988 were 16,156 MMcf, up 4.8% from 15,411 MMcf in 1987.

DEW has estimated its capital requirements for 1989-91 at $570 million, including $526 million for construction (excluding AFUDC). The company expected additional base load capacity will be needed early in the 1990s.

Nonutility subsidiaries contributed $0.10 a share to 1988 earnings; DEW expects subsidiary earnings to fluctuate but tend to grow over the next few years.

Dividend Data

Dividends have been paid since 1921. A dividend reinvestment plan is available.

Delta Air Lines

NYSE Symbol DAL Options on CBOE (Jan-Apr-Jul-Oct) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Jan. 4'90	1989-90					
69⅞	85¾-48¾	7	[1]1.20	[1]1.7%	B	1.08

Summary

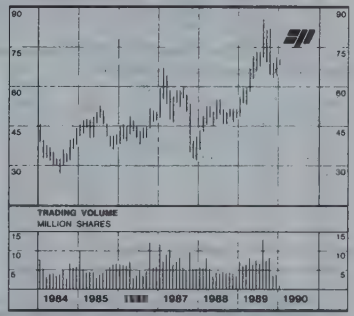
Delta, historically one of the most profitable carriers in the airline industry, has significantly expanded its route system in recent years, particularly through the 1986 acquisition of Western Air Lines. DAL is continuing to develop domestic hubs and is accelerating expansion in international markets. Long-term earnings prospects are favorable although fiscal 1990 profits will be off, reflecting competitive fare cuts and higher fuel costs.

Current Outlook

Earnings for the fiscal year ending June 30, 1990 are estimated at $7.50 a share, compared with the $9.37 of fiscal 1989.

Some increase in the $0.30 quarterly dividend is possible. A $0.50 special dividend was paid October 1, 1989.

Revenues for fiscal 1990 are likely to increase about 8%-9%. Strong traffic gains experienced in the first half of the fiscal year are likely to moderate, reflecting softening of the economy and comparisons with expanded receipts during the early Eastern strike period in 1989. Average fare yield probably will be flat in the second fiscal half as the result of competitive fare changes. Operating margins will be affected by rising costs, particularly sharp increases in fuel prices.



Operating Revenues (Million $)

Next earnings report expected in late January.

Important Developments

Nov. '89— Delta ordered 50 and took options on 110 (60 of which were conversions of MD-88 options) new MD-90 aircraft and ordered 50 and took options on 50 737-700s. It now has orders and options on 519 aircraft.

Sep. '89— Delta reached a preliminary agreement to form a joint venture to combine operations of its DATAS II computer reservations system with the Pars system owned by TWA and Northwest Airlines.

Jul. '89— Delta created an Employee Stock Ownership Plan, which received 6.9 million shares of a new convertible preferred stock equal to a 14% interest in the company. DAL plans to buy back about 9.5 million comon shares. It also sold 2.5 million shares (5%) to Swissair.

Business Summary

Delta Air Lines operates a route system covering most of the U.S. and extending to 11 foreign countries. As of June 30, 1989 it served 141 domestic cities in 44 states, the District of Columbia and Puerto Rico, and 24 international cities. In December, 1986 it acquired Western Air Lines, which operated primarily in western states. Western added 34 domestic cities, three Canadian cities and seven Mexican cities to the system.

The airline's major hubs are in Atlanta, Dallas/Ft. Worth, Salt Lake City and Cincinnati. Smaller hubs are operated in Boston, Los Angeles and Orlando. About 85% of flights are involved in hub and spoke operations. Foreign countries served are Canada, Mexico, Bahamas, Bermuda, England, West Germany, France, Ireland, Japan, Korea and Taiwan (Thailand was added in December 1989). During fiscal 1989 Delta carried 64.2 million passengers.

The aircraft fleet as of September 30, 1989 consisted of 40 L-1011s, 30 B-767s, 52 B-757s, 130 B-727-200s, 13 B-737-300s, 61 B-737-200s, 46 MD-88s and 36 DC-9-32s. On order were 17 757s, 16 767s, 32 MD-88s and nine MD-11s. On option were 132 MD-88s, 21 767s, 61 757s and 31 MD-11s. Delta operates the DATAS computer reservations system.

Summary

This company is the largest firm engaged principally in the printing of magnetic ink imprinted bank checks. It also produces deposit tickets for personal and business accounts; makes computer forms and related products; provides software and services to financial institutions; and is a direct marketer of selected consumer products. Earnings should resume a long-term uptrend in 1989, after a 35-year record of steadily rising profits was interrupted in 1988 by costs of investments in new technology.

Current Outlook

Earnings for 1990 should reach $2.20 a share, up 19% from the $1.85 estimated for 1989. A stronger advance is likely in 1991.

The quarterly dividend was raised 13%, to $0.26 from $0.23, with the August, 1989 declaration.

Sales for 1990 should reflect a moderate gain in check sales, double-digit growth in other businesses, and price increases. Operating margins should improve, reflecting relative stability in personnel and paper costs, the higher revenues, the implementation of new check printing technology, and reduced costs of investments in new technology.

Dec.	---	333	246	224
	---	1,196	948	867

Sales for the 1989 first half rose 12%, year to year. Higher costs and expenses impacted profitability, and in the absence of a prior-year $0.04 a share nonrecurring gain, the rise in pretax income was held to 8.0%. After taxes at 38.7%, versus 34.9%, net income rose 1.7%. Share net was $0.76, compared with $0.75.

Important Developments

Apr. '89— DLX implemented price increases averaging 5.25% on most of its checks and related products due to increases in manufacturing costs.

Jan. '89— DLX said that it was positioning itself to become a major participant in the emerging and potentially large point-of-sale (POS) market. Data Systems (DS) completed its first major POS installation at a 12-store supermarket chain in St. Louis in 1988, and was using that "showcase" installation to market its POS capabilities to potential customers. Data Systems was also pursuing international opportunities with the signing in 1989 of distributor contracts in France and the U.K. DS and IBM were selected to provide software for Canada's national POS system, which will link all Canadian financial institutions. IBM also began marketing DS software throughout the Pacific Rim.

Next earnings report expected in late October.

Business Summary

Deluxe Corp. (formerly Deluxe Check Printers) prints and sells checks and related forms to financial institutions and their customers. Operations have been expanded in recent years to include electronic funds transfer (EFT) processing, new account verification services, computer and business forms, office products, and direct marketing of selected consumer products.

The payment systems division (76% of 1988 sales and 93% of pretax income) prints checks, deposit tickets, and related transaction forms. DLX accounts for 54% of the U.S. check printing market. Data Systems is the nation's third largest third-party processor of automated teller machine (ATM) transactions and is the leading processor of interchange transactions for shared ATM networks. Chex Systems, Inc. provides new account verification services to financial institutions. Sales Development Systems provides training and marketing services to the financial industry.

The business systems division (10% of sales and 3% of income) is a major supplier of short-run computer and business forms (including checks and related supplies), and record keeping systems to small businesses and professional practices.

The consumer specialty products division (14% of sales and 4% of income) was formed with the December, 1987 acquistion of Looart Press, Inc. and its operating unit, Current, Inc. Current is the nation's largest direct mail marketer of greeting cards, stationery, and related consumer specialty products.

Dividend Data

Dividends have been paid since 1921. A "poison pill" stock purchase right was adopted in 1988.

Amt. of Divd. $	Date Decl.	Ex-divd. Date	Stock of Record	Payment Date
0.23	Nov. 4	Nov. 15	Nov. 21	Dec. 5'88
0.23	Feb. 10	Feb. 14	Feb. 21	Mar. 6'89
0.23	May 9	May 16	May 22	Jun. 5'89
0.26	Aug. 4	Aug. 15	Aug. 21	Sep. 5'89

Next dividend meeting: early Nov. '89.

Finances

In August, 1989 the company said that capital expenditures for 1989 would be between $80 and $90 million, but spending will be down to $50-$60 million in 1990. Current spending is largely for the installation of new printing technology and prgrams to support the rapid growth of the Business Systems Division.

Summary

This company is an important manufacturer of stationery products and systems for office, school and home use, of merchandise identification and control systems for the retailing industry, and of equipment and supplies for the packaging industry. Citing softness in markets for stationery and other key businesses, management lowered its 1989 third quarter earnings estimate to between $0.40 and $0.50 a share from $0.55, and said that it expected net income of $2.30 to $2.40 a share for the full year.

Business Summary

This diversified company is a manufacturer of stationery products, systems and packaging serving industrial, commercial and consumer markets worldwide. Segment contributions in 1988:

	Sales	Profits
Stationery products	51%	61%
Systems	27%	19%
Packaging	22%	20%

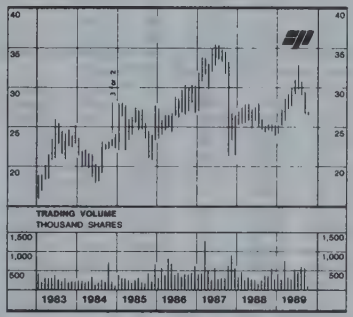
Foreign operations accounted for 26% of sales in 1988 and 28% of operating profits.

Stationery products include a wide range of record-keeping items, document protection and storage products, identification supplies, writing and marking instruments, ink and adhesive products and educational and decorating aids. Computer related products include flexible disks, inked ribbons, tape cleaners and testers, and filing, storage and work-station furniture products.

The Systems division operates in two markets: printing equipment, accessories, and supplies for product identification and control; and fastener equipment and supplies for various retail and industrial applications.

The Packaging segment provides high quality labels and labeling equipment for the packaging industry; and produces metallized papers for labels and packages and industrially treated papers used for insulation in electrical transformers.

Delphax Systems, a 50%-owned joint venture with Xerox Corp., produces medium and high speed non-impact printers, based on a process developed by Dennison. At the close of 1987 Delphax announced a three-year contract with Unisys Corp. to manufacture printers for data processing applications.



Important Developments

Sep. '89— Management reduced its third quarter earnings estimate to between $0.40 and $0.50 a share from $0.55, and said that it expected net income for the full year 1989 of $2.30 to $2.40 a share, slightly below 1988's $2.41. DSN said that it was experiencing softness in its stationery markets as well as in other key businesses, causing lower than expected margins in the third quarter. Also, costs related to consolidation and quality control measures, and new equipment start-ups have adversely affected profits. Separately, DSN noted that its market share in the new office products distribution channels continued to show strong growth.

Next earnings report expected in mid-October.

NYSE Symbol DTE Options on Phila (Jan-Apr-Jul-Oct) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 1'89	1989					
24³/₈	24³/₈-17¹/₈	NM	1.68	6.9%	A-	0.38

Summary

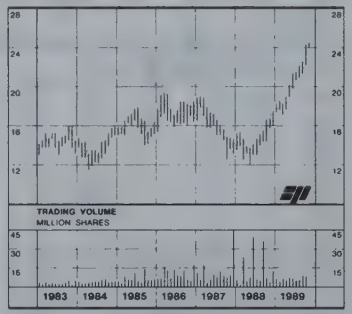
This Michigan-based utility owns the Fermi 2 nuclear plant, which it placed in commercial operation in January, 1988. In December, 1988 the Michigan Public Service Commission finalized the plant's rate structure and disallowance. DTE's near-term prospects will benefit from resolution of major regulatory issues, higher rates, some sales growth, and continuing cost controls. The longer-term outlook is enhanced by the completed construction program and substantially improved cash flow.

Current Outlook

Share earnings for 1990 are projected at $2.75, up from $2.65 estimated for 1989.

The $0.42 quarterly dividend is likely to be increased by mid-1990.

Share earnings for 1990 will benefit from higher rates, some sales growth, and continuing cost controls. Longer-term prospects are enhanced by the completed construction program.



Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	790	752	708	749
Jun.	758	722	688	691
Sep.	862	868	787	738
Dec	---	761	673	691
	---	3,102	2,857	2,869

Based on a brief report, revenues for the nine months ended September 30, 1989 rose 2.9%, year to year, as higher rates offset an 0.8% decrease in kwh sales. In the absence of a $79.9 million ($0.55 a share) charge for removal of the Greenwood oil plant from rate base, net income advanced 49%, $338.4 million from $227.1 million. Following preferred dividends, share earnings were $2.11, compared with $1.28, excluding a net special charge of $0.98 in the 1988 period.

Common Share Earnings ($)

Dec.	E0.53	d3.22	0.60	0.60
	E2.65	d1.95	3.25	2.58

Important Developments

Oct. '89— DTE reported that for the first nine months of 1989 total kwh sales were down 0.8% from the same period a year earlier, with residential sales down 2.6%, industrial sales down 0.6%, and commercial sales up 3.0%. The company noted that the decrease in residential sales for the period was due to cooler summer weather, partially offset by customer growth. The decrease in industrial sales was due to lower sales to steel and automotive customers, partially offset by higher sales to other industrial customers. The increase in commercial sales was due to customer growth, reflecting continued economic expansion in southeastern Michigan's business sector. Separately, DTE stated that a scheduled outage at its Fermi 2 nuclear plant began September 8 for refueling and preventive and scheduled maintenance.

Next earnings report expected in late January.

Business Summary

Detroit Edison supplies electricity and to a lesser extent steam in southeastern Michigan. Electric revenues in recent years:

Revenues	1988	1987	1986	1985
Residential	32%	32%	31%	30%
Commercial	25%	25%	24%	23%
Industrial	37%	37%	37%	37%
Other	6%	6%	8%	10%

Sources of generation in 1988 were coal 76%, nuclear 10%, and hydro and oil 14%. Peak demand in 1988 was 9,133 mw and capability totaled 9,870 mw for a capacity margin of 7%.

DTE's 89%-owned Fermi 2 nuclear plant entered commercial operation in January, 1988. In 1988's first quarter, DTE wrote-off disallowed Fermi 2 costs of $2.35 a share. Also, in 1988's first quarter DTE removed from rate base its Greenwood oil plant, which resulted in a net charge of $0.49 a share. Following the December, 1988 rate settlement, DTE recorded in 1988's fourth quarter an additional $3.81 per share charge, mostly for disallowed Fermi 2 costs, but also for additional costs related to the Greenwood plant. DTE will be purchasing the 11% Fermi 2 interest owned by Wolverine Power Supply Cooperative in 1990, for about $550.0 million. Rate recovery for the Wolverine ownership is included in the Fermi 2 rate order.

Dividend Data

Dividends have been paid since 1909. A dividend reinvestment plan is available.

Summary

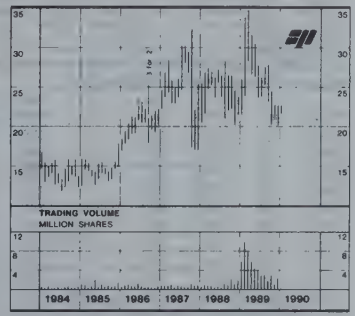
Dexter is an international producer of specialty chemical products and services and specialty materials and engineered plastics. It also has a 62% interest in Life Technologies, Inc., a large biotechnology company. In recent years DEX has completed a number of joint ventures and acquisitions, which have expanded its specialty materials and plastics, electronics, chemicals, coatings and biotechnology operations, while divesting several unprofitable businesses.

Current Outlook

Share earnings for 1990 are projected at about $1.90, up from the $1.74 expected for 1989.

The quarterly dividend was raised 10%, to $0.22 from $0.20, with the January, 1990 payment.

Profits in 1990 are expected to benefit from continued modest sales growth in key product lines, including nonwovens, coatings, water treatment chemicals, magnetic and electronic materials, plastisols, and biological and diagnostic products, and more favorable raw material costs. Slow automobile and construction markets will limit the gain. Earnings should also improve with better manufacturing efficiencies resulting from plant consolidations and expected lower new venture and product development costs.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	214.6	206.2	187.1	163.8
Jun.	221.5	213.9	201.6	165.1
Sep.	205.3	204.5	193.3	157.7
Dec.	---	202.7	200.8	163.5
	---	827.3	782.8	650.1

Sales for the first nine months of 1989 rose 2.7%, year to year, reflecting higher volumes and prices. In the absence of a onetime charge of 0.18 a share, net income advanced 10%, to $1.39 a share from $1.26, which excludes a loss from discontinued operations of $0.18 a share.

	E1 74	1.61	1.72	1.35

Important Developments

Dec. '89— DEX said that due to weak industry conditions, fourth quarter 1989 earnings were not expected to exceed the 1988 level. Principal market factors include the U.S. automobile industry, the worldwide electronics industry, and a general erosion of the industrial economy.

Oct. '89— Third-quarter 1989 earnings included a nonrecurring gain of $0.02 a share, while the 1988 quarter included a onetime charge of $0.18 a share. Total unit sales in the third quarter were unchanged from 1988 with price increases offset by lower currency exchange rates. Gross margins (excluding unusual items) were level with the prior and year-earlier quarters. Selling prices and raw material costs were stable, compared with the previous quarter. DEX said that losses associated with several business ventures would total about $0.20 a share in 1989. DEX believed that such costs were now peaking.

Next earnings report expected in mid-February.

Business Summary

Dexter produces specialty materials and chemicals and life science products. Contributions in 1988 by product group were:

	Sales	Profits
Materials & services	33%	53%
Coatings & encapsulants	32%	25%
Plastics & composites	19%	3%
Life Technologies	16%	19%

Operations outside North America accounted for 28% of sales and 37% of profits in 1988.

Specialty materials and services include nonwoven fabrics formulated from natural and synthetic fibers for tea bag paper, meat casings, filters and medical and industrial disposable garments and wraps; water treatment chemicals and equipment for energy conservation, corrosion and microbiological control; and magnetic components for electronic and computer uses.

Specialty coatings and encapsulants include liquid and powder coatings for the food and beverage packaging, automotive, aerospace, building and industrial markets, powdered encapsulants and coatings for electronics applications, and plastisols for the printing and sealants and coatings markets.

Specialty plastics and composites include engineered plastics, adhesives, sealants, mold release agents, fabricated parts, and carbon fibers and reinforced composite components for the aerospace, automotive, industrial, consumer, and medical markets.

Life Technologies (62%-owned) produces cell and molecular biology research products, culture media and diagnostic materials.

Dividend Data

Dividends have been paid since 1957. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

Diebold, Inc.

NYSE Symbol DBD Options on CBOE (Feb-May-Aug-Nov)

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Oct. 3'89	1989					
38¾	47¾-38¼	15	1.40	3.6%	A-	1.04

Summary

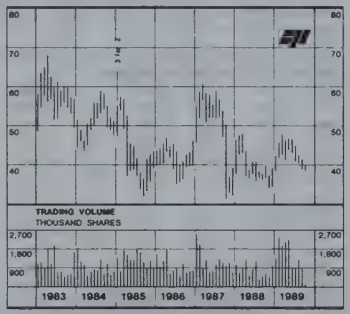
Diebold is a leading manufacturer of automated transaction systems, including automated teller machines and point-of-sale terminals, and security equipment. The company has expanded its presence in commercial markets and is also concentrating on enlarging its international business. Earnings are expected to improve slightly in 1989 in the absence of 1988 costs related to the consolidation of manufacturing, but sales will continue to be restricted by severe price competition.

Current Outlook

Earnings for 1989 are projected at $2.60 a share, up from the $2.38 reported for 1988. Earnings for 1990 could increase to $3.00 a share.

Dividends should continue at $0.35 quarterly.

Sluggish revenue growth is expected for the balance of 1989, as uncertain domestic demand and intense competition overseas continue to cloud the outlook. Orders for the 1989 first half were down 8.5% compared with the same 1988 period. Although the company is building up its service business, service revenue growth will continue to be restrained by severe competition from both third party vendors and in-house maintenance. Severe pricing pressure is expected to continue, but the consolidation of certain manufacturing and other cost containment efforts should have a positive effect on profitability. The company plans to maintain investment in new product development at current levels.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	114.4	106.8	104.0	104.6
Jun.	116.9	110.8	106.4	98.8
Sep.	---	115.8	109.3	100.4
Dec.	---	117.2	119.3	109.9
	---	450.6	439.1	413.7

Revenues for six months ended June 30, 1989 rose 6.3%, year to year. Gross margins narrowed slightly, but selling general and administrative expenses were held flat and research and development spending declined 9.0%. Pretax earnings were up 25%. After taxes at 31.4%, versus 32.8%, net income advanced 27%, to $1.25 a share from $0.98, which was before a $0.34 special credit.

Dec.	E0.70	0.70	0.91	0.76
		E2.60	2.38	2.72	2.66

Important Developments

Aug. '89— DBD settled a month-long strike of union employees at its Newark, Ohio manufacturing facility. Separately, in June DBD purchased certain assets of the Field Service division of the Payment Services division of Electronic Data Systems Corp. The acquisition included existing EDS hardware service contracts for automated teller machines, teller terminals and telecommunications devices as well as service parts inventories.

Next earnings report expected in mid-October.

Business Summary

Diebold manufactures a broad line of automated transaction systems and security systems sold primarily in the U.S. International sales contributed 9.8% of revenues in 1988.

The company's self service consumer transaction terminals include the Modular Delivery System (MDS) automated teller machines (ATMs). DBD believes it has the largest installed base of ATMs, with a 46% market share. MDS systems include through-the wall walk-up and drive-up systems, island drive-up systems, a compact cash dispenser, and a statement printer. Point-of-sale products include a credit authorization/draft capture terminal, automated fuel systems, a direct debit terminal, and a videotape dispensing machine.

Electronic security systems include IBM and Tandem host-based and a microprocessor-based monitoring systems. Other products include access control systems, video surveillance systems, film cameras, data line security, alarms, and intrusion detection systems.

Physical security products include a line of modular vault systems as well as vault doors, safe deposit boxes, security lockers, data safes, burglar- and fire-resistive safes, and bullet-resistive barriers.

Facility products feature a line of drive-up pneumatic banking sytems, enclosures for ATMs, a line of metal undercounter equipment for teller transactions and cash handling, modular counter-frontal systems, after-hours depositories, and drive-up windows.

DBD services its own and other manufacturers' equipment, offers disaster planning and recovery insurance, and supplies a line of accessories.

Dec. 1'89	1989					
85	122⅜-83½	11	None	None	B+	1.30

Summary

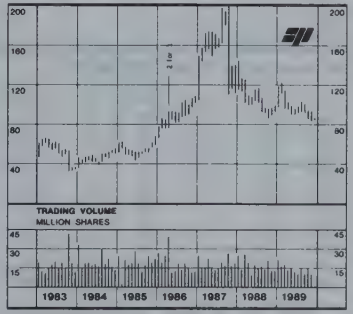
This company is the third largest U.S. manufacturer of data processing equipment, offering a broad range of networked computer systems and peripherals. Although DEC has recently enhanced its product line with new families of workstations, mid-range computers, and mainframes, revenue growth will continue to be adversely affected by the industrywide slowdown in the minicomputer market. Earnings are not expected to rebound until fiscal 1991, when volume shipments of DEC's new VAX mainframe are expected to begin.

Current Outlook

Earnings for the fiscal year ending June 30, 1990 are estimated at $7.20 a share, down from fiscal 1989's $8.45.

Initiation of cash dividends is not anticipated.

Revenue growth in fiscal 1990 is estimated at about 7.5%. Although DEC has recently enhanced its product line with the VAX 6000 mid-range family, VAX and RISC-based workstations, and the VAX 9000 mainframe, the industrywide slowdown in the domestic minicomputer market is expected to continue and international sales are vulnerable to changes in foreign exchange rates. Workstation demand is likely to remain very strong, but these products carry lower gross margins compared with the VAX minicomputers. Although sales of the new VAX 9000 mainframe line, which should be attractive to DEC's installed customer base, will provide a boost to margins, shipments are not expected to begin in volume until fiscal 1991. Until then, margins are likely to remain under pressure.



Operating Revenues (Billion $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Sep.	3.13	2.94	2.53	2.04
Dec.	---	3.18	2.78	2.27
Mar.	---	3.13	2.82	2.41
Jun.	---	3.49	3.34	2.67
	---	12.74	11.48	9.39

Revenues for the three months ended September 30, 1989 rose 6.4%, year to year; sales rose 5.2%, while service and other revenues advanced 8.7%. Margins were under pressure, reflecting sluggish U.S. business, lower high-end systems revenue, the negative impact of currency translation, and continued investments in R&D and marketing. Pretax earnings fell 35%. After taxes at 24.0%, versus 27.0%, net income was down 32%. Share earnings were $1.20 on fewer shares, versus $1.71.

Jun.	E2.54	2.51	3.08	2.85
	E7.20	8.45	9.90	8.53

Important Developments

Oct. '89— DEC announced the VAX 9000 systems, which offer mainframe power to the VAX architecture, at prices ranging from $1.24 million to $3.92 million. Model 210 systems with the VMS operating system will begin delivery in the second calendar quarter of 1990. Deliveries of the three Model 4XX systems with VMS will start in the third quarter. DEC's ULTRIX (UNIX) operating system will be available for the 9000 family in the last quarter of 1990.

Next earnings report expected in mid-January.

Data as orig. reptd. 1. Reflects accounting change. NM-Not Meaningful.

Business Summary

Digital Equipment is a leading manufacturer of computers and associated peripheral equipment, and related software and supplies. Revenues in recent fiscal years were derived as follows:

	1989	1988	1987	1986
Product sales	64%	66%	67%	67%
Service & other	36%	34%	33%	33%

International operations accounted for about 55% of revenues in fiscal 1989 and 71% of profits.

DEC's line of VAX systems ranges from the MicroVAX, a low-cost entry level system, to the largest six-processor VAX 6000 and recently introduced VAX 9000. The company's VAXcluster systems consist of a number of VAX computers linked together and sharing a common database that deliver mainframe power. Importantly, all the VAX systems use the same 32-bit architecture and same VMS operating system which makes all the computers fully compatible, thus allowing users to move from one system to another without modifying their software.

DEC makes peripheral devices such as magnetic tape transports, tape cassette and disk storage devices, displays, terminals, and printers.

DEC recently introduced a line of reduced instruction set computing (RISC)/UNIX-based workstations, systems and servers, thereby losing software portability with the VAX family. DEC is addressing the portability problem by developing a new umbrella architecture that will envelope VAX/VMS, RISC/UNIX, as well as other architectures.

Dividend Data

No cash dividends have ever been paid. A 2-for-1 stock split was distributed in May, 1986.

Finances

During 1989 DEC repurchased 8.25 million shares at a total cost of $815 million under a 10 million share repurchase program authorized in October, 1988.

In fiscal 1989 DEC spent $1.5 billion (12.0% of total revenues) on research and development, versus $1.3 billion (11.4%) the year before.

Capitalization

Long Term Debt: $136,161,000.

Dillard Department Stores

757F

NYSE Symbol DDS In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Oct. 26'89	1989					
66¼	74¼-41	18	0.20	0.3%	A+	1.16

Summary

This company operates some 168 conventional department stores located primarily in the Southwest and Midwest. In recent years Dillard has expanded aggressively through new store openings and acquisitions of clusters of department stores from leading retailers. Earnings should continue to rise in fiscal 1989-90, benefiting from acquisitions and improved apparel sales. A Dutch firm owns about 34% of the Class A shares, but members of the Dillard family hold almost all of the controlling Class B shares.

Current Outlook

Earnings for the fiscal year ending January 31, 1990 are projected at $4.15 a share, versus the $3.53 of 1988-9. Earnings should approximate $4.85 in fiscal 1990-1.

The quarterly dividend was raised 25%, to $0.05 from $0.04, with the November, 1989 payment.

Sales increases in fiscal 1989-90 should reflect acquired stores and improved consumer spending on apparel, stemming from more acceptable fashion trends. Gross margins should widen slightly on the increased volume, and expense ratios should benefit from the integration of acquired stores, but interest expense will be higher. Earnings per share will reflect more shares outstanding.

Net Sales[1] (Million $)

13 Weeks:	1989-90	1988-9	1987-8	1986-7
Apr.	598	517	417	370

Oct.	---	606	536	443
Jan.	---	882	778	629
	---	2,558	2,206	1,851

Sales for the 26 weeks ended July 29, 1989 rose 15%, year to year; comparable store sales advanced 7%. Gross margins widened slightly, and SG&A and advertising expenses were a constant percentage of sales; pretax income rose 21%. After taxes at 36.0%, versus 38.0%, net income gained 25%, to $1.17 a share from $0.95.

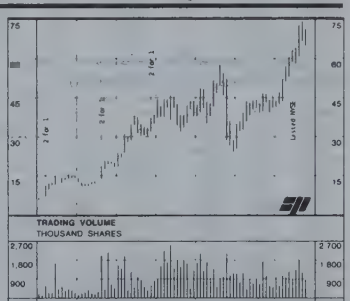
	E4.15	3.53	2.83	2.35



Important Developments

Oct. '89— DDS sold $50 million of 9½% debentures due October 15, 2001; this followed the September sale of $50 million of 9½% debentures due September 1, 2009. In August the company sold 2 million of its Class A shares in a public offering. In addition, Vendamerica B.V. sold 2 million shares, reducing its stake to about 33.6%. The company called a special meeting of shareholders on October 30 to consider a proposal to increase the number of Class A common shares authorized to 144,500,000 from 76,800,000. In May DDS completed the acquisition of D.H. Holmes Co., Ltd., for 870,902 Class A shares. D.H. Holmes operates 18 department stores, primarily in Louisiana, and two clearance centers.

Next earnings report expected in mid-November.

Business Summary

At the end of 1988-9 Dillard was operating 146 conventional department stores, ranging in size from 40,000 to 380,000 sq. ft. Most are located in suburban shopping centers in 13 states in the Southwest, Midwest and West with the heaviest concentrations in Texas, Oklahoma and Missouri.

Much of Dillard's growth has been through acquisition. The company's strategy is to enter or further penetrate markets where it can become the dominant conventional department store operator. In 1986, DDS acquired 12 Macy's units in Kansas and Missouri, two of which were sold, and in 1987 purchased the Joske's and Cain-Sloan divisions of Allied Stores for about $248 million. Of the 31 stores acquired, DDS is operating 17; the remainder were sold, closed or consolidated into existing operations. In February, 1988 DDS invested $30 million in a joint venture with The Edward J. DeBartolo Corp. to acquire The Higbee Co., with 12 department and specialty stores in Ohio.

The stores feature brand name goods, in the middle to upper-middle price range. Sales per square foot in 1988-9 amounted to $123, up from $119 the preceding year. Leased departments, which accounted for 7.6% of 1988-9 sales, include shoes and fine jewelry. Credit sales, excluding outside credit cards, accounted for 50.2% of 1988-9 sales.

Summary

The Dime Savings Bank of New York is the third largest thrift institution in New York State and one of the largest in the U.S., based on assets of $12.4 billion at September 30, 1989. DME operates 52 banking offices in New York as well as 11 loan production offices in New York and other Eastern seaboard states. Reflecting the slump in the Northeast real estate market, DME's nonperforming assets have been on the rise. Further loan losses are likely in 1990.

Current Outlook

Earnings for 1990 are estimated at $1.65 a share, up from the $0.70 anticipated for 1989.

Although not covered by earnings before special items in the June or September quarters, dividends should continue at $0.15 quarterly.

Loan originations in 1990 are expected to fall moderately, reflecting continued weakness in the Northeast housing market which is characterized by stable to declining home prices and a large overhang of properties for sale, as well as intense competition with fixed rate mortgages (which compete with DME's adjustable rate products). Spreads (1.61% for the September, 1989 quarter) could widen, based on lower projected interest rates through the first half. Credit quality has deteriorated significantly over the past year; underwriting standards have been tightened. Gains on loan sales are anticipated to increase. Cost control efforts, a top priority, have been successful thanks to geographic retrenchment, and additional gains are likely.

Review of Operations

Net interest income for the nine months ended September 30, 1989 fell 22%, year to year, reflecting tighter interest rate spreads. The provision for losses was 71% higher, at $15.1 million. Noninterest income declined 47%, mainly due to losses on asset sales of $682,000, versus gains of $22.6 million. Noninterest expenses were down 10%. Pretax income declined 70%. After taxes at 54.5%, against 49.5%, net income fell 73%. Share earnings were $0.46, against $1.72, before special credits of $0.31 and $1.14, respectively.

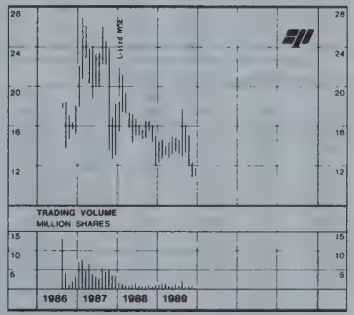
Dec.	E0.35	E0.24	0.28	0.68
	E1.65	E0.70	2.00	3.08



Important Developments

Nov. '89— At September 30, 1989 loans 60 days or more delinquent amounted to $512.3 million (4.83% of loans), up from $341.9 million (3.32%) at December 31, 1988. DME said it believes that the substantial increase is principally the result of a greatly increased volume of loan originations from 1986 through 1988, substantially all of which were under a limited documentation program (where the borrowers income is not verified). The adverse effect of the nonaccrual loans on the company's interest income for the first nine months of 1989 was about $30.5 million.

Oct '89— DME said that it had received approval from the FDIC to buy Starpointe Savings Bank for about $63 million in cash. Starpointe operates eight branches in central New Jersey and has assets of about $475 million.

Next earnings report expected in mid-February.

Business Summary

The Dime Savings Bank of New York, with assets of $12 billion at year-end 1988, is the third largest thrift in New York and one of the largest in the nation. It operates 54 branch offices in the New York metropolitan area, and separate loan production offices in New York and other states along the Eastern seaboard, including Connecticut, New Jersey and Florida.

At December 31, 1988 the loan portfolio (totaling $10.3 billion, up 8.0% from a year earlier) was divided: 73% home mortgage loans, 13% commercial real estate, 12% cooperative apartment loans, and 2% consumer and business loans. New loans originated in 1988 totaled $3.3 billion, down 36% from $5.2 billion in 1987. The one-year gap (excess of liabilities that would reprice before assets in one year as a percentage of assets) was -7% at 1988 year-end. Nonperforming assets amounted to 2.54% of assets at 1988 year-end, versus 1.65% a year earlier.

Of deposits of $8.7 billion at 1988 year-end, 6% were demand deposits, 10% regular savings, 15% variable rate savings and money market, 35% time deposits due within six months, 22% time deposits of between six months and a year, and 12% other.

The yield on interest-earning assets in 1988 was 9.57% (9.50% in 1987), and the cost of interest-bearing liabilities was 7.70% (7.59%), for a spread of 1.87% (1.91%).

DME sells a portion of the loans it originates, retaining the servicing rights, which are a source of fee income. At year-end 1988 it serviced $2.74 billion of loans for others.

Finances

During the second and third quarters of 1989 (as compared to recent prior periods), the company's loan originations declined significantly, as did its total commitments outstanding at September 30, 1989. Accordingly, management expects significantly reduced loan originations for the remainder of 1989 and at least through the first portion of 1989.

During periods of high interest rates, the company's net interest income is adversely affected by the drag of its residual portfolio of fixed-rate loans, bonds, and preferred stock. At December 31, 1988 DME still had $758 million of fixed-rate investment securities (exclusive of government securities held for liquidity), at an average rate of 6.84%, and $1.43 billion of fixed-rate residential property loans, at an average rate of 7.92%. By contrast, the average rate on the company's residential ARM portfolio was 9.42%, and this return is temporarily held down by about $4 billion of loans which have not reached the fully indexed rate.

Summary

This leader in theme parks and filmed entertainment has had remarkable earnings growth since an aggressive new management took control of the company in 1984. DIS has theme park interests in Florida, California and Japan, and is developing a Euro Disneyland park which is expected to open near Paris in 1992. Filmed entertainment operations include movies and TV shows, a pay-cable channel, and a Los Angeles TV station.

Current Outlook

Earnings for the fiscal year ending September 30, 1990 are estimated at $6.00 a share, up from fiscal 1989's $5.10.

A near-term increase in the dividend, currently at $0.12 quarterly, is expected.

Revenue growth in fiscal 1990 is expected to be aided by new attractions in DIS's theme park business. Foreign theatrical releases and sales to the home video and pay-TV markets of recent U.S. theatrical movies are likely to bolster filmed entertainment results. High visibility films released by DIS in the U.S. are expected to include "Dick Tracy." Also, the syndication of "The Golden Girls" TV show is expected to help DIS's earnings, starting in fiscal 1990.

Important Developments

Nov. '89— In fiscal 1989's fourth quarter, revenues and profit from DIS's theme park segment rose 25% and 44%, respectively, year to year. Filmed entertainment revenues and profit were up 49% and 198%, respectively, while DIS consumer products business had gains of 27% and 38%, respectively. In October, an approximately $956 million public stock offering was held in Europe of a 51% interest in Euro Disneyland SCA, which will be a major participant in a Disney theme park which is expected to open about 17 miles outside of Paris in 1992. The offering was priced in France at 72 francs per share, and as of mid-November, the shares had risen in value to 88 francs. DIS will manage the theme park, and has a 49% interest in Euro Disneyland SCA.

Business Summary

Walt Disney Co. (formerly Walt Disney Productions) is engaged in the ownership and operation of theme parks and related businesses, and is a major supplier of filmed entertainment. Business segment contributions in fiscal 1989:

	Revs.	Profits
Theme parks/resorts	56%	64%
Filmed entertainment	35%	21%
Consumer products	9%	15%

Theme parks/resorts includes Disneyland in Anaheim, Calif., and the Walt Disney World Complex near Orlando, Fla., which contains the Magic Kingdom and resort hotels, Walt Disney Village, Epcot (Environmental Prototype Community of Tomorrow) Center, and a new, major attraction called the Disney-MGM Studio Theme Park, which opened to the public in May 1989. Also, a Tokyo Disneyland has been open since April 1983. In fiscal 1988, DIS received about $700 million, representing the estimated present value of 20 years of expected royalties from the Tokyo operation. A new theme park in France, to be partly owned by DIS, is expected to open in 1992.

Filmed entertainment consists of the production and distribution of motion pictures (some of which are co-financed) to the theatrical, television, cable and home video markets. DIS also creates TV programming, owns a pay cable TV service called The Disney Channel, and acquired a Los Angeles television station in late 1988.

Dixons Group

NYSE Symbol DXN

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 14'89	1989					
5⅜	8½-5⅛	9	[1]0.2646	[1]4.9%	NR	NA

Summary

Dixons Group is the U. K.'s largest specialty retailer of consumer electronics and appliances. The company also has retailing interests in the U.S. In addition, Dixons derived 33% of its profits in fiscal 1988-9 from real estate operations. Profits for 1988-9 were down sharply, due primarily to much lower profits for retailing operations in the U.K. and in the U.S.

Business Summary

Dixons Group plc is engaged in the following businesses: retailing in the U.K. and the U.S (including financial services) and property (real estate). As of fiscal year-end 1988-9 Dixons Group was operating a total of 1,566 retail stores, consisting of 1,360 outlets in the U.K. (360 Dixons, 619 Currys, 347 Supasnaps, and 34 Mastercare) and 206 (all Silo) in the U.S. Business segment contributions (including interest income) in 1988-9:

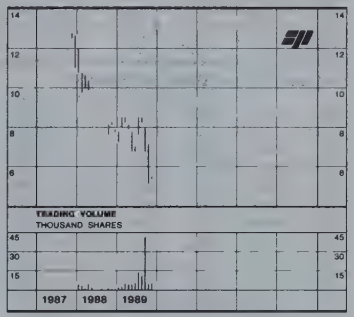
	Sales	Profits
Retail	95%	67%
Property	8%	33%

Sales and interest income by geographic area in fiscal 1988-9 were U.K. 70%, U.S. 28%, and Europe 3%.

Dixons, the largest specialty retailer of electronics and photographic products in the U.K., specializes in consumer electronic products, such as stereo equipment, microwave ovens, TVs, video cassette recorders (collectively brown goods), photographic equipment, and business products such as personal computers, fax machines and telephones. Currys, a leading retailer of domestic appliances in the U.K., sells washing machines, dishwashers and refrigerators, as well as brown goods. Supasnaps sells photographic products and develops film. Mastercare service centers provide after sales service for Dixons and Currys and others.

Silo (formerly Cyclops; acquired in 1987), a leading U.S. specialty electronics and appliance retail chain, has outlets located in Pennsylvania, the Midwest, the Rocky Mountain States, and the Pacific Northwest.

Financial services (part of the retail segment) consist primarily of re-insurance of extended warranty plans sold by Dixons and Currys.



The property segment includes real estate development throughout the U.K. (primarily retail and commercial sectors), as well as the management of real estate projects in Belgium and Germany. DXN also has a 92% interest in a developent site in Lisbon, Portugal.

Important Developments

Jul. '89— DXN said that during fiscal 1988-9 Currys superstores achieved worthwhile growth in sales per sq. ft. in comparable stores, and plans called for a significant expansion of selling space over the next few years. In addition, Dixons noted that its Silo chain had increased its number of stores in operation to 206 from 119 since it was acquired in 1987, and further substantial expansion was anticipated.

Next earnings report due in mid-January.

12 Mos. Apr.	2,966	2,865	1,856	1,433

Revenues (in British £) for the fiscal year ended April 29, 1989 rose 4.5%, year to year, primarily due to store expansion the U.S. which was partially offsett by lower comparable store sales in the U.K. Despite operating profit gains of 14% for retail financial services and 30% for real estate operations, earnings decreases of 49% for retail U.K (due primarily to lower comparable store sales) and 14% for retail U.S. (reduced gross margin and costs of expansion) led to a 24% decline in pretax income. Following taxes at 31.3%, against 31.9%, net income was down 23%, to £53.7 million (11.6 pence per ordinary share) from £70.0 million (16.4 pence). Earnings per ADS receded to $0.59 from $0.93, translated at the respective rates of £1=$1.69 and £1=$1.88.

Finances

In June, 1989 Dixons sold its film processing division through a management buy-out.

In November, 1988 Dixons sold Busy Beaver Building Centers (via a management buyout), a small chain of stores in the U.S. acquired with Silo. Also, in November Dixons acquired 92% of Sociedade Imobiliaria Sajorama, SA (Portugal).

In June, 1988 Dixons sold £93.5 million of 11% 7-year Eurobonds. In May, 1988 Dixons sold 9.3 million shares in Japan raising £16 million.

In February, 1988 Dixons acquired Wigfalls plc, a Sheffield-based brown and white goods retailer. In August, 1987 DXN acquired for $30.4 million Tipton Centers (a U.S. consumer electronics retailer) which was integrated into Silo.

Dividend Data

The company has paid a cash dividend on its ordinary shares since 1962, with an interim dividend normally paid in March and a final dividend paid around September. Payments on the ADS were initiated in 1988.

47	47 1/4-40 3/8	12	3.32	7.1%	A	0.36

Summary

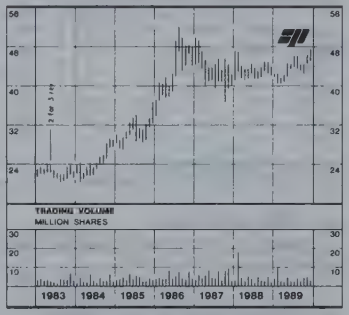
This Virginia-based utility holding company derives its power from coal and nuclear sources. D is adding capacity from cogenerators and independent power producers. Near-term prospects will be limited by rate proceedings associated with existing and new power sources. The longer-term outlook is favorable owing to the strong regional economy, the company's excellent cash flow, and its nonutility ventures. The quarterly dividend was raised 3.75% with the December, 1989 payment.

Current Outlook

Share earnings for 1990 are projected at $4.30, up from the $3.85 estimated for 1989.

The dividend was raised 3.75%, to $0.83 quarterly from $0.80, with the December, 1989 payment.

Share earnings for 1990 should benefit from higher electric sales, and a more profitable energy supply mix. Profits for 1989 were limited by higher operating costs and increased interest charges. Longer-term prospects are enhanced by strong cash flow.



Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	926	805	833	764
Jun.	851	767	746	685
Sep.	984	924	912	825
Dec.	---	864	761	798
	---	3,359	3,251	3,072

Revenues the nine months ended September 30, 1989 advanced 11%, year to year, owing to higher sales and increased rates. Following greater costs associated with outages at the company's nuclear facilities, and 15% higher net interest charges, net income fell 17%. Share earnings were $2.94 on 2.2% more shares, compared with $3.60.

	E3.85	4.52	4.54	4.10

Important Developments

Nov. '89— Share earnings for 1989's third quarter were primarily restricted by higher nuclear operating expenses and unusually mild weather. The company is seeking a base rate increase to cover costs related to its nuclear as well as its coal plants, in addition to new operating facilities. On May 1, 1989 D implemented a $95.0 million interim rate increase, subject to a ruling from the Virginia State Corporation Commission. The company has reported that a portion of the rate increase is being reserved. The rate order may be completed by year-end 1989.

Jun. '89— D announced an agreement to sell its Virginia Natural Gas unit to Consolidated Natural Gas Co. The transaction, valued at about $160.0 million, may be closed by year-end 1989.

Next earnings report expected in late January.

Data as orig. reptd

Business Summary

Dominion Resources is a utility holding company whose main subsidiary, Virginia Electric & Power Co., provides electric service (94% of revenues) primarily in Virginia and to a lesser extent in Northern Carolina. Virginia Natural Gas, Inc. provides gas service in Virginia (4%). Nonregulated businesses contributed about 2% of revenues. Electric revenues by customer class:

Revenues	1988	1987	1986	1985
Residential	42%	41%	42%	41%
Commercial	29%	28%	28%	28%
Industrial	12%	12%	12%	13%
Other	17%	19%	18%	18%

Sources of electric generation in 1988 were 45% coal, 34% nuclear, 5% oil and other, and 16% purchased. Peak demand in 1988 was 11,756 mw and capability totaled 13,468 mw for a capacity margin of 13%. In order to meet future load, the company will be developing conservation programs and life extension projects in addition to soliciting competitive bids from independent power producers. D will also be adding capacity to existing facilities. Gas sales in 1988 were 23,691 MMcf, down from 24,873 MMcf in 1987.

The company's Virginia and North Carolina service territory has one of the fast growing economies in the nation. The economy is characterized by government installations, high-technology centers and financial services businesses. The regional economy is further enhanced by the port facilities of the Hampton Roads region in Virginia.

Dividend Data

Domtar Inc.

NYSE Symbol DTC Options on Montreal (Feb-May-Aug-Nov)

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Jan. 3'90	1989-90					
11⅛	15⅜-11	[1]18	[2]0.50	[3]3.9%	B	1.37

Summary

This Canadian-based firm manufactures and markets pulp and paper products, packaging, chemicals, and construction materials; it is the largest manufacturer of fine papers in Canada, and the third largest producer of gypsum wallboard in North America. The company is disposing of its chemicals and energy businesses (about 10% of 1988 sales) to concentrate on its core activities. Sales and earnings are very sensitive to cyclical economic fluctuations.

Current Outlook

Earnings for 1990 are projected at C$0.40 a share, compared with the C$0.55 from continuing operations estimated for 1989.

The C$0.12½ quarterly dividend could be reduced in 1990.

Pulp and paper sales should remain strong in 1990 with the new Windsor mill at full production. Packaging revenues and earnings should decline due to weak pricing. Construction materials sales are expected to be down because of a sluggish homebuilding market. Profits will be hampered by increased interest expense associated with the new paper mill.

Sales (Million Can. $)

Quarter:	1990	1989	1988	1987
Mar.	---	---	673	604
Jun.	---	[5]1,246	646	657
Sep.	---	622	684	651
Dec.	---	---	700	656
	---	---	2,703	2,568

Sales from continuing operations for the nine months ended September 30, 1989 rose 2.8%, year to year, reflecting gains in fine papers and market pulp. Construction materials sales were down. Lower gypsum wallboard shipments and prices and higher interest expense led to a 39% decline in net income, to C$0.49 a share from C$0.86. Results exclude earnings from discontinued operations of $0.10 a share versus $0.06.

Important Developments

Nov. '89— Domtar signed an agreement to sell its Miranol subsidiary to Rhone-Poulenc. Miranol produces surfactants used in shampoo and other personal care products. Terms were not disclosed. Separately, Domtar sold another surfactant business in Ontario to Stepan Co.

Oct. '89— Domtar announced a restructuring aimed at improving effectiveness and financial performance that would eliminate approximately 500 salaried positions throughout the corporation.

Feb. '89— DTC announced its intention to divest its chemicals group and its oil and gas businesses. The two businesses accounted for slightly less than 10% of 1988 sales.

Next earnings report expected in late January.

Business Summary

Domtar is a Canadian-based manufacturer and marketer of pulp and paper products, packaging products, chemicals, and construction materials. Contributions by segment in 1988:

	Sales	Profits
Pulp and paper products	45%	56%
Packaging products	18%	34%
Construction materials	27%	3%
Chemicals	10%	7%

Principal products of the pulp and paper products group include fine papers, standard newsprint, groundwood specialty papers, and kraft pulp. DTC is the largest manufacturer of fine papers in Canada. DTC owns or has cutting rights on some 2.0 million hectares (5.0 million acres) of forested land principally in Quebec and Ontario.

The packaging group produces containerboard, corrugated containers and composite cans, and engages in paper recycling.

The chemicals group produces Sifto salt, chemically-treated wood products, and specialty chemicals (surfactants).

DTC's construction materials group is the third largest producer of gypsum wallboard in North America.

Dividend Data

Dividends have been paid since 1946. A dividend reinvestment plan is available.

Summary

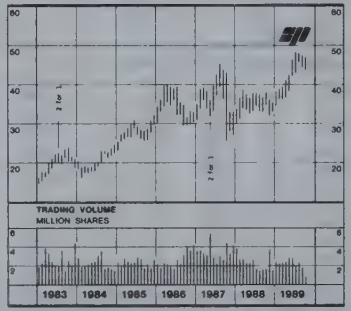
This company, the largest commercial printer in the U.S., produces catalogs, tabloids, directories, magazines, books and other printed material. Through Metromail Corp., DNY also provides listing services to the direct mail industry. Earnings from operations have grown steadily for more than a decade, and the company has made substantial investments in new plant and equipment in recent years. Long-term prospects are quite favorable.

Current Outlook

Earnings for 1990 are projected at $3.20 a share, versus the $2.90 estimated for 1989.

The $0.22 quarterly dividend, increased nearly 13% from $0.19½ in early 1989, is likely to be raised again in early 1990.

Revenues for 1990 should benefit from growth in market share and a continuing focus on faster growing areas of the business. Financial printing, a relatively small segment of DNY's business, is growing rapidly in spite of general malaise in that area, due to market share gains. Margins should benefit from operating efficiencies and the projected higher volume.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	708	638	511	492
Jun.	722	658	575	501
Sep.	---	702	625	561
Dec.	---	880	773	680
	---	2,878	2,483	2,234

Sales for the 1989 first half rose 10.3%, year to year, reflecting volume growth and an increase in the amount and price of paper furnished to customers. Operating earnings rose 8.0%. After higher other income, and taxes at 37.0% in each period, net income advanced 11%, to $1.17 a share from $1.05.

Important Developments

May '89— DNY continued with the expansion of its computer documentation services with the start up of a new production center in Thorp Arch, England. The facility supports U.S. and European hardware and software manufacturers, largely those based in Scotland's "Silicon Glen." DNY already has coast-to-coast operations in the U.S. and Ireland. DNY also began construction on a $30 million book manufacturing plant in Reynosa, Mexico, and is scheduled to start up in July, 1990.

Feb. '89— DNY acquired a 25% interest (with an option to acquire a majority position) in Tucson-based AlphaGraphics, a highly computerized operator of a worldwide network of retail units which provide quick printing services.

Next earnings report expected in mid-October.

Business Summary

R. R. Donnelley & Sons, also known as The Lakeside Press, is the largest commercial printer in the U.S. The sales breakdown in recent years:

	1988	1987	1986	1985
Catalogs	33%	34%	37%	40%
Magazines	21%	21%	22%	23%
Books	18%	18%	17%	18%
Directories	19%	20%	19%	15%
Other	9%	7%	5%	4%

DNY prints catalogs for customers ranging from major general mail order houses to merchandisers of specialty products or services. It also produces preprinted inserts. Magazine printing includes the production of over 250 different magazines. DNY is a leading book printer in virtually every category. In addition to telephone directories, DNY prints transportation guides, financial references, and directory needs of schools and industry.

Other services include printing of financial documents and corporate literature, computer and communications services related to graphic arts and design, and cartographic services.

DNY has an international satellite system that currently gives customers the ability to transmit data electronically between New York and London, and between Singapore and London. A controlling interest was acquired in Dowa Insatsu K.K., a Tokyo printing firm, in July 1988.

Dividend Data

Dividends have been paid since 1911. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

Amt. of Divd. $	Date Decl.	Ex-divd. Date	Stock of Record	Payment Date
0.19½	Oct. 28	Nov. 4	Nov. 11	Dec. 1'88
0.22	Jan. 26	Jan. 31	Feb. 6	Mar. 1'89

0.22	Jul. 27	Aug. 7	Aug. 11	Sep. 1'89

Next dividend meeting: Oct. 26'89.

Finances

Capital expenditures for the 1989 first half were $118.8 million. Capital spending for 1989 was budgeted at $250 million, versus $187.9 million spent in 1988. Included in 1989 spending are plans for a book manufacturing plant in Mexico and expansion of software services. In April, 1989 a documentation services production center started up near York, England, and in June another one opened in Portland, Ore.

Dover Corp.

NYSE Symbol DOV Options on ASE (Mar-Jun-Sep-Dec) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 28'89	1989					
32½	39½-27¼	14	0.72	2.2%	A-	1.17

Summary

Dover manufactures various machinery and equipment, such as elevators, electronic circuitry assembly equipment and control devices for the electronic, building, petroleum, aerospace and other industries. Share earnings for the first nine months of 1989 benefited from fewer shares outstanding. Forecasted higher sales coupled with likely improvement in margins and a decline in interest expense should permit a small earnings gain in 1990.

Current Outlook

Earnings for 1990 are projected at $2.45 a share, versus the $2.30 estimated for 1989.

The dividend was raised 5.9%, to $0.18 quarterly from $0.17, with the September, 1989 payment.

Sales are expected to rise at a less rapid rate in 1990 as a forecasted decline in the electronics products segment offsets continued gains in the other segments. An increase in the service component of the building division along with cost cutting in the electronics segment should lift margins. Aided by probable lower interest expense, earnings should post a small gain in 1990.

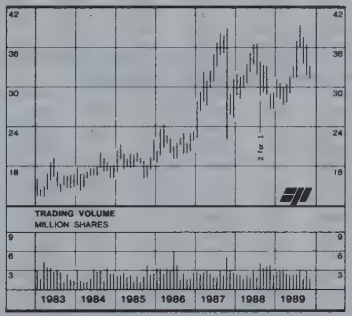
Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	515	467	366	355
Jun.	549	492	392	365
Sep.	515	494	394	346
Dec.	---	501	434	374
	---	1,954	1,586	1,440

Sales for the nine months ended September 30, 1989 rose 8.7%, year to year, reflecting gains in all segments. However, margin contraction in the electronics segment and flat margins in petroleum pared the gain in operating profit to 3.1%. Penalized by sharply higher interest expense, pretax income fell 0.7%. After taxes at 37.2%, versus 37.0%, net income declined 1.0%. Share earnings were $1.69 on 3.5% fewer shares, versus $1.65.

Common Share Earnings ($)

Quarter:	1989	1988	1987	1986
Mar.	0.50	0.57	0.35	0.27
Jun.	0.66	0.57	0.44	0.32
Sep.	0.53	0.51	0.40	0.29
Dec.	E0.61	0.57	0.47	0.34
	E2.30	2.22	1.66	1.21



Important Developments

Oct. '89— DOV reported third quarter earnings of $0.53 a share, versus $0.51 in 1988's third quarter. DOV noted that net income was virtually unchanged, year to year, and that share earnings were aided by share buybacks. Three of DOV's segments recorded profit gains in the quarter, but the increases were largely offset by a decline in the electronics products segment. DOV repurchased 275,000 shares of its common stock in the third quarter at an average price of $33.50 a share, raising total purchases in the past 12 months to 2,873,000 shares. DOV stated that although 1988's fourth quarter benefited from an unusually low tax rate and a onetime gain of $0.10 a share, it expected that share earnings for 1989's fourth quarter would probably exceed that of 1988 and permit another year of record earnings.

Next earnings report expected in late January.

Business Summary

Dover is a diversified manufacturer serving a wide range of customers in four principal markets. Segment contributions by markets in 1988:

	Sales	Profits
Electronic products	22%	19%
Building industry	37%	33%
Petroleum industry	12%	14%
Industrial & aerospace	29%	34%

Foreign business accounted for 16% of sales and 22% of operating profits in 1988.

The electronic products segment's largest unit is Universal Instruments, a producer of electronic circuitry assembly equipment. It also includes vapor-phase soldering and cleaning equipment, and microwave and R.F. filters.

The building division makes geared and gearless traction elevators, hydraulic elevators, and replacement parts, and provides installation and repair services.

The petroleum group makes equipment for producing oil wells and for the marketing of petroleum products. The former line includes sucker rods, pumps, valves and fittings, electronic controllers and hi-slip motors; the latter includes gasoline nozzles, pumps, and compressor parts.

The industrial and aerospace segment consists of 22 businesses, each dealing in a fairly small market niche. Approximately 80% of sales are to industrial concerns and 20% to the military/aerospace market.

Dividend Data

Dividends have been paid since 1955. A "poison pill" stock purchase right was adopted in 1987.

Oct. 27'89	1989					
93¾	107⅝–83¼	6	3.90	4.2%	B	1.15

Summary

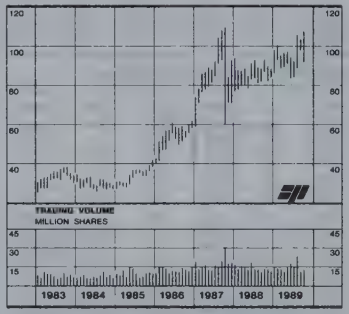
The second largest chemical company in the U.S., DOW produces basic chemicals and plastics, industrial specialties, and household, drug and agricultural products. More than half of sales and earnings generally come from foreign operations. Record earnings have been posted in recent periods, with strong demand and tight supply conditions in many product lines and geographic regions. Favorable business conditions are expected to continue for the foreseeable future. A 3-for-2 stock split is pending.

Current Outlook

Share earnings for 1990 are projected at about $12.50, down from the $14.65 expected for 1989, both before giving effect to the 3-for-2 stock split payable November 20, 1989.

The quarterly dividend was raised 22%, to $0.97½ from $0.80 (both unadjusted), with the September, 1989 declaration.

Earnings for 1990 are expected to be impacted by the decline in polyethylene and polystyrene resins prices experienced in 1989, slower economic growth, and the stronger U.S. dollar. Earnings will also be impacted by about $0.60 a share for goodwill and interest charges associated with the Marion acquisition. However, chemical and consumer specialties products should continue to advance, aided by product line and geographic extensions and recent acquisitions.



Net Sales (Billion $)

Quarter:	1989	1988	1987	[1]1986
Mar.	4.49	3.98	3.02	2.74
Jun.	4.60	4.25	3.41	2.84
Sep.	4.25	4.15	3.36	2.74
Dec.	---	4.30	3.60	2.79
	---	16.68	13.38	11.11

Sales for the nine months of 1989 rose 7.7%, year to year, reflecting price and volume increases. With strong profit gains in the U.S. and Europe and in chemicals and products, net income advanced 16%, to $11.41 a share from $9.38.

Dec.	E3.24	3.44	1.86	0.88
	E14.65	12.82	6.50	3.87

Important Developments

Oct. '89— DOW said that its solid performance in its seasonally low third quarter resulted from its product and geographic diversification. Plastics profits were impacted by lower polyethylene prices and demand from China, but demand for chemicals and products was strong and consumer profits improved. DOW said that industry fundamentals were sound entering the fourth quarter and that it was confident of record earnings in 1989.

Sep. '89— DOW completed the $2.2 billion tender offer for 39% of Marion Laboratories, Inc. (MKC) as part of a two-step transaction after which DOW will control about 67% of an expanded MKC. In the second step, MKC will issue 128 million new MKC shares to DOW for the Merrell Dow Pharamceuticals unit and 92 million contingent value rights. The new company, to be called Marion Merrell Dow Inc., will have annual sales of $2.3 billion.

Next earnings report expected in late January.

Business Summary

Dow Chemical is a major diversified chemical company. Contributions by product line in 1988:

	Sales	Profits
Chemicals & Performance products	31%	37%
Plastics	42%	45%
Hydrocarbons	9%	5%
Consumer specialties	18%	13%

Foreign operations accounted for 55% of sales and 58% of operating income in 1988.

Chemicals include inorganics (chlorine, caustic soda, chlorinated solvents, ethylene dichloride, vinyl chloride, magnesium metals) and organics (acetone, ethylene oxide/glycol, propylene oxide, phenols, and glycerine). Performance products consist of latexes, surfactants, antimocrobials, superabsorbents, cellulose ethers, ion exchange resins, heat transfer fluids, membranes systems, air separation systems, chelating agents, and plastic lined pipes.

Plastics include high-, low- and linear low-density polyethylene, Styron polystyrene resins, polyurethanes, ABS, epoxy resins, adhesives, elastomers, polyols, polycarbonates, and fabricated products (polystyrene and polyethylene foams and films).

Hydrocarbons include ethylene, propylene, benzene, and styrene.

Consumer specialties include agricultural products (herbicides, insecticides, and fumigants), pharmaceuticals (ethical drugs, antibiotics, antihistamines), and consumer products (Handi-Wrap and Saran Wrap plastic films, Ziploc bags, Spray'n Wash, Yes detergents, Fantastik and Glass Plus cleaners, and hair care products).

Dividend Data

Dow Jones & Co.

NYSE Symbol DJ Options on Phila (Mar-Jun-Sep-Dec) In S&P 500

Price	Range	P–E Ratio	Dividend	Yield	S&P Ranking	Beta
Oct. 11'89	1989					
37¼	40⅝–29¼	12	0.72	1.9%	A+	1.49

Summary

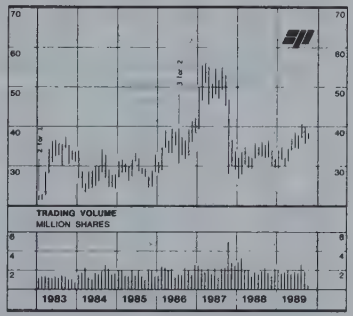
Dow Jones publishes The Wall Street Journal and Barron's, operates newswires and information retrieval services, publishes 23 local newspapers, and publishes media news reports. DJ is seeking to purchase the 33% it does not already own of Telerate Inc., a major provider of computerized financial information. Profitability is being restricted by continuing softness in financial markets, and its impact on demand for DJ's products and services.

Current Outlook

Earnings for 1990 are projected at $1.60 a share, versus the $3.15 estimated for 1989, which includes capital gains of $1.63.

An increase in the $0.18 quarterly dividend is not likely until late in 1990, or early in 1991.

Revenues for 1990 will continue to be impacted largely by softness in advertising demand and circulation at The Wall Street Journal and Barron's and weakness in financial markets. Advertising and circulation rate hikes, and lower newsprint prices will help to limit the impact of reduced linage on operating profits. Revenue and profit gains from information services, including Telerate, will continue to reflect depressed conditions for certain major customers and start-up costs.



Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	407	393	286	260
Jun.	438	414	313	285
Sep.	404	384	299	278
Dec.	---	413	417	312
	---	1,603	1,314	1,135

Revenues for the nine months ended September 30, 1989 rose 4.9%, year to year. Profitability was penalized by reduced advertising linage and start-up costs at Telerate, but including after-tax capital gains of $1.63 and $0.71 a share, respectively, net income advanced 50%, and share earnings rose 43%, to $2.75 from $1.92.

Dec.	E0.39	0.43	0.52	0.48
	E3.15	2.35	2.10	1.89

Important Developments

Oct. '89— Telerate that said a committee of independent directors rejected as inadequate an $18 a share, or $576 million, tender offer from DJ for the 33% of Telerate it does not already own. DJ, which commenced its tender offer in September, said in response that it believed the offer was fair and would proceed with the current offer. The offer was due to expire November 3, unless extended.

Jul. '89— Telerate began billing for its new Trading Service which had installations at 235 sites. The service, which had been in development for more than one year, allows foreign exchange traders to execute multiple trades and exchange information simultaneously.

Jan. '89— DJ sold its 16.5% stake in Continental Cablevision for $299.8 million. The shares were purchased in 1981 for about $27.5 million.

Next earnings report expected in mid-January.

Business Summary

Dow Jones & Co. publishes The Wall Street Journal and Barron's National Business and Financial Weekly, provides information services, and publishes general circulation newspapers. The book publishing unit was sold in February, 1988, and a 16.5% interest in Continental Cablevision was sold in January, 1989. Segment contributions in 1988:

	Revs.	Profits
Business publications	47%	30%
Information services	38%	58%
Community newspapers	15%	12%

The Wall Street Journal, a financial and business daily (December 31, 1988 circulation of about 1,950,000) is published in four U.S. editions and separate editions of The Asian Wall Street Journal and The Wall Street Journal/Europe. Barron's (circulation about 246,500) is a weekly magazine covering business and finance. Information services include newswires, radio and TV programming, a news retrieval service (which offers 49 separate data bases), and database software. A 67% interest is held in Telerate, a major supplier of computerized financial information.

Ottaway Newspapers publishes 23 community newspapers with combined average circulation of 567,400 daily and 458,700 Sunday at year-end 1988. DJ also has equity or other interests in international business and financial wire services, newspapers, publications and newsprint mills.

Dividend Data

Dividends have been paid since 1906. A dividend reinvestment plan is available.

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Jan. 3'90	1989-90					
44⅞	48-29	19	1.00	2.2%	B	1.20

Summary

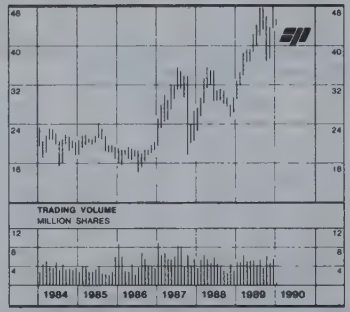
Dresser is a major supplier of products and services for industries involved in petroleum and natural gas exploration and development, energy processing and power systems, and mining and construction activities. The company's ongoing restructuring program has resulted in divestitures of units outside DI's core energy businesses and expansion into complementary markets via joint ventures and niche acquisitions. A turnaround in oil and gas drilling should enhance near-term prospects.

Current Outlook

Share earnings for the fiscal year ending October 31, 1990 are projected at $3.10, up from fiscal 1989's $2.42, which excludes $0.10 tax loss carryforward credits.

The $0.25 quarterly dividend is the minimum expectation.

Revenues in fiscal 1990 should benefit from continued gains in the energy processing segment (downstream). Margins are expected to firm in the oilfield (upstream) business.



Sales & Service Revs. (Million $)

Quarter:	1988-9	1987-8	1986-7	1985-6
Jan.	848	801	717	924
Apr.	1,017	1,068	787	951
Jul.	1,004	1,100	750	889
Oct	1,092	973	866	897
	3,961	3,942	3,120	3,661

Revenues for the fiscal year ended October 31, 1989 (preliminary) rose 0.5%, year to year, as gains in the downstream segment offset lower industrial revenues resulting from the divestiture of the construction equipment operations to the Komatsu Dresser joint venture. Benefiting from joint ventures, net income increased about 33%. Share earnings were $2.42 (before a $0.10 special tax credit), versus $1.78 (before earnings of $0.49 from discontinued operations and tax credits).

	2.42	1.78	0.22	0.01

Important Developments

Dec. '89— DI announced that its November agreement to acquire Smith International, a leading manufacturer of directional drilling equipment, had been terminated. DI was exploring possible alternate transactions regarding SII. Separately, DI's upstream segment continued to be impaired by soft market conditions in the oilfield business. The U.S. Baker-Hughes rig count averaged 1,041 in Novmeber, up from 1989's year-to-date average of 849, but the 1989 year-to-date average was down from 1988's year-to-date average of 937. Profitability in the downstream (processing) segment continued to sustain the company in fiscal 1989. Demand for downstream products and services has strengthened due to expansion and modernization of energy processing facilities throughout the world. The segment's backlogs are at record levels.

Next earnings report expected in mid-March.

Business Summary

Dresser Industries is a diversified manufacturer of products for the energy and natural resource industries. Industry segment contributions (operating profits in million $) in fiscal 1988:

	Revs.	Profits
Oilfield operations	14%	$41.9
Energy processing	32%	110.3
Mining & constr. equip.	22%	13.4
Engineering services	19%	18.6
General industry	13%	80.1

Sales outside the U. S. accounted for some 43% of fiscal 1988 revenues.

The upstream (oilfield) segment provides a broad range of products and technical services for oil and gas well drilling, production, and marketing. Principal products and services include drilling fluid systems, oil field products (bits and tools), and gasoline dispensing systems.

The downstream (processing) segment makes high technology compressors and pumps, steam turbines, mechanical power systems, and environmental control systems, primarily for oil and gas production, the conversion of oil, gas, and coal into other energy forms, and gas transmission. Engineering services consist mainly of the M.W. Kellogg Co., a major energy industry design and construction concern, acquired in January, 1988.

The industrial products segment makes walking draglines, mining machines, crawler tractors, trucks, and tools. DI also manufactures refractory products and pneumatic tools. On September 1, 1988 DI formed a 50% owned joint venture with Komatsu Ltd. to make construction equipment.

Dividend Data

Dividends have been paid since 1948. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.
